Equality of Opportunity

Bryn Mawr College is firmly committed to a policy of equal opportunity for all members of its faculty, staff and student body. Bryn Mawr College does not discriminate on the basis of race, color, religion, national or ethnic origin, sexual orientation, age or disability in the administration of its educational policies, scholarship and loan programs, and athletic and other College-administered programs, or in its employment practices.

In conformity with the Civil Rights Act of 1964, as amended, and Title IX of the Education Amendments of 1972, it is also the policy of Bryn Mawr College not to discriminate on the basis of sex in its employment practices, educational programs or activities. The admission of only women in the Undergraduate College is in conformity with a provision of the Civil Rights Act. The provisions of Title IX protect students and employees from all forms of illegal sex discrimination, which includes sexual harassment and sexual violence, in College programs and activities.

Inquiries regarding compliance with this legislation and other policies regarding nondiscrimination may be directed to the Equal Opportunity Officer (eoo@brynmawr.edu or 610-526-7360) and Title IX Coordinator (titleix_coordinator@brynmawr.edu or 610-526-7360), who administer the College’s procedures.

## ACADEMIC CALENDARS

### 2017 First Semester
- **September 4**: Labor Day (no classes)
- **September 5**: Classes begin
- **October 13**: Fall break begins after last class
- **October 22**: Fall break ends at 8 a.m.
- **November 22**: Thanksgiving break begins after last class
- **November 26**: Thanksgiving break ends
- **December 14**: Last day of classes
- **December 15–16**: Review period
- **December 17–22**: Examination period

### 2018 First Semester
- **September 3**: Labor Day (no classes)
- **September 4**: Classes begin
- **October 12**: Fall break begins after last class
- **October 21**: Fall break ends at 8 a.m.
- **November 21**: Thanksgiving break begins after last class
- **November 25**: Thanksgiving break ends
- **December 13**: Last day of classes
- **December 14–15**: Review period
- **December 16–21**: Examination period

### 2018 Second Semester
- **January 22**: Classes begin
- **March 9**: Spring break begins after last class
- **March 18**: Spring break ends
- **May 4**: Last day of classes
- **May 5–6**: Review period
- **May 7–18**: Examination period
- **May 19**: Commencement

### 2019 Second Semester
- **January 21**: Martin Luther King, Jr. Day (no classes)
- **January 22**: Classes begin
- **March 8**: Spring break begins after last class
- **March 17**: Spring break ends
- **May 3**: Last day of classes
- **May 4–5**: Review period
- **May 6–17**: Examination period
- **May 18**: Commencement

ABOUT BRYN MAWR COLLEGE

The Mission of Bryn Mawr College

The mission of Bryn Mawr College is to provide a rigorous education and to encourage the pursuit of knowledge as preparation for life and work. Bryn Mawr teaches and values critical, creative and independent habits of thought and expression in an undergraduate liberal-arts curriculum for women and in coeducational graduate programs in the arts and sciences and in social work and social research. Bryn Mawr seeks to sustain a community diverse in nature and democratic in practice, for we believe that only through considering many perspectives do we gain a deeper understanding of each other and the world.

Since its founding in 1885, the College has maintained its character as a small residential community that fosters close working relationships between faculty and students. The faculty of teacher/scholars emphasizes learning through conversation and collaboration, primary reading, original research and experimentation. Our cooperative relationship with Haverford College enlarges the academic opportunities for students and their social community. Our active ties to Swarthmore College and the University of Pennsylvania as well as the proximity of the city of Philadelphia further extend the opportunities available at Bryn Mawr.

Living and working together in a community based on mutual respect, personal integrity and the standards of a social and academic Honor Code, each generation of students experiments with creating and sustaining a self-governing society within the College. The academic and co-curricular experiences fostered by Bryn Mawr, both on campus and in the College’s wider setting, encourage students to be responsible citizens who provide service and leadership for an increasingly interdependent world.
A Brief History of Bryn Mawr College

When Bryn Mawr College opened its doors in 1885, it offered women a more ambitious academic program than any previously available to them in the United States. Other women's colleges existed, but Bryn Mawr was the first to offer graduate education through the PhD—a signal of its founders’ refusal to accept the limitations imposed on women's intellectual achievement at other institutions.

A Quaker Legacy

The founding of Bryn Mawr carried out the will of Joseph W. Taylor, a physician who wanted to establish a college “for the advanced education of females.” Taylor originally envisioned an institution that would inculcate in its students the beliefs of the Society of Friends (popularly known as Quakers), but by 1893 his trustees had broadened the College’s mission by deciding that Bryn Mawr would be non-denominational. Bryn Mawr’s first administrators believed that excellence in scholarship was more important than religious faith in appointing the faculty, although the College remained committed to Quaker values such as freedom of conscience.

The College’s mission was to offer women rigorous intellectual training and the chance to do to original research, a European-style program that was then available only at a few elite institutions for men. That was a formidable challenge, especially in light of the resistance of society at large, at the end of the 19th century, to the notion that women could be the intellectual peers of men.

Academic Excellence for Women

At its inception, the College was adopted as a life’s work by a woman of immense tenacity, M. Carey Thomas. Thomas, Bryn Mawr’s first dean and second president, had been so intent upon undertaking advanced study that when American universities denied her the opportunity to enter a Ph.D. program on an equal footing with male students, she went to Europe to pursue her degree.

When Thomas learned of the plans to establish a college for women just outside Philadelphia, she brought to the project the same determination she had applied to her own quest for higher education. Thomas’ ambition was the engine that drove Bryn Mawr to achievement—though it is important to understand that while M. Carey Thomas was an ardent proponent of higher education for women, she sought this privilege for wealthy white women only.

The College established undergraduate and graduate programs that were widely viewed as models of academic excellence in both the humanities and the sciences, programs that elevated standards for higher education nationwide. Under Thomas and James E. Rhoads, who served the College as president from 1885 to 1894, Bryn Mawr emerged as a leader in higher education. The College was, for example, the first institution in the United States to offer fellowships for graduate study to women; its self-government association, the first in the country at its founding in 1892, was unique in the United States in granting to students the right not only to enforce but to make all of the rules governing their conduct; and its faculty, alumnae, and students made discoveries that expanded human knowledge.

A Commitment to Engaging the World

In 1912, the bequest of an alumna founded the Graduate Department of Social Economy and Social Research, which made Bryn Mawr the first institution in the country to offer a Ph.D. in social work. The department became the Graduate School of Social Work and Social Research in 1970. In 1921, Bryn Mawr intensified its engagement with the world by opening its Summer School for Women Workers in Industry, which offered scholarships for broad-based programs in political economy, science, and literature to factory workers until 1938.

During the presidency of Marion Edwards Park, from 1922 to 1942, the College began to work toward cooperative programs with nearby institutions—Haverford College, Swarthmore College, and the University of Pennsylvania—that would later greatly expand the academic and social range of Bryn Mawr students. In 1931, the Graduate School of Arts and Sciences began to accept male students. During the decades of the Nazi rise to power in Europe and World War II, Bryn Mawr became home to many distinguished European scholars who were refugees from Nazi persecution.

Respect for the Individual

From 1942 to 1970 Katharine Elizabeth McBride presided over the College in a time of change and growth. During McBride’s tenure, the College twice faced challenges to its Quaker heritage of free inquiry and freedom of conscience. During the McCarthy era, Congress required students applying for loans to sign a loyalty oath to the United States and an affidavit regarding membership in the Communist party. Later, at the height of student protest against the Vietnam War, institutions of higher education were required to report student protesters as a condition of eligibility for government scholarship support.

On both occasions, Bryn Mawr was a leader among colleges and universities in protecting its students’ rights. It was the first college to decline aid under the McCarthy-era legislation and the only institution in Pennsylvania to decline aid rather than take on the role of informer during the Vietnam War. Bryn Mawr faculty and alumnae raised funds to replace much of the lost aid, and a court eventually found the Vietnam-era law unconstitutional and ordered restitution of the scholarship funds.

Opening Doors

During the 1960s, Bryn Mawr strengthened its ties to Haverford, Swarthmore and Penn when it instituted mutual cross-registration for all undergraduate courses. In 1969, it augmented its special relationship with Haverford by establishing a residential exchange program that opened certain dormitories at each college to students of the other institution.
During the presidency of Harris L. Wofford, from 1970 to 1978, Bryn Mawr intensified its already-strong commitment to international scholarship. Wofford worked hard to involve alumnae overseas in recruiting students and raising money for their support and for the support of Bryn Mawr’s extensive overseas programs. Wofford, who later became a U.S. senator, also initiated closer oversight of the College’s financial investments and their ramifications in the world.

Mary Patterson McPherson led the College from 1978 to 1997, a period of tremendous growth in the number and diversity of students—approximately 1,300 undergraduates, nearly a quarter of whom were women of color. During McPherson’s tenure, Bryn Mawr undertook a thorough re-examination of the women-only status of its undergraduate college and concluded that providing the benefits of single-sex education for women—in cultivating leadership, self-confidence and academic excellence—remained essential to the College’s mission.

When McPherson stepped down from the presidency, she had led two successful capital campaigns, balanced the budget, instituted a program of long term planning, and overseen the creation of two new libraries. At the time of McPherson’s retirement, Hanna Holborn Gray ’50, then chairman of the board of trustees, remarked, “Pat’s unwavering dedication to rigorous standards of intelligent thinking and constructive debate, combined with her humor and zestful delight in the variety and range of the human comedy, have communicated to all of us both her seriousness and her joy in enabling and enhancing the qualities that lie at the heart of our college.”

**Strengthening the Institution**

Nancy J. Vickers, Bryn Mawr’s president from 1997 to 2008, began her tenure by leading the College community to a clear understanding of its priorities and the challenges it would face in the next century through the adoption of the Plan for a New Century. When she retired in June 2008, she left the College with a 40 percent increase in undergraduate applications, a completed fund-raising campaign that tripled the goal of the previous campaign and an endowment that had nearly doubled since she took office.

Beyond attaining a sound financial footing for the College, Vickers oversaw dramatic changes in the academic program, in outreach and in infrastructure, while remaining true to the College’s historic mission. Those changes include refining undergraduate recruiting messages and practices, initiating new interdisciplinary programs and faculty positions, improving student life, embracing cross-cultural communication, upgrading the campus’ use of technology, renovating many buildings, and achieving worldwide visibility through the Katharine Houghton Hepburn Medal.

Under Jane McAuliffe’s leadership, 2008 to 2013, the College committed itself anew to liberal arts for the twenty-first century. It initiated the innovative 360° Program, through which students investigate an issue or theme from multiple disciplinary perspectives, and became a national leader among liberal arts colleges in combining the strengths of online and classroom teaching—blended learning—in its liberal arts curriculum. McAuliffe spearheaded strategic partnerships with several universities and colleges across the globe. Addressing global needs in science, technology, engineering, and math (STEM), Bryn Mawr continued to be a leader in preparing students for careers in these fields and recruited its first STEM Posse cohort of students.

**Excellence in Action**

Kimberly Wright Cassidy, president since 2014, articulates and pursues the College’s commitment to academic excellence that leads to meaningful engagement with the world.

During her nearly seven-year tenure as Provost and Interim President, Cassidy collaborated with Bryn Mawr’s faculty to make Bryn Mawr a leading innovator in liberal arts education. She led the development of the College’s interdisciplinary 360° courses, the introduction of new academic programs (including new majors in International Studies, Biochemistry and Molecular Biology, and a minor with Haverford College in Environmental Studies), and the advancement of digital initiatives within the classroom. She is committed to the value of the scholar/teacher model and its premise that the most exciting and powerful teaching is done by faculty who are actively creating new knowledge.

In Fall 2016, Cassidy and Haverford College President Kim Benston reaffirmed the two colleges’ decades’ long collaborative relationship with a formal Memorandum of Understanding. Cassidy has also worked to strengthen ties with the University of Pennsylvania and Swarthmore and played a key role in establishing Bryn Mawr’s 4+1 and 3+2 dual-degree opportunities for students, such as an A.B./M.A. program with University of Pennsylvania’s School of Engineering and Applied Science.

As president, Cassidy has been a public champion of women in STEM and has represented the College at a White House summit on STEM as well as a summit on college access, a value to which Bryn Mawr has long been committed. On campus, she is leading the effort to apply lessons learned from using blended learning in STEM subjects to the humanities. She also has launched the Leadership, Innovation, and the Liberal Arts Center (LILAC), which works with students to help them build pathways from their liberal arts education to their professional goals through career and professional development, experiential learning opportunities, and civic engagement. In addition, Cassidy has hosted three campus-wide gatherings to engage all campus constituents in dialogue about difference with respect to race and class, and is focused on creating a new ethos around joy and wellness, including the design and construction of a new student facility.

Today, Bryn Mawr College continues and expands its
traditions of academic excellence, opportunity for women, respect for the individual, and purposeful action in the world.

Geographical Distribution of Students

2016–17 Undergraduate Degree Candidates

The 1,361 full time undergraduate students came from 45 states, the District of Columbia, Puerto Rico, Guam, the Virgin Islands, and the Armed Forces Europe and 60 foreign nations, distributed as follows:

United States Residents (includes non-US citizens; percentages are of residents, not of entire undergraduate student body)

LIBRARIES AND EDUCATIONAL RESOURCES

Libraries

The Mariam Coffin Canaday Library is the center of Bryn Mawr’s library system. Opened in 1970, it houses the College’s holdings in the humanities and the social sciences. The award-winning Rhys Carpenter Library, opened in 1997, is located in the M. Carey Thomas Library building and houses the collections in Classical and Near Eastern Archaeology, Classics, History of Art, and Growth and Structure of Cities. The Lois and Reginald Collier Science Library was dedicated in 1993 and brings together the collections for Mathematics and the sciences. The library collections of Haverford and Swarthmore Colleges, which complement and augment those of Bryn Mawr, are freely accessible to students.

Tripod (http://tripod.brynmawr.edu), the library catalog, provides information about the more than three million books, journals, videos, sound recordings, and other materials in the Bryn Mawr, Haverford, and Swarthmore College collections. A large percentage of the Tri-College holdings are accessible online. Bryn Mawr students may use the Haverford and Swarthmore libraries and may also have material transferred from either of the other two campuses for pickup or use at Bryn Mawr, usually in less than 24 hours. Through the Library’s home page (www.brynmawr.edu/library), students may connect to Tripod; explore more than 200 subject-specific research databases; and tap into other library services and resources such as reference services, research consultation, reserve readings, interlibrary loan, etc.

Bryn Mawr maintains extensive relationships with other major academic libraries both in the region and worldwide. Through the consortial EZ-Borrow system, students can borrow materials from more than 30 academic libraries in the mid-Atlantic region. Students may also request items from libraries across North America through interlibrary loan.

Additional information about Bryn Mawr’s libraries and services may be accessed at www.brynmawr.edu/library.

Special Collections

The Special Collections Department, based in Canaday Library, houses extensive holdings of art, artifacts, archival materials, rare books, and manuscripts. Objects held in all of these collections are available to students for individual research and are also frequently used as teaching tools in the classroom and incorporated into exhibitions in libraries and other spaces across the campus.

Bryn Mawr has developed an extraordinarily rich Rare Books and Manuscripts collection to support the research interests of students and faculty. The collection of late medieval and Renaissance texts includes one of the country’s largest groups of books printed in the 15th century, as well as manuscript volumes and 16th-century printed books. Other important focuses of the collection are travel and exploration, women writers and women’s lives, the history of archaeology and museums, European and African cities, and important literature in early editions. Complementary to the rare books are collections of original letters, diaries and other unpublished documents. Bryn Mawr has important collections from the late 19th and 20th centuries, including papers and photographs relating to the women’s rights movement; the experiences of women,
primarily Bryn Mawr graduates, travelling and working overseas; the papers of playwrights, writers, and scholars; and extensive collections of the letters, diaries, and scholarly works of Bryn Mawr faculty and alumnae.

The College Archives contains the historical records of Bryn Mawr, including the papers of the Presidents, and an extensive photographic collection that documents the social, intellectual, administrative, and personal aspects of campus activities and student life.

The Art and Artifacts collection includes objects of interest to students of anthropology, archaeology, the fine and decorative arts, geology, and related inter- and multi-disciplinary courses of study. The Anthropology collections include objects from around the world, with the largest portion of these collections originating from North America, South America and Africa. These collections comprise numerous categories of objects: African and Oceanic works, Southwest pottery and Native American ritual, functional, and decorative objects, and Pre-Columbian ceramics and textiles from present-day Peru, among many others.

The Archaeology collections include an extensive group of Greek and Roman objects, especially vases, pre-classical antiquities, and objects from Egypt and the ancient Near East, many of which represent the interests of Bryn Mawr faculty from the beginnings of the college to the present day.

The Fine Art collections include important holdings of prints, drawings, photographs, paintings and sculpture. The painting collection of approximately 250 works is primarily composed of 19th- and 20th-century American and European works; a highlight is John Singer Sargent’s 1899 portrait of Bryn Mawr President M. Carey Thomas. The print collection illustrates the history of Western printmaking from the 15th through the mid-20th centuries and includes Old Master prints, art prints, and examples of 19th-century book illustrations. The collection also includes Japanese ukiyo-e woodblock prints, works in a wide range of media by contemporary women artists, Chinese paintings and calligraphy, and early, modern, and contemporary photography.

Special Research Resources

The Rhys Carpenter Library houses the new Digital Media and Collaboration Lab, which provides technologically enabled spaces for collaborative work and individual work stations with scanners. Assistance is available for video and image editing. Carpenter staff also work with faculty, staff, and students on building digital collections, publishing digital scholarship, and facilitating the use of digital tools.

Information Technology

Students have access to a high-speed wireless Internet connection in all residence halls, libraries (which contain public computers), and classrooms throughout the campus. Online course materials, registration, e-mail, shared software and Tripod, the library catalog shared by Bryn Mawr, Haverford and Swarthmore Colleges are accessible from a Web browser—many of these are available from off-campus as well. Each new Bryn Mawr student receives their own e-mail and Network file storage accounts upon matriculation (typically late spring).

Professional staff are available to students, faculty and staff for consultation and assistance with their technology needs.

The Help Desk is located on the main floor of Canaday Library and is available for walk-up help, email and telephone assistance. Public computing labs may be found in the following buildings.

- Canaday (1st Floor and A Floor)
- Carpenter (B floor)
- Collier (Park Science Center)
- Graduate School of Social Work and Social Research

Laboratories

Laboratory work is emphasized at all levels of the curriculum and the natural science departments have excellent teaching and research facilities that provide students with the opportunity to conduct cutting-edge research using modern equipment. Laboratories and classrooms are equipped with extensive computer resources for data analysis and instruction, including state-of-the-art video-projection systems and computer workstations.

Teaching and research in biology, chemistry, computer science, geology, mathematics, and physics is carried out in the Marion Edwards Park Science Center, which also houses the Lois and Reginald Collier Science Library. Teaching and research in psychology is conducted in Bettws-y-Coed.

See below for more detailed descriptions of the labs in each department, as well as a description of the instrument shop, where custom-designed equipment for special research projects can be fabricated by two expert instrument makers.

Biology

The Department of Biology houses a wide variety of instrumentation appropriate for the investigation of living systems at the levels of cells, organisms and populations. This equipment is used in both our teaching and research laboratories, providing our students with the opportunity to utilize modern research methodologies for their explorations. There is an extensive collection of microscopes that can be used for dissection, histology, microinjection and subcellular structural analyses, including dissection microscopes, an inverted microscope, and light microscopes equipped with fluorescent and DIC optics as well as advanced digital capture and image analysis software. To conduct molecular analyses of DNA and proteins, we have both
end-point and real-time thermal cyclers, centrifuges, electrophoresis equipment, a plate reader for ELISA assays, traditional and Nanodrop spectrophotometers and a DNA sequencer. The department houses sterile tissue culture facilities that are used for cell culture experiments. There is a wide assortment of physiology equipment that is used to measure intracellular and extracellular muscle and nerve activity, including voltage clamp amplifiers. Infrared and greenhouse gas analyzers and a dedicated stable isotope facility are used to evaluate plant and ecosystem metabolism in solid and gas samples. A greenhouse is available for plant biology and ecology research, and an on-campus pond serves as a research field site for the analysis of micro- and macro-organism diversity and water quality parameters.

**Chemistry**

The Department of Chemistry houses many spacious well equipped laboratories with specialized instrumentation and equipment for teaching and research. These include a 400 MHz high-resolution nuclear magnetic resonance (NMR) spectrometer with an autosampler; gas and liquid chromatograph-mass spectroimeters (GC-MS/LC-MS); Fourier transform-infrared (FT-IR) spectrophotometers; a fluorescence spectrophotometer; ultraviolet-visible (UV-vis) spectrophotometers, including Nanodrop format; high pressure liquid chromatographs (HPLC); a fast protein liquid chromatography (FPLC) system; liquid scintillation counter and equipment for radioactive isotope work; cold rooms and centrifuges for the preparation of biomolecules; refrigerated and heated shakers for cell culture growth; thermal cyclers and electrophoresis equipment for molecular biology; stereomicroscope for protein crystal inspection and manipulation; potentiostats for electrochemical and spectroelectrochemical analysis; a biopotentiostat; facilities for molecular modeling and computational chemistry, including a shared Beowulf cluster; and departmental laptop computers for chemistry majors. In addition, two inert atmosphere dry boxes and multiple Schlenk vacuum manifolds allow anaerobic operations for chemical handling and synthesis. Finally, the Chemistry Department shares an atomic force microscope with the other science departments in the Park Science Center.

**Computer Science**

The Department of Computer Science is home to four computer laboratories, in addition to an extensive collection of advanced robots, high-end computers for rendering 3D graphics, and access to Athena, an 84-core computer cluster. Dual-boot Linux/Windows workstations and Macintosh computers featuring the latest CPU and graphics capabilities are available in the laboratories, as well as resources for instruction, data analysis, and visualization.

**Geology**

Because laboratory work in geology is based on observations in the field, the department conducts field trips in most of its courses and also has additional trips of general interest. To aid in the study of observations and samples brought back from the field, the department has excellent petrographic and analytical facilities, extensive reference and working mineral collections of approximately 10,000 specimens each, and a fine fossil collection.

The Department of Geology holds extensive paleontology, mineral, and rock collections for research and teaching. A fully-equipped rock preparation facility, with rock saws, grinding, polishing, crushing, thin section and mineral separation equipment, allows students and faculty to prepare their own samples for petrographic and geochemical analysis. For rock and mineral analysis the department has petrographic microscopes, a Rigaku Ultima IV x-ray diffractometer, and a remote sensing laboratory for digital processing and analysis of imagery by orbiting satellites. The department also houses a fully equipped paleomagnetic and rock magnetic lab that includes an Agico JR-6A spinner magnetometer, an ASC thermal demagnetizer, a DTECH 2000 alternating field demagnetizer, a 10.0 Tesla pulse magnetometer, an Agico KLY3 and an MFK1 automated susceptibility kappabridge, a dynamic low-magnetic field cage, and a PMS MicroMagTM 3900 Vibrating Sample Magnetometer that is shared with the Physics Department.

The Department hosts a state-of-the-art Geochemistry Suite that houses a modern sedimentology laboratory for analysis of sediments, a large geochemistry lab facility for advanced geochemical research, a ventilation-isolated balance room containing a Mettler Toledo XP56 microbalance, and a Class 10,000 clean lab facility for sensitive isotopic analysis of low-level trace metals in natural materials. Equipment housed in the Geochemistry Suite include an ELTRA Carbon and Sulfur Determinator with TIC module, an inorganic/organic Carbon analyzer, an Agilent inductively-coupled plasma mass spectrometer (ICP-MS), a cathodo-luminescence microscope, a Carpenter Microsysytems MicroSampler, a conodont extraction setup, and heavy liquid mineral separation setup. Sample preparation and processing equipment in the sedimentology lab includes a Virtis XL-55 12-port benchtop freeze-dryer, Labconco water deionizer, IEC Centra-GP8 ventilated benchtop centrifuge, Thermolyne 48000 furnace, VWR 1370 forced-air drying oven, stand-up refrigerator and separate stand-up freezer, two VWR 370 hotplate-stirrers, Branson 5210 ultrasonic bath, 8 sets 3” diameter stainless steel sieves (44 micron - 500 micron mesh) and 2 sets of 8” diameter stainless steel sieves (44 micron - 8 mm mesh). Analytical equipment in the sedimentology lab includes binocular optical microscopes and a UIC Inc. CM5014 coulometric carbon analyzer with furnace and acidification modules,
and a Turner Designs 10-AU portable fluorometer for in-vivo/in-situ or extractive chlorophyll analysis.

In addition to two field-ready fully equipped Chevrolet Suburban 4x4 vehicles and a departmental 15-passenger van for transportation to field sites, the geology department has a wide array of field equipment for use by students. Basic mapping equipment includes twelve (12) Brunton 5010 GEO Transit compasses, a high-precision Leica TPS 1100 total surveying station (theodolite and electronic distance meter), four high-precision Trimble differential GPS units including two handheld GeoXT’s, and backpack or pole mountable ProXRS and ProXH antennas with field-rugged handheld PCs for data acquisition, and five Xplore Inc. field-rugged Tablet PCs equipped with ESRI ArcGIS mapping software and built-in GPS antennas. Detailed geophysical surveys are supported by an ASD field-portable visible- to near-infrared spectrometer a Bartington Grad601 dual magnetic gradiometer system, and a PulseEKKO 100 ground-penetrating radar system with 50, 100 and 200 MHz antennas. For environmental monitoring students use Onset Hobo data loggers and sensors, a YSI dissolved oxygen sensor, and an In-Situ Troll 9500 multi-parameter water quality meter; other water monitoring equipment includes Van Dom water sampling bottle, Secchi disk, and a General Oceanics mechanical flowmeter For rock and sediment sample collection the department has rock hammers, two gas-powered rock drills, several Eijkelkamp augers and coring devices, and a Ponar sediment grab sampler.

**Physics**

The Department of Physics has many laboratories for education and research. The instructional advanced experimental physics laboratories house oscilloscopes, digital multimeters, power supplies, low-temperature facilities, and a great deal of ancillary equipment commonly found in research laboratories. In addition, the instructional optics laboratory has six dark rooms with interferometers, lasers, and miscellaneous equipment for optics experiments. The instructional nuclear physics laboratory houses a low-temperature gamma detector and computer-based multichannel analyzers for nuclear spectroscopy, alpha particle detection, and positron-electron annihilation detection. The instructional electronics laboratory has seventeen stations equipped with electronic breadboards, function generators, power supplies, oscilloscopes, multimeters, and computers. The Atomic and Optical Physics research laboratory is equipped with three optical tables, two ultrahigh vacuum systems used for cooling and trapping of atomic rubidium, a host of commercial and home built diode laser systems, several YAG pumped dye laser systems, a high vacuum atomic beam system, an electron multiplying ccd camera, and a variety of other supporting equipment. The Nanomaterials and Spintronics Laboratory has microfabrication facilities including an AJA ATC Orion sputtering deposition system, a Karl Suss MJB3 mask aligner for photolithography, optical microscope, Filmetrics thin-film thickness measurement system, a DI water purification system, and a chemical hood, hosted in a 100-square-foot class-1000 soft curtain cleanroom with the ceiling lighting suitable for photolithography. It also has two chemical hoods, a Princeton Applied Research potentiotstat (VersaSTAT-200), and an ETS humidity control chamber for self-assembly and templated electrochemical deposition of nanomaterials. It also has a PMS MicroMag™ 3900 Vibrating Sample Magnetometer shared with the Geology Department. The Bryn Mawr Plasma Laboratory has a 3000 liter high vacuum chamber and a 50kJ pulsed plasma source as well as a high density array of magnetic diagnostics. Along with the other science departments in the Park Science Center, the Physics Department has shared access to an Atomic Force Microscope, a Rigaku Ultima IV X-ray diffractometer and a new on-campus computing cluster that has 84 computing cores, 512 GB RAM, and 144 TB of accessible storage.

**Psychology**

Laboratory classes in Psychology have specialized equipment for studying stress reactivity, perception, cultural influences, decision-making, language processing, and the psychophysiological correlates of human cognition and emotion. The Department of Psychology provides students with laboratory experience encompassing the wide range of subject matters within the discipline of psychology. The department has state of the art equipment for studying brain activity, both at the single neuron level and the whole brain level, including several stereotactic apparatuses, instrumentation for recording and analyzing the activity of single neurons in relation to behavior, and EEG apparatus for whole brain recording. The equipment interfaces with computers with advanced software for evaluating electrophysiological data. For research on behavior, emotion, language and cognition, students have access to a variety of computerized programming and equipment. This equipment includes digital video cameras, video editing programs, behavioral coding programs, and statistical analysis programs that are used to examine data obtained from human participants ranging in age from early childhood to older adulthood.

**Instrument Shop**

The Department of Science Services in the Park Sciences Building houses a fully-equipped Instrument Shop staffed by 2 full-time instrument makers and 1 analytical instrumentation specialist that design, build, troubleshoot and maintain the scientific equipment for instructional and research laboratories in all 6 natural science departments. Capabilities include 3D SolidWorks design modeling of instrumentation, 2- and 3-axis CNC milling machines, a precision instrument lathe, surface grinding, full welding complement, sandblasting, sheet metal machinery, as well as a...
large lathe and milling machine for oversized work. The instrument makers/designers work with undergraduates engaged in research, class projects and senior thesis projects with some hands-on machining and assembly from their designs. Help with material selection, design and production alternatives is also offered.

Facilities for the Arts

Goodhart Hall is home to the Dance and Bi-Co Theater program offices and serves as the main venue for their curricular performances and productions as well as the multidisciplinary Performing Arts Series. The Office for the Arts and Production Office are both housed in Goodhart and support curricular and student-run performance groups and administer the building's performance spaces. Entrance to all Goodhart facilities are wheelchair accessible, including the 512-seat McPherson Auditorium, with state-of-the-art lighting and sound systems; the Katharine Hepburn Teaching Theater, a flexible black-box-style space with theatrical lighting and sound capabilities; the Music Room, equipped with a small stage and two pianos and used for Bi-Co Music lessons, Bi-Co Chamber Music and Chamber Singers rehearsals and recitals, as well as the Bryn Mawr Reading Series presented by the Creative Writing Program; and the Common Room, an intimate, carpeted space used for Bi-Co Theater classes and student works. Goodhart also offers practice rooms and classrooms for music with a suite of grand and upright pianos and instrument storage areas for academic music studies, student-led instrumental ensembles, choirs and acapella groups, and casual instrumental practice.

The M. Carey Thomas Great Hall provides a large space for classical music concerts, lectures and readings, while the adjacent Cloisters, Carpenter Library roof, and Taft Garden are popular outdoor performance spaces. The former Rhoads Dining Hall is appropriate for parties, DJ events, and small- to medium-scale student theatrical productions and concerts. The Marie Salant Neuberger Centennial Campus Center hosts films, spoken word events, and student club performances and tabling.

The Pembroke and Denbigh dance studios are home to Dance Program classes, workshops and events and most small-to-medium-scale dance performance activities. Each has large windows, ballet barres, mirrors and theatrical lighting and sound capabilities.

Wyndham Alumnae House’s Ely Room and English House host creative writing classes, workshops, and readings.

Arnecliffe Studio is administered by the student-run Bryn Mawr Art Club and offers arts and crafts workshops open to the Tri-Co community. The Rockefeller Hall drafting studios are devoted to architectural studies and theater set and costume design.

Students interested in learning more about art spaces and venues on campus may contact the Office for the Arts at 610-526-5210 or visit www.brynmawr.edu/arts/.

The Bern Schwartz Fitness and Athletic Center

The Bern Schwartz Fitness and Athletic Center has quickly become the place to be since reopening in September 2010. The new 11,500 sq. ft. fitness center boasts over 50 pieces of cardio equipment, 15 selectorized weight machines and a multi-purpose room housing everything from a broad offerings of physical education classes, Bryn Mawr Fit Club classes and strength and conditioning sessions for student athletes. The fitness center has over 100 different workout options, free weights, indoor cycling bicycles, ergs, and cardiovascular and strength training machines.

The Class of 1958 Gymnasium is home to the College’s intercollegiate badminton, basketball and volleyball programs and hosts two regulation sized basketball and volleyball courts. In addition, the building includes a state-of-the-art eight lane swimming pool, athletic training room, locker rooms, a conference smart room and the Department of Athletics & Physical Education offices. The fitness center is located on the second floor directly up the circular staircase as you enter the Bern Schwartz Fitness and Athletic Center. For more information please consult www.brynmawr.edu/athletics/.

The outdoor athletics and recreation facilities includes; Applebee Field, Shillingford Field, seven tennis courts, a recreational and club sport field at the Graduate School of Social Work, and an outdoor track and field practice area. The Applebee Field named for Constance M. K. Applebee, the first director of physical education at the College and credited for bringing field hockey to the United States, was renovated in August 2012. The field was converted from natural grass to a synthetic field, and expanded to meet NCAA requirements for lacrosse, soccer and field hockey.

Campus Center

The Marie Salant Neuberger Centennial Campus Center, a transformation of the historic gymnasium building on Merion Green, opened in 1985. As the center for non-academic life, the facility houses a café, lounge areas, meeting rooms, the College post office and the bookshop. The offices of Career Development and Conferences and Events are also located here. Students, faculty and staff use the campus center for informal meetings and discussion groups as well as for campus-wide social events and activities.

STUDENT RESPONSIBILITIES AND RIGHTS

The Honor Code

A central principle of Bryn Mawr College is the trust that it places in its students. This trust is reflected in the

12 Student Responsibilities and Rights
academic and social Honor Codes. Individual students take responsibility for integrity in their academic and social behavior. Administration of the academic Honor Code is shared with the faculty. The academic Honor Board, composed of both students and faculty, mediates in cases of infraction. In the social Honor Code, as in all aspects of their social lives, students are self-governing. A social Honor Board consisting of 10 students mediates in cases where conflicts cannot be resolved by the individuals directly involved. Trained student mediators work with students to resolve conflicts in effective ways.

The successful functioning of the Honor Code is a matter of great pride to the Bryn Mawr community, and it contributes significantly to the mutual respect that exists among students and between students and faculty. While the Honor Code makes great demands on the maturity and integrity of students, it also grants them an independence and freedom that they value highly. To cite just one example, many examinations are self-scheduled, so that students may take them at whatever time during the examination period is most convenient for their own schedules and study patterns.

In resolving academic cases, the Honor Board has the full range of options. It might fail a student on an assignment or in a course, separate the student from the College temporarily, or exclude the student permanently. Social infractions that are beyond the ability of the Honor Board to resolve might be brought to a Dean’s Panel, which exercises similar authority. For details regarding Honor Board hearings and Dean’s Panels, please refer to the Student Handbook.

Privacy of Student Records

The Family Educational Rights and Privacy Act of 1974 was designed to protect the privacy of educational records, to establish the right of students to inspect and review their educational records, and to provide guidelines for the correction of inaccurate or misleading data through informal and formal hearings. Students have the right to file complaints with the Family Policy Compliance Office, US Department of Education, 400 Maryland Avenue, S.W., Washington, D.C. 20202-5920, concerning alleged failures by the institution to comply with the act. Questions concerning the Family Educational Rights and Privacy Act may be referred to the Undergraduate Dean’s Office.

Directory Information

Bryn Mawr College designates the following categories of student information as public or “directory information.” Such information may be disclosed by the institution for any purpose, at its discretion.

• Category I: Name, address, dates of attendance, class, current enrollment status, electronic mail address
• Category II: Previous institution(s) attended, major field of study, awards, honors, degree(s) conferred
• Category III: Date of birth
• Category IV: Telephone number
• Category V: Marital status

Currently-enrolled students may withhold disclosure of any category of information under the Family Educational Rights and Privacy Act of 1974 by written notification, which must be in the Registrar’s Office by August 15. Forms requesting the withholding of directory information are available in the Registrar’s Office. Bryn Mawr College assumes that failure on the part of any student to request the withholding of categories of directory information indicates individual approval of disclosure.

Campus Crime Awareness and Fire Safety

This report is prepared in compliance with the Federal Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act, as amended by the Violence Against Women Reauthorization Act of 2013. The statistics are maintained and compiled by the Campus Safety Department.

These laws require all institutions of higher education within the Commonwealth to provide students and employees with information pertaining to, but not limited to crime statistics, fire statistics, fire safety measures, policies relating to missing persons, and penalties for drug use, on an annual basis. These acts also require that this information be available to prospective students and employees upon request.

The primary purpose of the federal law is to create a national reporting system on crime and safety, as well as fire safety for our nation’s colleges and universities. Bryn Mawr College is located in Lower Merion Township, a quiet residential suburb of Philadelphia. Bryn Mawr has a strong crime-prevention and fire safety program that includes the entire community ¬ students, staff and faculty. The entire report is available on-line at www.brynmawr.edu/safety/act73.htm plus the link is disseminated via e-mail and handout messages to the Bryn Mawr College Community by October 1st every year as required by law. Should you have other general questions please contact the Campus Safety Department at (610) 526-7911.

Right-to-Know Act

The Student Right-to-Know Act requires disclosure of the graduation rates of degree-seeking undergraduate students. Students are considered to have graduated if they complete their programs within six years of the date they entered college.

Class entering fall 2010 (Class of 2014)

size at entrance: 369
Within 4 years: 78%
Within 5 years: 82.4%
Within 6 years: 83.5%
Equal Opportunity, Non Discrimination, and Discriminatory Harassment Policies

Bryn Mawr College is firmly committed to a policy of equal opportunity for all members of its faculty, staff and student body. Bryn Mawr College does not discriminate on the basis of race, color, religion, national or ethnic origin, sexual orientation, age or disability in the administration of its educational policies, scholarship and loan programs, and athletic and other College-administered programs, or in its employment practices.

In conformity with the Civil Rights Act of 1964, as amended, and Title IX of the Education Amendments of 1972, it is also the policy of Bryn Mawr College not to discriminate on the basis of sex in its employment practices, educational programs or activities. The admission of only women in the Undergraduate College is in conformity with a provision of the Civil Rights Act. The provisions of Title IX protect students and employees from all forms of illegal sex discrimination, which includes sexual harassment and sexual violence, in College programs and activities.

Inquiries regarding compliance with this legislation and other policies regarding nondiscrimination may be directed to the Equal Opportunity Officer (eoo@brynmawr.edu or 610-526-7360) and Title IX Coordinator (titleix_coordinator@brynmawr.edu or 610-526-7360), who administer the College’s procedures.

Access Services

Bryn Mawr welcomes the full participation of individuals with disabilities in all aspects of campus life and is committed to providing equal access for all qualified students with disabilities in accordance with Section 504 of the Rehabilitation Act and the Americans with Disabilities Act as amended. Students with access needs due to a learning, physical, or psychological disability are encouraged to contact the Coordinator of Access Services as early as possible to discuss their concerns and to obtain information about the eligibility criteria and procedures for requesting accommodations. Disclosure of a disability is voluntary, and the information will be maintained on a confidential basis.

STUDENT LIFE

Student Advising

The Undergraduate Dean’s Office is charged with promoting the general welfare of undergraduates. Students may consult their deans on both academic and general matters. After students select their majors at the end of their sophomore year, they are assigned a faculty adviser in the major who helps them plan their academic program for the junior and senior years. Dean’s Office staff collaborate with the staff of the Leadership, Innovation and Liberal Arts Center (LILAC) to promote a holistic and experiential view of education. In addition to their deans, students may work with staff in offices such as Residential Life, the Pensby Center, and Student Activities. The Residential Life staff and upper-class students known as Hall Advisers provide advice and assistance on questions of community life, especially within the residence halls. Health concerns and questions can be addressed by the College’s Medical Director, Director of the Counseling Center, consulting psychiatrist and counselors through scheduled appointments at the Health Center. Students requiring urgent medical attention or personal assistance outside of regular campus office hours should call on Campus Safety.

Customs Week

Customs Week, Bryn Mawr’s new student orientation program, helps first-year, transfer, McBride, and guest students make the transition to college. The year-long program kicks off with a five-day introduction to life at the College and includes both academic and social support components. Each incoming student is placed into a Customs Group which is led by current students who have been selected to serve as Customs People (CPs). These campus leaders use their experience and knowledge to give students the insights they need to navigate Bryn Mawr.

Academic Support Services

Academic support services at Bryn Mawr include the Academic Support and Learning Resources Specialist, the Writing Center, the Q Center (Quantitative Reasoning Project), peer mentoring, peer tutoring and a variety of study-skills support services. The Academic Support and Learning Resources Specialist offers free individual and small group meetings with students to identify and implement techniques for more effective learning, studying, test-taking and time and stress management. The Academic Support and Learning Resources Specialist also offers workshops and class presentations. The Writing Center offers free, individual consultations with peer writing tutors to review, strategize and revise writing assignments and projects. The Writing Center also offers occasional workshops open to the campus. The Public Speaking Initiative (PSI) offers consultations for public speaking. The Q Center supports student work on quantitative problems in introductory courses across social science and science disciplines. The Q Center is staffed by peer mentors who are trained to help students with quantitative reasoning, problem solving strategies, and alleviating math anxiety. Peer mentoring and peer tutoring are available without cost to students. More information about academic support services can be found on the Deans’ Office website at: www.brynmawr.edu/deans/for_students.shtml.

Leadership, Innovation, and Liberal Arts Center (LILAC)

LILAC serves as the umbrella organization under which Civic Engagement and Career & Professional
Development operate along with a broad array of experiential education programs. The mission of LILAC is to prepare liberal art students to become effective, self-aware leaders in their chosen life pursuits. The preparation is rooted in experiential education with a strong focus on reflection and growth. Career & Professional Development provides opportunities for students to maximize their liberal arts education, preparing them to make intentional decisions about their futures. Civic Engagement collaborates with community-based organizations to prepare students to be socially responsible leaders and citizens through purposeful action, reflection, and learning. The LILAC team includes 17 professional staff members, 20 undergraduate student coordinators, eight undergraduate career peers and a faculty liaison.

LILAC offers students opportunities to engage beyond campus, expanding their experience and their global reach. Engagement with LILAC is encouraged beginning in the first year and throughout the years at the College. LILAC programs allow students to work on developing skills such as communication, conceptual thinking, problem solving, breadth of interdisciplinary thought, collaboration, and research through course work, professional development programs, internships and externships, alumnae engagement, and civic engagement. These skills are keystone building blocks for long term career success and leadership.

The following list offers a sampling of LILAC programs:

- Free self-assessments such as Strength Finders, MBTI, Interpersonal Leadership Styles Assessment, Career Leader, or Strong Interest Inventory.
- Handshake: Access to jobs and internships from employers interested in hiring Bryn Mawr students.
- Externships: Job shadowing with alumnae/i for 2-10 days during winter and spring breaks.
- LILAC Summer Internship Funding: Funds are awarded to students to support the costs of 8-10 week internship experiences through a competitive application process.
- Alumna in Residence: An opportunity for reciprocal exchanges of knowledge, alumnae from different majors and careers return to campus to spend a day interacting with faculty, students and staff.
- Student leadership roles as Career Peers or Student Coordinators of service programs.
- Paid work off-campus through the federally funded American Reads/American Counts tutoring programs or in a wide variety of other non-profit organizations through the Community Based Work Study Program.
- Coaching on resume building, LinkedIn profiles, navigating internship/job search, graduate school and interview skills.
- Intensives: 3-5 day educational programs focused on topics such as Management, Entrepreneurship, Grantsmanship, Storytelling, Leadership Empowerment Advancement Program (LEAP), and the Leadership Assessment Center.
- Structured volunteer programs in off-campus communities, such as Bryn Mawr Buddies where international students are matched with immigrant elementary school students or becoming a certified IRS tax preparer who assists low-income Montgomery County residents with income tax preparation through the Volunteer Income Tax Assistance (VITA) program.
- Praxis courses: Praxis means the integration of theory and practice. Praxis courses incorporate ways to explore and engage in real world experiences that provide opportunities to apply and build on what you learn in the traditional classroom.
- On-campus recruiting events which include visits from hiring employers and graduate schools.

Health Center

The Health Center is a full service primary care office open to students when the College is in session. The College’s Health Service offers a wide range of medical and counseling services to all matriculated undergraduates. A detailed description of the services and fees can be found on the Health Center website: brynmawr.edu/healthcenter.

Outpatient primary care medical services include urgent care, nursing visits, routine laboratory work, same day appointments, routine gynecologic services, and care for chronic medical problems. There is no charge for doctor, nurse practitioner or nurse visits. No student is ever denied needed care due to an inability to pay.

The counseling service is available to all undergraduate students. There is no charge for the first 10 visits each academic year. There is a fee for subsequent visits most of which is covered by insurance if the student submits the necessary paperwork. No student is ever denied needed service because of an inability to pay. Consultation with a counselor or psychiatrist can be arranged by appointment by calling the main number of the Health Center. Those with a serious urgent problem that cannot wait for an appointment can come to the Health Center for an evaluation at any time.

All entering students must file completed medical history and evaluation forms with Health Services before registration for classes.

The College purchases a medical insurance policy for full-time undergraduate students to assure no student is denied necessary medical care. The insurance is provided in conjunction with services supplied by the Bryn Mawr College Health Center. It is to be used as a secondary policy in conjunction with the student’s primary insurance. Therefore students should maintain their coverage on their families’ health plans. Information
about the basic insurance plan and any available additional plans is sent to students each summer.

A student may at any time request a medical leave of absence for reasons of health. For information on leaves of absence, see Departure from the College prior to Graduation in the Academic Regulations.

Student Residences

Residence in College housing is required of all undergraduates. Exceptions may be made for a limited number of upperclassmen (typically fifty to seventy seniors) who gain approval to live off campus through the annual room draw process in the preceding spring semester.

The College’s residence halls provide simple and comfortable living for students. Bryn Mawr expects students to respect its property and the standards on which the halls are run. More information is posted on the Residential Life website: www.brynmawr.edu/residentiallife/policies. The College offers a variety of living accommodations, including singles, doubles, triples, quadruples and a few suites. The College provides basic furniture, but students supply linen, bed pillows, desk lamps, rugs, mirrors and any other accessories they need.

Forty Hall Advisors provide resources and advice to students living in the halls, and they work with the other dorm leadership team members and residents to uphold the social Honor Code within the halls. The halls are open during fall and spring breaks and Thanksgiving vacation, but the dining halls are closed. During winter vacation, special arrangements are made for international students, winter athletes and students who are taking classes at the University of Pennsylvania who wish to remain in residence. These students pay a special fee for housing and a limited meal plan, and they live in an assigned residence hall. The dining halls are normally closed for the majority of winter break.

The physical maintenance of the halls is the responsibility of the Director of Facilities Services and Housekeeping Services. At the end of the year, each student is held responsible for the condition of the room and its furnishings. Room assignments, the hall-advisor program, residential life policies, and vacation-period housing are the responsibility of the Director of Residential Life.

Resident students are required to participate in the meal plan, which provides access to 20 meals per week. For those living at Batten House, the environmental co-op, where a kitchen is available, the meal plan is optional. Any student with medical or other extraordinary reasons for an accommodation to the meal plan may present documentation of the disability to the coordinator of Access Services. Ordinarily, with the help of the College dietician, Dining Services can meet these special needs.

The Bi-College housing exchange with Haverford College was established in 1969-70, when the College began housing a limited number of students from Bryn Mawr and Haverford. When there is equal interest from students at both campuses, Bryn Mawr and Haverford offer a housing exchange so that a few returning students may live on the other campus for a year. As neither Bryn Mawr nor Haverford allows room retention from one year to the next, the number and kind of bi-college options change each year.

The College will consider modifying housing assignment procedures or arrangements when necessary to provide equal access to the residence halls for students with disabilities or chronic medical conditions. Any student who requires consideration should contact the Coordinator of Access Services.

The College is not responsible for loss of personal property due to fire, theft or any other cause. Students who wish to insure against these risks should do so individually or through their own family policies.

Six residence halls (Brecon, Denbigh, Merion, Pembroke East, Pembroke West and Radnor) are named for counties in Wales, recalling the tradition of the early Welsh settlers of the area in which Bryn Mawr is situated. Rockefeller Hall is named for its donor, John D. Rockefeller, and Rhoads North and South for the first president of the College, James E. Rhoads. Erdman Hall, first opened in 1965, was named in honor of Eleanor Donnelley Erdman ’21, a former member of the Board of Trustees. Batten House serves as a residence for those interested in a cooperative living environment. The Enid Cook ’31 Center is named after the first African-American alumna, and serves as the Black Cultural Center as well as a residence hall. It has been newly renovated and was dedicated in Fall 2015. Connected by a walkway to the Enid Cook ’31 Center is the newest residence hall, the first to be built on Bryn Mawr’s campus since 1969. This New Dorm opened in Fall 2015.

ADMISSION

Bryn Mawr College seeks candidates of character and ability who want an education in the liberal arts and sciences and are prepared for college work. The College has found highly successful candidates among students of varied interests and talents from a wide range of schools and regions in the United States and abroad. In its consideration of candidates, the College conducts a holistic review in determining a student’s ability and readiness for college through the student’s high-school record in context of the rigor of her program of study, her rank in class (if available), standardized tests (if provided), personal essays, and insight provided by school and community officials.

Candidates are expected to complete a four-year secondary school curriculum. A school program giving good preparation for study at Bryn Mawr would be as follows: English grammar, composition, and literature
through four years; at least three years of mathematics (preferably up to statistics, pre-calculus, or calculus); three years of one modern or ancient language, or a good foundation in two languages; work in history; and at least three courses in science, including two lab sciences (preferably biology, chemistry, or physics). Elective subjects might be offered in, for example, art, music, or computing to make up the total of 16 or more credits recommended for admission to the College.

Since school curricula vary widely, the College is fully aware that many applicants for admission will offer programs that differ from the one described above. The College will consider such applications, provided the students have maintained good records and continuity in the study of basic subjects.

Application

For the 2017-18 application cycle, Bryn Mawr College will accept The Common Application and The Coalition Application. There is no application fee. For more information about applying to Bryn Mawr, please visit www.brynmawr.edu/admissions/apply/.

Admission Plans

Application to the first-year class may be made through one of three plans: Fall Early Decision (ED I), Winter Early Decision (ED II), or Regular Decision.

• For all three plans, applicants follow the same procedures and are evaluated by the same criteria.

• Both the Fall Early Decision (ED I) and Winter Early Decision (ED II) plans are binding and are most beneficial for the candidate who has thoroughly investigated Bryn Mawr and has found the College to be her clear first choice. The ED II plan differs only in recognizing that some candidates may arrive at a final choice of college later than others.

• An early decision candidate may not apply early decision to any other institution, but may apply to another institution under a regular admission plan or a non-binding early action plan. If admitted to Bryn Mawr College under an early decision plan, the student is required to withdraw applications from all other colleges or universities.

• An early decision candidate must sign the Early Decision Agreement to either The Common Application or The Coalition Application indicating that she understands the commitment required. The signatures of a parent and a high school official are also required.

• Early decision candidates will receive one of three decisions: admit, defer to the regular applicant pool, or deny. If admitted to Bryn Mawr, the student is required to withdraw all other applications. If deferred to the regular pool, the student will be reconsidered along with the regular admission applicants and will receive notification in late March. If denied, the student may not apply again that year.

• The Regular Decision Plan is designed for those candidates who wish to keep open different options for their undergraduate education throughout the admission process. Applications under this plan are accepted at any time before the January 15 deadline.

Application Deadlines

Fall Early Decision (ED I): the deadline for applications and all supporting materials: November 15.

Winter Early Decision (ED II): the deadline for applications and all supporting materials: January 1.

Regular Decision Plan: the deadline for applications and all supporting materials: January 15.

Standardized Tests and Interviews

Bryn Mawr College provides undergraduate applicants the option of submitting standardized test scores.

• SAT I or ACT scores are optional for US citizens and US permanent residents.

• Non-US citizens and Non-US permanent residents are required to submit standardized test scores (SAT I or ACT) as well as either the TOEFL or IELTS if their primary language is not English and/or their language of instruction over the past four years has not been English.

• Official scores should be sent from testing agencies such as the College Board (Bryn Mawr code: 2049) or the ACT (Bryn Mawr code: 3526). Information about the tests, test centers, fees, and dates may be obtained at www.collegeboard.com and www.actstudent.org.

Students submitting test scores must have them completed by the January test date.

Interview: An interview either at the College, with an alumna admissions representative, or via Skype or telephone is strongly recommended for all candidates. Interviews should be completed by the deadline of the plan under which the candidate is applying. Appointments for interviews, information sessions, and campus tours can be made in advance by completing the campus visit request form online or calling the Office of Admissions at (610) 526-5152. The Office of Admissions is open from 9 a.m. to 5 p.m. on weekdays, and is open on select Saturdays throughout the year. A student who is unable to visit the College can arrange an alumna or Skype interview by visiting the website as well.

International Students

Bryn Mawr welcomes applications from international students who have outstanding secondary school records and who meet university entrance requirements in their own countries.
Non-US citizens and Non-US permanent residents are required to submit standardized test scores (SAT I or ACT) as well as either the TOEFL* or IELTS** if their primary language is not English and/or their language of instruction over the past four years has not been English. Because exams are only given on selected dates students should sit for their exams well in advance of the application deadlines.

Bryn Mawr will accept official results of any of the TOEFL tests: computer, paper or internet-based.

*www.toefl.org
**www.ielts.org

Early Admission and Deferred Entrance

Each year a few outstanding students enter the College after the junior year of high school. Students who wish to apply for early admission should plan to complete a senior English course before entrance to the College and should write to the Office of Admissions about application procedures. An interview, on campus or with an alumna admissions representative, is required of early admission candidates.

A student admitted to the College may request to defer entrance to the freshman class for one year. Students who wish to defer their entrance will submit the enrollment card with the $500 deposit and select the “defer” option. The student will then contact the Office of Admissions in writing by May 1 with the details as to how they will spend this time. Students will be contacted as to whether their requests have been approved.

Credit for Advanced Placement Tests and International Exams

Students who have carried advanced work in school and who have honor grades (5 in Art History, English, Environmental Science, French, Government and Politics, History, Music Theory, Psychology and Spanish; 4 or 5 in most other subjects) on the Advanced Placement Tests of the College Board may, after consultation with the dean and the departments concerned, be admitted to one or more advanced courses in the first year at the College.

With the approval of the dean and the departments concerned, one or more Advanced Placement Tests with honor grades may be presented for credit. Students receiving six or more units of credit may apply for advanced standing. The Advanced Placement Tests are given at College Board centers in May.

Bryn Mawr recognizes the academic rigor of the International Baccalaureate program and awards credit as follows:

• Students who present the full International Baccalaureate diploma with a total score of 30 or better and honor scores in three higher-level exams normally receive one year’s credit.
• Those with a score of 35 or better, but with honor scores in fewer than three higher-level exams, receive two units of credit for each honor score in higher-level exams plus two for the exam as a whole.
• Those with a score of less than 30 receive two units of credit for each honor score in a higher-level exam.

*Honors scores are considered to be 6 or 7 in English, French, History and Spanish; 5, 6 or 7 in other subjects.

Non-US citizens and Non-US permanent residents are required to submit standardized test scores (SAT I or ACT) as well as either the TOEFL* or IELTS** if their primary language is not English and/or their language of instruction over the past four years has not been English. Because exams are only given on selected dates students should sit for their exams well in advance of the application deadlines.

Bryn Mawr will accept official results of any of the TOEFL tests: computer, paper or internet-based.

*www.toefl.org
**www.ielts.org

Home-School and Alternative Education Students

Students who are homeschooled or participate in alternative education such as an online/cyber school must submit either The Common Application or The Coalition Application with the following supporting documents in addition to the following items:

1. Official transcripts from any high schools or postsecondary institutions attended;
2. An academic portfolio that includes:
   • A transcript of courses taken, either self-designed (including reading lists and syllabi), or a formal document from a correspondence school or agency;
   • Evaluations or grades received for each subject;
   • A short research paper, preferably completed within the last year (including evaluator’s comments);
3. An additional essay on the reasons for choosing homeschooling; and
4. An interview (on campus or Skype) with a member of the admissions staff.

Please note that the supporting documents noted above are in addition to those items required of all applicants.

Transgender Students

Bryn Mawr’s undergraduate mission is to educate and empower intellectually engaged, reflective and ethical women leaders. In taking an inclusive approach to fulfilling this mission—one that reflects the College’s
To qualify for the A.B. degree, students ordinarily should have completed a minimum of two years of full-time study at Bryn Mawr.

*www.toefl.org
**www.ielts.org

The Katharine E. McBride Scholars Program

The Katharine E. McBride Scholars Program was created to give women, 24 years of age or above, who for one reason or another did not begin or complete their education immediately following high school, an opportunity to attend Bryn Mawr College.

Applicants under the McBride program are required to submit either The Common Application or The Coalition Application in addition to the items listed below.

- All official high school transcripts or GED equivalent (Secondary School Final Report is not required)
- All official college transcripts
- Two Instructor Evaluations*
- SAT I or ACT and TOEFL or IELTS (if applicable)

*McBride Scholar applicants who have not attended college within the last three years may submit letters of reference from recommenders other than professors.

Once admitted to the College, McBride scholars are subject to the residency rule, which requires a student to take a minimum of 24 course units while enrolled at Bryn Mawr. Exceptions will be made for students who transfer more than eight units from previous work. Such students may transfer up to 16 units and must then take at least 16 units at Bryn Mawr. McBride Scholars may study on a part-time or full-time basis.

Bryn Mawr College accepts both The Common Application and The Coalition Application. There is no application fee. For more information about applying to Bryn Mawr, please visit www.brynmawr.edu/admissions/apply.

The Community College Connection

Community College Connection (C3) encourages women studying at community colleges to continue their education toward a bachelor’s degree at Bryn Mawr College.

Students pursuing an A.A., A.S., or A.F.A. at a community college are eligible to apply. At the time of application, students should have completed or nearly completed their associate’s degree with strong core classes that cross disciplines.

The most competitive applicants demonstrate the potential and drive to complete a bachelor’s degree at a liberal arts college, have a competitive G.P.A. and demonstrate leadership abilities and critical thinking skills.

C3 applicants to Bryn Mawr College should follow...
the application instructions for transfer students. The application deadline for fall entrance is March 1.

**Readmission**
A student who has withdrawn from the College must apply for permission to return. The student should contact the Undergraduate Dean’s Office concerning the application process and be prepared to demonstrate readiness to resume work at Bryn Mawr.

**BILLING, PAYMENT, AND FINANCIAL AID**

**The Offices of Financial Aid and Student Accounts**
Student Accounts within the Controller’s Office bills for tuition, room and board, fines and other fees.

Financial Aid within the Enrollment Division administers the College’s financial aid programs.

**Costs of Education**
The tuition and fees in 2017-18 for all enrolled undergraduate students, resident and nonresident, is $49,310 a year.

**Summary of Fees and Expenses for 2017-18**
- Tuition ..........................................................$ 49,310
- Residence (room and board)..............................$ 15,910
- College Fee .....................................................$ 830
- Self-Government Association Dues....................$ 360
- Non U.S. Citizen & Non-Permanent
  - Resident Health Insurance ............................$ 1,562
  - Continuing enrollment fee (per semester) ........$ 400

Faced with rising costs affecting all parts of higher education, the College has had to raise tuition annually in recent years. Further annual increases may be expected.

**Billing and Payment Due Dates**
By registering for courses, students accept responsibility for the charges of the entire academic year, regardless of the method of payment. The College bills for each semester separately. The bill for the fall semester is published online in early July and is due August 1. The bill for the spring semester is published online the first week in December and is due January 2.

Student Accounts sends an email notification to the student’s official Bryn Mawr email address when an eBill is available to view. The College no longer sends paper bills. Students are able to set up authorized parties (parents, guardians or others) who then can view bills online, make payments by either electronic check or credit card or set up a payment plan when enrollment opens. Our third-party on-line processor for eBilling, ePayments and Payment Plans is Nelnet Enterprise. Students and authorized parties may make one-time payments this system or utilize the Automatic Monthly Payment Plan, all accessed through BIONIC.

The College’s payment plan, enables monthly payment of all or part of semester fees in installments without interest charges. The cost of enrolling is a $25 nonrefundable fee per semester. Payments for the plan commence prior to the beginning of each term. Information about the payment plan is available from Student Accounts.

The College reserves the right to prevent a student from registering for classes, attending class or entering residence until payment of the College charges has been made each semester. No student may preregister for the next semester, participate in room draw, order a transcript, participate in summer internships, employment or fellowships, hold leadership positions, participate in graduation, or receive a diploma, until all accounts are paid, including the activities fee assessed by the student Self-Government Association officers. This fee covers class and hall dues and support for student organizations and clubs. All resident students are required to participate in the College meal plan.

A fee of $400 per semester will be charged to all undergraduates who are studying at another institution during the academic year and who will transfer the credits earned to Bryn Mawr College, with the exception of students in the Junior Year Abroad Program.

Students are permitted to reserve a room during the spring semester for the succeeding academic year, prior to payment of room and board fees, if they intend to be in residence during that year. Those students who have reserved a room but decide, after June 15, to withdraw from the College or take a leave of absence are charged a fee of $500. This charge is billed to the student’s account.

All entering students are required to make a deposit of $500. This deposit is applied to the student’s tuition account.

**When a Student Withdraws**

**Determination of Withdrawal Date**
The date the student began the withdrawal process by contacting the dean’s office orally or in writing is considered the date of withdrawal for College refunds and for the return of Federal Title IV funds. When a student continues to attend classes or other academically related activity after beginning the withdrawal process, the College may choose to use the student’s last date of documented attendance at an academically related activity as the date of withdrawal. For a student who leaves the College without notifying the College of the intent to withdraw, the College normally uses the student’s last date of documented attendance at an academically related activity as the
date of withdrawal. If that date cannot be ascertained, the College will consider the midpoint of the enrollment period to be the date the student withdrew.

Treatment of College Charges When a Student Withdraws: College Refund Policy

Students will be refunded 100% of their previously paid tuition, room and board, and college fee if the Registrar receives written notice that the student has withdrawn from the College or begun a leave of absence before the first day of classes.

For a student withdrawing from the College or embarking on a medical or psychological leave of absence on or after the first day of classes, refunds of tuition, room and board occur according to a prorata schedule up to 60% attendance. No refunds are processed for withdrawals after 60% of the semester. Fall and spring breaks are not included in the calculation of refund weeks. Note that Self-Government Association dues and the health insurance portion of the college fee are non-refundable.

Treatment of Title IV Federal Aid When a Student Withdraws

The College’s Refund Policy and the Return of Federal Title IV funds procedures are independent of one another. The calculation of Title IV Funds earned by the student has no relationship to the student’s incurred charges. Therefore, the student may still owe funds to the College to cover unpaid institutional charges.

The policy of returning unearned Title IV funds to the federal programs applies to all students receiving Federal Pell Grants, Federal Iraq and Afghanistan Service Grant, Federal Direct Loans, Federal PLUS Loans, Federal Supplemental Educational Opportunity Grants (FSEOG), Federal Perkins Loans, and in some cases, state grants.

When a recipient of Title IV Federal grant or loan assistance withdraws or takes a leave of absence from the College during the semester, the College must determine per a federal formula, the amount of federal aid that the student may retain as of the withdrawal date. Any federal aid that the student is eligible to receive, but which has not been disbursed, will be offered to the student as a post-withdrawal disbursement. Any federal aid the student is not eligible to receive according to the federal refund policy will be returned to the federal government.

The student is entitled to retain federal aid based on the percentage of the semester she has completed. As prescribed by federal formula, the College calculates the percentage by dividing the total number of calendar days in the semester into the number of calendar days completed as of the withdrawal date. Fall and spring breaks are excluded as periods of nonattendance in the enrollment period. Once the student has completed more than 60% of the semester, she has earned all of the Title IV assistance scheduled for that period.

The amount of Title IV assistance not earned is calculated by determining the percentage of assistance earned and applying it to the total amount of grant and loan assistance that was disbursed. The amount the school must return is the lesser of:

- the unearned amount of Title IV assistance or
- the institutional charges incurred for the period of enrollment multiplied by the unearned percentage.

The order of return of Title IV funds is:

- Unsubsidized Federal Direct Loans
- Subsidized Federal Direct Loans
- Federal Perkins Loans
- Federal PLUS Loans
- Federal Pell Grants
- Federal Iraq Afghanistan Service Grant
- Federal Supplemental Education Opportunity Grants (FSEOG)
- Other Title IV assistance

If the College has issued a refund of Title IV funds in excess of the amount the student has earned prior to the withdrawal date, the student is responsible for repaying the funds. Any amount of loan funds that the student (or the parent for a PLUS Loan) has not earned must be repaid in accordance with the terms of the promissory note, that is, the student (or parent for a PLUS Loan) must make scheduled payments to the holder of the loan over a period of time. Any amount of unearned grant funds is called an overpayment. The amount of a grant overpayment that the student must repay is half of the unearned amount. The student must make arrangements with the College or the Department of Education to return the unearned grant funds.

A leave of absence is treated as a withdrawal and a return of Title IV funds may be calculated. A student may take a leave of absence from school for not more than a total of 180 days in any 12-month period.

The calculation of the return of Title IV funds will be done by the Offices of Financial Aid and Student Accounts.

Deadlines for Returning Federal Title IV Funds

The amount unearned federal funds allocated to the Federal Loan, Federal PLUS Program, Federal Pell Grant, Federal Iraq and Afghanistan Service Grant, Federal SEOG, and Federal Perkins will be returned by the College to the appropriate federal program accounts within 45 days of the date the student officially withdrew or was expelled, or within 45 days of the date the College determined that the student had unofficially withdrawn.

The amount of the earned federal funds, if any, allocated to the student will be paid within 45 days of the student’s withdrawal date or, if the student withdrew unofficially,
the date that the dean’s office determined that the student withdrew.

**Treatment of College Grants When a Student Withdraws**

The amount of College grant funds a student will retain is based on the percentage of the period of enrollment completed up to 60% of attendance.

**Treatment of State Grants When a Student Withdraws**

The amount of the state grant funds a student will retain is based on the individual refund policy prescribed by the issuing state.

**FINANCIAL AID**

For general information about financial aid and how to apply for financial aid, consult the Office of Financial Aid website at www.brynmawr.edu/financial-aid. Detailed information about the financial aid application and renewal process, types of aid available and regulations governing the disbursement of funds from grant and loan programs, can be found in the Financial Aid Handbook, which is updated and published annually, and posted to our website.

The education of all students is subsidized by the College because their tuition and fees cover only part of the costs of instruction. To those students well qualified for education in the liberal arts and sciences but unable to meet the College fees, Bryn Mawr is able to offer further financial aid. Alumnae and friends of the College have built up endowments for scholarships; annual gifts from alumnae and other donors add to the amounts available each year. Bryn Mawr supported 71 percent of the undergraduate students at the College with institutional grant aid during the 2016-17 academic year, awarding more than $31.8 million in grant aid.

Initial requests for financial aid are reviewed by the Office of Financial Aid and are assessed on the basis of the student and family’s demonstrated financial need. Students must reapply each year. Eligibility is re-established annually, assuming the student has maintained satisfactory progress toward the degree.

Bryn Mawr College subscribes to the principle that the amount of aid granted a student should be based upon documented financial eligibility. When the total amount of aid needed has been determined, awards are made in the form of grants, loans and jobs.

**Bryn Mawr Merit Scholarship**

Students admitted to Bryn Mawr College as first-time undergraduate students are automatically considered for the Bryn Mawr Merit Scholarship; no additional application is required. Applicants are evaluated using Bryn Mawr’s holistic admission review process, which takes numerous factors into consideration including but not limited to academic coursework and performance, involvement in school and community, leadership qualities, letters of recommendation, quality and content of writing, and potential to contribute in meaningful ways to the Bryn Mawr community.

Students may receive a Bryn Mawr Merit Scholarship even with no demonstrated financial need. Merit scholarships may be awarded to U.S. citizens and permanent residents. Awards range from $12,000-$30,000 per year. Scholarships are non-negotiable and only awarded at the time of admission. Merit scholarships are awarded for a maximum of eight semesters and renewable provided that the student is enrolled full time at Bryn Mawr.

In addition to the funds made available through College resources, Bryn Mawr participates in the following Federal Student Assistance Programs:

- The Federal Direct Loan Program: Low interest federal loans for undergraduate students.
- The Federal Direct PLUS Loan: Low interest federal loans for parents of dependent undergraduates.
- The Federal Perkins Loan: A low-interest federal loan for undergraduates with federal need.
- The Federal Work-Study Program: This program provides funds for campus jobs for students who meet the federal eligibility requirements.
- The Federal Pell Grant: A federal grant awarded to undergraduates who have not earned a bachelor’s degree and who demonstrate a level of financial need specified annually by the Department of Education.
- The Federal Iraq and Afghanistan Service Grant: For students who are not eligible for Pell Grant but whose parent or guardian was a member of the U.S. armed forces and died as a result of service performed in Iraq or Afghanistan after September 11, 2001.
- The Federal Supplemental Educational Opportunity Grant (FSEOG): A federal grant for undergraduates with exceptional financial need. Priority is given to students who receive Federal Pell Grants.

Instructions to apply for financial aid are on the Office of Financial Aid web page at: www.brynmawr.edu/financial-aid.

**Required Forms and Instructions for U.S. Citizens and Permanent Residents**

**First-Year and Transfer Students**

Only applicants who apply for aid at the time of initial admission will be considered for Bryn Mawr Grant assistance during any of their subsequent years of enrollment at the College. To be considered for aid as a freshman, the applicant’s response to the FA Intent question on The Common Application must be affirmative. Applicants may apply and will be considered for federal aid, including the Federal Direct Loan.
Returning Students

Returning students must reapply for financial aid each year. All applications and documents must be submitted by April 15. Eligibility is re-established annually and depends on the student's maintaining satisfactory progress toward the degree and on continued demonstrated need for assistance. The financial aid award may change each year as a result of annual changes in family circumstances, such as the number of family members in college or the family's adjusted gross income. Self-help expectations including campus employment and the amount of the federal loan a student is expected to borrow may increase each year.

- **CSS Financial Aid PROFILE:** Submit the CSS Financial Aid PROFILE at least two weeks before the deadline. If the student's parent is divorced, separated or has never been married, submit the CSS Noncustodial Parent PROFILE. The Bryn Mawr College CSS code number is 2049.

- **Free Application for Federal Student Aid (FAFSA):** Submit the FAFSA as soon as possible to meet the deadline. The Bryn Mawr College federal code number is 003237. Parents and students are encouraged to import their data directly from the Internal Revenue Service (IRS) to the FAFSA using the IRS Data Retrieval (IRDT) tool.

- **Federal Tax Returns:** Parents of dependent students and independent students and their spouse (if applicable) must submit signed copies of federal (no state) income tax returns, including all schedules and attachments, both business and personal, along with all W2 forms to the College Board Institutional Document Service (IDOC). Parents of dependent students and independent students and the their spouse (if applicable) who are not required to file a federal income tax return must submit copies of all W-2 forms along with a Parent or Student Non-Tax-Filer Form to IDOC. All documents should be submitted to IDOC by the deadline. Note: Dependent students are only required to submit a signed copy of their complete federal income tax return or Student Non-Tax-Filer Form if they are selected for verification.

- **Trust Documents:** Students and parents who are beneficiaries of trust funds (other than Uniform Gift to Minor Act trusts) must submit a copy of the Trust Tax Form 1041, the beneficiary’s K-1 form, the year-end investment account statement for the trust assets, and a copy of the trust instrument governing the management of the trust by the Trustee to IDOC.

---

Returning Students

As long as they are continually enrolled students whose citizenship status is not U.S. Citizen or U.S. Permanent Resident are not required to re-submit a financial aid application annually. College grants and loans are automatically renewed. International students who have not attended Bryn Mawr for more than two semesters are required to submit a new financial aid application. Only students who were awarded aid upon entrance to the College are eligible for college grant and loan support in subsequent years at Bryn Mawr.

For a list of scholarship funds and prizes that support the awards made, see the scholarship funds page. These funds are used to enhance Bryn Mawr's need-based financial aid program. They are not awarded separately. For information on loan funds, see the loan funds page.

Loan Funds

Federal Direct Loans

The Federal Direct Loan Program enables students who have a citizenship status of U.S. Citizen or U.S. Permanent Resident to borrow directly from the federal government rather than from a bank. Students must complete the Free Application for Federal Student Aid (FAFSA) and be enrolled at least half time (two units). Loans made through this program include the Direct Subsidized and the Direct Unsubsidized Loans.

Repayment begins six months after the student is no longer enrolled at least half-time at an accredited institution. The repayment term ranges from 10 to 25 years depending on the amount borrowed and the repayment plan chosen. The minimum monthly payment is $50. If the student borrows a smaller amount, the student will have shorter payment terms. If the student borrows a larger amount, the student may wish to consolidate the loan to extend the repayment term. The student should review options at: www2.ed.gov/offices/OSFAP/DirectLoan/index.html.

Required Forms and Instructions: Non U.S. Citizens and Non Permanent Residents

Interest rates on federal student loans are set by Congress. Under the Bipartisan Student Loan Certainty Act of 2013 federal student loan interest rates are tied to financial markets. Under this Act, interest rates will be determined each June for new loans being made for the upcoming award year, which runs from July 1 to the following June 30. Each loan will have a fixed interest rate for the life of the loan. Interest rates can be viewed at: www2.ed.gov/offices/OSFAP/DirectLoan/index.html.

Loan fees will be deducted proportionately from the gross amount on all Federal Direct Loans. The amount of loan funds the student receives is less than the amount borrowed, but the student is responsible for repaying the entire amount borrowed and not just the amount received. For loans first disbursed on or after December 1, 2016, the loan fee was 1.069%.

Federal Direct PLUS Loan

The Federal Direct PLUS Loan is a federally subsidized loan program designed to help parents of dependent undergraduates pay for educational expenses. Parents and their dependent child must be U.S. citizens or eligible noncitizens, must not be in default on any federal education loans or owe an overpayment on a federal education grant, and must meet other general eligibility requirements for the Federal Student Aid programs. Parent PLUS Loan borrowers cannot have an adverse credit history (a credit check will be done).

Repayment begins on the date of the last disbursement. Parent PLUS loan borrowers whose funds were first disbursed on or after July 1, 2013 have the option of delaying their repayment on the PLUS loan either 60 days after the loan is fully disbursed or six months after the dependent student is not enrolled at least half-time.

During this time, interest may be paid by the parent or capitalized.

Interest rates on PLUS loans are set by Congress. Under the Bipartisan Student Loan Certainty Act of 2013 federal loan interest rates are tied to financial markets. Under this Act, interest rates will be determined each June for new loans being made for the upcoming award year, which runs from July 1 to the following June 30. Each loan will have a fixed interest rate for the life of the loan.

A loan fee that is a percentage of the principal amount of the loan will be deducted from the gross amount on the Federal Direct PLUS Loan. The amount of loan funds the parent receives is less than the amount borrowed, but the parent is responsible for repaying the entire amount borrowed and not just the amount received. For loans first disbursed on or after December 1, 2016 through September 30, 2017, the loan fee was 4.276%. For loans disbursed after October 1, 2017, the loan fee may be different depending on the across-the-board federal budget cuts known as “sequester” put into place by the Budget Control Act of 2011. The Department of Education will notify borrowers of fee changes.

International Loan

The International Loan Program is administered by the College from institutional funds to students who are not U.S. Citizens or U.S. Permanent Residents, and must be awarded as part of a student’s aid offer. Recipients must remain enrolled at the College at least half time to retain eligibility. The 5% interest rate and repayment of the loan begin 12 months after graduation, withdrawal from the College or dropping below half-time status. No interest accrues on the loan until repayment begins. The maximum repayment period is 10 years. Students who file for bankruptcy may still be required to pay back the loan. Students may not borrow more than the amount offered as part of a financial aid award from year to year.

Scholarship Funds

The following scholarship funds are used to enhance Bryn Mawr's need-based financial aid program. They are not awarded separately.

The Barbara Goldman Aaron Scholarship Fund was established by Barbara Goldman Aaron '53. The fund shall be used to provide undergraduate financial aid. (2005)

The Warren Akin IV Scholarship Fund was established by Mr. and Mrs. Warren Akin (father) and Mr. and Mrs. William Morgan Akin (brother) in memory of Warren Akin IV, M.A. ’71, Ph.D. ’75. The fund is to be awarded in the following order of preference: first, to graduate students in English; second, to any graduate student; third, to any Bryn Mawr student. (1984)

The George I. Alden Scholarship Fund was established by the George I. Alden Trust through a challenge grant. The fund shall be used to provide undergraduate financial aid. (1998)

The Sarah Lynn Allegra Scholarship Fund was established by Catherine Allegra ’83. The fund shall be used to provide scholarship assistance to an undergraduate student who demonstrates financial need. (2016)

The Dorothy K. Archer Scholarship Fund was established by a generous gift from Cynthia Archer 1975, in honor of her mother. The Fund shall be used to provide scholarship assistance to an undergraduate student who demonstrates financial need. (2016)

The Johanna M. Atkiss Scholarship Fund was established by Ruth R. Atkiss ’36 in memory of her mother. The income will be used to provide scholarship assistance to a student preferably from the Philadelphia High School for Girls. In the event that there is no student with financial need from the Philadelphia High School for Girls in a given year, the income may support either a student from the Masterman School in Philadelphia, or a Philadelphia area public high school. The fund shall be used to provide undergraduate financial aid. (1999)

The Mildred P. Bach Scholarship Fund was established by Mildred P. Bach ’26. The fund shall be used to provide undergraduate financial aid. (1992)

The William O. and Carole Bailey ’61 Scholarship Fund was established by Carole Parsons Bailey ’61 and William O. Bailey. The fund shall be used to provide undergraduate financial aid. (1994)

The Baird Scholarship Endowment was established by Bridget Baird ’69. Income from this fund shall be used to support financial aid for undergraduate students with preference given to minority students with significant financial need. (2008)

The Barbara Otnow Baumann ’54 Scholarship Fund was established through a bequest from Barbara Otnow Baumann ’54 to provide undergraduate financial aid with preference given to a student from the New York metropolitan area. (2006)

The Edith Schmid Beck Scholarship Fund was established by Edith Schmid Beck ’44. The fund shall be used to provide undergraduate financial aid to a student working toward world peace who have shown genuine commitment to working toward international peace and justice, regardless of their academic major. Edith Beck had strong interest in fostering global solutions to world problems; she made a life-long commitment to erasing human differences that led to conflict and to working toward a worldwide acceptance and compliance with a universal code of law and social justice. (1999)

The Susanna E. Bedell Fund provides undergraduate financial aid. (2007)

The Beekey Scholarship Fund was established by Lois E. Beekey ’55, Sara Beekey Pfefenroth ’63, and their mother, Mrs. Cyrus E. Beekey. The fund shall be used to provide undergraduate financial aid for a student majoring in a modern foreign language or in English. (1985)
The L. Diane Bernard, Ph.D. '67, Endowed Scholarship Fund was established by L. Diane Bernard, Ph.D. '67. The fund shall support the mission, program and activities of the Graduate School of Social Work and Social Research of Bryn Mawr College by providing funding in perpetuity for a graduate scholarship. (2011)

The Nanda-Bissell Scholarship Fund was established by Monsoon Bissell 1993. This Fund provides financial assistance to an undergraduate student with documented financial need. (2016)

The Star K. and Estan J. Bloom Scholarship Fund was established by Star K. Bloom '60, and her husband, Estan J. Bloom, of Tuscaloosa, Alabama. The fund shall be used to provide undergraduate financial aid to students from the southern part of the United States, with first preference given to residents of Alabama. (1976)

The Virginia Burdick Blumberg '31 Scholarship Fund was established by Virginia Burdick Blumberg '31. The fund shall be used to provide undergraduate financial aid. (1998)

The Norma and John Bowles ARCS Endowment for Sciences was established by Norma Landwehr Bowles '42 and is administered in accordance with the interests of the ARCS (Achievement Research for College Students) Foundation, which seeks to encourage young women to pursue careers in the sciences. The fund shall be used to provide undergraduate financial aid with preference for students studying the sciences. (1987)

The Helen D. Brooks 1946 Fund was established through a bequest from Helen D. Brooks 1946. The fund shall be used to provide undergraduate financial aid. (2016)

The Cynthia Butterworth Burns 1959 Scholarship Fund was established by Cynthia Butterworth Burns '59. The fund shall be used to provide undergraduate financial aid. (2016)

The Bryn Mawr Club of Princeton Scholarship was established by The Bryn Mawr Club of Princeton. The fund shall be used to provide undergraduate financial aid with preference to a student from the Princeton area or from elsewhere in New Jersey. (1973)

The Mariam Coffin Canaday Scholarship Fund was established by Ward M. Canaday, Trustee, George W. Ritter, co-Trustee and Frank H. Canaday, co-Trustee, of the Ward M. and Mariam C. Canaday Educational and Charitable Trust. The fund shall be used to provide undergraduate financial aid with preference to a student from metropolitan Toledo, Ohio, the residence of Ward M. and Mariam C. Canaday. (1968)

The Erin Grace Cassidy Scholarship Fund was established by Kimberly Wright Cassidy and Bart E. Cassidy in memory of their daughter. The fund shall be used to provide undergraduate financial aid. (2015)

The Patricia L. Chapman, M.S.S. '81, Endowed Scholarship Fund for the Graduate School of Social Work and Social Research was established by Patricia L. Chapman, M.S.S. '81. The Chapman Fund supports financial aid for single mothers raising children while balancing the demands of family, school and work. (2010)

Daria Cheremeteff Fund for Student Support was established by Catherine Cheremeteff Davison '52 in memory of her mother, Daria Cheremeteff. The fund shall be used to provide undergraduate financial aid. (2000)

The Class of 1922 Memorial Scholarship Fund was established by a bequest from Margaret Crosby '22, Ph.D. Yale '34. The fund shall be used to provide undergraduate financial aid. (1972)

The Class of 1939 Memorial Scholarship Fund was established by members of the Class of 1939. The fund shall be used to provide undergraduate financial aid. (1985)

The Class of 1943 Scholarship Fund was established by the James H. and Alice I. Goulder Foundation, Inc., of which Alice Ireman Goulder '43, and her husband were officers. Members of the Class of 1943 and others have added to the Fund. The fund shall be used to provide undergraduate financial aid. (1974)

The Class of 1944 Memorial Scholarship Fund was established by members of the Class of 1944. The Class of 1944 Memorial Scholarship Fund was initiated in 1954 in memory of Jean Brunn Mungall '54, the Class's first president, and continues to memorialize subsequent deceased members. The fund shall be used to provide undergraduate financial aid. (1988)

The Class of 1950 Scholarship Fund was established in 2015 by a member of Class of 1950. This Fund provides financial assistance to an undergraduate student with documented financial need who demonstrates high academic promise and a personal commitment to the values of Bryn Mawr College.

The Class of 1956 Endowed Scholarship Fund was established by Members of the Class of 1956 to commemorate their 55th reunion. The fund shall be used to provide undergraduate financial aid. (2011)

The Class of 1957 Scholarship Fund was established by Members of the Class of 1957 to commemorate their 50th Reunion. The fund shall be used to provide undergraduate financial aid. (2007)

The Class of 1958 Scholarship Fund was established by members of the class to commemorate their 40th Reunion. The fund shall be used to provide undergraduate financial aid. (1998)

The Class of 1960 Endowed Scholarship Fund was established to commemorate their 50th Reunion. The fund shall be used to provide undergraduate financial aid. (2010)

The Class of 1982 Endowed Scholarship Fund was established to provide financial assistance to
undergraduates with documented financial need who demonstrates the highest academic promise and personal commitment to the values of Bryn Mawr College with preference given to students from underserved communities. (2012)

The Margaret Jackson Clowes Scholarship Fund was established by Margaret Jackson Clowes ’37. The fund shall be used to provide undergraduate financial aid. (2008)

The Evelyn Flower Morris Cope and Jacqueline Pascal Morris Evans Memorial Scholarship Fund was established by Edward W. Evans and other family members in memory of Evelyn Flower Morris Cope, Class of 1903, and Jacqueline Pascal Morris Evans, Class of 1908. The fund shall be used to provide undergraduate financial aid. (1958)

The Regina Katharine Crandall Scholarship Fund was established by a group of Regina Katharine Crandall’s students and friends. She was a member of the teaching staff at Bryn Mawr College from 1902 to 1916; Associate in English 1916 to 1917; Associate Professor of English Composition 1917 to 1918; Margaret Kingsland Haskell Professor of English Composition 1918 to 1933. The fund shall be used to provide undergraduate financial aid with preference to a student who has shown excellence in writing. (1950)

The Louise Hodges Crenshaw Scholarship Fund was established by Miss Evelyn Hodges, sister of the late Louise Crenshaw, died and left half of her residuary estate to the Army Relief Society. Before her death, Miss Hodges indicated to Parke Hodges, her brother, a wish to change her will and make certain funds available to Bryn Mawr College, in memory of Mrs. Crenshaw, to provide job counseling for Bryn Mawr graduates. The Army Relief Society (since merged with the Army Emergency Relief) was advised by its legal counsel that it could not make an unrestricted gift to Bryn Mawr College, but could give funds to the College as a memorial to Mrs. Crenshaw for individuals and purposes in accordance with their certificate of incorporation. The Army Emergency Relief Board of Managers approved a gift to Bryn Mawr College to be added to the College’s endowment and to be used for scholarships for dependent children of Army members meeting AER eligibility requirements. The fund shall be used to provide undergraduate financial aid. (1978)

The Raymond E. and Hilda Buttenwieser Crist ’20 Scholarship Fund was established by Raymond E. Crist. The fund shall be used to provide undergraduate financial aid. (1989)

The Annie Lawrie Fabens Crozier Scholarship Fund was established by Mr. and Mrs. Abbot F. Usher in memory of Mrs. Usher’s daughter, Annie Lawrie Fabens Crozier ’51, who died only a few years after her graduation from Bryn Mawr. The fund shall be used to provide undergraduate financial aid with preference to a Junior or Senior majoring in English. (1960)

The Louise Dickey Davison Fund was established in memory of Louise Dickey Davison ’37 by her husband, Roderic H. Davison and son, R. John Davison. The fund shall be used to provide undergraduate financial aid with preference to students studying Classical and Near Eastern Archaeology. (1995)

The Anna Janney DeArmond Endowed Fund was established by Anna Janney DeArmond’s friend, Gertrude Weaver, in 1999. The fund shall be used to provide undergraduate financial aid. (2008)

The Edith Aviles de Kostes 1988 Scholarship Fund was established by Edith Aviles de Kostes 1988. The fund shall be used to provide support for undergraduate scholarships with preference for Latina students. (2014)

The Dolphin Endowed Scholarship Fund was established by Joan Gross Scheuer ’42 to provide long-term support for the Dolphin Scholarships after the Dolphin Program ended in 1998. The purpose of the Dolphin Endowed Scholarship Fund is to support students from the New York City Public Schools. The fund shall be used to provide undergraduate financial aid. (1991)

The Josephine Devigne Donovan Memorial Fund was established by family and friends of Josephine Devigne Donovan ’38. The fund shall be used to provide undergraduate financial aid to a student studying in France her junior year. (1996)

The Barbara Cooley McNamee Dudley Fund was established by Robin Krivanek, sister of Barbara Cooley McNamee Dudley ’42 and mother of Jennifer Krivanek ’75, aid to students from outside the United States. The fund shall be used to provide undergraduate financial aid with preference to students from outside the United States, not excluding members of families temporarily living in the United States. (1983)

The Ellen Silberblatt Edwards Scholarship Fund was established by Lucy Friedman ’65 and Temma Kaplan, and other friends and classmates of Ellen Edwards to honor her memory. The Ellen Edwards Scholarship will be awarded to an entering student whose promise for success at Bryn Mawr is not necessarily shown in conventional ways. Preference is to be given to a student from New York City. The fund shall be used to provide undergraduate financial aid. (1994)

The Charles E. Ellis Scholarship shall be used to provide undergraduate financial aid. (1985)

The Rebecca Winsor Evans and Ellen Winsor Memorial Scholarship Fund was established by a bequest from Rebecca Winsor Evans, who died on July 25, 1959. She survived her sister, Ellen Winsor, by only 20 minutes. The fund shall be used to provide undergraduate financial aid to a minority student. (1959)

The Helen Feldman Scholarship Fund was established by the Class of 1968 for the establishment of a Fund in the name of Helen Feldman ’68, their classmate who was killed in an automobile accident in August, 1967,
the summer before her senior year. The fund shall be used to provide undergraduate financial aid for a student spending the summer studying in Russia. (1968)

The Courtney Seibert Fennimore '99 and Thomas Fennimore Scholarship Fund was established by Courtney Seibert Fennimore '99 and Thomas Fennimore. The fund shall be used to provide undergraduate financial aid. (2016)

The Cora B. and F. Julius Fohs Perpetual Scholarship Fund was established by the Fohs Foundation of Houston, Texas. The fund shall be used to provide undergraduate financial aid. (1965)

The Lucy Norman Friedman Scholarship Fund was established by Lucy Norman Friedman '65. The fund shall be used to provide undergraduate financial aid to those with substantial need. (2007)

The Edgar M. Funkhouser Memorial Scholarship Fund was established by Anne Funkhouser Francis '33, from the estate of her father, Edgar M. Funkhouser. The fund shall be used to provide undergraduate financial aid with preference being given to residents from southwest Virginia and thereafter to students from District III. (1984)

The Helen Hartman Gemmill Fund for Financial Aid was established by a bequest from Helen Hartman Gemmill ’38, of Jamison, Pennsylvania who died on December 11, 1998. The fund shall be used to provide undergraduate financial aid. (1999)

The Samuel and Esther Goldin Endowment was established by Rosaline Goldin and Julia Goldin in memory of their parents. The fund shall be used to provide undergraduate financial aid for students studying Hebrew or Judaic studies. (2001)

The Hazel Goldmark Fund was established by the daughters of Hazel Seligman Goldmark ’30, of New York, New York. Hazel Goldmark worked for many years in the New York Bookstore to raise money scholarships. The fund shall be used to provide undergraduate financial aid. (1991)

The Barbara and Arturo Gomez Fund was established by Barbara Baer Gomez ’43, M.A. ’44, and Arturo Gomez. The fund shall be used to provide undergraduate financial aid to a Mexican undergraduate. (1997)

The Phyllis Goodhart Gordan Scholarship Fund was established by the Class of 1935 in honor of Phyllis Goodhart Gordan ’35. The fund shall be used to provide undergraduate financial aid with preference given to students in the languages. (1985)

The Kierstin Gray ’01 Scholarship was established by Kierstin Gray ’01. The fund shall be used to provide financial assistance to an undergraduate student with documented financial need with a preference for students of underserved populations. (2016)

The Margaret Winthrop McEwan Hansen ‘46 Scholarship Fund was established by Laurie Hansen Saxton ’79 in honor of her mother, Margaret Winthrop McEwan Hansen ’46. The fund shall be used to support a student with need who is interested in the sciences. (2013)

The Alice Cohen Harrison ’36 and Sally R. Harrison ’71 Scholarship Fund was established through the bequest of Alice Cohen Harrison and by Walter C. Harrison in honor of Sally R. Harrison ’71. The fund shall be used to provide unrestricted support for the general purposes of the College with a preference for providing financial assistance to an undergraduate student with documented financial need. (2014)

The Bill Hart and Dabney Gardner Hart ’62 Scholarship Fund was established by Bill Hart and Dabney Gardner Hart ’62. The fund shall be used to provide financial assistance to an undergraduate student with documented financial need. (2015)

The Cheryl Holland 1980 Scholarship Fund was established by a generous gift from Cheryl Holland ’80. The fund shall be used to support undergraduate scholarships. (2015)

The Leila Houghteling Memorial Scholarship Fund was established by family and friends in memory of Leila Houghteling, Class of 1911, of Winnetka, Illinois. The
fund shall be used to provide undergraduate financial aid. (1929)

The Lillia Babbitt Hyde Scholarship Fund was established by the Lillia Babbitt Hyde Foundation. The fund shall be used to provide undergraduate financial aid to students who plan to pursue a medical education or a scientific education in Chemistry. (1963)

The Jenna Lynn Higgins '07 Bryn Mawr Archaeology Memorial Scholarship Fund was established by Lillian and Charles Higgins with additional support from friends of Jenna Lynne Higgins '07. The income from this fund is to be awarded annually to an undergraduate Archaeology student. (2010)

The Elizabeth Bethune Higginson Jackson Scholarship Fund was established by Deborah Jackson Weiss '68 and her family in memory of her grandmother, Elizabeth Bethune Higginson Jackson, Class of 1897, who died on January 14, 1974. Elizabeth Bethune Higginson Jackson, herself an alumna of Bryn Mawr, had two daughters, two daughters-in-law and three granddaughters who attended Bryn Mawr, and was a major donor to the Class of 1897 Professorship in Science. The fund shall be used to provide undergraduate financial aid. (1974)

The Kate Kaiser Scholarship Fund was established by Ruth Kaiser Nelson '58 in her mother's name. The fund shall be used to provide undergraduate financial aid for nontraditional-age students. (1991)

The Sue Mead Kaiser Scholarship Fund was established by The Bryn Mawr Club of Northern California and other individuals. The fund shall be used to provide undergraduate financial aid. (1974)

The Stephanie Wenkert Kanwit '65 Scholarship Fund by Stephanie Wenkert Kanwit '65. This Fund provides financial assistance to an undergraduate student with documented financial need who demonstrates the highest academic promise and a personal commitment to the values of Bryn Mawr College. (2014)

The Alexandra Kaufmann '04 Scholarship Fund was established by The Langdon-Schieffelin Fund. The fund shall be used to provide undergraduate financial aid. (2004)

The Eileen P. Kavanagh Scholarship Fund provides financial assistance to an undergraduate student with documented financial need who demonstrates the highest academic promise and a personal commitment to the values of Bryn Mawr College. Preference will be given to a student involved in the Bryn Mawr Science Posse program. (2012)

The Sara Mann Ketcham '42 Scholarship Fund was established by Sara Mann Ketcham '42. The income will support her for all four years at the College, assuming ongoing financial need. The fund shall be used to provide undergraduate financial aid with preference for a graduate of Philadelphia High School for Girls if there is no student with financial need from the Philadelphia High School for Girls, the Fund may be used to provide support for a student from a Philadelphia area public high school. (2007)

The Kohn Family Scholarship Fund was established by Martha and Jeffrey Kohn in honor of their daughter, Alexandra Kohn 2016. The fund shall be used to provide scholarship assistance to an undergraduate student who demonstrates financial need. (2014)

The Kopal Scholarship Fund was established by Zdenka Kopal Smith '65 and her family in memory of Zdenèk Kopal and Eva M. Kopal. The scholarship was conceived of by Zdenka’s late sister, Eva M. Kopal ’71, to honor her father, astronomer Zdenèk Kopal (1914-1993). The fund shall be used to provide undergraduate financial aid. (2001)

The Melodee Siegel Kornacker '60 Fellowship in Science was established by Melodee Siegel Kornacker '60, of Columbus, Ohio. The fund shall be used to provide graduate financial aid to a student in biology, chemistry, geology, physics or psychology in that order. (1976)

The Hertha Kraus Scholarship Fund was established to support a student of the Graduate School of Social Work and Social Research with demonstrated financial need. (2007)

The Laura Schlageter Krause ’43 Scholarship Fund in the Humanities was established by Laura Schlageter Krause ’43. The fund shall be used to provide undergraduate financial aid to a student in the humanities. (1998)

The Charlotte Louise Belshe Kress Scholarship Fund was established by a bequest from Paul F. Kress, husband of Charlotte Louise Belshe Kress ’54, of Chapel Hill, North Carolina. The fund shall be used to provide undergraduate financial aid. (1994)

The Langdon-Schieffelin Fund was established by Bayard Schieffelin and his wife, Virginia Loomis Schieffelin ’30, during the Centennial Campaign. They requested that The Langdon-Schieffelin Fund be established, saying that the funds were given in gratitude for the years at Bryn Mawr of the following students: Julia Langdon Loomis, Class of 1898, Ida Langdon, Class of 1905, Barbara Schieffelin Bosanquet ’27, Virginia Loomis Schieffelin ’30, Barbara Schieffelin Powell ’62. The fund shall be used to provide faculty salaries or undergraduate financial aid. (1982)

The Minor W. Latham Scholarship Fund was established by a bequest from John C. Latham of New York City, brother of Minor W. Latham, a graduate student during 1902-04. The fund shall be used to provide undergraduate financial aid for a student studying English and residing in Virginia, North Carolina, South Carolina, Georgia, Florida, Alabama, Louisiana, Mississippi, Tennessee and Kentucky. (1984)

The Edith Rotch Lauderdale 1950 Scholarship Fund was established by Edith Rotch Lauderdale '50. The fund shall be used to provide undergraduate financial aid.
aid with preference for the Posse program. (2016)
The Marguerite Lehr Scholarship Fund was established by an anonymous alumna in memory of Marguerite Lehr, Ph.D. ’23, and a member of the Bryn Mawr faculty from 1924 to 1967. The fund shall be used to provide undergraduate financial aid who have excelled in Mathematics. (1988)
The Jean Lucas Lenard ’59 Scholarship Fund was established by John and Jean Lucas to provide financial assistance to an undergraduate student with documented financial need who demonstrates the highest academic promise and a personal commitment to the values of Bryn Mawr College. This scholarship will provide support to a junior or senior pursuing a career in biochemistry or molecular biology. (2011)
The Elisabeth Lerner Endowed Scholarship Fund was established by the Elmar Fund upon the recommendation of Elisabeth Lerner ’90. The fund shall be used to provide undergraduate financial aid. (2015)
The Bertha Szold Levin 1895, Alexandra Lee Levin 1933, and Betsy Levin 1956 Scholarship Fund was established by Betsy Levin ’56 in memory of her mother and grandmother. The fund shall be used to provide undergraduate financial aid with preference for first generation college students. (2015)
The Louise Steinhart Loeb Scholarship Fund was established by the Louise and Henry Loeb Fund at Community Funds, Inc. The fund shall be used to provide undergraduate financial aid. (2001)
The Ann Logan and Gregory Lawler Scholarship Fund was established by Ann Logan 1976 and Gregory Lawler. The fund shall be used to provide undergraduate financial aid. (2015)
The Vi and Paul Loo Scholarship Fund was established by Violet Loo ’56 and Paul Loo to provide undergraduate financial aid with preference to students from Hawaii. (2007)
The Alice Low Lowry Fund for Undergraduate and Graduate Scholarships and Tuition Grants was established by family, friends and colleagues in memory of Alice Low Lowry ’38 of Shaker Heights, Ohio. The fund shall be used to provide undergraduate and graduate financial aid. (1968)
The Lucas Scholarship Fund was established by Diana Daniel Lucas ’44 in memory of her parents, Eugene Willett van Court Lucas, Jr., and Diana Elmendorf Richards Lucas; her brother, Peter Randell Lucas; and her uncle, John Daniel Lucas. The fund shall be used to provide undergraduate financial aid. (1985)
The Katharine Mali Scholarship Fund was established by a bequest from Katharine Mali ’23 of New York, New York. The fund shall be used to provide undergraduate financial aid. (1980)
The Dorothy Nepper Marshall Scholarship Fund was established by a bequest from Dorothy N. Marshall, Ph.D. ’44, of Brookline Massachusetts. The fund shall be used to provide undergraduate financial aid. (1986)
The Katharine E. McBride Endowed Scholarship Fund was established by a McBride alumna who offered an anonymous challenge to alumnae and friends of the McBride Program. A second challenge from Susan Ahlstrom ’93 and Bill Ahlstrom helped complete the challenge. The fund shall be used to provide undergraduate students in the McBride Program with financial aid with preference given to sophomores, juniors or seniors. (2001)
The Katharine E. McBride Undergraduate Scholarship Fund was established by Gwen Davis ’54, of Beverly Hills, California. The fund shall be used to provide undergraduate financial aid. (1970)
The Mary-Berenice Morris McCall ’52 Memorial Fund for Study Abroad was established by Dr. John P. McCall. The fund shall be used to provide undergraduate financial aid for students studying abroad. (2015)
The Carol McMurrrie Scholarship Fund was established by Carol Cain McMurrrie ’66. The fund shall be used to provide undergraduate financial aid. (2007)
The Midwest Scholarship Endowment Fund was established by alumnae of District VII in honor of Barbara Bauman Morrison ’62. The fund shall be used to provide undergraduate financial aid to Midwestern students. (1974)

Dorothy F. Miller P ’68 Scholarship Fund was established by Jean Kutner ’88 in memory of her mother. The fund shall be used to provide undergraduate financial aid. (2016)
The Elinor Dodge Miller Scholarship Fund was established to provide undergraduate financial aid. (1985)
The Karen Lee Mitchell ’86 Scholarship Fund was established by Carolyn and Gary Mitchell in memory of their daughter, Karen. The purpose of the Fund is to provide scholarship support for students of English literature, with a special interest in women’s studies, a field of particular concern to Karen Mitchell. The fund shall be used to provide undergraduate financial aid. (1992)
The Jesse S. Moore Fund was established by Caroline Moore ’56 and her husband Peter “for post-college-age women with financial need who have matriculated at Bryn Mawr from the Special Studies Program.” The fund shall be used to provide undergraduate financial aid. (1982)
The Mrs. Wistar Morris Japanese Scholarship was established by the Japanese Scholarship Committee of Philadelphia. The fund shall be used to provide undergraduate financial aid for Japanese students. (1978)
The Frank L. and Mina W. Neall Scholarship Fund was
established by the bequest of Adelaide W. Neall in memory of Miss Neall's parents. The fund shall be used to provide undergraduate financial aid. (1957)

The Bryn Mawr Fund of the New Hampshire Charitable Foundation was established by The Spaulding-Potter Charitable Trusts, of Keene, New Hampshire through a challenge for alumnae of Bryn Mawr living in New Hampshire. The fund shall be used to provide undergraduate financial aid with preference to students from New Hampshire. (1964)

The Patricia McKnew Nielsen Scholarship Fund was established by Patricia McKnew Nielsen '43. The fund shall be used to provide undergraduate financial aid with preference given to psychology majors. (1985)

The Jane M. Oppenheimer Scholarship Fund was established by a bequest from Dr. James H. Oppenheimer, father of Jane Oppenheimer '32, William R. Kenan, Jr. Professor Emeritus of Biology and History of Science Department of Biology. The fund shall be used to provide undergraduate financial aid with preference given to Jewish Biology students. (1997)

The Jean Shaffer Oxtoby '42 Memorial Scholarship Fund was established by her son, David Oxtoby. The fund shall be used to provide undergraduate financial aid. (2010)

The Pacific Northwest Scholarship Fund was established to provide undergraduate financial aid to students from the Pacific Northwest. (1976)

The Marie Hambalek Palm '70 Memorial Scholarship Fund was established by Gregory Palm, together with family and friends of his late wife, Marie Hambalek Palm '70. The fund shall be used to provide undergraduate financial aid. (1998)

The Margaret Tyler Paul Scholarship Fund was established by the Class of 1922 in honor of their 40th Reunion. The fund shall be used to provide undergraduate financial aid. (1963)

The Delia Avery Perkins Fund was established by a bequest from Delia Avery Perkins, Class of 1900, of Montclair, New Jersey. The fund shall be used to provide undergraduate financial aid for freshman students from northern New Jersey. (1963)

The Mary DeWitt Pettit Scholarship was established by the Class of 1928 to honor their classmate. The fund shall be used to provide undergraduate financial aid with preference given to a student studying the sciences. (1978)

The Georgette Chapman Phillips 1981 Scholarship Fund was established by Georgette Chapman Phillips '81. The fund shall be used to provide scholarship assistance to an undergraduate student who demonstrates financial need, with preference given to students from Somerset, Cambria, Bedford or Westmoreland counties in Pennsylvania. (2016)

The Julia Peyton Phillips Scholarship Fund was established in 1986 with a gift from the Fairfield County Community Foundation. Since that time, the fund has provided scholarship support for undergraduates studying Latin, Greek, American History, or English.

The Vinton Liddell Pickens '22 Scholarship Fund was established by Cornelia Pickens Suhler '47 in memory of her mother. The fund shall be used to provide undergraduate financial aid with preference to students with a major in Fine Arts or the Growth and Structure of Cities, or a concentration in Environmental Studies. (1995)

The Louise Hyman Pollak Scholarship Fund was established by a bequest from Louise Hyman Pollak 1908, of Cincinnati, Ohio. The fund shall be used to provide undergraduate financial aid to a student from Cincinnati or the surrounding area. (1932)

The Porter Scholarship Fund was established by Carol Porter Carter '60 and her mother, Mrs. Paul W. Porter, for the establishment of a scholarship fund. The fund shall be used to provide undergraduate financial aid to a returning student. (1985)

The Jean Seldomridge Price Memorial Scholarship Fund was established by a bequest from Jean S. Price '41. The Fund shall be used to provide undergraduate financial aid. (2011)

The Patricia A. Quinn Scholarship Fund was established by Joseph J. Connolly has in honor of his wife, Patricia Quinn Connolly '91. The fund shall be used to provide undergraduate financial aid for a student from a high school of the Catholic Archdiocese of Philadelphia. Should no graduate of the Archdiocesan school system require financial aid in a given year, the Quinn Scholarship shall be awarded to a student with financial need in the Katharine E. McBride Scholars Program, or to another nontraditional-aged student at the College. (1991)

The Meera Ratnesar '01 Scholarship Fund was established in 2016 by Meera Ratnesar '01. This Fund provides financial assistance to an undergraduate student with documented financial need. (2016)

The Caroline Remak Ramsay Scholarship Fund was established by Caroline Remak Ramsay, Class of 1925. The fund shall be used to provide undergraduate financial aid for undergraduate students in the social sciences. (1992)

The Maximilian and Reba E. Richter Scholarship Fund was established by Charles Segal, Esq., attorney for and one of the Trustees of the Estate of Max Richter, father of Helen R. Elser, Class of 1913. The fund shall be used to provide undergraduate financial aid to a student from a New York City public high school or college. (1961)

The Rise8 Fund shall be used to provide undergraduate financial aid with preference for Posse students. (2016)

The Alice Mitchell Rivin Scholarship Fund was
established by an anonymous donor in honor of Alice Mitchell Rivlin '52. The fund shall be used to provide undergraduate financial aid. (1996)

The Barbara Paul Robinson Scholarship Fund was established by Barbara Paul Robinson '62. The fund shall be used to provide undergraduate financial aid who demonstrates the highest academic promise, a determined spirit and a personal commitment to public service and the values of Bryn Mawr College. (2007)

The Jennifer Rusk '05 Scholarship Fund was established by Jennifer Rusk '05. The fund shall be used to provide undergraduate financial aid with preference for a student in the Posse program. (2015)

The Serena Hand Savage Memorial Scholarship Fund was established by family and friends of Serena Hand Savage '22, former President of the Alumnae Association in her memory. The fund shall be used to provide undergraduate financial aid for a Junior who shows great distinction in scholarship and character, and who may need assistance to finish her last two years of College. (1951)

The Constance E. Schaar Memorial Fund was established by the parents, family, fellow students and friends of Constance E. Schaar '63, who died during the year following her graduation. The fund shall be used to provide undergraduate financial aid. (1964)

The Joseph and Gertrude Schrot Scholarship Fund was established through a bequest from Gertrude S. Schrot of Philadelphia. The fund shall be used to provide financial aid to students of non-traditional age. (2010)

The Schwartz Merit Scholarship Fund was established by Rosalyn Ravitch Schwartz '44. The fund will provide scholarship support for deserving undergraduates at Bryn Mawr. (2013)

The Mary Wilson Schwertz '41 Scholarship Fund was established by Mary Wilson Schwertz '41. The fund shall be used to provide undergraduate financial aid with preference for a student studying chemistry. (2011)

The Judith Harris Selig Fund was established by a bequest from Judith Harris Selig '57. Her friends and family made additional gifts in her memory. The fund shall be used to provide undergraduate financial aid. (1968)

The Jacqueline Silbermann Scholarship Fund was established by Jacqueline Winter Silbermann '59. The fund shall be used to provide financial assistance to matriculated students facing unexpected financial hardship with documented financial need who demonstrate the highest academic promise and a personal commitment to the values of Bryn Mawr College. (2011)

The Smalley Foundation, Inc. Scholarship was established to provide undergraduate financial aid. Grant was made to Bryn Mawr in 1995 in honor of Elisa Dearhouse '85.

The W.W. Smith Scholarship Prize is made possible by a grant from the W.W. Smith Charitable Trust for financial aid support for past W.W. Smith Scholarship recipients who have shown academic excellence and are beginning their senior year. The fund shall be used to provide undergraduate financial aid. (1986)

The W.W. Smith Scholar Grants are made possible by the W.W. Smith Charitable Trust. The scholarships are awarded to needy, full-time undergraduate students in good academic standing, and may be awarded to the same student for two or more years. (1978)

The C.V. Starr Scholarship Fund was established by The Starr Foundation, of New York City. The fund shall be used to provide undergraduate financial aid. (1988)

The Lavori Sterling Foundation Scholarship was established by the Lavori Sterling Foundation upon the recommendation of Liana Sterling '03. This fund shall be used to provide undergraduate financial aid. (2016)

The Amy Sussman Steinhart Scholarship Fund was established by the family of Amy Sussman Steinhart Class of 1902, of San Francisco. The fund shall be used to provide undergraduate financial aid for a student from the Western states. (1932)

The Anna Lord Strauss Scholarship and Fellowship Fund was established by the Ivy Fund, of which Anna Lord Strauss was the President. The fund shall be used to provide undergraduate financial aid to students interested in public service or the process of government. (1976)

The Solon E. Summerfield Foundation was established by Gray Struther '54 to provide undergraduate financial aid. (1958)

The Chiemi Suzuki '00 and Margaret diZerega Scholarship Fund was established by Chiemi Suzuki '00 and Margaret diZerega. The fund shall be used to provide undergraduate financial aid. (2015)

The Elizabeth Prewitt Taylor Scholarship Fund was established by a bequest from Elizabeth P. Taylor, Class of 1921. The fund shall be used to provide undergraduate financial aid. (1960)

The Dean Karen Tidmarsh '71 Scholarship Fund was established by Sandra Berwind, M.A. '61, Ph.D. '68, in honor of Dean Karen Tidmarsh '71. Preference is to be given to graduates of Philadelphia area public high schools. The fund shall be used to provide undergraduate financial aid. (2006)

The Marion B. Tinagliia Scholarship Fund was established by John J. Tinagliia in memory of his wife, Edith Marion Brunt Tinagliia '45. The fund shall be used to provide undergraduate financial aid. (1983)

The Kate Wendall Townsend Scholarship Fund was established by Katharine W. Sisson, Class of 1920, who died on July 6, 1978, in honor of her mother. The fund shall be used to provide undergraduate financial aid with preference for a student from New England who has
made a definite contribution to the life of the College in some way besides scholastic achievement. (1978)

The Hope Weam Troxell Memorial Scholarship was established by Southern California Alumnae in memory of Hope Weam Troxell ’46. The fund shall be used to provide undergraduate financial aid to a student who has contributed responsibly to the life of the College community. (1973)

The Suetse Li Tung ’50 and Mr. and Mrs. Sumin Li Scholarship Fund for International Students was established by Suetse Li Tung ’50. The fund shall be used to provide undergraduate financial aid for international students, with preference for students from China. (2008)

The Florence Green Turner Scholarship Fund was established to provide undergraduate financial aid. (1991)

The UPS Endowment Fund Scholarship was established by the Foundation for Independent Colleges, Inc. The fund shall be used to provide undergraduate financial aid. (1997)

The Anne Hawks Vaux Scholarship Fund was established by George Vaux of Bryn Mawr, Pennsylvania in memory of his wife, Anne Hawks Vaux ’35, M.A. ’41. The fund shall be used to provide undergraduate financial aid. (1979)

The Nancy J. Vickers Global Scholars Fund recognizes Nancy’s leadership as Bryn Mawr’s seventh president by providing students with financial assistance to study abroad for one semester. This Fund was established with gifts honoring her 2008 retirement. (2011)

The Mildred and Carl Otto Von Kienbusch Fund for Undergraduate Scholarships was established by a bequest from Carl Otto von Kienbusch of New York City, husband of the late Mildred Pressinger von Kienbusch, Class of 1909. The fund shall be used to provide undergraduate financial aid. (1976)

The Cynthia Walk ’67 Scholarship Fund was established by Cynthia Walk ’67. This Fund shall provide financial assistance to an undergraduate student with documented financial need. (2017)

The Julia Ward Scholarship Fund was established by an anonymous friend in memory of Julia Ward, Class of 1923. The scholarship is given in particular recognition of Julia Ward’s understanding and sympathy for young students. The fund shall be used to provide undergraduate financial aid. (1963)

The Elizabeth Vogel Warren ’72 Scholarship was established by Elizabeth Vogel Warren ’72. The fund shall be used to provide undergraduate financial aid. (2008)

The Betsy Frantz Havens Watkins ’61 Scholarship Fund was established in 2012 by Betsy Frantz Havens Watkins ’61 and Charles Watkins. The fund shall be used to provide financial assistance to an undergraduate student with documented financial need who demonstrates the highest academic promise and a personal commitment to the values of Bryn Mawr College. (2011)

The Eliza Jane Watson Scholarship Fund was established by the John Jay and Eliza Jane Watson Foundation. The fund shall be used to provide undergraduate financial aid. (1964)

The Susan Opstad White ’58 Scholarship Fund was established by Mrs. Raymond Opstad in honor of her daughter, Susan Opstad White. The fund shall be used to provide undergraduate financial aid. (1987)

The Sarah Lark Twiggar Scholarship Fund was established by Sarah Twiggar Wernitz ’58 in memory of her mother. This Fund provides financial assistance to an undergraduate student with documented financial need who demonstrates academic promise and a personal commitment to the values of Bryn Mawr College. (2014)

The Benjamin and Jennifer Suh Whitfield Scholarship Fund was established by Benjamin and Jennifer Suh Whitfield ’98. This Fund provides financial assistance to an undergraduate student with documented financial need who demonstrates the highest academic promise and a personal commitment to the values of Bryn Mawr College. (2012)

The Anita McCarter Wilbur Scholarship Fund was established by a bequest from Anita McCarter Wilbur ’43, Kensington, Maryland, who died on March 28, 1996. The fund shall be used to provide undergraduate financial aid. (1996)

The William H. Willis Endowed Scholarship Fund was established by Caroline C. Willis ’66 in memory of her father. The Fund provides scholarship support for undergraduate students, with preference for students from the South or students who are studying Classical Studies. (2008)

The James Wood Family Scholarship Fund shall be used to provide scholarship assistance to a Posse Scholar or an undergraduate student who demonstrates financial need. (2016)

The Margaret W. Wright and S. Eric Wright Scholarship was established by a bequest from Margaret White Wright ’43, of Charleston, West Virginia. The fund shall be used to provide undergraduate financial aid to students of Quaker lineage attending the College. (1985)

The D. Robert Yarnall Fund was established by a bequest from D. Robert Yarnall, of Chestnut Hill, Philadelphia, who died on September 11, 1967. His mother, Elizabeth Biddle Yarnall ’19, aunt Ruth Biddle Penfield ’29 and daughter Kristina Yarnall-Sibinga ’83 are graduates of the College. The fund shall be used to provide undergraduate financial aid. (1967)
The Harris and Clare Wofford International Fund Scholarship was established to honor President Wofford and his commitment to international initiatives which he enthusiastically supported during his tenure at Bryn Mawr. (1978)

THE ACADEMIC PROGRAM

The Curriculum

The Bryn Mawr curriculum is designed to encourage breadth of learning and training in the fundamentals of scholarship in the first two years, and mature and sophisticated study in depth in a major program during the last two years. Its overall purpose is to challenge the student and prepare her for the lifelong pleasure and responsibility of educating herself and playing a responsible role in society. The curriculum encourages independence within a rigorous but flexible framework of distribution and major requirements.

The Bryn Mawr curriculum obtains further breadth through institutional cooperation. Virtually all undergraduate courses and all major programs at Bryn Mawr and Haverford Colleges are open to students from both schools, greatly increasing the range of available subjects. With certain restrictions, Bryn Mawr students may also take courses at Swarthmore College, the University of Pennsylvania and Villanova University during the academic year without payment of additional fees.

Requirements for the A.B. Degree

for students who matriculated in the fall of 2011 or later (students who matriculated prior to fall 2011 should consult prior catalogs)

Thirty-two units of work are required for the A.B. degree. These must include

- One Emily Balch Seminar.
- One unit to meet the Quantitative and Mathematical Reasoning Requirement (preceded by the successful completion of the Quantitative Readiness Assessment or Quantitative Readiness Seminar)
- Two units to satisfy the Foreign Language Requirement.
- Four units to meet the Distribution Requirement.
- A major subject sequence.
- Elective units of work to complete an undergraduate program.

In addition, all students must complete six half-semesters of physical education courses, including the required wellness class, THRIVE. They must also successfully complete a swim proficiency requirement and meet the residency requirement.
Students will normally satisfy the Emily Balch Seminar, the Quantitative and Mathematical Reasoning Requirement, the Foreign Language Requirement, and the Distribution Requirement with courses taken while in residence at Bryn Mawr during the academic year. Students may use credits transferred from other institutions to satisfy these requirements only with prior approval. AP, A level, or IB credits may not be used to satisfy any of these requirements, although they might allow a student to place into a more advanced course.

**Emily Balch Seminar Requirement**

The Emily Balch Seminars aim to engage students in thinking about broad intellectual questions within and across disciplines and to teach close reading and cogent writing. The seminars help prepare students for a world that demands critical thinking and effective communication both within and outside of the frameworks of particular disciplines. Students must attain a grade of 2.0 or higher in the seminar in order to satisfy this requirement.

**Quantitative Requirement**

Students must demonstrate proficiency in the application of the quantitative skills needed to succeed in many social and natural science courses, not to mention their personal and future professional lives, by a) earning a satisfactory score on the SAT, the ACT, b) earning a satisfactory score on the Quantitative Readiness Assessment offered before the start of the freshman year, or c) completing a Quantitative Readiness Seminar with a grade of 2.0 or higher during the freshman year.

In addition, before the start of the senior year, students must complete, with a grade of 2.0 or higher, one course which makes significant use of at least one of the following: mathematical reasoning and analysis, statistical analysis, quantitative analysis of data or computational modeling. Courses that satisfy this requirement are designated “QM” in course catalogs and guides.

Students cannot use the same course to meet both the QM and distribution requirements. A student may use credits transferred from other institutions to satisfy these requirements only with prior approval.

**Foreign Language Requirement**

Before the start of the senior year, students must complete, with a grade of 2.0 or higher, two units of foreign language. Courses that fulfill this requirement must be taught in the foreign language; they cannot be taught in translation. Students may fulfill the requirement by completing two sequential semester-long courses in one language, either at the elementary level or, depending on the result of their language placement test, at the intermediate level. Students who are prepared for advanced work may complete the requirement instead with two advanced free-standing semester-long courses in the foreign language(s) in which they are proficient. Non-native speakers of English may choose to satisfy this requirement by coursework in English literature.

Students cannot use the same course to meet both the Foreign Language and distribution requirements. A student may use credits transferred from other institutions to satisfy these requirements only with prior approval.

**Distribution Requirement: Approaches to Inquiry**

The course of study in the major provides students the opportunity to acquire a depth of disciplinary knowledge. In order to ensure exposure to a broad range of frameworks of knowledge and modes of analysis, the College has a distribution requirement that directs students to engage in studies across a variety of fields, exposes them to emerging areas of scholarship, and prepares them to live in a global society and within diverse communities. The aim of this distribution requirement is to provide a structure to ensure a robust intellectual complement to a student’s disciplinary work in the major.

Before the start of the senior year, each student must have completed, with grades of 2.0 or higher, one unit in each of the following Approaches to Inquiry:

1. **Scientific Investigation (SI):** understanding the natural world by testing hypotheses against observational evidence.
   
   These are courses in which students engage in the observational and analytical practices that aim at producing causal understandings of the natural world. They engage students in the process of making observations or measurements and evaluating their consistency with models, hypotheses or other accounts of the natural world. In most, but not all, cases this will involve participation in a laboratory experience and will go beyond describing the process of model testing or the knowledge that comes from scientific investigation.

2. **Critical Interpretation (CI):** critically interpreting works, such as texts, objects, artistic creations and performances, through a process of close-reading.
   
   These courses engage students in the practice of interpreting the meanings of texts, objects, artistic creations, or performances (whether one's own or the work of others) through “close-reading” of those works.

3. **Cross-Cultural Analysis (CC):** analyzing the variety of societal systems and patterns of behavior across space.
   
   These courses encourage students to engage with communities and cultures removed from their own. Using the tools, methodologies and practices that inform our scholarship, students will develop a deeper sense of what it means to analyze or
Students must declare their major subject before the end of the sophomore year. The minimum course requirement in the major subject shall be eight course units, of which at least one course must be writing intensive (or the equivalent attention to writing in two courses) at the 200 or 300 level.

The process of declaring a major is part of the Sophomore Planning Process. Students shall consult with the departmental adviser and complete a major work plan, which the student then shares with the dean. Students may not choose to major in a subject in which they have incurred a failure, or in which their average is below 2.0.

Students may double major with the consent of both major departments and their dean. Even when a double major has been approved, scheduling conflicts may occur which make it impossible for a student to complete the plan.

Students may choose to major in any department at Haverford College, in which case they must meet the major requirements of Haverford College and the degree requirements of Bryn Mawr College. Procedures for selecting a Haverford major are available from the Haverford Dean’s Office website and are sent to all sophomores in the early spring.

Declaring a major is one element of the Sophomore Planning Process. An up-to-date overview of the Process and details about each of the components will be posted on the Dean’s Office website each fall.

Students working for an A.B. degree are expected to maintain grades of 2.0 or higher in all courses in their major subject. Students who receive a grade below 2.0 in a course in their major are reviewed by the Committee on Academic Standing and may be required to change majors. If, at the end of junior year, a student
has a major-subject grade point average below 2.0, that student must change to a different major. If there is no alternative major, that student will be excluded from the College. A student who is excluded from the College is not eligible for readmission.

Each department sets its own standards and criteria for honors in the major, with the approval of the Curriculum Committee. Students should contact departments for details.

The Independent Major Program

The Independent Major Program is designed for students whose interests cannot be accommodated by an established departmental major. An independent major is a rigorous, coherent, and structured plan of study involving courses from the introductory through the advanced level in a recognized field within the liberal arts. Independent majors must be constructed largely from courses offered at Bryn Mawr and Haverford Colleges.

The following is a list of some recent independent majors:

• Creative Writing
• Dance
• Education
• Theater
• Film and Media Studies

Students interested in the Independent Major Program should attend the informational teas and meet with Assistant Dean Raima Evan in the spring of their freshman year or the fall of their sophomore year. In designing an independent major, students must enlist two faculty members to serve as advisers. One, who acts as director of the program, must be a member of the Bryn Mawr faculty; the other may be a member of either the Bryn Mawr or Haverford faculty. To propose an independent major, students must submit completed applications by the following deadlines:

• the end of the first week of classes in the spring of the sophomore year (for students hoping to study abroad during one or two semesters of the junior year), or
• the end of the fourth week of classes in the spring of the sophomore year (for students planning to remain at Bryn Mawr throughout the junior year), or
• the end of the fourth week of classes in the fall of the junior year (for juniors)

The application for an independent major consists of the following components:

• A proposal developed in conversation with the advisers that describes the student’s reasons for designing the independent major and explains why her interests cannot be accommodated by an established major or a combination of an established major and a minor or concentration. The proposal should identify the key intellectual questions her major will address and explain how each proposed course contributes to the exploration of those questions.

• An independent major work plan of 11 to 14 courses, at least seven of which must be taken at Bryn Mawr or Haverford. The plan will include up to two courses at the 100 level and at least four at the 300 or 400 level, including at least one semester of a senior project or thesis (403).

• Supporting letters from the two faculty advisers, discussing the academic merits of the independent major work plan and the student’s ability to complete it.

• A copy of the student’s transcript, which will be supplied by the Dean’s Office.

The Independent Major Committee, composed of four faculty members, two students, and one dean, evaluates the proposals on a case-by-case basis. Their decisions are final. The fact that a particular topic was approved in the past is not a guarantee that it will be approved again.

The committee considers the following issues:

• Is the proposed major appropriate within the context of a liberal arts college?

• Could the proposed major be accommodated instead by an established major and minor?

• Does the proposal convey its intellectual concerns and the role each course will play in this inquiry?

• Are the proposed courses expected to be offered over the next two years?

• Will the faculty members be available for good advising?

• Does the student’s record predict success in the proposed major?

If the committee approves the proposed major and its title, the student declares an independent major. The committee continues to monitor the progress of students who have declared independent majors and must approve, along with the advisers, any changes in the program. A grade of 2.0 or higher is required for all courses in the independent major. If this standard is not met, the student must change immediately to a departmental major.

Honors may be awarded for significant work in the field of the independent major. Criteria are a GPA of 3.8 for the courses in the major or an outstanding senior project (3.7 or 4.0) combined with a 3.5 major average. Honors are determined by the two major advisers and an outside reader/spectator. This third reader should be agreed upon by both the student and the major advisers.
Physical Education Requirement

The Department of Athletics, Physical Education (P.E.), and Recreation (the Department) affirms the College’s long standing commitment to excellence in all areas of growth and development. The Department’s current programming allows opportunities to promote self-awareness, confidence, skill development, and habits that contribute towards a healthy lifestyle. Specific curricula towards this mission, through Intercollegiate Athletics, Physical Education, Wellness, and Recreation, are designed to educate the current student and enhance the quality of campus life.

First-year students

Students matriculating on or after August 2011 are required to complete 6 P.E. credits through the Department. Students will complete 3 P.E. credits through what are considered the core requirements. Students must complete THRIVE, the first-year wellness program, during their first Fall semester at Bryn Mawr. They must also complete the swim proficiency requirement by either passing the swim proficiency test or by completing a swim class at Bryn Mawr College. The remaining 3 P.E. credits will be completed through the general requirements. These may be satisfied by P.E. classes, dance classes (provided they’re not taken for academic credit), varsity athletics (annual max), participation in a club sport (annual max), P.E. classes in special topics, and independent study (by prior approval only). Students are expected to complete all aspects of the P.E. requirement before Spring Break of their sophomore year. Failure to meet these expectations will affect a student’s position in the following year room draw, may affect their eligibility for study abroad, and will be reported to the Dean’s office.

McBride and Transfer Students

For the purposes of the P.E. requirement, McBride students are treated as either sophomore or junior transfer students, depending on their academic status. All transfers must complete the swim proficiency requirement by either completing the swim proficiency test or by completing a swim class at Bryn Mawr College. Sophomore transfer students must also complete 3 credits of P.E. from the general requirements. Junior transfer students must complete 1 credit of P.E. from the General Requirements. For specifics on credit allocation and polices regarding what programs satisfy P.E. requirements, students and advisors are encouraged to reference the Physical Education Website: http://athletics.brynmawr.edu/information/physical_education/requirements#mcbride.

Residency Requirement

Each student must complete six full-time semesters and earn a minimum of 24 academic units while in residence at Bryn Mawr. These may include courses taken at Haverford and Swarthmore Colleges and the University of Pennsylvania during the academic year. Exceptions to this requirement for transfer students entering as second-semester sophomores or juniors are considered at the time of matriculation.

The senior year must be spent in residence. Seven of the last 16 units must be earned in residence. Students do not normally spend more than the equivalent of four years completing the work of the A.B. degree.

Exceptions

All requests for exceptions to the above regulations are presented to the Special Cases Subcommittee of the Committee on Academic Standing for approval. Normally, a student consults her dean and prepares a written statement to submit to the Committee.

Eligibility to Participate in Commencement Ceremony

A student must have completed all degree requirements to be awarded the A.B. Donning full academic regalia (robe, mortarboard and hood) and being called to the stage at Commencement signify that a student has completed all degree requirements. These honors are therefore reserved, without exception, for only those students who have completed all degree requirements.

Members of the graduating class who have not yet completed all degree requirements are invited to participate in Senior Week activities with their classmates (or postpone until the year that they graduate), to don the robe to participate in Convocation, and to attend Commencement as audience members. They are further invited to return to participate fully in Commencement in a future year once their degree requirements are complete.

ACADEMIC REGULATIONS

Registration

Each semester, all Bryn Mawr students preregister for the next semester’s courses in consultation with their deans or faculty advisers. Once a student has selected a major, the student must consult the major adviser; prior to that, the student consults the dean. Failure to preregister means a student is excluded from any necessary enrollment lotteries.

Students must then confirm their registration on the announced days at the beginning of each semester according to the procedures published on the Dean’s Office website.

Students normally carry a complete program of four courses (four units) each semester. Requests for exceptions must be presented to the student’s dean or, in the case of an accommodation for a disability, arranged through the Access Services Office. Students may not register for more than five courses (five units) per semester. Requests for more than five units are
Credit/No Credit Option

A student may take four units over four years, not more than one in any semester, under the Credit/No Credit (CR/NC) option. A student registered for five courses is not permitted a second CR/NC registration.

Transfer students may take one CR/NC unit for each year they spend at Bryn Mawr, based on class year at entrance.

A student registered for a course under either the graded or the CR/NC option is considered a regular member of the class and must meet all the academic commitments of the course on schedule. The instructor is not notified of the student’s CR/NC registration because this information in no way affects the student’s responsibilities in the course.

Faculty members submit numerical grades for all students in their courses. For students registered CR/NC, the registrar converts numerical grades of 1.0 and above to CR and the grade of 0.0 to NC. Numerical equivalents of CR grades are available to each student from the registrar, but once the CR/NC option is elected, the grade is converted to its numerical equivalent on the transcript only if the course becomes part of the student’s major.

When a course is taken under the CR/NC option, the grade submitted by the faculty member is not factored into the student’s grade point average. However, that grade is taken into consideration when determining the student’s eligibility for magna cum laude and summa cum laude distinctions.

Students may not take any courses in their major under the CR/NC option, but they may use it to take courses towards the Emily Balch Seminar, Quantitative Readiness, Quantitative and Mathematical Reasoning, Distribution or Foreign Language Requirements. While all numerical grades of 1.0 or better will be recorded on the transcript as CR, the registrar will keep a record of whether the course meets the 2.0 minimum needed to count towards a requirement. It is the student’s responsibility to consult the Academic Requirements feature of the student’s Student Center in BIONIC to determine whether a course the student took CR/NC has satisfied a particular requirement.

Students wishing to take a semester-long course CR/NC must sign the registrar’s register by the end of the sixth week of classes. The deadline for half-semester courses is the end of the third week of the half-semester. No student is permitted to sign up for CR/NC after these deadlines. Students who wish to register for CR/NC for year-long courses in which grades are given at the end of each semester must register CR/NC in each semester because CR/NC registration does not automatically continue into the second semester in those courses. Haverford students taking Bryn Mawr courses must register for CR/NC at the Haverford Registrar’s Office.

Course Options

Most departments allow students to pursue independent study as supervised work, provided that a professor agrees to supervise the work. Students pursuing independent study usually register for a course in that department numbered 403 and entitled “Supervised Work,” unless the department has another numerical designation for independent study. Students should consult with their deans if there are any questions regarding supervised work.

Students may audit courses with the permission of the instructor, if space is available in the course. There are no extra charges for audited courses, and they are not listed on the transcript. Students may not register to take the course for credit after the stated date for Confirmation of Registration.

Some courses are designated as limited enrollment. BIONIC provides details about restrictions. If consent of the instructor is required, the student is responsible for securing permission. If course size is limited, the final course list is determined by lottery. Only those students who have preregistered for a course will be considered for a lottery.

Students who confirm their registration for five courses may drop one course through the third week of the semester. After the third week, students taking five courses are held to the same standards and calendars as students enrolled in four courses.

No student may withdraw from a course after confirmation of registration, unless it is a fifth course dropped as described above. Exceptions to this regulation may be made jointly by the instructor and the appropriate dean only in cases when the student’s ability to complete the course is seriously impaired due to unforeseen circumstances beyond her control. The decision to withdraw from a Bryn Mawr course must take place before the final work for the course is due. If the course is at Haverford College, Haverford’s deadlines apply.

Half-Semester Courses

Some departments offer half-credit, half-semester courses that run for seven weeks on a normal class schedule. These courses, which are as in-depth and as fast-paced as full semester courses, provide students with an opportunity to sample a wider variety of fields and topics as they explore the curriculum (see Focus Courses in “Academic Opportunities”). Note that half-semester courses follow registration deadlines that differ slightly from full semester courses.
Cooperation with Neighboring Institutions

Students at Bryn Mawr may register for courses at Haverford, Swarthmore and the University of Pennsylvania during the academic year without payment of additional fees according to the procedures outlined below. This arrangement does not apply to summer programs. Credit toward the Bryn Mawr degree (including the residency requirement) is granted for such courses with the approval of the student's dean, and grades are included in the calculation of the grade point average. Bryn Mawr also has a limited exchange program with Villanova University.

Virtually all undergraduate courses at Haverford College are fully open to Bryn Mawr students. Students register for Haverford courses in exactly the same manner as they do for Bryn Mawr courses, and throughout most of the semester will follow Bryn Mawr procedures. If extensions beyond the deadline for written work or beyond the exam period are necessary, the student must be in compliance with both Bryn Mawr and Haverford regulations.

Many Swarthmore courses are open to Bryn Mawr students in good academic standing, but on a space-available basis. To register for a Swarthmore course the student must obtain the instructor's signature on a Swarthmore registration form. The student submits a copy of the Swarthmore form to the Swarthmore registrar's office in Parrish Hall and a copy of the form to the Bryn Mawr registrar's office.

Bryn Mawr students in good academic standing may register for up to two courses per semester at the University of Pennsylvania on a space-available basis, provided that the course does not focus on material that is covered by courses at Bryn Mawr or Haverford. Scheduling problems are not considered an adequate reason for seeking admission to a course at Penn. These courses will normally be liberal arts courses offered by the College of Arts and Sciences. However, over one's time at Bryn Mawr, a student may count towards the degree up to four courses taught outside the College of Arts and Sciences at the University of Pennsylvania. To ensure that students spend their first two years exploring the liberal arts curriculum, gaining breadth, and preparing for a major, students will enroll in no such courses during the first year of study and no more than one such course in the sophomore year. These courses must be taken during the fall or spring semesters; summer courses are excluded.

Complete information on the process of requesting and registering for a Penn course is available on the Bryn Mawr Registrar's website. Bryn Mawr students must meet all Penn deadlines for dropping and adding courses and must make arrangements for variations in academic calendars. Note that Bryn Mawr students cannot shop Penn classes. Students should consult their deans or the Bryn Mawr registrar's office if they have any questions about Penn courses or registration procedures.

Bryn Mawr juniors and seniors in good academic standing may take one course per semester in the College of Arts and Sciences at Villanova University on a space-available basis, provided that the course is not offered at Bryn Mawr or Haverford. If the course is fully enrolled, Bryn Mawr students can be admitted only with the permission of the Villanova instructor. This exchange is limited to superior students for work in their major or in an allied field. Students must have permission of both their major adviser and their dean.

Courses at Villanova may be taken only for full grade and credit; Bryn Mawr students may not elect Villanova's pass/fail option for a Villanova course. Credits earned at Villanova are treated as transfer credits; students must earn grades of C or better to transfer Villanova courses, the grades are not included in the student's grade point average, and these courses do not count toward the residency requirement.

In order to register for a course at Villanova, students should consult the Villanova Course Guide, and obtain a registration form to be signed by the major adviser and returned to the Dean's Office. The Dean's Office forwards all registration information to Villanova; students do not register at Villanova. Students enrolled in a course at Villanova are subject to Villanova's regulations and must meet all Villanova deadlines regarding dropping/adding, withdrawal and completion of work. It is the student's responsibility to make arrangements for variations in academic calendars. Students should consult their deans if they have any questions about Villanova courses or registration procedures.

Bryn Mawr students enrolled in courses at Swarthmore, the University of Pennsylvania, or Villanova are subject to the regulations of these institutions. Students are responsible for informing themselves and remaining in compliance with these regulations as well as with Bryn Mawr regulations.

Conduct of Courses

Regular attendance at classes is expected. Responsibility for attendance—and for learning the instructor's standards for attendance—rests solely with each student. Absences for illness or other urgent reasons will normally be excused. Students are responsible for contacting their instructors and, if necessary, their dean in a timely fashion to explain an absence. Students should consult their instructors about making up the work. If it seems probable to the dean that a student's work may be seriously hindered by the length of an absence, the dean may require the student to withdraw from a course or from the entire semester.

Quizzes, Examinations and Extensions

Announced quizzes—written tests of an hour or less—are given at intervals throughout most courses. The number of quizzes and their length are determined by the instructor. Unannounced quizzes may also be
included in the work of any course. If a student is absent without previous excuse from a quiz, the student may be penalized at the discretion of the instructor. The weight is decided by the instructor. If a student has been excused from a quiz because of illness or some other emergency, a make-up quiz is often arranged.

An examination is required of all students in undergraduate courses, except when the work for the course is satisfactorily tested by other means. If a student fails to appear at the proper time for a self-scheduled, scheduled or deferred examination, or fails to return a take-home exam, the student is counted as having failed the examination.

A student may have an examination deferred by the student’s dean only in the case of illness or some other emergency. When the deferral means postponement to a date after the conclusion of the examination period, the student must ordinarily take the examination at the next Deferred Examination Period.

Within the semester, the instructor in each course is responsible for setting the date when all written reports, essays, critical papers and laboratory reports are due. The instructor may grant permission for extensions within the semester; the written permission of the dean is not required. Instructors may ask students to inform their dean of the extension or may themselves inform the dean that they have granted an extension.

Two deadlines are important to keep in mind when planning for the end of the semester. Assignments due during the semester proper must be handed in by 5 p.m. on the last day of written work, which is the last day of classes. Final exams or final papers written in lieu of exams must be handed in by 12:30 p.m. on the last day of the exam period. Note that the exam period ends earlier for seniors. These deadlines are noted on the Registrar’s website.

During the course of the semester, if a student is unable to complete the work for reasons the student cannot control, the student should contact the professor in advance of the deadline, if at all possible, to request an extension. Extensions are generally not given after a deadline has already passed.

Requests for extensions that go into the exam period or beyond involve conversations between the student, professor, and dean. A student should contact both her professor and her dean before the due date of the assignment in question. The dean and the professor must agree to all terms of the extension. Normally, the dean will support such an extension only if the delay results from circumstances beyond a student's control, such as illness or family or personal emergency. Once the terms of the extension are agreed upon, the dean fills out an extension form, which is then submitted to the registrar.

If the instructor has not received a student's work by the end of the exam period, the instructor will submit a grade of Incomplete if an extension has been agreed upon. An Incomplete is a temporary grade. Once the student submits her work, the Incomplete will be replaced by the numerical grade which is the student’s final grade in the class.

If a student does not meet the date set in her extension, and does not request and receive a further extension, the instructor is required to submit a final grade. When official extensions are not received by the registrar from the dean, and the instructor submits a grade of Incomplete or fails to submit a grade, that grade is temporarily recorded on the transcript as an Unauthorized Incomplete. No grade, except a failure, can be recorded in place of an Unauthorized Incomplete without an extension or other appropriate action taken jointly by the student's dean and instructor.

Seniors must submit all written work and complete exams by 5 p.m. on the Saturday before senior grades are due in the Registrar’s Office. Extensions beyond that deadline cannot be granted to any senior who expects to graduate that year.

Specific dates for all deadlines are published and circulated by the registrar. It is the student's responsibility to inform herself of these dates

Once reported to the registrar, a grade may be altered by the faculty member who originally submitted the grade, or by the department or program chair on behalf of the absent faculty member, by submitting a change-of-grade form with a notation of the reason for the change. Once reported to the registrar, no grade may be changed after one year except by vote of the faculty.

**Repeating Courses**

With the permission of the instructor, a student who fails a course may enroll in it a second time. The initial enrollment and failing grade remain on the student’s transcript and count towards the overall GPA.

In extraordinary circumstances, a student who receives a grade of 1.0, 1.3 or 1.7 may repeat the course after receiving the permission of the Special Cases
Committee. The student would receive unit of credit for the first attempt only. However, both grades would count toward the overall GPA. With the permission of the Committee, a student may repeat up to two courses, and not more than one in any semester.

Satisfactory Academic Progress

The following guidelines regarding satisfactory academic progress meet the standards set by the Faculty of Bryn Mawr College and those mandated by the Department of Education.

1. Qualitative Measures for Satisfactory Progress toward the Degree: Academic Standard of Work

At the close of every semester, the Committee on Academic Standing (CAS) reviews the records of all students who have failed to meet the college’s academic standard of work. The record of any student who has received a grade below 2.0 in a course might be reviewed (see below). Upon review, students must meet the requirements set by CAS in order to regain good standing at the college.

The Merit Rule requires that a student attain grades of 2.0 or higher in at least one half of the total number of courses taken while at Bryn Mawr. Courses from which the student has withdrawn are not considered. Covered grades for courses which the student elects to take Credit / No Credit are considered. The student may be excluded from the College at the close of any semester in which the student has failed to meet this requirement and is automatically excluded if more than one-half of the student’s work falls below 2.0 at the close of the student’s junior year. A student who is excluded from the College is not eligible for readmission.

The Standard of Work in the Major requires that every student working for an A.B. degree maintain grades of 2.0 or higher in all courses in the major subject. No student may choose as the major subject one in which the student has received a grade below 1.0 or one in which the student’s average is below 2.0. A student receiving a grade below 2.0 in any course in the major subject (including a course taken at another institution) is reported to the Committee on Academic Standing. After consulting with the student’s major department, the Committee may require the student to change the major. At the end of the junior year, a student having a major subject average below 2.0 must change the major. If the student has no alternative major, the student is excluded from the College and is not eligible for readmission.

Repeated Failure: A student who has incurred a grade of 0.0 or NC following a previous 0.0 or NC will be reported to the Committee on Academic Standing.

Deterioration of Work: A student whose work meets these specific standards but whose record has deteriorated (for example, who has earned two or more grades below merit) will be reported to the Committee on Academic Standing.

2. Quantitative Measures for Satisfactory Progress toward the Degree

Students may request exceptions to these quantitative measures by petitioning their deans or the Special Cases Subcommittee of the Committee on Academic Standing. Only the records of those students who fail to meet these standards or to secure an exception will be reviewed at the close of the semester by the Committee on Academic Standing (CAS). Upon review, students must meet the requirements set by CAS in order to regain good standing at the college.

Units:

Thirty-two units are required to complete the A.B. degree. Students normally carry a complete program of four courses (four units) each semester and are expected to complete the full-time course of study in eight enrolled semesters. A student may register for 3.0, 3.5, 4.5 or 5.0 units per semester with the approval of the student’s dean. To enroll in 5.5 units, the student must also secure the permission of the Special Cases Subcommittee of the Committee on Academic Standing.

Pace:

Full-time students must earn a minimum of fifteen units before the start of the junior year. These units may include transfer credits. At the end of the second, third or fourth semester, students who are unable to present to their dean a viable plan to meet this expectation must petition the Special Cases Subcommittee of the Committee on Academic Standing for an exception. Students who are not granted an exception will be brought to the attention of the Committee on Academic Standing.

All students must be on pace to complete the A.B. degree within 150% of the standard thirty-two units. To meet these guidelines, students must complete at least 67% of all courses attempted in any single semester and at least 67% cumulatively. Courses in which a student has earned the following grades for any reason, including non-attendance, will count as units attempted but not completed: W (withdrawal), 0.0 (failure), NC (a failure earned in a course taken credit / no credit), or NGR (no grade). Officially dropped and unofficially audited courses count as neither units attempted nor completed. Courses in which a student has earned a grade of UI (unauthorized incomplete) or I (incomplete) will not be counted as a unit attempted until the final grade has been assigned. These standards apply to students enrolled in dual degree programs. The maximum timeframe for a transfer student may not exceed 150% of the thirty-two units minus the number of units accepted for transfer at the point of matriculation. Students who are unable to meet this expectation may petition their dean for an exception.

Acceptance into a Major Program:

By the end of the sophomore year, every student must have declared a major. At the end of the
fourth semester, any student who has failed to meet this expectation must petition the Special Cases Subcommittee of the Committee on Academic Standing for an exception. Students who are not granted an exception will be brought to the attention of the Committee on Academic Standing.

Completion of requirements:

Before the start of the sophomore year, all students must have completed the Emily Balch Seminar Requirement. At the end of the second semester, any student who has failed to meet this expectation must petition the Special Cases Subcommittee of the Committee on Academic Standing for an exception. Students who are not granted an exception will be brought to the attention of the Committee on Academic Standing.

Before the start of the junior year, all students who matriculated in August 2011 or later must have completed the physical education requirement. At the end of the fourth semester, any student who has failed to meet this expectation must petition the Department of Athletics for an exception. Students who are not granted an exception will be brought to the attention of the Committee on Academic Standing.

Before the start of the senior year, all students must have completed all remaining requirements, including the distribution, foreign language and quantitative requirements, and for students who matriculated prior to August 2011, the physical education requirement. At the end of the sixth semester, any student who is unable to present to her dean a viable plan to meet this expectation must petition the Special Cases Subcommittee of the Committee on Academic Standing for an exception. Students who are not granted an exception will be brought to the attention of the Committee on Academic Standing.

3. Procedure: The Committee on Academic Standing (CAS)

At the end of every semester, the Committee on Academic Standing (CAS) reviews the records of all students who have failed to meet the academic standards of the College or to make satisfactory progress towards the degree. A student whose record is reviewed by CAS must meet the requirements set by CAS in order to regain good standing at the college.

Each student whose record is reviewed will receive an official letter from the Dean of Studies on behalf of the Committee which lays out an academic plan and specifies the standards the student must meet by the end of the following semester or before returning to the College. In addition, the Committee may place restrictions upon a student's course load or course selection. The student's parent(s) or guardian(s) will be notified that the student's record has been reviewed by the Committee and informed of any resulting change in student status.

Any student previously in good standing whose record has been reviewed will be put on academic warning or major subject warning the following semester, or the semester of the student's return if the student has been required to withdraw. If the student receives financial aid, the student will also receive a financial aid warning. While on academic or major subject warning, the student will be required to meet regularly with the student's dean and the student's instructors will be asked to submit mid-semester reports regarding the student's work. If the student meets the standards specified by the committee, the student regains good standing. If the student fails to meet the standards, the student may appeal to CAS for permission to return on academic probation or major subject probation (and, if appropriate, for a semester of financial aid probation). The student's appeal should specify the reasons the student failed to make satisfactory academic progress (such as health issues, family crises, or other special circumstance) and the changes that have taken place that ensure that the student can make satisfactory progress in the upcoming semester. The student may supply documentation to support the appeal.

Any student whose record is reviewed by CAS or who appeals to CAS to return on academic probation or major subject probation may be required to withdraw from the College and present evidence that she can do satisfactory work before being readmitted on probation. A withdrawn student may not register for classes at the College until she has been readmitted. The CAS may also recommend to the president that the student be excluded from the College. An excluded student is not eligible for readmission to the College.

4. Readmission process for students who have been required to withdraw

Students who have been required by the CAS to withdraw may apply to return on probation when they have met the expectations set by the CAS and can demonstrate they are ready to do satisfactory work at the college. Students who hope to return in September must submit a re-enrollment application and all supporting materials by May 1. Those who hope to return in January must submit their application and materials by November 1. Re-enrollment applications are reviewed by CAS in June and in December.

Cumulative Grade Point Averages

In calculating cumulative grade-point averages, grades behind CR, NC or NNG are not included. Summer school grades from Bryn Mawr earned on this campus are included, as are summer school grades earned from the Bryn Mawr programs at Avignon. No other summer school grades are included. Term-time grades from Haverford College, Swarthmore College and the University of Pennsylvania earned on the exchange are included. Term-time grades transferred from other institutions are not included.
Distinctions
The A.B. degree may be conferred cum laude, magna cum laude and summa cum laude.

Cum laude
All students with cumulative grade point averages of 3.40 or higher, calculated as described above, are eligible to receive the degree cum laude.

Magna cum laude
To determine eligibility for magna cum laude, grade point averages are recalculated to include grades covered by CR, NC and NNG. All students with recalculated grade point averages of 3.60 or higher are eligible to receive the degree magna cum laude.

Summa cum laude
To determine eligibility for summa cum laude, grade point averages are recalculated to include grades covered by CR, NC and NNG. The 10 students with the highest recalculated grade point averages in the class receive the degree summa cum laude, provided their recalculated grade point averages equal or exceed 3.80.

Credit for Work Done Elsewhere
All requests for transfer credit are approved by the Registrar. The following minimal guidelines are not exhaustive. To ensure that work done elsewhere will be eligible for credit, students must obtain approval for transfer credit before enrolling. These guidelines apply to all of the specific categories of transfer credit listed below.

- Only liberal arts courses taken at accredited four-year colleges and universities will be considered for transfer.
- Four semester credits (or six quarter credits) are equivalent to one unit of credit at Bryn Mawr.
- A minimum grade of 2.0 or C or better is required for transfer. Grades of C minus or “credit” are not acceptable.
- No on-line, correspondence, or distance learning courses, even those sponsored by an accredited four-year institution, are eligible for transfer.
- The Registrar cannot award credit without the receipt of an official transcript from the outside institution recording the course completed and the final grade.

To count a transferred course towards a College requirement (such as an Approach), students must obtain prior approval from their dean, the Registrar, and the Special Cases Committee.

Domestic study away: Students who wish to receive credit for a semester or a year away from Bryn Mawr as full-time students at another institution in the United States must have the institution and their programs approved in advance by their dean, major adviser, the registrar, and other appropriate departments. Students with citizenship outside the United States may also be eligible to have a period of study at a university in their home country considered domestic study away.

Domestic Summer Work: Students who wish to receive credit for summer school work at an institution in the United States must have the institutions, their programs and the courses they will take approved in advance by the Registrar. Students must present to the Registrar an official transcript within one semester of completion of the course. A total of no more than four units earned in summer school may be counted toward the degree; of these, no more than two units may be earned in any one summer.

Study Abroad: Bryn Mawr maintains a list of approved programs and accepts credit from more than seventy programs and universities in over thirty countries. Students, who plan to study abroad during the academic year, must obtain the approval of the Study Abroad Committee in addition to that of their deans, major advisers, Registrar, and other appropriate departments. Students must enroll in a normal full-time (15-16 credits) program at their study abroad program.

Summer Study Abroad: Students must obtain pre-approval of the institutions/programs and the courses they wish to take abroad for credit. Students must request an official transcript from the summer study abroad program to be sent to the Registrar within one semester of completion of the course(s). Students who participate in a Bryn Mawr summer program (e.g., Institut d’Etudes Francaises d’Avignon, Russian Language Institute, and International Summer School in China) do not need to obtain pre-approval for their courses. A total of no more than four units earned in summer school may be counted toward the degree; of these, no more than two units may be earned in any one summer.

Work done prior to matriculation: Students may receive up to four units of transfer credit for courses taken at a college prior to graduation from secondary school. The courses must have been taught on the college campus (not in the high school) and have been open to students matriculated at that college. The courses cannot have been counted toward secondary school graduation requirements. These courses may include those taken at a community college. In all other respects, requests for transfer credit for work done prior to secondary school graduation are subject to the same provisions, procedures and limits as all other requests for transfer credit.

Transfer Students: Students who transfer to Bryn Mawr from another institution may transfer a total of eight units. These courses may include those taken at a community college. Exceptions to the eight unit limit for second-semester sophomores and for juniors are considered at the time of the student’s
A medical leave of absence, students must authorize from the College in good standing. To be eligible for a leave of absence from their dean and, if approved, withdraw conditions may apply for a one- or two-semester leave. At any time, students with medical and/or psychological leaves of absence chooses not to return to the College after two semesters, the student's status changes to “Withdrawn” (see Voluntary Withdrawal below).

A student on a semester-long leave of absence who chooses not to return at the scheduled time may ask to visit Haverford or Bryn Mawr without prior permission. While Withdrawn or on Leave Students who are on a leave of absence are advised not to visit Haverford or Bryn Mawr without prior permission from the student's dean. Failure to abide by this advice may compromise a student’s eligibility to return to the College.

Returning to the College Students who withdraw for any reason or are placed on a leave of absence must apply for permission to return.
The first step to returning to the college is for the student to contact the student's dean to discuss their readiness to return and the application process. The application and instructions are available on the Deans Office website.

If the student is applying to return after an absence due to a medical or mental health leave, the College will require evidence of the student's readiness to resume studies. Evidence may take several forms including: completing coursework elsewhere and/or engagement in a full-time activity such as employment or community service (in which case a letter from the student's supervisor may be requested). The student should ask the medical or counseling professional with whom the student has been working during their leave to be in contact with either the medical director or director of counseling services at the Health Center. The student may also be asked to outline a plan for self-care on return.

Students must submit their application and all supporting documents to their dean no later than May 1 (for return in the fall) or November 1 (for return in the spring).

ACADEMIC OPPORTUNITIES

Minors and Concentrations

Many departments, but not all, offer a minor. Students should see departmental entries for details. The minor is not required for the A.B. degree. A minor usually consists of six units, with specific requirements to be determined by the department. Every candidate for the A.B. degree is expected to maintain grades of 2.0 or above in all courses in the major, minor or concentration. However, if a course taken under the Credit/No Credit (CR/NC) or Haverford College’s No Numerical Grade (NNG) option subsequently becomes part of a student’s minor or concentration but not part of her major, the grade is not converted to its numerical equivalent.

The following is a list of subjects in which students may elect to minor. Minors in departments or programs that do not offer majors appear in italics.

Theater Studies
Visual Studies (at Haverford)

The concentration, which is not required for the degree, is a cluster of classes that overlap the major and focus a student’s work on a specific area of interest:

- Gender and Sexuality Studies
- Geoarchaeology (with a major in Anthropology, Classical and Near Eastern Archaeology, or Geology)
- Latin-American, Latino and Iberian Peoples and Cultures
- Peace, Conflict, and Social Justice Studies

Combined Degree Programs

A.B./M.A. Degree Program

The combined A.B./M.A. program lets the unusually well-prepared undergraduate student work toward a master’s degree while still completing her bachelor’s degree. Students in this program complete the same requirements for each degree as do students who undertake the A.B. and then the M.A. sequentially, but they are able to work toward both degrees concurrently. They are allowed to count up to two courses towards both degrees. A full description of requirements for the
3.0 GPA in all math, science, and engineering courses. Applicants are also encouraged to submit GRE scores. Successful applicants are permitted to take up to three graduate courses at Penn while undergraduates through the Quaker Consortium. These courses would count towards a student’s undergraduate degree and at the discretion of her major department might also count towards a student’s major. Successful applicants may also be eligible to participate in Penn’s summer undergraduate research program.

Upon completion of her undergraduate degree, students in the 4+1 Partnership would then matriculate at the University of Pennsylvania and complete her Master’s Degree. Students who had already completed three graduate courses would be able to complete the degree (seven remaining courses) in one year.

Penn Engineering has posted information tailored to prospective 4+1 students on its website. Students interested in this program should consult the 4+1 liaison for their major department, as well as their major adviser. It may be advisable for such students to enroll in one or more introductory engineering courses at Penn during their sophomore year to learn more about engineering and better prepare for graduate level courses.

4+1 Partnership In Bioethics with the University of Pennsylvania

Qualified Haverford and Bryn Mawr undergraduates may apply to gain early and expedited admission as external “submatriculates” to the Master of Bioethics (MBE), an interdisciplinary degree program offered by the Department of Medical Ethics & Health Policy.

3-2 Program in City and Regional Planning with the University of Pennsylvania

This arrangement with the Department of City and Regional Planning at the University of Pennsylvania allows a student to earn an A.B. degree with a major in the Growth and Structure of Cities Program at Bryn Mawr and a degree of Master of City Planning at the University of Pennsylvania in five years. While at Bryn Mawr the student must complete all college-wide requirements and the basis of a major in the Growth and Structure of Cities Program. The student applies to the M.C.P. program at Penn in her junior year. GRE scores will be required for the application. Students are encouraged to prepare for the program by completing both URBS 204 and URBS 440 before entering the program. No courses taken prior to official acceptance into the M.C.P. program may be counted toward the master’s degree, and no more than eight courses may be double-counted toward both the A.B. and the M.C.P. after acceptance. For further information, students should consult the Cities program early in their sophomore year.

Combined Master’s and Teacher Certification Programs at the University of Pennsylvania, Graduate School of Education (GSE )

Bryn Mawr and Haverford students interested in obtaining both the M.S.Ed. degree as well as faculty
Bryn Mawr and Haverford students who submatriculate may take up to two graduate-level education courses at Penn while they are undergraduates (usually during their junior or senior years) that will double count toward both their undergraduate and graduate degrees. To submatriculate into the program, students must have a GPA of a 3.0 or above and a combined GRE score of at least 1000 and must complete an application for admission.

More information about the secondary education and elementary education master’s programs are available on the GSE website.

4+2 Master’s Program in China Studies with Zhejiang University

Taught in English and designed for Bryn Mawr graduates, this two-year master’s program in China Studies includes courses in a range of fields, such as history, economic development and contemporary Chinese Society and Culture. Graduating seniors and recent alumnae/i from all major fields are encouraged to apply. All expenses will be paid by Zhejiang University.

Summer Language Programs

Summer language programs offer students the opportunity to spend short periods of time studying a language, conducting research and getting to know another part of the world well.

Bryn Mawr offers a six-week summer program in Avignon, France. This total-immersion program is designed for undergraduate and graduate students with a serious interest in French language, literature and culture. The faculty of the Institut is composed of professors teaching in colleges and universities in the United States and Europe. Classes are held at the Médiathèque Ceccano and other sites in Avignon; the facilities of the Médiathèque Ceccano as well as the Université d’Avignon library are available to the group. Students are encouraged to live with French families or in student residences. A certain number of independent studios are also available.

Applicants for admission must have strong academic records and have completed a course in French at a third-year college level or the equivalent. For detailed information concerning admission, curriculum, fees, academic credit, and scholarships, students should consult Lisa Kolonay (avignon@brynmawr.edu) and/or visit the Avignon website at www.brynmawr.edu/avignon. For detailed information on the courses offered by the Institut, students should contact Prof. Le Menthéour (rlementheo@brynmawr.edu).

The College also participates in summer programs with American Councils Advanced Russian Language and Area Studies Program (RLASP) in Moscow, St. Petersburg and other sites in Russia. These overseas programs are based at several leading Russian universities and are open to Bryn Mawr students who have reached the intermediate level of proficiency in speaking and reading. Summer programs are 8 weeks in length and provide the equivalent of 2 course units of work in advanced Russian language and culture. Many Bryn Mawr students also take part in the semester (4 units) or academic year (8 units) programs in Russia as well. For further information about American Councils programs, students should consult the Department of Russian or American Councils at www.americancouncils.org.

Bryn Mawr offers an eight-week intensive summer program in Russian language and culture on campus available through the Russian Language Institute (RLI). The program is open to bi-college students as well as to qualified students from other colleges, universities, and high schools.

The Russian Language Institute offers a highly-focused curriculum (6 hours per day) and co-curricular environment conducive to the rapid development of linguistic and cultural proficiency. Course offerings are designed to accommodate a full range of language learners, from the beginner to the advanced learner (three levels total). This highly-intensive program provides the equivalent of a full academic year of Russian to participants who complete the program. Students may use units completed at RLI to advance to the next level of study at their home institution or to help fulfill the language requirement. Most RLI participants elect to reside on-campus at the Russian-speaking residential hall, as part of the overall RLI learning experience.

Study Abroad in the Junior Year

When carefully incorporated into students’ academic careers, study abroad can strengthen students’ language skills, broaden their academic preparation, introduce them to new cultures, and enhance their personal growth and independence. The College has approved approximately 90 programs in colleges and universities in other countries. In addition, students can participate in a domestic exchange at Spelman College through the Bryn Mawr-Spelman Exchange Program. Students who study abroad include majors across the humanities, the social sciences and the natural sciences. In recent years, students studied in Argentina, Australia, Austria, Belgium, Brazil, Chile, China, Costa Rica, Cuba, Denmark, Ecuador, France, Germany, Hungary, Ireland, Italy, Japan, New Zealand, Russia, South Africa, Spain, England, and Scotland.

The Study Abroad Committee is responsible for evaluating applications from all Bryn Mawr students who want to study abroad during the academic year.
as part of their Bryn Mawr degrees. The Study Abroad Committee determines a student’s eligibility by looking at a variety of factors, including the overall and major grade point averages, the intellectual coherence of the study abroad experience with the student’s academic program, the student’s overall progress towards the degree, and faculty recommendations. After careful review of applications, the Committee will notify the student of their decision granting, denying, or giving conditions for permission to study abroad. Only those students whose plans are approved by the Committee will be allowed to transfer credits from their study abroad programs towards their Bryn Mawr degrees.

Students applying for study abroad must be in good academic and disciplinary standing. They are expected to have, and to maintain, a minimum cumulative and major GPA of 3.0 and must be on track to complete College-wide degree requirements. In addition, students must declare a major and complete their major work plan and College-wide requirements plan by the required deadline.

Students with a grade point average below 3.0 should consult the Assistant Dean, Director of International Education regarding eligibility. Most non-English speaking language immersion programs expect students to meet at least intermediate proficiency level in the language of instruction and/or target language before matriculation, and some require more advanced preparation. The student must also be in good disciplinary standing.

Most students may study abroad for one semester only during their academic career. The Committee will consider requests for exceptions to this rule from students majoring in a foreign language and those accepted to Oxford or the London School of Economics, which are yearlong programs for which one semester is not an option. All students interested in study abroad in their junior year must declare their major(s) and complete the Bryn Mawr study abroad application in the Student Service Center in BiONIC by the required deadline stated on the Study Abroad website.

Study abroad students pay Bryn Mawr College tuition regardless of the tuition cost of the study abroad program. The College, in turn, pays the program tuition and academic-related fees directly to the institution abroad. Students are responsible for paying room and board costs and all other fees directly to the program or to the appropriate service provider.

Financial aid for study abroad is available for students who are eligible for assistance and have been receiving aid during their first and sophomore years. If the study abroad budget is not able to support all of those on aid who plan to study abroad, priority will be given to those for whom it is most appropriate academically and to those who have had the least international experience.

Preparation for Careers in Architecture

Although Bryn Mawr offers no formal degree in architecture or a set pre-professional path, students who wish to pursue architecture as a career may prepare for graduate study in the United States and abroad through courses offered in the Growth and Structure of Cities Program. Students interested in architecture and urban design should pursue the studio courses (226, 228) in addition to regular introductory courses. They should also select appropriate electives in architectural history and urban design (including courses offered by the departments of Classical and Near Eastern Archaeology, East Asian Languages and Cultures, and History of Art) to gain a broad exposure to architecture over time as well as across cultural traditions. Affiliated courses in physics and calculus meet requirements of graduate programs in architecture; theses may also be planned to incorporate design projects. These students should consult as early as possible with Senior Lecturer Daniela Voith and the program director in the Growth and Structure of Cities Program.

Preparation for Careers in the Health Professions

The Bryn Mawr curriculum offers courses that meet the requirements for admission to professional schools in medicine, dentistry, physician assistant, veterinary, pharmacy, nursing, and many other areas of health. Each year a significant number of Bryn Mawr graduates enroll in these schools. Most Bryn Mawr students apply to health professions schools following graduation, which is reflective of national trends of students taking time for work or other experiences before enrolling. The minimal requirements for most medical and dental schools include one year of English, one year of biology, one year of general chemistry, one year of organic chemistry, one year of physics, and one semester of biological chemistry; however, several medical and dental schools require one additional semester of upper-level coursework in biology as well as math courses. Schools of veterinary medicine usually require upper-level coursework in biology as well as extensive experience working with a diversity of animal species. Students considering careers in one of the other health professions are strongly encouraged to discuss their plans with the undergraduate health professions adviser in Canwyll House.

International students should be aware that students who are not U.S. citizens or permanent residents comprise less than 1% of the medical school students in the United States. Many medical schools do not accept applications from international students, and schools that do accept international students often require them to document their ability to pay the entire cost of a four-year medical school education. International students are encouraged to contact the undergraduate health professions advisor to discuss the significant challenges faced by international students seeking admission to U.S. medical schools as well as to other health professional schools.

The Health Professions Advising Office publishes the
Guide for First- and Second-Year Students Interested in the Health Professions. This handbook is available at the meeting for first-year students during Customs Week and at the Health Professions Advising Office in Canwyll House. More information about preparing for careers in the health professions, including the Guide for First- and Second-Year Students, is also available at the Health Professions Advising Office website, www.brynmawr.edu/healthpro.

Preparation for Careers in Law
Because a student with a strong record in any field of study can compete successfully for admission to law school, there is no prescribed program of “pre-law” courses. Students considering a career in law may explore that interest at Bryn Mawr in a variety of ways—e.g., by increasing their familiarity with U.S. history and its political process, participating in Bryn Mawr’s well-established student government process, “shadowing” alumn/i lawyers through the Career and Professional Development’s externship program, attending LILAC and CPD law career panels and refining their knowledge about law-school programs in the Pre-Law Club. Students seeking guidance at any point in their career about the law-school application and admission process should consult with the College’s pre-law advisor, Jennifer Beale, at Career and Professional Development. Please email her at jbeale@brynmawr.edu to be added to the prelaw listserv.

Teacher Certification
Students majoring in biology, chemistry, English, French, geology, history, Latin, mathematics, physics, political science, Spanish and a number of other fields that are typically taught in secondary school may get certified to teach in public secondary high schools in Pennsylvania. By reciprocal arrangement, the Pennsylvania certificate is accepted by most other states as well. A student who wishes to pursue teacher certification should consult her dean, the Education Program adviser and the chair of her major department early in her college career so that she may make appropriate curricular plans. Students may also choose to get certified to teach after they graduate through the Bryn Mawr/Haverford Post-Baccalaureate Teacher Education Program. For further information, see the Education Program.

Air Force Reserve Officer Training Corps (AFROTC)
The Department of Aerospace Studies offered through Detachment 750 at Saint Joseph’s University offers college students a one-to-four year curriculum leading to a commission as a Second Lieutenant in the United States Air Force (USAF). In the four-year option, a student (cadet) takes General Military Course (GMC) classes during their freshmen and sophomore years, attends a 3-week summer training program between their sophomore and junior years, and then takes Professional Officer Course (POC) classes during their junior and senior years. Cadets in the three-year option will be dual-enrolled in both GMC classes during their sophomore year, attend a summer training program, and take POC classes during their junior and senior years. Those who begin the program as juniors enroll in the two-year curriculum and attend a four-week summer training program following the spring semester of the junior year. Entering seniors will be in the one-year curriculum and take the remaining half of POC courses followed by a four-week summer training program. A cadet is under no contractual obligation with the USAF until entering the POC or accepting an AFROTC scholarship.

The GMC curriculum focuses on the scope, structure, organization, and history of the USAF with an emphasis on the development of airpower and its relationship to current events. The POC curriculum concentrates on the concepts and practices of leadership and management, and the role of national security forces in American society.

In addition to the academic portion of the curricula, each cadet participates in a two-hour Leadership Laboratory and physical training each week. Leadership Laboratory utilizes the cadet organization designed for the practice of leadership and management techniques.

Further information on the AFROTC program at Saint Joseph’s University can be found at sites.sju.edu/afrotc, or students can contact detachment personnel directly at: Unit Admissions Officer, AFROTC Detachment 750, Saint Joseph’s University, Philadelphia, PA 19131; Phone: 610-660-3190; Email: rotc@sju.edu.

Centers for 21st Century Inquiry
Bryn Mawr’s interdisciplinary centers encourage innovation and collaboration in research, teaching and learning. The two interrelated centers are designed to bring together scholars from various fields to examine diverse ways of thinking about areas of common interest, creating a stage for constant academic renewal and transformation.

Flexible and inclusive, the centers help ensure that the College’s curriculum adapts to changing circumstances and evolving methods and fields of study. Through research and internship programs, fellowships and public discussions, the centers foster links among scholars in different fields, between the College and the world around it, and between theoretical and practical learning.

The Center for the Social Sciences was established to respond to the need for stronger linkages and cooperation among the social sciences at Bryn Mawr College. Uniting all the social sciences under an inclusive umbrella, the center provides opportunities for consideration of broad substantive foci within the fundamentally comparative nature of the social science disciplines, while engaging different disciplinary lenses on a variety of issues.
The Center for Visual Culture is dedicated to the study of visual forms and experience of all kinds, from ancient artifacts to contemporary films and computer-generated images. It serves as a forum for explorations of the visual aspect of the natural world as well as the diverse objects and processes of visual invention and interpretation around the world.

Continuing Education Program
The Continuing Education Program provides highly qualified women, men, and high-school students who do not wish to undertake a full college program leading to a degree the opportunity to take courses at Bryn Mawr College on a fee basis, prorated according to the tuition of the College, space and resources permitting. Students accepted by the Continuing Education Program may apply to take up to two undergraduate courses or one graduate course per semester; they have the option of auditing courses or taking courses for credit. Alumnae/i who have received one or more degrees from Bryn Mawr (A.B., M.A., M.S.S., M.L.S.P. and/or Ph.D.) and women and men over 65 years of age are entitled to take undergraduate courses for credit at the College at a special rate. This rate applies only to continuing-education students and not to matriculated McBride Scholars. Continuing-education students are not eligible to receive financial aid from the College. For more information or an application, go to www.brynmawr.edu/academics/continuing_ed.shtml.

Katharine E. McBride Scholars Program
The Katharine E. McBride Scholars Program serves women beyond the traditional college-entry age who wish to earn an undergraduate degree at Bryn Mawr. The program admits women who have demonstrated talent, achievement and intelligence in various areas, including employment, volunteer activities and home or formal study.

Once admitted to the College, McBride scholars are subject to the residency rule, which requires that a student take a minimum of 24 course units while enrolled at Bryn Mawr. Exceptions will be made for students who transfer more than eight units from previous work. Such students may transfer up to 16 units and must then take at least 16 units at Bryn Mawr. McBride Scholars may study on a part-time or full-time basis. For more information or an application, visit the McBride Program website at www.brynmawr.edu/mcbride or call (610) 526-5152.

Postbaccalaureate Premedical Program
The Postbaccalaureate Premedical Program at Bryn Mawr College was established in 1972 and is designed for men and women who are highly motivated to pursue a career in medicine yet have not completed the science prerequisite coursework necessary for applying to medical school. It is an intensive 12-month, full-time program for up to 80 students per year. Students in the program range in age and reflect diverse backgrounds in terms of their education and experience. In addition to their coursework, postbac students engage in volunteer work in the community and participate with undergraduates in health-related interest programming. Applications should be submitted as early as possible during our application season because decisions are made on a rolling basis and the postbac program is highly selective. Please visit www.brynmawr.edu/postbac for complete information about the program.

Students enrolled in the postbac program may elect to forgo the traditional application process to medical and dental school in favor applying through linkage programs. Those accepted through linkage enter medical or dental school in the August immediately after completing their postbaccalaureate year. Otherwise, students apply to medical school after completing their postbaccalaureate studies and matriculate one year later.

The Emily Balch Seminars
Director: Gail Hemmeter, Department of English

The Emily Balch Seminars introduce all first-year students at Bryn Mawr to a critical, probing, thoughtful approach to the world and our roles in it. The seminars are named for Emily Balch, Bryn Mawr Class of 1889. She was a gifted scholar with a uniquely global perspective who advanced women’s rights on an international level and who, in 1946, was awarded the Nobel Prize for Peace.

These challenging seminars are taught by scholar/teachers of distinction within their fields and across academic disciplines. They facilitate the seminars as active discussions among students, not lectures. Through intensive reading and writing, the thought-provoking Balch Seminars challenge students to think about complex, wide-ranging issues from a variety of perspectives.

While books and essays are core texts in the Balch Seminars, all source materials that invite critical interpretation and promote discussion and reflection may be included—films, performances, material objects, research surveys and experiments, or studies of social practices and behavior.

The seminars are organized around fundamental questions in contemporary or classical thought that students will inevitably address in their lives, regardless of the majors they elect at Bryn Mawr or the profession or career they pursue after graduating. Seminar topics vary from year to year.

An important goal of the seminars is to give students instruction and practice in writing as a flexible tool of inquiry and interpretation. Students can expect to write
formal and informal assignments weekly during the semester. Students also meet one-on-one with their teachers every other week outside of class to discuss their written work and their progress in becoming a critical thinker.

In the Balch Seminars, students form a tightly knit, collaborative learning community that will serve as a model for much of their intellectual life at Bryn Mawr, both in and out of the classroom. As a result, students will enrich their educational experience in whatever fields of knowledge they pursue at Bryn Mawr, and be better prepared for a more reflective and critical life in a complex and changing world beyond college.

For more information and a list of current courses, visit www.brynmawr.edu/balch/.

360º

360º creates an opportunity for students to participate in a cluster of multiple courses that connect students and faculty in a single semester (or in some cases across contiguous semesters) to focus on common problems, themes, and experiences for the purposes of research and scholarship.

Interdisciplinary and interactive, the 360º Program builds on Bryn Mawr’s strong institutional history of learning experiences beyond the traditional classroom, placed within a rigorous academic framework.

360º is a unique academic opportunity that is defined by the following five characteristics:

1. 360º offers an interdisciplinary experience for students and faculty.

   Reflecting the fact that many interesting questions are being explored at the edges or intersections of fields, each cluster of courses in the 360º Program emphasizes interdisciplinary, multidisciplinary or transdisciplinary coursework. 360º clusters may involve two or more courses bridging the humanities and the natural and social sciences; collaborations within each broad division, or even two or more courses within the same department with very different subfields. What is central is that these courses engage problems using different approaches, theories, prior data and methods.

2. 360º is unified by a focused theme or research question.

   These unifying themes can be topics that cut across disciplines such as “poverty,” refer to a particular space or time like “Vienna at the turn of the 20th century,” or define a complex research question, such as the impact of Hurricane Katrina in the city of New Orleans.

3. 360º engages students and faculty in active and interactive ways through experiential learning.

   Essential to the 360º Program is a component beyond traditional classroom walls. This could occur through data gathering or research trips, praxis-like community based partnerships, artistic productions, and/or intensive laboratory activity.

4. 360º will encourage students and faculty to reflect on these different perspectives in explicit ways.

   Over their course of study, students often informally put together a set of related courses. The 360º Program makes these connections explicit and explored reflectively among faculty and fellow students.

5. 360º participants enrich the entire community by sharing their work in some form.

   All 360º participants will share their experiences through such activities as poster sessions, research talks, web postings, panel discussions and/or sharing of data, research, visuals etc. Materials produced in a 360º cluster are archived for later use by others within the College community.

For more information and a list of current and upcoming clusters, visit www.brynmawr.edu/360/.

Focus Courses

Focus Courses are 7-week long, half-semester courses that provide students with an opportunity to sample a wider variety of fields and topics as they explore the curriculum. While some Focus Courses have been designed to whet the appetite for further study, several upper level topics lend themselves to a more in-depth, shorter experience. Focus courses are as rigorous and fast-paced as full semester courses and are used to experiment and engage with more of Bryn Mawr’s stellar academic offerings.

Athletics and Physical Education

Administration

Kathleen Tierney, Director of Athletics and Physical Education
Katie Tarr, Associate Director of Athletics/Senior Woman’s Administrator
MaryAnn Schiller, Assistant Director of Athletics
Travis Galaska, Athletics Communication Director
Courtney Morris, Head Strength and Conditioning Coach and Fitness Center Director

Faculty

Kelly Barnes, Lecturer and Head Lacrosse Coach
Carol Bower, Senior Lecturer and Head Rowing Coach
Victor Brady, Lecturer and Head Field Hockey Coach
Jason Hewitt, Lecturer and Head Coach of Cross Country and Indoor and Outdoor Track and Field, Athletics and Physical Education
Laura Kemper, Lecturer and Assistant Athletic Trainer, Athletics and Physical Education
The Department of Athletics and Physical Education sponsors 12 intercollegiate sports in badminton, basketball, crew, cross country, field hockey, indoor and outdoor track and field, lacrosse, soccer, swimming, tennis and volleyball. Bryn Mawr is a NCAA Division III member and a charter member of the Centennial Conference. Club sport opportunities are available in a range of sports; including rugby, equestrian, fencing, karate, ice-skating, squash, and Ultimate Frisbee. Students interested in any of these programs should consult the Department of Athletics at: http://athletics.brynmawr.edu/landing/index.

Bryn Mawr’s Physical Education curriculum is designed to provide opportunities to develop lifelong habits that will enhance the quality of life. From organized sport instruction, to a variety of dance offerings, lifetime sport skills, fitness classes, and a wellness curriculum, the Department provides a breadth of programming to meet the needs of the undergraduate and the greater College community. The physical education and dance curriculums offer more than 50 courses in a variety of disciplines. Students can also enroll in physical education classes at Swarthmore and Haverford Colleges.

All students must complete a physical education requirement (as determined by their year of entry into the college), including a swim-proficiency requirement, and a first-year wellness class, THRIVE.

Developed by the Department of Physical Education, the Health Center, Student Life offices and the Dean’s Office, THRIVE is a 10-week, non-graded class that focuses on a variety of issues confronting college students. The course is mandatory for all first-year students and fulfills two physical education credits. The curriculum is designed to be interactive and to provide a base of knowledge that will encourage students to think about their wellbeing as an essential complement to their academic life. The course will be taught by College faculty and staff from various disciplines and offices.

The renovated Bern Schwartz Fitness and Athletic Center has quickly become the place to be since reopening in September 2010. The 11,500 sq. ft. fitness center boasts more than 50 pieces of cardio equipment and 15 selectorized weight machines. The fitness center has over 100 different workout options, including drop-in classes, free weights, indoor cycling bicycles, and cardiovascular and strength training machines.

The building hosts two courts in the Class of 1958 Gymnasium, an eight-lane pool, a fitness center with varsity weight training area, an athletic training room, locker rooms, a conference smart room and the Department of Athletics and Physical Education offices. The fitness center is located on the second floor directly up the circular staircase as you enter the Bern Schwartz Fitness and Athletic Center. For more information please consult http://athletics.brynmawr.edu/information/facilities/index.

The outdoor athletics and recreation facilities include two varsity athletics playing fields, seven tennis courts and two fields for recreational and club sport usage. The Shillingford and Applebee Fields are home to the College’s field hockey, soccer and lacrosse programs. In the fall of 2011 the College completed construction on Applebee, converting it from natural grass to a NCAA regulation sized synthetic field.

**Praxis Program**

The Praxis Program, one of the programs offered through the Leadership, Innovation and Liberal Arts Center (LILAC), promotes the development of experiential learning and ethical engagement with community-based organizations and issues in connection with the Bryn Mawr academic curriculum. The program provides consistent, equitable guidelines along with curricular coherence and support to students and faculty who wish to combine coursework with fieldwork and community-based research. Praxis Program staff assist faculty in identifying, establishing and supporting field placements in a wide variety of organizations, such as public health centers, community art programs, museums, community-development and social service agencies, schools, and local government offices. The three designated types of Praxis courses—Praxis I and II Departmental courses and Praxis Independent Study courses—are described below and https://www.brynmawr.edu/lilac/experiential-learning/praxis-courses.

Praxis courses are distinguished by genuine collaboration with community based organizations. The nature of fieldwork assignments and projects varies according to the learning objectives for the course and according to the needs of the community partner. The three types of Praxis courses require increasing amounts of fieldwork but do not need to be taken successively. Praxis I and II courses are offered within a variety of academic departments and are developed by faculty in those departments. Praxis Independent Study courses are developed by students, in collaboration with faculty field supervisors and Praxis staff. Students may enroll in more than one Praxis course at a time and are sometimes able to use the same field placement to meet the requirements of both courses.

Praxis I Departmental Courses provide opportunities for students to explore and develop community connections
in relation to the course topic by incorporating a variety of activities into the syllabus, such as: field trips to local organizations, guest speakers from those organizations, and assignments that ask students to research local issues. In some cases, students in Praxis I courses are engaged in introductory fieldwork activities; the time commitment for this fieldwork does not exceed 2 hours per week or 20 hours per semester.

Praxis II Departmental Courses include a more substantial fieldwork component that engages students in activities and projects off-campus that are linked directly to course objectives and are useful to the community partner. The time commitment for fieldwork varies greatly from course to course but falls within the range of 2-7 hours per week or 20-70 hours per semester. Praxis II courses might include: weekly fieldwork in local classrooms or community-based organizations; conducting research that has been requested by a community partner; project-based activities such as creating a curriculum, designing a website, or curating a museum exhibit. The Praxis Fieldwork Agreement is an important part of all Praxis II courses. This document outlines the learning and placement objectives of the Praxis component and is signed by the course instructor, the field supervisor, the Praxis coordinator and the student.

Praxis Independent Study places fieldwork at the center of a supervised learning experience and gives students the opportunity to design their own course and select their own field placement. The fieldwork for Praxis Independent Study consists of 8-10 hours per week for 12 weeks. Typically, students complete two, 4-to-5 hour visits per week. Fieldwork is supported by appropriate readings and regular meetings with a faculty advisor. Students receive additional support from the Praxis staff, who conduct reflection sessions for each semester’s Praxis cohort, visit each student’s field site once a semester to meet with the student and their supervisor, and coordinate a Praxis Poster Session. Praxis Independent Study is an option for sophomore and higher-level students who are in good academic standing. Students are eligible to take up to two Praxis Independent Study courses during their time at Bryn Mawr.

Advance planning is required for students wanting to develop a Praxis Independent Study course. At least one semester ahead of time, students should complete the Praxis Independent Study Tutorial, available on the website, attend one of the LILAC Internship workshops and review additional online resource materials. Once they have completed the Praxis Independent Study Tutorial, students are invited to schedule an appointment with one of the Praxis Program Directors, Nell Anderson or Kelly Strunk, for additional guidance in developing a Praxis Independent Study course. A brief online Praxis Proposal, declaring their intention to develop a Praxis Independent Study course should be submitted before or after that appointment.

The Praxis Proposal requires approval from the student's dean and major advisor. Once students have submitted their proposals, they are enrolled in a Moodle course that guides them in developing the Praxis Independent Study Learning Plan.

The Praxis Independent Study Learning Plan—which must include a description of the course, learning objectives, all stipulated coursework, identification of the faculty supervisor, field site, field site supervisor and fieldwork responsibilities—should be submitted online by the end of the semester prior to their enrollment in the Praxis Independent Study course. The Praxis Program Director will review and approve the plan and will notify the Registrar’s Office that the student can be officially registered for the course.

Collaboration with the Graduate School of Arts and Sciences and the Graduate School of Social Work and Social Research

At Bryn Mawr, we embrace a distinctive academic model that offers a select number of outstanding coeducational graduate programs in arts and sciences and social work in conjunction with an exceptional undergraduate college for women. As such, Bryn Mawr undergraduates have significant opportunities to do advanced work by participating in graduate level courses offered in several academic areas. These areas include Chemistry; Classical and Near Eastern Archaeology; Greek, Latin, and Classical Studies; French, History of Art; Mathematics; Physics; and Social Work. An undergraduate must meet the appropriate prerequisites for a particular course and obtain departmental approval if she wishes the course to count towards her major.

The Graduate School of Arts and Sciences (GSAS)

Founded in 1885, the Bryn Mawr Graduate School was the first graduate school to open its doors to women in the United States. This radical innovation of graduate education in a women’s college was the beginning of a distinguished history of teaching and learning designed to enable every student to reach the apex of her intellectual capacity. Today, students in the Graduate School of Arts and Sciences are a vital component in a continuum of learning and research, acting as role models for undergraduates and as collaborators with the faculty. Renowned for excellence within disciplines, Bryn Mawr also fosters connections across disciplines and the individual exploration of newly unfolding areas of research.

Examples of GSAS graduate level courses that are open to advanced undergraduates include:

- **ARCH 693** Studies in Greek Pottery
- **CHEM 534** Organometallic Chemistry
- **FREN 655** Rousseau polémiste
- **HART 607** Women in Medieval Art
- **GREK 643** Readings in Greek History
- **MATH 506** Graduate Topology
- **PHYS 503 and 504** Electromagnetic Theory I and II
The Graduate School of Social Work and Social Research (GSSWSR)

Social work was woven into the very fabric of Bryn Mawr College since it first opened its doors in 1885. Founded by Joseph Wright Taylor, a Quaker physician who wanted to establish a college for the advanced education of women, Bryn Mawr College soon became nondenominational but continued to be guided by Quaker values, including the freedom of conscience and a commitment to social justice and social activism. The Bryn Mawr College Graduate School of Social Work and Social Research (GSSWSR) was established through a bequest in 1912 from an undergraduate alumna of the College, Carola Woerishoffer, who at the time of her death at age 25 was investigating factory conditions for the New York Department of Labor. Her gift of $750,000 (about $14 million in today’s dollars) was the largest gift the College had received at that time, and was made so that others would be prepared to engage in social work, the field to which Carola Woerishoffer had committed herself.

As part of the Bryn Mawr College academic community and throughout its 100+ year history, the School has placed great emphasis on critical, creative, and independent habits of thought and expression as well as an unwavering commitment to principles of social justice. It has been instrumental in promoting the social work profession by providing a rigorous educational environment to prepare clinicians, administrators, policy analysts, advocates, and educators who are committed to addressing the needs of individuals, families, organizations, and communities, both locally and globally.

Moving forward, the School has reaffirmed its commitment through a redesigned outcomes/abilities-based curriculum, providing all students with an integrated perspective on policy, practice, theory, and research. Both Master’s and PhD graduates are prepared to address the rapidly growing and complex challenges impacting the biological, psychological, and social conditions of children and families within their communities. GSSWSR graduates are leaders in defining standards of practice, shaping social welfare policy, and undertaking ethically grounded research in the social and behavioral sciences.

Examples of GSSWSR graduate level courses that are open to advanced undergraduates include:

**ACADEMIC AWARDS AND PRIZES**

The following awards, fellowships, scholarships, and prizes are awarded by the faculty and are given solely on the basis of academic distinction and achievement.

The Academy of American Poets Prize, awarded in memory of Marie Bullock, the Academy's founder and president, is given each year to the student who submits to the Department of English the best poem or group of poems. (1957)

The Seymour Adelman Book Collector’s Award is given each year to a student for a collection on any subject, single author or group of authors, which may include manuscripts and graphics. (1980)

The Seymour Adelman Poetry Award was established by Daniel and Joann Semel Rose ’52, to provide an award in honor of Seymour Adelman. The award is designed to stimulate further interest in poetry at Bryn Mawr. Any member of the Bryn Mawr community—undergraduate or graduate student, staff or faculty member—is eligible for consideration. The grant may be awarded to fund research in the history or analysis of a poet or poem, to encourage the study of poetry in interdisciplinary contexts, to support the writing of poetry or to recognize a particularly important piece of poetic writing. (1985)

The Horace Alwyne Prize was established by the Friends of Music of Bryn Mawr College in honor of Horace Alwyne, Professor Emeritus of Music. The award is presented annually to the student who has contributed the most to the musical life of the College. (1970)

The Areté Fellowship Fund was established by Doreen Canaday Spitzer ’31. The fund supports graduate students in the Departments of Greek, Latin and Classical Studies, History of Art, and Classical and Near Eastern Archaeology. (2003)

The Bair-Swiggett Poetry Prize was established by a gift of Mr. and Mrs. Glen Levin Swiggett. This prize is to be awarded by a committee of the faculty on the basis of the work submitted. (1958)

The Berle Memorial Prize Fund in German Literature was established by Lillian Berle Dare in memory of her parents, Adam and Katharina Berle. The prize is awarded annually to an undergraduate for excellence in German literature. Preference is given to a senior who is majoring in German and who does not come from a German background. (1975)

The Bolton Prize was established by the Bolton Foundation as an award for students majoring in the
The Bryn Mawr European Fellowship has been awarded each year since the first class graduated in 1889. It is given for merit to a member of the graduating class, to be applied toward the expenses of one year’s study at a university in the United States or abroad. The European Fellowship continues to be funded by a bequest from Elizabeth S. Shippen.

The Commonwealth Africa Scholarship was established by a grant from the Thomcroft Fund Inc. at the request of Helen and Geoffrey de Freitas. The scholarship is used to send a graduate to a university or college in Commonwealth Africa, to teach or to study, with a view to contributing to mutual understanding and the furtherance of scholarship. In 1994, the description of the scholarship was changed to include support for current undergraduates. (1965)

The Hester Ann Corner Prize for distinction in literature was established in memory of Hester Ann Corner ’42, by gifts from her family, classmates, and friends. The award is made to a senior or junior on the recommendation of a committee composed of the chairs of the Departments of English and of Classical and Modern Foreign Languages. (1950)

The Katherine Fullerton Gerould Memorial Prize was founded by a gift from a group of alumnae, many of whom were students of Mrs. Gerould when she taught at Bryn Mawr from 1901 to 1910. It is awarded to a student who shows evidence of creative ability in the fields of informal essay, short story and longer narrative or verse. (1946)

The Elizabeth Duane Gillespie Fund for Scholarships in American History was founded by a gift from the National Society of Colonial Dames of America in the Commonwealth of Pennsylvania in memory of Elizabeth Duane Gillespie. Two prizes are awarded annually on nomination by the Department of History, one to a member of the sophomore or junior class for work of distinction in American history, a second to a senior doing advanced work in American history for an essay written in connection with that work. The income from this fund has been supplemented since 1955 by annual gifts from the society. (1903)

Friends and colleagues have joined Ruth Nelson in honoring Judy Gould’s retirement through the establishment of the Judy Loomis Gould ’64 Fund for Summer Study Abroad.

The Maria L. Eastman Brooke Hall Memorial Scholarship was founded in memory of Maria L. Eastman, principal of Brooke Hall School for Girls, Media, Pennsylvania, by gifts from the alumnae of the school. It is awarded annually to the member of the junior class with the highest general average and is held during the senior year. Transfer students who enter Bryn Mawr as members of the junior class are not eligible for this award. (1901)

The Charles S. Hinchman Memorial Scholarship was founded in memory of the late Charles S. Hinchman of Philadelphia by a gift made by his family. It is awarded annually to a member of the junior class for work of special excellence in her major subject(s) and is held during the senior year. (1921)

The Sarah Stifler Jesup Fund was established in memory of Sarah Stifler Jesup ’56, by gifts from New York alumnae, as well as family and friends. The income is to be awarded annually to one or more undergraduate students to further a special interest, project or career goal during term time or vacation. (1978)

The Pauline Jones Prize was established by friends, students and colleagues of Pauline Jones ’35. The prize is awarded to the student writing the best essay in French, preferably on poetry. (1985)

The Anna Lerah Keys Memorial Prize was established by friends and relatives in memory of Anna Lerah Keys ’79. The prize is awarded to an undergraduate majoring in Classical and Near Eastern Archaeology. (1984)

The McPherson Fund for Excellence was established during term time or vacation. (1978)

The Helen Taft Manning Essay Prize in History was established in honor of Helen Taft Manning ’15, in the year of her retirement, by her class. The prize is awarded to a senior in the Department of History for work of special excellence in the field. (1957)

The McPherson Fund for Excellence was established through the generous response of alumnae/i, friends, and faculty and staff members of the College to an appeal issued in the fall of 1996. The fund honors the achievements of President Emeritus Mary Patterson McPherson. Three graduating seniors are named McPherson Fellows in recognition of their academic distinction and community service accomplishments. The fund provides support for an internship or other special project.

The Nadia Anne Mirel Memorial Fund was established by the family and friends of Nadia Anne Mirel ’85. The fund supports the research or travel of students undertaking imaginative projects in the following areas: children’s educational television, and educational film and video. (1986)

The Martha Barber Montgomery Fund was established by Martha Barber Montgomery ’49, her family and
friends to enable students majoring in the humanities, with preference to those studying philosophy and/or history, to undertake special projects. The fund may be used, for example, to support student research and travel needs, or an internship in a nonprofit or research setting. (1993)

The Elinor Nahm Prizes in Italian are awarded for excellence in the study of Italian at the introductory, intermediate and advanced levels. (1991)

The Elinor Nahm Prizes in Russian are awarded for excellence in the study of Russian language and linguistics and of Russian literature and culture. (1991)

The Milton C. Nahm Prize in Philosophy is awarded to the senior Philosophy major whose thesis is judged most outstanding. (1991)

The Elisabeth Packard Art and Archaeology Internship Fund was established by Elisabeth Packard ’29 to provide stipend and travel support to enable students majoring in History of Art or Classical and Near Eastern Archaeology to hold museum internships, conduct research or participate in archaeological digs. (1993)

The Alexandra Peschka Prize was established in memory of Alexandra Peschka ’64 by gifts from her family and friends. The prize is awarded annually to a member of the first-year or sophomore class and writer of the best piece of imaginative writing in prose. (1969)

The Jeanne Quistgaard Memorial Prize was given by the Class of 1938 in memory of their classmate, Jeanne Quistgaard. The income from this fund may be awarded annually to a student in Economics. (1938)

The Laura Estabrook Romine ’39 Fellowship in Economics was established by a gift from David E. Romine, to fulfill the wish of his late brother, John Ransel Romine III, to establish a fund in honor of their mother, Laura Estabrook Romine ’39. The fellowship is given annually to a graduating senior or alumna, regardless of undergraduate major, who has received admission to a graduate program in Economics. (1996)

The Barbara Rubin Award Fund was established by the Amicus Foundation in memory of Barbara Rubin ’47. The fund provides summer support for students undertaking internships in nonprofit or research settings appropriate to their career goals, or study abroad. (1989)

The Gail Ann Schweiter Prize Fund was established in memory of Gail Ann Schweiter ’79 by her family. The prize is to be awarded to a science or Mathematics major in her junior or senior year who has shown excellence both in her major field and in musical performance. (1993)

The Charlotte Angas Scott Prize in Mathematics is awarded annually to an undergraduate on the recommendation of the Department of Mathematics. It was established by an anonymous gift in memory of Charlotte Angas Scott, Professor of Mathematics 1885 to 1924. (1960)

The Elizabeth S. Shippen Scholarship in Foreign Language was founded under the will of Elizabeth S. Shippen of Philadelphia. It is awarded to a junior whose major is in French, German, Greek, Italian, Latin, Russian or Spanish for excellence in the study of foreign languages. (1915)

The Elizabeth S. Shippen Scholarship in Science was founded under the will of Elizabeth S. Shippen of Philadelphia and is awarded to a junior whose major is in Biology, Chemistry, Geology or Physics for excellence in the study of sciences. (1915)

The Gertrude Slaughter Fellowship was established by a bequest of Gertrude Taylor Slaughter, Class of 1893. The fellowship is to be awarded to a member of the graduating class for excellence in scholarship to be used for a year’s study in the United States or abroad. (1964)

The Ariadne Solter Fund was established in memory of Ariadne Solter ’91 by gifts from family and friends to provide an annual award to a Bryn Mawr or Haverford undergraduate working on a project concerning development in a third world country or the United States. (1989)

The Katherine Stains Prize Fund in Classical Literature was established by Katherine Stains in memory of her parents, Arthur and Katheryn Stains, and in honor of two excellent 20th-century scholars of classical literature, Richmond Lattimore and Moses Hadas. The income from the fund is to be awarded annually as a prize to an undergraduate student for excellence in Greek literature, either in the original or in translation. (1969)

The M. Carey Thomas Essay Prize is awarded annually to a member of the senior class for distinction in writing. The award is made by the Department of English for either creative or critical writing. It was established in memory of Miss Thomas by her niece, Millicent Carey McIntosh ’20. (1943)

The Emma Osborn Thompson Prize in Geology was established by a bequest of Emma Osborn Thompson ’04. From the income of the bequest, a prize is to be awarded from time to time to a student in Geology. (1963)

The Laura van Straaten Fund was established by Thomas van Straaten and his daughter, Laura van Straaten ’90, in honor of Laura’s graduation. The fund supports a summer internship for a student working to advance the causes of civil rights, women’s rights or reproductive rights. (1990)

The Esther Walker Award was founded by a bequest from William John Walker in memory of his sister, Esther Walker ’10. It is given from time to time to support the study of living conditions of northern African Americans. (1940)

The Anna Pell Wheeler Prize in Mathematics is awarded annually to an undergraduate on the recommendation
of the Department of Mathematics. It was established by an anonymous gift in honor of Anna Pell Wheeler, Professor of Mathematics from 1918 until her death in 1966. (1960)

The Thomas Raeburn White Scholarships were established by Amos and Dorothy Peaslee in honor of Thomas Raeburn White, Trustee of the College from 1907 until his death in 1959, counsel to the College throughout these years, and President of the Trustees from 1956 to 1959. The income from the fund is to be used for prizes to undergraduate students who plan to study foreign languages abroad during the summer under the auspices of an approved program. (1964)

The Anne Kirschbaum Winkelman Prize, established by the children of Anne Kirschbaum Winkelman ’48, is awarded annually to the student judged to have submitted the most outstanding short story. (1987)

**Scholarships for Medical Study**

The following scholarships may be awarded to seniors or graduates of Bryn Mawr intending to study medicine, after their acceptance by a medical school in the United States. The premedical adviser will send applications for the scholarship to medical school applicants during the spring preceding the academic year in which the scholarship is to be held.

The Linda B. Lange Fund was founded by bequest under the will of Linda B. Lange, A.B. 1903. The income from this fund provides the Anna Howard Shaw Scholarship in Medicine and Public Health, awarded to members of the graduating class or graduates of the College for the pursuit, during an uninterrupted succession of years, of studies leading to the degrees of M.D. and Doctor of Public Health or M.D. and Master of Public Health. The award may be continued until the degrees are obtained. Renewal applications will be sent to scholarship recipients by the premedical adviser. (1948)

The Hannah E. Longshore Memorial Medical Scholarship was founded by Mrs. Rudolf Blankenburg in memory of her mother. The Scholarship is awarded by a committee to students and alumnae who have been accepted by a medical school. (1921)

The Jane V. Myers Medical Scholarship Fund was established by Mrs. Rudolf Blankenburg in memory of her aunt. The scholarship is awarded by a committee to students and alumnae who have been accepted by a medical school. (1921)

The Harriet Judd Sartain Memorial Scholarship Fund was founded by bequest under the will of Paul J. Sartain. The income from the fund is to establish a scholarship which is awarded by a committee to students and alumnae who have been accepted by a medical school. (1948)

**AREAS OF STUDY**

**Definitions**

**MAJOR**

In order to ensure that a student’s education involves not simply exposure to many disciplines but also development of some degree of mastery in at least one, she must choose a major subject at the end of the sophomore year. With the guidance of the major adviser, a student plans an appropriate sequence of courses. The following is a list of major subjects:

- Anthropology
- Astronomy (Haverford College)
- Biochemistry and Molecular Biology
- Biology
- Chemistry
- Classical and Near Eastern Archaeology
- Classical Culture and Society
- Classical Languages
- Comparative Literature
- Computer Science
- East Asian Languages and Cultures
- Economics
- English
- Fine Arts (Haverford College)
- French and French Studies
- Geology
- German and German Studies
- Greek
- Growth and Structure of Cities
- History
- History of Art
- Italian and Italian Studies
- International Studies
- Latin
- Linguistics (Tri-College Major)
- Linguistics and Languages (Tri-College Major)
- Mathematics
- Music (Haverford College)
- Philosophy
- Physics
- Political Science
- Psychology
- Religion (Haverford College)
- Romance Languages
- Russian
- Sociology
- Spanish

**MINOR**

The minor typically consists of six courses, with specific requirements determined by the department or program. A minor is not required for the degree. The following is a list of subjects in which students may elect to minor. Minors in departments or programs that do not offer majors appear in italics.
CONCENTRATION

The concentration, which is not required for the degree, is a cluster of classes that overlap the major and focus a student's work on a specific area of interest:

- Gender and Sexuality Studies
- Geoarchaeology (with a major in Anthropology, Classical and Near Eastern Archaeology, or Geology)
- Latin-American, Iberian, and Latina/o Studies
- Peace, Conflict and Social Justice Studies

KEY TO COURSE NUMBERS

001-099 These course numbers are used by only a few departments. They refer to introductory courses that are not counted towards the major.

100-199 Introductory courses.

200-299 Introductory and intermediate-level courses.

300-399 Advanced courses.

400-499 Special categories of work (e.g., 403 for a unit of supervised work).

A semester course usually carries one unit of credit. Students should check the course guide for unit listing. One unit equals four semester hours or six quarter hours. A quarter course (or Focus course) carries 0.5 units.

KEY TO REQUIREMENT INDICATORS

Quantitative and Mathematical Reasoning (QM): Indicates courses that meet the requirement for work in QM.

Quantitative Readiness (QR): Indicates courses that require quantitative readiness.

Scientific Inquiry (SI): Indicates courses that meet the requirement for work in SI.

Critical Interpretation (CI): Indicates courses that meet the requirement for work in CI.

Cross-Cultural Analysis (CC): Indicates courses that meet the requirement for work CC.

Inquiry Into the Past (IP): Indicates courses that meet the requirement for work in IP.

Neighboring College Courses

Selected Haverford College courses may be listed in this catalog when applicable to Bryn Mawr programs. Consult the Haverford catalog for full course descriptions. Students should consult their deans or major advisers for information about Swarthmore College, University of Pennsylvania and Villanova University courses pertinent to their studies. Catalogs and course guides for Swarthmore are available through the Tri-Co Course Guide. Catalogs and course guides for Penn and Villanova are available through each institution’s website.

Course Descriptions

Following the description are the name(s) of the instructor(s), the College requirements that the course meets, if any, and information on cross-listing. Information on prerequisite courses may be included in the descriptions or in the prefatory material on each department.

At the time of this printing, the course offerings and descriptions that follow were accurate. Whenever possible, courses that will not be offered in the current year are so noted. There may be courses offered in the current year for which information was not available at the time of this catalog printing. For the most up-to-date and complete information regarding course offerings, faculty, status, and college requirements, please consult BiONic at https://vbm.brynmawr.edu.
AFRICANA STUDIES

Students may complete a minor in Africana Studies.

Core and Affiliated Faculty

Michael Allen, Professor of Political Science on the Harvey Wexler Chair in Political Science
Linda-Susan Beard, Associate Professor of English and Director of Africana Studies
Jody Cohen, Term Professor in the Bryn Mawr/Haverford Education Program
Susanna Fioratta, Assistant Professor of Anthropology (on leave semesters I & II)
Ignacio Gallup-Díaz, Associate Professor of History
Jennifer Harford-Vargas, Associate Professor of English on the Rosabeth Moss Kanter Change Master Fund and Co-Director of Latin American, Latina/o and Iberian Studies Program (on leave semesters I & II)
Lela Aisha Jones, Pre-Doctoral Fellow in Dance
Kwame Labi, Visiting Scholar in History of Art and Museum Studies from the University of Ghana
Alice Lesnick, Director and Term Professor in the Bryn Mawr/Haverford Education Program and Faculty Convener of International Programs
Airea D. Matthews, Assistant Professor of Creative Writing
Veronica Montes, Assistant Professor of Sociology and Co-Director of the Latin American, Iberian, and Latina/o Studies Program
Elaine Mshomba, Instructor in Swahili Language and Culture
Kalala Ngalamulume, Associate Professor of Africana Studies and History, Co-Director of International Studies, and Co-Director of Health Studies (spring)
Mary Osirim, Provost and Professor of Sociology
Monique Scott, Director of Museum Studies
Mecca Jamilah Sullivan, Assistant Professor of English
Michael Tratner, Mary E. Garrett Alumnae Professor in English
Sharon Ullman, Professor of History
Robert Washington, Professor of Sociology
Susan A. White, Professor of Chemistry and Co-Director of Health Studies (fall) (on leave semester II)

The Africana Studies Program brings an international vantage to the study of Africa and its diasporas. Drawing on analytical and affective perspectives from anthropology, economics, history, literary studies, political science, the health sciences, education, the fine arts, museum studies, creative writing, and sociology, the Program focuses on peoples of African descent within the context of increasing globalization and dramatic cultural, economic, and political change.

In consortial relationship with Haverford College, Swarthmore College, and the University of Pennsylvania, Bryn Mawr offers its students the opportunity to take a broad range of courses by enrolling in courses offered by all participating institutions. The Africana Studies Center at Penn is one of four global resource centers offering courses and specialized language training, which our students utilize. Moreover, Bryn Mawr participates in study abroad programs offered in Kenya, Zimbabwe, Ghana, and Senegal. Bryn Mawr and Haverford students may also participate in the Dalun Bi-Co Lagim Tehi Tuma Summer Fellowship Program in Northern Ghana.

Students are encouraged to begin their work in the Africana Studies Program by taking Introduction to African Civilizations (HIST B102). This required introductory level course, which provides students with a common intellectual experience as well as the foundation for subsequent courses in Africana Studies, should be completed by the end of the student’s junior year.

Minor Requirements

The requirements for a minor in Africana Studies are the following:

- One-semester interdisciplinary course: Introduction to African Civilizations (HIST B102 at Bryn Mawr or ICPR 101 at Haverford)
- Five additional semester courses from an approved list of courses in Africana Studies or by permission of the Africana faculty.
- At least three of these have to be taken at Bryn Mawr or Haverford.
- A senior thesis or seminar-length essay in an area of Africana Studies. A copy of the thesis or essay has to be deposited with the Director of Africana Studies who serves as advisor to Africana Studies minors.

Students are encouraged to organize their course work along one of several prototypical routes. Such model programs might feature:

- Regional or area studies, for example, focusing on blacks in Latin America, the English-speaking Caribbean or North America.
- Thematic emphases, for example, exploring class politics, ethnic conflicts and/or economic development in West and East Africa.
- Comparative emphases, for example, problems of development, governance, public health or family and gender.

The student should indicate the focus of the minor at the time of registration.

The final requirement for the Africana Studies minor is a senior thesis or its equivalent. If the department in which the student is majoring requires a thesis, the Africana Studies requirement can be satisfied by writing on a topic that is approved in writing by her department and the Africana Studies Director. If the major department does not require a thesis, a seminar-length essay is required. The essay may be written within the framework of a particular course or as an independent study project. The topic must be approved in writing by both the instructor in question and the Africana Studies Program Director. A copy of the thesis or the essay will become the property of the Africana Studies archives.

COURSES

ANTH B202 Africa in the World

In this course, we will approach Africa with an emphasis on the many interconnections that link the continent with the rest of the world, through both time and space. Much popular talk about Africa in the U.S. is overwhelmingly negative—focusing on poverty, violence, and failed states—and often portrays
Africa as something “other,” both different from and unrelated to the United States and much of the rest of the world. But such preconceptions bluntly overlook what we know about historical and contemporary movements of people, ideas, materials, and money around the globe. Rather than regarding Africa as separate or apart, in this course we will examine the centrality of African engagements with these global movements. Rather than attempting a survey of particular, bounded African “peoples” or “cultures,” we will explore complex issues and processes through interconnected topics including colonial and postcolonial politics, urban life, gender and sexuality, religion, economic networks, development, and transnational migration. We will use these themes as guides for exploring larger, interlinked questions of social life in Africa and around the world. Prerequisite: Sophomore standing or higher.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Africana Studies
Units: 1.0
(Not Offered 2017-2018)

ARCH B101 Introduction to Egyptian and Near Eastern Archaeology
A historical survey of the archaeology and art of the ancient Near East and Egypt.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Africana Studies
Units: 1.0
(Not Offered 2017-2018)

ARCH B230 Archaeology and History of Ancient Egypt
A survey of the art and archaeology of ancient Egypt from the Pre-Dynastic through the Graeco-Roman periods, with special emphasis on Egypt’s Empire and its outside connections, especially the Aegean and Near Eastern worlds.
Approach: Inquiry into the Past (IP)
Major Writing Requirement: Writing Attentive
Counts towards: Africana Studies; Middle Eastern & Islamic Studies
Units: 1.0
(Not Offered 2017-2018)

ARTD B267 Diasporic Bodies, Grounding Freedom: The Black Dancing Body
Diasporic Bodies, Grounding Freedom: The Black/African Dancing Body, Restoration, and Activism take Marronage—the act of escaping from slavery in the Americas to create communities of freedom and autonomy—as its model. This course views Black/African diasporic movement and artistic practices as a form of contemporary marronage, providing spaces of activism and embodied restoration. These thriving, fertilizing spaces, communities, and artists center and reboots, with integrity, the connections among black/African diasporic bodies, traditions, and cultures across oceans and lands. While focusing on the black experience, this course will examine these temporal, Imaginative spaces, claiming them as essential to all people in societies that do not acknowledge multiplicity or diversity as societal norms, and capable of conjuring semi-lost histories waiting to be revived. It will examine marronage in diasporic communities as an effort to ground, re-ground, and free bodies. Together, we will explore other diasporic-based research and approaches to understanding and experiencing embodied restoration and we will also learn a meditative embodiment process with 3 elements: mining, archiving, and witnessing. We will examine literature, animation, and film resources to broaden our dialogue on how interdisciplinary, artistic spaces make fertile foundations for embodied and restorative activism. This course will merge lecture, readings, viewings, and praxis as its main components. No dance experience is necessary but students should dress comfortably to move. In lieu of books, readings will be posted on Moodle and students will be assigned to see a performance (typical costs: $12-30) but may take advantage of free Tri-co performances. A previous dance lecture/seminar course or a course in a relevant discipline such as anthropology, sociology, or history is strongly recommended but not required.

Approach: Cross-Cultural Analysis (CC)
Major Writing Requirement: Writing Attentive
Counts towards: Africana Studies
Units: 1.0
Instructor(s): Jones,L.
(Fall 2017)

EDUC B200 Critical Issues in Education
Designed to be the first course for students interested in pursuing one of the options offered through the Education Program, this course is also open to students exploring an interest in educational practice, theory, research, and policy. The course examines major issues and questions in education in the United States by investigating the purposes of education. Fieldwork in an area school required (eight visits, 1.5-2 hours per visit).

Approach: Cross-Cultural Analysis (CC)
Major Writing Requirement: Writing Attentive
Counts towards: Africana Studies
Units: 1.0
Instructor(s): Cohen,J.
(Spring 2018)

EDUC B208 Race-ing Education
This course investigates education as part of processes of racialization and marginalization and as a space for challenging these processes. How do race and schooling intersect and interact? How can educators – along with students, parents, and communities – learn and teach critical awareness of race as an idea and a system? With a focus on the U.S., we look at ways in which race as a way of creating power is embedded in earlier iterations of schooling, as in cases regarding access to education for Black, Latinx, and Asian students and in American Indian boarding schools, and how race is differently taken up in the work of such thinkers/educators as W.E.B. Dubois, James Baldwin, and Paulo Freire. We consider how such issues play out in the recent past and contemporary moment through ongoing cases on affirmative action; work in Critical Race Theory and LatCrit by such educators as Patricia Williams and Tara Yosso, and in decolonizing education by Eve Tuck and Gloria Anzaldua; and curriculum and pedagogy in the theory and practice of such educators as Kevin Kumashiro and movements such as Black Lives Matter. We also consider Bryn Mawr’s own history, in light of how to move forward through critically engaged education.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Africana Studies
Units: 1.0
(Not Offered 2017-2018)

EDUC B260 Multicultural Education
In our era of globalization, increased standardization of education, and perpetual discrimination, this course investigates
the following key question: What does multicultural education mean today? We will investigate globalization, reflect on notions of power and privilege, critique understandings of difference, and examine the multi-faceted ways in which multicultural education is enacted in pedagogy, curriculum and educational organization. We will also examine the intersections between race, class, gender, sexuality, language, and citizenship status and try to assess their impact on teaching and learning. Fieldwork of two to three hours per week.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Africana Studies; Praxis Program
Units: 1.0
(Spring 2018)

EDUC B266 Schools in American Cities
This course examines issues, challenges, and possibilities of urban education in contemporary America. We use as critical lenses issues of race, class, and culture; urban learners, teachers, and school systems; and restructuring and reform.

While we look at urban education nationally over several decades, we use Philadelphia as a focal "case" that students investigate through documents and school placements. This is a Praxis II course (weekly fieldwork in a school required)

Approach: Cross-Cultural Analysis (CC)
Counts towards: Africana Studies; Child and Family Studies; Praxis Program
Units: 1.0
(Spring 2018)

ENGL B217 Narratives of Latinidad
This course explores how Latina/o writers fashion bicultural and transnational identities and narrate the intertwined histories of the U.S. and Latin America. We will focus on topics of shared concern among Latino groups such as struggles for social justice, the damaging effects of machismo and racial hierarchies, the politics of Spanglish, and the affective experience of migration. By analyzing a range of cultural production, including novels, poetry, testimonial narratives, films, activist art, and essays, we will unpack the complexity of Latinidad in the Americas.

Approach: Critical Interpretation (CI)
Counts towards: Africana Studies; Gender and Sexuality Studies; Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B234 Postcolonial Literature in English
This course will survey a broad range of novels and poems written while countries were breaking free of British colonial rule. Readings will also include cultural theorists interested in defining literary issues that arise from the postcolonial situation.

Approach: Critical Interpretation (CI)
Counts towards: Africana Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B239 African American Poetry
This course explores the work of black poets in the Americas. Focusing on a range of poetic forms from the 18th century through the present, we will consider key questions that have animated the works of black poets in North America and the Caribbean, and how they have used poetic strategy to engage these questions. How do black poets explore black political and social life in various historical and geographical contexts?
How do they use particular formal strategies (for example, form poetry, free verse, narrative poetry, and experimental modes) to interrogate notions of blackness?
How do political movements around gender, class, and sexuality factor in?
As we approach these questions, we will consider important critical conversations on African American poetry and poetics, examining how both well-known and underexplored poets use form to complicate blackness and imagine various forms of freedom. Our work will take us through several poetic genres and forms, including print works, performance poetry, hip hop music, and digital media.

Throughout our analysis, we will consider how discourses on gender, sexuality, class, national and transnational identity, and other engagements with difference shape black poetic expression, both historically and in our current moment.

Approach: Critical Interpretation (CI)
Counts towards: Africana Studies; Gender and Sexuality Studies
Units: 1.0
Instructor(s): Beard,L-S.
(Fall 2017)

ENGL B262 Survey in African American Literature
English 262 is a topics course that allows for multiple themes to be taught. Each topic will have its own description and students may enroll for credit in the course as long as the topics vary.

Current topic description: Nineteenth-Century African American Narrative. A study of the interplay of history, politics, art, and fiction, this course traces a chronological, new historict path between the forging of a literary identity in a new nation and Pauline Hopkins’ Contending Forces (1900).

Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Intensive
Counts towards: Africana Studies; Gender and Sexuality Studies
Units: 1.0
Instructor(s): Beard,L-S.
(Spring 2018)

ENGL B263 Toni Morrison and the Art of Narrative Conjure
A comprehensive study of Morrison’s narrative experiments in fiction, this course traces her entire oeuvre from “Recitatif” to God Help the Child. We read the works in publication order with three main foci: Morrison-as-epistemologist questioning what it is that constitutes knowing and being known, Morrison-as-revisionary-teacher-of-reading-strategies, and Morrison in intertextual dialogue with several oral and literary traditions. In addition to critical essays, students complete a “Pilate Project” – a creative response to the works under study.

Approach: Critical Interpretation (CI)
Counts towards: Africana Studies; Gender and Sexuality Studies
Units: 1.0
Instructor(s): Beard,L-S.
(Fall 2017)

ENGL B264 Black Bards: Poetry in the Diaspora
An interrogation of poetic utterance in works of the African diaspora, primarily in English, this course addresses a multiplicity of genres, including epic, lyric, sonnet, rap, and mimetic jazz. The development of poetic theories at key moments such as the Harlem Renaissance and the Black Arts Movement will be explored.

Approach: Critical Interpretation (CI)
Counts towards: Africana Studies
ENGL B279 Introduction to African Literature
Taking into account the oral, written, aural, and visual forms of African "texts" over several thousand years, this course will explore literary production, intertextuality, translation, and audience/critical reception. Representative works to be studied include oral traditions, the Sundiata and Mwindo epics, the plays of Wole Soyinka and his Burden of History, the Muse of Forgiveness; and the work of Sembène Ousmane, Bessie Head, Ayi Kwei Armah, Mariama Bâ, Naguib Mahfouz, Ngugi wa Thiong'o, Chimamanda Ngozi Adichie, Yvonne Vera, and others.
Approach: Critical Interpretation (CI)
Counts towards: Africana Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B320 Black Feminist Literature
This course explores contemporary black feminist literature and culture on a transnational stage. We will consider the works of prominent, emerging, and underexplored black feminist writers from various African diaspora locations, including South Africa, West Africa, Europe, North America, and the Caribbean. How do these writers engage with key currents in global black feminist politics, including understandings of gender, sexuality, class, nationality and colonialism? How do they complicate these discussions in their work? We will ground our exploration in close study of black feminist poetries—the specific formal and creative choices that black feminist poets, fiction writers, visual artists, hip hop artists, webseries producers and others use to examine gender end sexuality in their art. Paying particular attention to the work of queer and LGBT+ (Lesbian, Gay, Bisexual, Trans* and Intersex) artists, we will consider the various meanings of terms such as “black,” “feminist,” and “queer” in various parts of the African Diaspora. Our work will emphasize close analysis of black feminist writers' works, as well as collaborative exercises and invited in-class discussions with several contemporary black diasporic feminist artists themselves. Requirements include two short papers, regular response papers, and a final project.
Counts towards: Africana Studies; Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Sullivan, M.
(Fall 2017)

ENGL B362 African American Literature: Hypercanonical Codes
Intensive study of six 18th-21st century hypercanonical African American written and visual texts (and critical responses) with specific attention to the tradition’s long use of speaking in code and in multiple registers simultaneously. Focus on language as a tool of opacity as well as transparency, translation, translocation, invention and resistance. Previous reading required.
Counts towards: Africana Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B379 The African Griot(te)
English 379 is a capstone topics course in the study of two or more distinguished African writers who have made significant contributions to African literary production. The focus changes from one semester to the next so that students may re-enroll in the course for credit. The specific focus of each semester’s offering of the course is outlined separately.
Approach: Critical Interpretation (CI)
Counts towards: Africana Studies; Gender and Sexuality Studies
Units: 1.0
Instructor(s): Beard, L-S.
(Fall 2017, Spring 2018)

Fall 2017: Women Writing Southern Africa. This is a study of two centuries of Southern African literatures written by and about Xhosa, Zulu, Khoikhoi, Shona, Matabele, Setswana, English, Afrikaner, Indian, and Coloured women from Jewish, Christian, Muslim, and traditional communities. Our goal is the exploration of literature’s role in constructing space, place, and politics in South Africa, Botswana, Zimbabwe, Zambia, Lesotho, Swaziland, and the old Rhodesia. We begin with the ventriloquized story of Sarah Baartman, the so-called Hottentot Venus, who was displayed semi-nude in Great Britain between 1810 and 1815. We will journey to and beyond Zoe Wicomb’s multidirectional You Can’t Get Lost in Cape Town.

ENGL B381 Post-Apartheid Literature
South African texts from several language communities which anticipate a post-apartheid polity and texts by contemporary South African writers who explore the complexities of life in “the new South Africa.” Several films emphasize the minefield of post-apartheid reconciliation and accountability.
Counts towards: Africana Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B388 Contemporary African Fiction
Noting that the official colonial independence of most African countries dates back only half a century, this course focuses on the fictive experiments of the most recent decade. A few highly controversial works from the 90’s serve as an introduction to very recent work. Most works are in English. To experience depth as well as breadth, there is a small cluster of works from South Africa. With novels and tales from elsewhere on the huge African continent, we will get a glimpse of “living in the present” in history and letters.
Counts towards: Africana Studies
Units: 1.0
Instructor(s): Beard, L-S.
(Spring 2018)

FREN B254 Teaching (in) the Postcolony: Schooling in African Fiction
This seminar examines novels from Francophone and Anglophone Africa, critical essays, and two films, in order better to understand the forces that inform the African child’s experiences of education. This course is taught in English.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Africana Studies
Units: 1.0
(Not Offered 2017-2018)
GNST B103 Introduction to Swahili Language and Culture I
The primary goal of this course is to develop an elementary level ability to speak, read, and write Swahili. The emphasis is on communicative competence in Swahili based on the National Standards for Foreign Language Learning. In the process of acquiring the language, students will also be introduced to East Africa and its cultures. No prior knowledge of Swahili or East Africa is required. Note: GNST B103/B105 do not fulfill the Bryn Mawr College language requirement.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Africana Studies
Units: 1.0
Instructor(s): Mshomba,E.
(Fall 2017)

GNST B105 Introduction to Swahili Language and Culture II
The primary goal of this course is to continue working on an elementary level ability to speak, read, and write Swahili. The emphasis is on communicative competence in Swahili based on the National Standards for Foreign Language Learning. Students will also continue learning about East Africa and its cultures.
Prerequisite: GNST B103 (Introduction to Swahili Language and Culture I) or permission of the instructor is required. Note: GNST B103/B105 does not fulfill the Bryn Mawr College language requirement.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Africana Studies
Units: 1.0
Instructor(s): Mshomba,E.
(Spring 2018)

HART B226 Perspectives on African Art
This course is an exploration of a selected range of art that represent the role and place of art in Africa and demonstrate the changes in artwork over time. The course begins with an examination of what defines the art of Africa, and proceeds to the changes in artwork over time. The course begins with an examination of what defines the art of Africa, and proceeds to the changes in artwork over time. The course will emphasize the diversity of African aesthetics as well as highlight the similarities and differences between African people within and across various artistic practices in secular and non-secular settings.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Africana Studies; Museum Studies; Praxis Program
Units: 1.0
Instructor(s): Labi,K.
(Fall 2017)

HART B279 Exhibiting Africa: Art, Artifact and New Articulations
At the turn of the 20th century, the Victorian natural history museum played an important role in constructing and disseminating images of Africa to the Western public. The history of museum representations of Africa and Africans reveals that exhibitions—both museum exhibitions and “living” World’s Fair exhibitions—has long been deeply embedded in politics, including the persistent “othering” of African people as savages or primitives. While paying attention to stereotypical exhibition tropes about Africa, we will also consider how art museums are creating new constructions of Africa and how contemporary curators and conceptual artists are creating complex, challenging new ways of understanding African identities.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Africana Studies; Museum Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B102 Introduction to African Civilizations
The course is designed to introduce students to the history of African and African Diaspora societies, cultures, and political economies. We will discuss the origins, state formation, external contacts, and the structural transformations and continuities of African societies and cultures in the context of the slave trade, colonial rule, capitalist exploitation, urbanization, and westernization, as well as contemporary struggles over authority, autonomy, identity and access to resources. Case studies will be drawn from across the continent.
Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Africana Studies; Gender and Sexuality Studies; International Studies
Units: 1.0
Instructor(s): NgalaMumule,K.
(Fall 2017)

HIST B200 The Atlantic World 1492-1800
The aim of this course is to provide an understanding of the way in which peoples, goods, and ideas from Africa, Europe, and the Americas came together to form an interconnected Atlantic World system. The course is designed to chart the manner in which an integrated system was created in the Americas in the early modern period, rather than to treat the history of the Atlantic World as nothing more than an expanded version of North American, Caribbean, or Latin American history.
Approach: Inquiry into the Past (IP)
Counts towards: Africana Studies; Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies; International Studies; Peace, Justice and Human Rights
Units: 1.0
(Not Offered 2017-2018)

HIST B212 Pirates, Travelers, and Natural Historians: 1492-1750
In the early modern period, conquistadors, missionaries, travelers, pirates, and natural historians wrote interesting texts in which they tried to integrate the New World into their existing frameworks of knowledge. This intellectual endeavor was an adjunct to the physical conquest of American space, and provides a framework though which we will explore the processes of imperial competition, state formation, and indigenous and African resistance to colonialism.
Approach: Inquiry into the Past (IP)
Counts towards: Africana Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Gallup-Díaz,I.
(Fall 2017)

HIST B215 Europe and the Other 1492-1800
This course will introduce students to process through which Europeans created systems and categories of difference into which they placed Indigenous, African, and Asian peoples between the years 1492 and 1815. Topics of study include
Indigenous leaders, slave and free communities, and cultural mediators on colonial frontiers.

Approach: Inquiry into the Past (IP)
Counts towards: Africana Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Gallup-Díaz,I.
(Fall 2017)

HIST B236 African History since 1800
The course analyzes the history of Africa in the last two hundred years in the context of global political economy. We will examine the major themes in modern African history, including the 19th-century state formation, expansion, or restructuration; partition and resistance; colonial rule; economic, social, political, religious, and cultural developments; nationalism; post-independence politics, economics, and society, as well as conflicts and the burden of disease. The course will also introduce students to the sources and methods of African history.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Africana Studies; International Studies
Units: 1.0
Instructor(s): Ngalamulume,K.
(Spring 2018)

HIST B237 Topic: Modern African History
This is a topics course. Course content varies

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Africana Studies; Gender and Sexuality Studies
Units: 1.0
Instructor(s): Ngalamulume,K.

Fall 2017: Urban History.

Spring 2018: African Economic Development. This course examines the political economy of African development in historical perspectives. We will address the following questions: Why is the African continent, which is rich in natural resources, so poor? What are the causes of poverty in Africa? The course will analyze the environmental, economic, political, and historical factors that have affected the development of Africa. We will discuss the impact of slavery, colonial exploitation, foreign interventions, foreign aid, trade, and democratic transitions on African development. We will also explore the theories of development and underdevelopment.

HIST B243 Topics: Atlantic Cultures
This is a topics course. Course content varies.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Africana Studies
Units: 1.0
Instructor(s): Gallup-Díaz,I.

Spring 2018: Maroon Communities

HIST B265 Colonial Encounters in the Americas
The course explores the confrontations, conquests and accommodations that formed the “ground-level” experience of day-to-day colonialism throughout the Americas. The course is comparative in scope, examining events and structures in North, South and Central America, with particular attention paid to indigenous peoples and the nature of indigenous leadership in the colonial world of the 18th century.

Approach: Inquiry into the Past (IP)
Counts towards: Africana Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B325 Topics in Social History
This is a topics course that explores various themes in American social history. Course content varies.

Counts towards: Africana Studies
Units: 1.0
Instructor(s): Ullman,S.

Spring 2018: Civil War, Race, and American Memory. This course explores how the American Civil War, fought over the issue of maintaining race based slavery, has become enshrined with a host of contested meanings about race and citizenship to generations of Americans ever since the Confederacy surrendered at Appomattox. During this semester we will explore some of those contests and address the Civil War’s intense power in the American psyche.

HIST B336 Topics in African History
This is a topics course. Course content varies.

Counts towards: Africana Studies; International Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B337 Topics in African History
This is a topics course. Topics vary.

Counts towards: Africana Studies; Gender and Sexuality Studies; International Studies
Units: 1.0
Instructor(s): Ngalamulume,K.

Fall 2017: Global Health Histories in Africa

HIST B339 The Making of the African Diaspora 1450-1800
This course explores the emergence, development, and challenges to the ideologies of whiteness and blackness, that have been in place from the colonial period to the present. Through the reading of primary and secondary sources, we will explore various ways through which enslaved people imagined freedom, personal rights, community membership, and some of the paths they created in order to improve their experiences and change the social order. In an attempt to have a comparative approach, we will look at particular events and circumstances that took place in few provinces in the Americas, with an emphasis on Latin America and the Caribbean. The course will also look at the methodological challenges of studying and writing history of people who in principle, were not allowed to produce written texts. Throughout, we will identify and underscore the contribution that people of African descent have made to the ideas of rights, freedom, equality, and democracy.

Counts towards: Africana Studies; Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B349 Topics in Comparative History
This is a topics course. Topics vary.

Approach: Inquiry into the Past (IP)
Counts towards: Africana Studies
Units: 1.0
Instructor(s): Vider, S.

Spring 2018: Public History and Praxis

HLTH B115 Introduction to Health Studies
The multidisciplinary foundation for the health studies minor. Students will be introduced to theories and methods from the life sciences, social sciences, and humanities and will learn to apply them to problems of health and illness. Topics include epidemiological, public health, and biomedical perspectives on health and disease; social, behavioral, and environmental determinants of health; globalization of health issues; cultural representations of illness; health inequalities, social justice, and the ethics of health as a human right.
Approach: Course does not meet an Approach
Counts towards: Africana Studies; Health Studies
Units: 1.0
Instructor(s): White, S., Montgomery, A.
(Fall 2017)

POLS B243 African and Caribbean Perspectives in World Politics
This course makes African and Caribbean voices audible as they create or adopt visions of the world that explain their positions and challenges in world politics. Students learn analytical tools useful in understanding other parts of the world. Prerequisite: POLS 141 or 1 course in African or Latin American history.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Africana Studies
Units: 1.0
Instructor(s): Allen, M.
(Spring 2018)

SOCL B225 Women in Society
A study of the contemporary experiences of women of color in the Global South. The household, workplace, community, and the nation-state, and the positions of women in the private and public spheres are compared cross-culturally. Topics include feminism, identity and self-esteem; globalization and transnational social movements and tensions and transitions encountered as nations embark upon development.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Africana Studies; Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Montes, V.
(Spring 2018)

SOCL B229 Black America in Sociological Perspective
This course presents sociological perspectives on various issues affecting black America as a historically unique minority group in the United States: the legacy of slavery and the Jim Crow era; the formation of urban black ghettos; the civil rights reforms; the problems of poverty and unemployment; the problems of crime and other social problems; the problems of criminal justice; the continuing significance of race; the varied covert modern forms of racial discrimination; and the role of race in American politics.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Africana Studies; Child and Family Studies
Units: 1.0
(Note Offered 2017-2018)

SOCL B321 The Black American Intellectual Community
Viewing black American intellectuals from the perspective of the sociology of knowledge, this course examines the patterns of development and conflict in the black American intellectual community, from early 20th century to the 21st century. It highlights the social and historical influences that shaped black intellectuals' world views on racism, black social problems, racial integration, black culture and black identity. Prerequisites: At least one previous sociology course or a course focused on black Americans or race relations. Open only to sophomores, juniors, or seniors.
Counts towards: Africana Studies
Units: 1.0
Instructor(s): Washington, R.
(Fall 2017)

ANTHROPOLOGY

Students may complete a major or a minor in Anthropology. Within the major, students may complete a concentration in Geoarchaeology.

Faculty
Casey Barrier, Assistant Professor of Anthropology (on leave semesters I & II)
Leigh M. Campoamor, Visiting Assistant Professor
Susanna Fioratta Assistant Professor of Anthropology (on leave semesters I & II)
Melissa Pashigian, Associate Professor and Acting Chair of Anthropology
Maja Seselj, Assistant Professor of Anthropology
Caroline VanSickle, Visiting Assistant Professor
Amanda Weidman, Associate Professor of Anthropology (on leave semesters I & II)

Anthropology is a holistic study of the human condition in both the past and the present. The anthropological lens can bring into focus the social, cultural, biological and linguistic variations that characterize the diversity of humankind throughout time and space. The frontiers of anthropology can encompass many directions: the search for early human fossils in Africa, the excavations of prehistoric societies and ancient civilizations, the analysis of language use and other expressive forms of culture, or the examination of the significance of culture in the context of social life.

Major Requirements
Requirements for the major are ANTH 101, 102, 303, 398, 399, an ethnographic area course that focuses on the cultures of a single region, and four additional 200- or 300-level courses in anthropology. Students are encouraged to select courses from each of four subfields of anthropology: archaeology, bioanthropology, linguistics or sociocultural. ANTH B303 fulfills the major writing intensive requirement.

Students may elect to do part of their work away from Bryn Mawr. Courses that must be taken at Bryn Mawr include ANTH 101, 102, 303, 398 and 399. (ANTH 103 at Haverford may be substituted for ANTH 102.)
Minor Requirements
Requirements for a minor in anthropology are ANTH 101, 102, 303, one ethnographic area course and two additional 200- or 300-level courses in anthropology.

Honors
Qualified students may earn departmental honors in their senior year. Honors are based on the quality of the senior thesis (398, 399) and grade point average in courses taken for the anthropology major.

Concentration in Geoarchaeology
The Department of Anthropology participates with Classical and Near Eastern Archaeology and Geology in offering a concentration within the major in geoarchaeology.

Cooperation with Other Programs
The Department of Anthropology actively participates and regularly contributes to the minors in Africana Studies, Environmental Studies, Gender and Sexuality Studies, and Health Studies. In addition, Anthropology cross-lists several courses with Biology, Classical and Near Eastern Archaeology, German, Growth and Structure of Cities, History, Peace and Conflict Studies, Political Science, and Sociology. Anthropology at Bryn Mawr also works in close cooperation with our counterpart department at Haverford College.

COURSES
ANTH B101 Introduction to Biological and Archaeological Anthropology
An introduction to the place of humans in nature, evolutionary theory, living primates, the fossil record for human evolution, human variation and the issue of race, and the archaeological investigation of culture change from the Old Stone Age to the rise of early civilizations in the Americas, Eurasia and Africa. In addition to the lecture/discussion classes, students must select and sign up for one lab section.
Approach: Inquiry into the Past (IP); Scientific Investigation (SI)
Units: 1.0
Instructor(s): Sesełj, M., VanSickle, C.
(Fall 2017)

ANTH B102 Introduction to Cultural Anthropology
An introduction to the methods and theories of cultural anthropology in order to understand and explain cultural similarities and differences among contemporary societies.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Child and Family Studies; Gender and Sexuality Studies; International Studies
Units: 1.0
Instructor(s): Pashigian, M., Campoamor, L.
(Spring 2018)

ANTH B202 Africa in the World
In this course, we will approach Africa with an emphasis on the many interconnections that link the continent with the rest of the world, through both time and space. Much popular talk about Africa in the U.S. is overwhelmingly negative—focusing on poverty, violence, and failed states—and often portrays Africa as something “other,” both different from and unrelated to the United States and much of the rest of the world. But such preconceptions blatantly overlook what we know about historical

and contemporary movements of people, ideas, materials, and money around the globe.

ANTH B209 Human Evolution
This course explores the biological and cultural evolution of humans as viewed from the fossil and archaeological record, beginning with our earliest ancestors and continuing to the dispersal of modern humans around the globe. We will use comparative, functional, and evolutionary anatomy to interpret past behaviors and relationships among fossil hominins, as well as their relationship to modern humans. Furthermore, we will use geology, archaeology, and paleoecology to reconstruct behavioral aspects of fossil hominins and their environmental influences. Throughout the course, we will focus our discussions on major debates in paleoanthropology. Prerequisite: ANTH 101 or permission of instructor.
Approach: Scientific Investigation (SI)
Units: 1.0
Instructor(s): VanSickle, C.
(Spring 2018)
ANTH B210 Medical Anthropology
This course examines the relationships between culture, society, disease and illness. It considers a broad range of health-related experiences, discourses, knowledge and practice among different cultures and among individuals and groups in different positions of power. Topics covered include sorcery, herbal remedies, healing rituals, folk illnesses, modern disease, scientific medical perceptions, clinical technique, epidemiology and political economy of medicine. Prerequisite: ANTH 102, H103 or permission of instructor.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Environmental Studies; Health Studies
Units: 1.0
(Not Offered 2017-2018)

ANTH B220 Methods and Theory in Archaeology
An examination of techniques and theories archaeologists use to transform archaeological data into statements about patterns of prehistoric cultural behavior, adaptation and change. Theory development, hypothesis formulation, gathering of archaeological data and their interpretation and evaluation are discussed and illustrated by examples. Theoretical debates current in anthropological archaeology are reviewed and the place of archaeology in the general field of anthropology is discussed. Prerequisite: ANTH 101 or permission of instructor.
Approach: Inquiry into the Past (IP)
Counts towards: Geoarchaeology
Units: 1.0
(Not Offered 2017-2018)

ANTH B232 Human Diets Past and Present: Nutritional Anthropology
This course will explore the complex nature of human experiences in satisfying needs for food and nourishment. The approach is biocultural, exploring both the biological basis of human food choices and the cultural context that influences food acquisition and choice. Material covered will primarily be from an evolutionary and cross-cultural perspective. Also included will be a discussion of popular culture in the U.S. and our current obsession with food, such as dietary fads. Prerequisite: ANTH 101 or instructor permission.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

ANTH B234 Forensic Anthropology
Introduces the forensic subfield of biological anthropology, which applies techniques of osteology and biomechanics to questions of forensic science, with practical applications for criminal justice. Examines the challenges of human skeletal identification and trauma analysis, as well as the broader ethical considerations and implications of the field. Topics will include: human osteology; search and recovery of human remains; taphonomy; trauma analysis; and the development and application of innovative and specialized techniques. Prerequisite: ANTH 101 or permission of instructor.
Approach: Scientific Investigation (SI)
Units: 1.0
(Not Offered 2017-2018)

ANTH B237 Environmental Health
This course introduces principles and methods in environmental anthropology and public health used to analyze global environmental health problems globally and develop health and disease control programs. Topics covered include risk; health and environment; food production and consumption; human health and agriculture; meat and poultry production; and culture, urbanization, and disease. Prerequisite: ANTH B102, H103 or permission of instructor.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Environmental Studies; Health Studies
Units: 1.0
(Not Offered 2017-2018)

ANTH B238 Chinese Culture and Society
This course encourages students to think critically about major developments in Chinese culture and society that have occurred during the twentieth and twenty-first centuries, with an emphasis on understanding both cultural change and continuity in China. Drawing on ethnographic material and case studies from rural and urban China over the traditional, revolutionary, and reform periods, this course examines a variety of topics including family and kinship; marriage, reproduction, and death; popular religion; women and gender; the Cultural Revolution; social and economic reforms and development; gift exchange and guanxi networks; changing perceptions of space and place; as well as globalization and modernity. Prerequisite: Sophomore standing or higher.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies; International Studies
Units: 1.0
(Not Offered 2017-2018)

ANTH B244 Global Perspectives on Early Farmers and Social Change
Throughout most of human history our ancestors practiced lifestyles focused upon the gathering and hunting of wild plants and animals. Today, however, a globalized agricultural economy supports a population of over seven billion individuals. This course utilizes information produced by archaeologists around the globe to examine this major historical transition while asking big questions like: What impact did the adoption of agriculture have on communities in the past, and how did farming spread to different world regions? We will also consider how the current farming system influences our own society. How does farming still affect our lives today, and how will the history of agricultural change shape our collective future? Counts toward Environmental Studies minor.
Approach: Inquiry into the Past (IP)
Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)

ANTH B259 The Creation of Early Complex Societies
In the last 10,000 years, humans around the world have transitioned from organizing themselves through small, egalitarian social networks to living within large and socially complex societies. This archaeology course takes an anthropological perspective to seek to understand the ways that human groups created these complex societies. We will explore the archaeological evidence for the development of complexity in the past, including the development of villages and early
cities, the institutionalization of social and political-economic inequalities, and the rise of states and empires. Alongside discussion of current theoretical ideas about complexity, the course will compare and contrast the evolutionary trajectories of complex societies in different world regions. Case studies will emphasize the pre-Columbian histories of complex societies in the Americas as well as some of the early complex societies of the Old World. Counts toward Latin American, Iberian, and Latino Studies minor. Approach: Inquiry into the Past (IP) and Cross-Cultural (CC)

ANTH B266 Waves of Power: Sound in Culture, Politics, and Society
From the chants of protesters to the hum of engines, from the ring of church bells to the background tracks of our favorite songs, sound matters. It is not just a background to what we see, but a crucial and powerful part of social life. This course builds an understanding of sound through anthropological investigation, as a product of human creativity, human conflict, and human interaction with the material world. We will explore the ways that sound is conceptualized and endowed with meaning; how sound becomes linked to identity; and how sound can become a call to action in different cultural and historical contexts. The kinds of sounds we will encounter in this course include, but are not limited to, music and spoken language; we will also be studying environmental, industrial, and religious sounds. You will also be learning about different ways to record, document, and write about sound by engaging in your own sound-based ethnographic research. Prerequisite: Sophomore Standing or higher.

Approach: Cross-Cultural Analysis (CC)
Units: 1.0
(Not Offered 2017-2018)

ANTH B268 Cultural Perspectives on Marriage and Family
This course explores the family and marriage as basic social institutions in cultures around the world. We will consider various topics including: kinship systems in social organization; dating and courtship; parenting and childhood; cohabitation and changing family formations; family planning and reproductive technologies; and gender and the division of household labor. In addition to thinking about individuals in families, we will consider the relationship between society, the state, and marriage and family. Prerequisite: ANTH B102 or permission of instructor.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ANTH B271 Museum Anthropology: History, Politics, Practices
This course provides an in-depth exploration of museum anthropology: the critical study of museum practices from an anthropological perspective. The course will fundamentally consider the role of museums in exhibiting culture—the politics of placing cultures on display, from living humans and human remains to cultural objects and artifacts. The course will also consider changing practices in museum anthropology, including repatriation efforts, shifting notions of heritage and identity and the emergence of community-curated exhibitions. This course complements the theoretical explorations of the museum with visits to area museums and hands-on work in Special Collections.

Approach: Course does not meet an Approach
Counts towards: Museum Studies
Units: 1.0
(Not Offered 2017-2018)

ANTH B274 Bioarchaeology
Since the earliest days of excavations, people have been fascinated by human skeletons recovered from ancient sites. However, skeletal remains are more than a physical bridge between the present and a romanticized past—they also encode valuable information about demography, gender differences, social identities and the daily lives of past peoples. Bioarchaeology is the study of human skeletal material from archaeological sites to address questions about these topics. In this course, students will learn about the methods used to analyze skeletal remains (e.g., how to estimate age and sex) and the hypotheses those methods are used to test (e.g., what health differences existed between social classes in the past?). Prerequisite: ANTH B101 or permission of the instructor.

Approach: Scientific Investigation (SI)
Units: 1.0
Instructor(s): VanSickle, C.
(Fall 2017)

ANTH B278 Paleoanthropology Methods
Paleoanthropology is the study of how human ancestors evolved. Part biological anthropology and part archaeology, this sub-discipline uses a variety of methods to test hypotheses about the human past. This class provides an overview of some of the most useful and commonly employed methods. We will also practice using many of these techniques first-hand. Methods will come from geology (e.g., how to date a fossil site), chemistry (e.g., how to reconstruct an ancient environment), demography (e.g., how to identify gene flow between populations in the past), genetics (e.g., what ancient DNA from fossils tells us about evolution), and more. The techniques that we will explore include modeling the past using primatology, ethnology, and archaeology; assessing evidence of ancient disease through paleopathology; reconstructing diets and developmental stages of fossils based on microscopic tooth anatomy, and using virtual reconstructions to compare hominin morphologies. Prerequisites: ANTH B101 or instructor permission.

Approach: Scientific Investigation (SI)
Counts towards: Geoarchaeology
Units: 1.0
Instructor(s): VanSickle, C.
(Spring 2018)

ANTH B279 Anthropology of Childhood and Youth
This course will challenge you to think about childhood and youth as a diverse global experience by exploring a set of fundamental questions. How do children’s daily lives differ from place to place, and how are race, class and gender linked to discourses and experiences of childhood? How do children stand in as symbols for broader political and cultural concerns? The course will explore these questions by considering the ways childhood is constructed and experienced in relation to controversial topics such as education, labor, migration, human rights, violence, consumerism, and media.
ANTH B281 Language in Social Context

Studies of language in society have moved from the idea that language reflects social position/identity to the idea that language plays an active role in shaping and negotiating social position, identity, and experience. This course will explore the implications of this shift by providing an introduction to the fields of sociolinguistics and linguistic anthropology. We will be particularly concerned with the ways in which language is implicated in the social construction of gender, race, class, and cultural/national identity. The course will develop students’ skills in the ethnographic analysis of communication through several short ethnographic projects. Prerequisite: ANTH B102, ANTH H103 or permission of instructor.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

ANTH B283 The Living Primates: Biology, Bones, and Behavior

This course provides a comprehensive review of the order Primates, focusing on morphology, biological adaptations, and behavioral diversity characterizing non-human primates. First, we will investigate the morphological traits that characterize major primate groups, and their evolutionary history. As many primate taxa are endangered or vulnerable to extinction, we will explore the approaches and challenges to primate conservation. In the second half of the course, we will focus on primate socioecology, examining how different environments influence primate distribution and social relationships. We will then delve further into primate behavior and cognition, examining interpersonal relationships, social dynamics, communication strategies, and learning modes. In doing this, we will address the questions concerning the recognition and definition of culture, self-awareness, and personhood among non-human primates using a comparative perspective. Prerequisites: ANTH B101 or permission of the instructor.

Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): Seselj, M.
(Fall 2017)

ANTH B285 Anthropology of Development, Aid, and Activism

This course will provide tools to reflect critically on the meanings and effects of aid, or “doing good” for others in a world characterized by historically-rooted social, political, and economic inequalities. What goes into defining specific people or geographic regions as “in need”? What complex dynamics are at play when an outside actor – whether in the form of a government aid agency, an NGO, or an individual volunteer – enters a community in order to aid its members? How do those categorized as beneficiaries assert their own identities and offer their own perspectives on social change?

Approach: Cross-Cultural Analysis (CC)
Counts towards: International Studies; Peace, Justice and Human Rights
Units: 1.0
Instructor(s): Campoamor, L.
(Fall 2017)

ANTH B294 Culture, Power, and Politics

What do a country’s national politics have to do with culture? Likewise, how are politics hidden below the surface of our everyday social lives? This course explores questions like these through anthropological approaches. Drawing on both classic and contemporary ethnographic studies from the U.S. and around the world, we will examine how social and cultural frameworks help us understand politics in new ways. Topics will include states and political systems, nationalism and citizenship, gender, violence, rumor and conspiracy theory, and non-state forms of governance. Prerequisite: ANTH 102, B103 or permission of the instructor.

Approach: Cross-Cultural Analysis (CC)
Counts towards: International Studies
Units: 1.0
(Not Offered 2017-2018)

ANTH B301 Anthropology of Globalization: Wealth, Mobility, Insecurity

This course explores economic globalization from an anthropological perspective. With a focus on the social, cultural, and historical aspects of global connections, we seek to understand not only large-scale change in the world, but also how the growing integration of different countries and economic systems shapes everyday life experience. Conversely, we will also explore how individuals actively engage with, and sometimes help shape, changing global processes. We will examine the meanings and motivations that guide some people to accumulate capital, and we will consider the structural inequalities and barriers that prevent others from doing so. We will study the paths of mobile individuals around the world—those who cross borders “legally” as well as those whose movements are deemed “illegal”—and think critically about what exclusion and forced immobility means for people socially as well as economically. Finally, we will investigate patterns of economic, political, and social insecurity that often accompany processes of globalization. Working through a series of ethnographic analyses and conducting our own research, we will gain a better understanding of how people around the world experience and actively make “the global.” Prerequisite: ANTH B102, ANTH H103 or permission of the instructor.

Units: 1.0
(Not Offered 2017-2018)

ANTH B303 History of Anthropological Theory

A consideration of the history of anthropological theories and the discipline of anthropology as an academic discipline that seeks to understand and explain society and culture as its subjects of study. Several vantage points on the history of anthropological theory are engaged to enact an historically charged anthropology of a disciplinary history. Anthropological theories are considered not only as a series of models, paradigms, or orientations, but as configurations of thought, technique, knowledge, and power that reflect the ever-changing relationships among the societies and cultures of the world. This course qualifies as completion of the writing requirement. Prerequisite: ANTH B102/ANTH H103 and at least one additional anthropology course at the 200 or 300 level.
Major Writing Requirement: Writing Intensive
Units: 1.0
Instructor(s): Campoamor,L.
(Fall 2017)

**ANTH B312 Anthropology of Reproduction**

An examination of social and cultural constructions of reproduction, and how power and politics in everyday life shapes reproductive behavior and its meaning in Western and non-Western cultures. The influence of competing interests within households, communities, states, and institutions on reproduction is considered. Prerequisite: ANTH B102 (or ANTH H103) or permission of instructor.

Counts towards: Child and Family Studies; Gender and Sexuality Studies; Health Studies
Units: 1.0
(Not Offered 2017-2018)

**ANTH B316 Media, Performance, and Gender in South Asia**

Examines gender as a culturally and historically constructed category in the modern South Asian context, focusing on the ways in which everyday experiences of and practices relating to gender are informed by media, performance, and political events. Prerequisite: Sophomore standing or higher.

Counts towards: Gender and Sexuality Studies; International Studies
Units: 1.0
(Not Offered 2017-2018)

**ANTH B317 Disease and Human Evolution**

Pathogens and humans have been having an “evolutionary arms race” since the beginning of our species. In this course, we will look at methods for tracing diseases in our distant past through skeletal and genetic analyses as well as tracing the paths and impacts of epidemics that occurred during the historic past. We will also address how concepts of Darwinian medicine impact our understanding of how people might be treated most effectively. There will be a midterm, a final, and an essay and short presentation on a topic developed by the student relating to the class. Prerequisite: ANTH B101 or permission of the instructor.

Counts towards: Health Studies, Biology

Counts towards: Health Studies
Units: 1.0
Instructor(s): Seselj,M.
(Spring 2018)

**ANTH B322 Anthropology of the Body**

This course examines a diversity of meanings and interpretations of the body in anthropology. It explores anthropological theories and methods of studying the body and social difference via a series of topics including the construction of the body in medicine, identity, race, gender, sexuality and as explored through cross-cultural comparison. Prerequisite: ANTH B102, ANTH H103 or permission of instructor.

Counts towards: Gender and Sexuality Studies; Health Studies
Units: 1.0
(Not Offered 2017-2018)

**ANTH B325 Mobility, Movement, and Migration in the Past**

The movement of human social groups across landscapes, borders, and boundaries is a dominant feature of today’s world as well as of the recent historic past. Archaeological research has demonstrated that migration, movement, and mobility were also common features of human life in the more distant past. From examining cases of small-scale groups that were largely defined by constant movements across their social landscapes, to the study of the spread of complex societies and early political states, this course will consider the role of migration in the formation, reproduction, and alteration of human societies. Attention will be paid to how archaeologists recognize and study movement, as well as to how knowledge of the past contributes to a broader anthropological understanding of human migration. Prerequisite: ANTH B101, or permission of instructor

Units: 1.0
(Not Offered 2017-2018)

**ANTH B328 Race, Inequality and Human Variation**

In this seminar, students will examine the relationship between science and social policies that impact “race” historically and in the present day. The course will focus on the role that anthropology has played in the study of race and how anthropological work has been used and abused in socio-political arenas, both with and without the complicity of the scientists themselves. We will discuss the history of the study of evolution and how race concepts have affected its study, how the worlds of science, politics and society are interrelated and how their relationship has been used to undermine, and sometimes promote, different racial and ethnic groups. Prerequisite: ANTH 101 or instructor permission.

Units: 1.0
(Not Offered 2017-2018)

**ANTH B331 Advanced Topics in Medical Anthropology**

The purpose of the course is to provide a survey of theoretical frameworks used in medical anthropology, coupled with topical subjects and ethnographic examples. The course will highlight a number of sub-specializations in the field of Medical Anthropology including genomics, science and technology studies, ethnomedicine, cross-cultural psychiatry/psychology, cross-cultural bioethics, ecological approaches to studying health and behavior, and more. Prerequisite: ANTH B102, ANTH H103, or permission of instructor.

Counts towards: Health Studies
Units: 1.0
(Not Offered 2017-2018)

**ANTH B348 In Search of Women in the Paleolithic**

What was the role of women in Paleolithic times? How does female form reflect evolutionary changes to our species? Paleoanthropologists reconstruct how humans evolved based on evidence from fossilized bones, ancient DNA, and archaeological artifacts. This complex narrative is often presented as androcentric, focusing on the importance of male-bodies, while de-emphasizing or even ignoring female-bodies. In this seminar, students will read and discuss historical and modern works on paleoanthropology and its critical interaction with feminist theory. The goal will be to find out what women were doing in our evolutionary past, and identify methodological and theoretical approaches to prevent gender-biased, androcentric paleoanthropological research from occurring. Prerequisites: ANTH B101

Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): VanSickle,C.
(Spring 2018)
ANTH B354 Political Economy, Gender, Ethnicity and Transformation in Vietnam

Today, Vietnam is in the midst of dramatic social, economic and political changes brought about through a shift from a central economy to a market/capitalist economy since the late 1980s. These changes have resulted in urbanization, a rise in consumption and shifts in social and economic relationships and cultural practices as the country has moved from low income to middle income status. This course examines culture and society in Vietnam focusing largely on contemporary Vietnam, but with a view to continuities and historical precedent in past centuries. In this course, we will draw on anthropological studies of Vietnam, as well as literature and historical studies. Relationships between the individual, family, gender, ethnicity, community and state will pervade the topics addressed in the course, as will the importance of political economy, nation, and globalization. Prerequisite: Sophomore standing or higher.

Counts towards: Gender and Sexuality Studies; International Studies
Units: 1.0
Instructor(s): Pashigian, M.
(Fall 2017)

ANTH B398 Senior Conference

Research design, proposal writing, research ethics, empirical research techniques and analysis of original material. Class discussions of work in progress and oral and written presentations of the analysis and results of research are important. A senior thesis proposal is the most significant writing experience in the seminar. Prerequisite: Senior Anthropology majors only.

Units: 1.0
Instructor(s): Pashigian, M., Seselj, M.
(Fall 2017)

ANTH B399 Senior Conference

Coding research notes, discussion of ongoing field work and research. A senior’s thesis is the most significant writing experience in the seminar.
Prerequisite: BM Anthropology Majors
Units: 1.0
Instructor(s): Pashigian, M., Seselj, M.
(Spring 2018)

ANTH B403 Supervised Work

Independent work is usually open to junior and senior majors who wish to work in a special area under the supervision of a member of the faculty and is subject to faculty time and interest.

Units: 1.0
(Fall 2017)

ANTH B425 Praxis III: Independent Study

Praxis III courses are Independent Study courses and are developed by individual students, in collaboration with faculty and field supervisors. A Praxis course is distinguished by genuine collaboration with fieldsite organizations and by a dynamic process of reflection that incorporates lessons learned in the field into the classroom setting and applies theoretical understanding gained through classroom study to work done in the broader community.

Counts towards: Praxis Program
Units: 1.0
(Not Offered 2017-2018)

ARCH B260 Daily Life in Ancient Greece and Rome

The often-praised achievements of the classical cultures arose from the realities of day-to-day life. This course surveys the rich body of material and textual evidence pertaining to how ancient Greeks and Romans -- famous and obscure alike -- lived and died. Topics include housing, food, clothing, work, leisure, and family and social life.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

ARTD B223 Anthropology of Dance

This course surveys ethnographic approaches to the study of global dance in a variety of contemporary and historical contexts, including contact improvisation, Argentinian tango, Kathak dance in Indian modernity, a range of traditional dances from Japan and China, capoeira in today’s Brazil, and social dances in North America and Europe. Recognizing dance as a kind of shared cultural knowledge and drawing on theories and literature in anthropology, dance and related fields such as history, and ethnomusicology, we will examine dance’s relationship to social structure, ethnicity, gender, spirituality and politics. Lectures, discussion, media, and fieldwork are included. Preparation: a course in anthropology or related discipline, or a dance lecture/seminar course, or permission of the instructor.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Major Writing Requirement: Writing Attentive
Units: 1.0
(Not Offered 2017-2018)

ARTD B310 Performing the City: Theorizing Bodies in Space

Building on the premise that space is a concern in performance, choreography, architecture and urban planning, this course will interrogate relationships between (performing) bodies and (city) spaces. Using perspectives from dance and performance studies, urban studies and cultural geography, it will introduce space, spatiality and the city as material and theoretical concepts and investigate how moving and performing bodies and city spaces intersect in political, social and cultural contexts. Lectures, discussion of assigned readings, attendance at a live performance, and 2-3 field trips are included. Prerequisites: One dance lecture/seminar course or one course in relevant discipline e.g. cities, anthropology, sociology, or permission of the instructor.

Major Writing Requirement: Writing Attentive
Units: 1.0
(Not Offered 2017-2018)

BIOL B236 Evolution

A lecture/discussion course on the development of evolutionary biology. This course will cover the history of evolutionary theory, population genetics, molecular and developmental evolution, paleontology, and phylogenetic analysis. Lecture three hours a week.

Approach: Scientific Investigation (SI)
Counts towards: Biochemistry and Molecular Biology
Units: 1.0
Instructor(s): Davis,G.  
(Spring 2018)

**CITY B185 Urban Culture and Society**  
Examines techniques and questions of the social sciences as tools for studying historical and contemporary cities. Topics include political-economic organization, conflict and social differentiation (class, ethnicity and gender), and cultural production and representation. Philadelphia features prominently in discussion, reading and exploration as do global metropolitan comparisons through papers involving fieldwork, critical reading and planning/problem solving using qualitative and quantitative methods.  
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)  
Units: 1.0  
Instructor(s): McDonogh,G., Raddatz,L.  
(Fall 2017)

**CITY B229 Topics in Comparative Urbanism**  
This is a topics course. Course content varies. Current topic description: City, Nature and Culture - Creativity, sprawl, alienation, mobility, nature and artifice --what do developments beyond the metropolis tell us about urban life. Probing suburban places, experiences, imagery and reforms around Paris, Hong Kong, Buenos Aires and Philadelphia, this required major writing seminar examines suburbs for both problems from the past and ideas for the future.  
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)  
Major Writing Requirement: Writing Intensive  
Counts towards: Latin American, Iberian and Latina/o Studies  
Units: 1.0  
Instructor(s): McDonogh,G.  
(Spring 2018)

**CITY B335 Topics in City and Media**  
This is a topics course. Course content varies.  
Units: 1.0  
(Not Offered 2017-2018)

**CITY B365 Topics: Techniques of the City**  
This is a topics course. Course content varies. Current topic description: Fragmentation, Enclaves, and the Future of Global Cities - Ghettoes. Gated Communities. Chinatowns. Cities have been and continue to be fragmented in multiple ways in space, meaning and experience, based on political economics, social formations and culture. From the Jewish ghetto of Venice to contemporary Chinatowns, the divided Philadelphia of W.E.B. DuBois to the gilded ghettos of contemporary gated communities, we will explore divided cities as historical process and future challenge.  
Prerequisite: One introductory level social science course.  
Units: 1.0  
Instructor(s): McDonogh,G.  
(Spring 2018)

**GERM B231 Cultural Profiles in Modern Exile**  
This course investigates the anthropological, philosophical, psychological, cultural, and literary aspects of modern exile. It studies exile as experience and metaphor in the context of modernity, and examines the structure of the relationship between imagined/remembered homelands and transnational identities, and the dialectics of language loss and bi- and multilingualism. Particular attention is given to the psychocultural dimensions of linguistic exclusion and loss. Readings of works by Julia Alvarez, Albert Camus, Ana Castillo, Sigmund Freud, Eva Hoffman, Maxine Hong Kingston, Milan Kundera, Friedrich Nietzsche, Salman Rushdie, W. G. Sebald, Kurban Said, and others.  
Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)  
Major Writing Requirement: Writing Attentive  
Counts towards: Latin American, Iberian and Latina/o Studies; International Studies  
Units: 1.0  
(Not Offered 2017-2018)

**HIST B200 The Atlantic World 1492-1800**  
The aim of this course is to provide an understanding of the way in which peoples, goods, and ideas from Africa, Europe, and the Americas came together to form an interconnected Atlantic World system. The course is designed to chart the manner in which an integrated system was created in the Americas in the early modern period, rather than to treat the history of the Atlantic World as nothing more than an expanded version of North American, Caribbean, or Latin American history.  
Approach: Inquiry into the Past (IP)  
Counts towards: Africana Studies; Latin American, Iberian and Latina/o Studies; International Studies; Peace, Justice and Human Rights  
Units: 1.0  
(Not Offered 2017-2018)

**ARABIC**  
Arabic language instruction is offered through Tri-College cooperation. Arabic 001 and 002 are taught at Haverford College (ARAB H001 and H002 Introduction to Modern Standard Arabic). Intermediate Arabic courses are taught at Bryn Mawr (ARAB B003 and B004 Second-Year Modern Standard Arabic), and Advanced Arabic courses are available at Swarthmore College and the University of Pennsylvania through the Quaker Consortium. The teaching of Arabic is one important component of the three colleges’ efforts to increase the presence of the Middle East in their curricula. Bryn Mawr offers courses on the Middle East in the departments of Anthropology, Classical and Near Eastern Archaeology, Comparative Literature, General Studies, History, History of Art, and Political Science. Additionally, students can have a concentration in Middle Eastern Studies.  

**Faculty**  
Grace Armstrong, Eunice M. Schenck 1907 Professor of French and Director of Middle East Languages  
Manar Darwish, Instructor and Coordinator of Bi-Co Arabic Program  
Farnaz Perry, Drill Instructor  

**College Foreign Language Requirement**  
Before the start of the senior year, each student must complete, with a grade of 2.0 or higher, two units of foreign language. Students may fulfill the requirement by completing two sequential semester-long courses in one language, beginning at the level determined by their language placement. A student who is prepared for advanced work may complete the requirement...
instead with two advanced free-standing semester-long courses in the foreign language(s) in which she is proficient.

COURSES

ARAB B003 Second Year Modern Standard Arabic
Combines intensive oral practice with writing and reading in the modern language. The course aims to increase students’ expressive ability through the introduction of more advanced grammatical patterns and idiomatic expressions. Introduces students to authentic written texts and examples of Arabic expression through several media. Prerequisite: ARAB H002 or placement by instructor.

Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): Darwish,M.
(Fall 2017)

ARAB B004 Second-Year Modern Standard Arabic
Combines intensive oral practice with writing and reading in the modern language. The course aims to increase students’ expressive ability through the introduction of more advanced grammatical patterns and idiomatic expressions. Introduces students to authentic written texts and examples of Arabic expression through several media. Prerequisite: ARAB B003 or placement.

Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): Darwish,M.
(Spring 2018)

ARAB B403 Independent Study
Units: 1.0
Instructor(s): Darwish,M.
(Fall 2017, Spring 2018)

ARTS PROGRAM

Students may complete a minor in Creative Writing, Dance or Theater and may submit an application to major in Creative Writing, Dance or Theater through the independent major program. Students may complete a major in Fine Arts or a major or minor in Music at Haverford College. English majors may complete a concentration in Creative Writing.

Faculty

Madeline Cantor, Associate Director and Term Professor of Dance
Linda Caruso Haviland, Director and Associate Professor of Dance (on leave semester I)
Lauren Feldman, Lecturer
Thomas Ferrick, Lecturer
Lela Aisha Jones, Pre-Doctoral Fellow
Annie Liontas, Lecturer
Mark Lord, Alice Carter Dickerman Director of the Arts Program and Professor of the Arts on the Theresa Helburn Chair of Drama and Director of the Theater Program
Maiko Matsushima, Lecturer
Airea D. Matthews, Assistant Professor of Creative Writing
Catharine Slusar, Assistant Professor of Theater
Daniel Torday, Associate Professor of Creative Writing (on leave semester II)
Molly Ward, Lecturer

Courses in the arts are designed to prepare students who might wish to pursue advanced training in their fields and are also for those who want to broaden their academic studies with work in the arts that is conducted at a serious and disciplined level. Courses are offered at introductory as well as advanced levels.

ARTS IN EDUCATION

ARTA B251 Arts Teaching in Educational and Community Settings
This is a Praxis II course intended for students who have substantial experience in an art form and are interested in extending that experience into teaching and learning at educational and community sites. Following an overview of the history of the arts in education, the course will investigate underlying theories. The praxis component will allow students to create a fluid relationship between theory and practice through observing, teaching and reflecting on arts practices in educational contexts. School or community placement 4 hours a week. Preparation: At least an intermediate level of experience in an art form. This course counts toward the minor in Dance or Theater.

Counts towards: Praxis Program
Units: 1.0
Instructor(s): Cantor,M.
(Fall 2017)

CREATIVE WRITING

Courses in Creative Writing within the Arts Program are designed for students who wish to develop their skills and appreciation of creative writing in a variety of genres (poetry, prose fiction and nonfiction, playwriting, screenwriting, etc.) and for those intending to pursue studies in creative writing at the graduate level. Any English major may include one Creative Writing course in the major plan. Students may pursue a minor as described below. While there is no existing major in Creative Writing, exceptionally well-qualified students with a GPA of 3.7 or higher in Creative Writing courses completed in the Tri-College curriculum may consider submitting an application to major in Creative Writing through the Independent Major Program after meeting with the Creative Writing Program director. When approved, the independent major in Creative Writing may also be pursued as a double major with another academic major subject.

Minor Requirements

Requirements for the minor in Creative Writing are six units of course work, generally including three beginning/intermediate courses in at least three different genres of creative writing (chosen from ARTW 159, 231, 236, 240, 251, 260, 261, 262, 263, 264, 265, 266, 268, 269) and three electives, including at least one course at the 300 level (ARTW 360, 361, 362, 364, 366, 367, 371, 373, 382), allowing for advanced work in one or more genres of creative writing which are of particular interest to the student. The objective of the minor in Creative Writing is to provide both depth and range, through exposure to several genres of creative writing. Students should consult with the Creative Writing Program director by the end of their sophomore
year to submit a plan for the minor in order to ensure admission to the appropriate range of courses.

**Concentration in Creative Writing**

English majors may elect a three-course concentration in Creative Writing as part of the English major program. Students interested in the concentration must meet with the Creative Writing Program director by the end of their sophomore year to submit a plan for the concentration and must also confirm the concentration with the chair of the English Department.

**COURSES**

**ARTW B159 Introduction to Creative Writing**

This course is for students who wish to experiment with three genres of creative writing: short fiction, poetry, and drama, and techniques specific to each of them. Priority will be given to interested first- and second-year students; additional spaces will be made available to upper-year students with little or no experience in creative writing. Students will write or revise work every week: roughly four weeks each will be devoted to short fiction, poetry, and drama. There will be individual conferences with the instructor to discuss their progress and interests. Half of class time will be spent discussing student work and half will be spent discussing syllabus readings.

Prerequisite: Students interested in a Creative Writing course must register for ARTW B999 and turn in the creative writing questionnaire by the end of registration.

Approach: Critical Interpretation (CI)

Units: 1.0

Instructor(s): Matthews, A.

(Fall 2017)

**ARTW B260 Writing Short Fiction I**

An introduction to fiction writing, focusing on the short story. Students will consider fundamental elements of fiction and the relationship of narrative structure, style, and content, exploring these elements in their own work and in the assigned readings in order to develop an understanding of the range of possibilities open to the fiction writer. Weekly readings and writing exercises are designed to encourage students to explore the material and styles that most interest them, and to push their fiction to a new level of craft, so that over the semester their writing becomes clearer, more controlled, and more absorbing.

Prerequisite: Students interested in a Creative Writing course must register for ARTW B999 and turn in the creative writing questionnaire by the end of registration.

Approach: Critical Interpretation (CI)

Units: 1.0

Instructor(s): Liontas, A., Torday, D.

(Spring 2018)

**ARTW B262 Playwriting I**

An introduction to playwriting through a combination of reading assignments, writing exercises, discussions about craft and ultimately the creation of a complete one-act play. Students will work to discover and develop their own unique voices as they learn the technical aspects of the craft of playwriting. Short writing assignments will complement each reading assignment. The final assignment will be to write an original one-act play.

Approach: Critical Interpretation (CI)

Units: 1.0

Instructor(s): Feldman, L.

(Fall 2017)

**ARTW B263 Writing Memoir I**

The purpose of this course is to provide students with practical experience in writing about the events, places and people of their own lives in the form of memoir. Emphasis will be placed on open-ended investigation into what we think we know (about ourselves and others) and how we think we came to know it. In addition to writing memoir of their own, and workshop discussions, students will also read and discuss works by writers such as Montaigne, Hazlitt, Freud, H.D., J.R. Ackerley, Georges Perec, and more contemporary writing by writers such as Akeel Bilgrami, Elif Batuman, Emily Witt, Lawrence Jackson. Although little mention will be made of the master narratives of American memoir—Christian redemption, confession, captivity, and slavery—the class will consistently struggle to come to terms with their foundational legacy in American life and letters.

Approach: Critical Interpretation (CI)

Units: 1.0

(Not Offered 2017-2018)

**ARTW B264 News and Feature Writing**

Students in this class will learn how to develop, report, write, edit and revise a variety of news stories, beginning with the basics of reporting and writing the news and advancing to longer-form stories, including personality profiles, news features and trend stories, and concluding with point-of-view journalism (columns, criticism, reported essays). The course will focus heavily on work published in The Philadelphia Inquirer and The New York Times. Several working journalists will participate as guest speakers to explain their craft. Students will write stories that will be posted on the class blog, the English House Gazette.

Prerequisite: Students interested in a Creative Writing course must register for ARTW B999 and turn in the creative writing questionnaire by the end of registration.

Approach: Critical Interpretation (CI)

Units: 1.0

Instructor(s): Ferrick, T.

(Spring 2018)
ARTW B265 Creative Nonfiction
This course will explore the literary expressions of nonfiction writing by focusing on the skills, process and craft techniques necessary to the generation and revision of literary nonfiction. Using the information-gathering tools of a journalist, the analytical tools of an essayist and the technical tools of a fiction writer, students will produce pieces that will incorporate both factual information and first person experience. Readings will include a broad group of writers ranging from E.B. White to Anne Carson, George Orwell to David Foster Wallace, Joan Didion to James Baldwin, among many others.

Prerequisite: Students interested in a Creative Writing course must register for ARTW B999 and turn in the creative writing questionnaire by the end of registration.

Approach: Critical Interpretation (CI)

Units: 1.0

Instructor(s): Liontas,A.
(Fall 2017)

ARTW B266 Screenwriting
An introduction to screenwriting. Issues basic to the art of storytelling in film will be addressed and analyzed: character, dramatic structure, theme, setting, image, sound. The course focuses on the film adaptation; readings include novels, screenplays, and short stories. Films adapted from the readings will be screened. In the course of the semester, students will be expected to outline and complete the first act of an adapted screenplay of their own.

Approach: Critical Interpretation (CI)

Counts towards: Film Studies

Units: 1.0

(Not Offered 2017-2018)

ARTW B269 Writing for Children
In this course, students have the opportunity to hone the craft of writing for children and young adults. Through reading, in-class discussion, peer review of student work, and private conferences with the instructor, we will examine the specific requirements of the picture book, the middle-grade novel, and the young adult novel. This analytical study of classic and contemporary literature will inspire and inform students’ creative work in all aspects of storytelling, including character development, plotting, world building, voice, tone, and the roles of illustration and page composition in story narration.

Approach: Critical Interpretation (CI)

Units: 1.0

(Not Offered 2017-2018)

ARTW B360 Writing Short Fiction II
An exploration of approaches to writing short fiction designed to strengthen skills of experienced student writers as practitioners and critics. Requires writing at least five pages each week, workshopping student pieces, and reading texts ranging from realist stories to metafictional experiments and one-page stories to the short novella, to explore how writers can work within tight confines. Suggested Preparation: ARTW B260 or work demonstrating equivalent expertise in writing short fiction. Students without the ARTW B260, must submit a writing sample of 10-15 pages in length (prose fiction) to the Creative Writing Program during the preregistration period to be considered for this course.

Prerequisite: Students interested in a Creative Writing course must register for ARTW B999 and turn in the creative writing questionnaire by the end of registration.

Units: 1.0

Instructor(s): Torday,D.
(Fall 2017)

ARTW B361 Writing Poetry II
This course assumes that reading and writing are inextricably linked, and that the only way to write intelligent and interesting poetry is to read as much of it as possible. Writing assignments will be closely connected to syllabus reading, including an anthology prepared by the instructor, and may include working in forms such as ekphrastic poems (i.e. poems about works of visual art or sculpture), dramatic monologues, prose poems, translations, imitations and parodies. Suggested Preparation: ARTW B261 or work demonstrating equivalent familiarity with the basic forms of poetry in English. For students without ARTW B261, a writing sample of 5-7 poems must be submitted to the instructor to be considered for this course.

Prerequisite: Students interested in a Creative Writing course must register for ARTW B999 and turn in the creative writing questionnaire by the end of registration.

Units: 1.0

Instructor(s): Matthews,A.
(Spring 2018)

ARTW B362 Playwriting II
This course challenges students of playwriting to further develop their unique voices and improve their technical skills in writing for the stage. We will examine how great playwrights captivate a live audience through their mastery of character, story and structure. Through a combination of weekly reading assignments, playwriting exercises, theater explorations, artist-driven feedback, and discussions of craft, this class will facilitate each student’s completion of an original, full-length play. Prerequisite: ARTW 262; or suitable experience in directing, acting or playwriting; or submission of a work sample of 10 pages of dialogue. All students must complete the Creative Writing preregistration questionnaire during preregistration to be considered for the course.

Units: 1.0

(Not Offered 2017-2018)

ARTW B364 Longer Fictional Forms
An advanced workshop for students with a strong background in fiction writing who want to write longer works: the long short story, novella and novel. Students will write intensively, and complete a long story, novel or novella (or combination thereof) totaling up to 20,000 words. Students will examine the craft of their work and of published prose. Suggested Preparation: ARTW B260 or proof of interest and ability. For students without ARTW B260, students must submit a writing sample of 10-15 pages in length (prose fiction) to the Creative Writing Program during the preregistration period to be considered for this course.

Prerequisite: Students interested in a Creative Writing course must register for ARTW B999 and turn in the creative writing questionnaire by the end of registration.

Units: 1.0

(Spring 2018)

ARTW B365 Creative Nonfiction II
An exploration of approaches to writing personal essays and lyric essays designed to strengthen skills of experienced student essayists as practitioners and critics. Requires writing at least
five pages each week, workshopping student essays, and reading texts ranging from long personal essays to book-length essays, to explore how writers can work within the broader parameters of the long essay. Suggested Preparation: ARTW B265 or work demonstrating equivalent expertise in writing personal and lyric essays. Students without the ARTW B265, must submit a writing sample of 10-15 pages in length (nonfiction prose) to the Creative Writing Program during the preregistration period to be considered for this course.

Approach: Course does not meet an Approach
Units: 1.0
(Not Offered 2017-2018)

ARTW B403 Supervised Work

Students who have had a Creative Writing Major approved through the Independent Major Program will work with a member of the Creative Writing Program faculty on a semester-long 403 (Independent Study) as a final project their senior year. Highly qualified Creative Writing minors and concentrators may petition the program to complete an independent study, subject to the availability of faculty to supervise such projects.

Units: 1.0
(Fall 2017)

DANCE

Dance is not only an art and an area of creative work; it is also a significant and enduring human behavior that can serve as a core of creative and scholarly inquiry within the liberal arts. The Program offers full semester courses in progressive levels of ballet, modern and jazz, as well as a full range of technique courses in diverse genres and various traditions. Several performance opportunities are available to students ranging from our Dance Outreach Ensemble, which travels to schools throughout the Philadelphia region, to our Spring Concert in which students work with professional choreographers or re-creators and perform in our main stage theater. Students may also investigate the creative process in three levels of composition and choreography courses. We also offer lecture/ seminar courses designed to introduce students to dance as a vital area of academic inquiry. These include courses that examine dance within western practices as well as courses that extend or locate themselves beyond those social or theatrical traditions.

Students can take single courses in dance, can minor in dance, or complete a major through the independent major program. The core academic curriculum for the dance minor or independent major in dance includes intermediate or advanced technique courses, performance ensembles, dance composition, independent work, and courses in dance research or analysis.

Minor Requirements

Requirements for the dance minor are six units of coursework: three required (ARTD B140, B142, or B144 and two .5 credit studio courses: one must be selected from among the following technique courses: 136-139 or any 200 or 300 level technique course; the second .5 credit course must be a technique course at the 200 or 300 level or selected from among the following performance ensembles: 345-350); three approved electives; and attendance at a prescribed number of performances/events. With the advisor’s approval, one elective in the minor may be selected from allied Tri-College departments.

Independent Major in Dance Requirements

The independent major requires eleven courses, drawn primarily from our core academic curriculum and including: ARTD 140 and one additional dance lecture/seminar course; ARTD B142 and ARTD B144; one 0.5 technique course at the intermediate or advanced level each semester after declaring the major. Participation in a performance ensemble is highly recommended. The major also requires attendance at a prescribed number of performances/events, demonstration of basic writing competency in dance by taking two writing attentive or one writing intensive course in Dance or an approved allied program or department, and a senior capstone experience. With the advisor’s approval, two electives in the major may be selected from allied Tri-College departments.

In both the minor and the major, students may choose to emphasize one aspect of the field, but must first consult with the dance faculty regarding their course of study.

Technique Courses and Performance Ensemble Courses

The Dance Program offers a full range of dance instruction including courses in ballet, modern, jazz, and African as well as techniques developed from other cultural art and social forms such as flamenco, Classical Indian, Polynesian dance, hip-hop, Latin social dance, and tap dance, among others. A ballet placement class is required for upper level ballet courses. Performance ensembles, choreographed or re-staged by professional artists, are by audition only and are given full concert support. The Dance Outreach Ensemble tours regional schools. Technique courses ARTD 136-139, 230-232, 330-331, and all dance ensembles are offered for academic credit but all technique courses and ensemble courses may be taken for Physical Education credit instead (see both listings below).

Courses for Academic Credit

ARTD B136 001 Intro to Dance Techniques I - Modern
ARTD B137 002 Intro to Dance Techniques I - Ballet
ARTD B138 001 Intro to Dance Techniques II - Modern
ARTD B139 002 Intro to Dance Techniques II - Ballet
ARTD B140 Approaches to Dance: Themes and Perspectives
(Not offered 2017-18)
ARTD B142 Dance Composition: Process and Presence
ARTD B144 Dance Composition: Elements and Craft
ARTD B145 Dance: Close Reading (not offered 2017-18)
ARTD/ANTH B223 Anthropology of Dance (not offered 2017-18)
ARTD B230 Intermediate Technique: Modern
ARTD B231 Intermediate Technique: Ballet
ARTD B232 Intermediate Technique: Jazz
ARTD B240 Dance History I: Roots of Western Theater Dance
(Not offered 2017-18)
ARTD B241 Dance History II: A History of Contemporary Western Theater Dance
ARTD B250 Performing the Political Body (not offered 2017-18)
Dance, Migration and Exile (not offered 2017-18)
ARTD B267 Diasporic Bodies: The Black Dancing Body, Restoration, and Activism
ARTD/ANTH B310 Performing the City: Theorizing Bodies in Space (not offered 2017-18)
ARTD B330 Advanced Technique: Modern
ARTD B331 Advanced Technique: Ballet
ARTD B342 Advanced Choreography
ARTD B345 Dance Ensemble: Ballet
ARTD B346 Dance Ensemble: Modern
ARTD B347 Dance Ensemble: Jazz
ARTD B348 Dance Ensemble: African
ARTD B349 Dance Ensemble: Outreach
ARTD B350 Dance Ensemble: Special (2017-2018: Style Hip Hop)
ARTD B390 Senior Project/Thesis
ARTD B403 Supervised Work
ARTD B403 002 Supervised Work: Practical Anatomy: Bones, Muscle, Movement
ARTA B251/EDUC B251 Arts Teaching in Educational and Community Settings

Technique/Ensemble Courses for PE Credit (check course guide for courses available each semester)

PE B101 Ballet: Beginning Technique
PE B102 Ballet: Intermediate Technique
PE B103 Ballet: Advanced Technique
PE B104 Ballet Workshop
PE B105 Modern: Beginning Technique
PE B106 Modern: Intermediate Technique
PE B107 Modern: Advanced Technique
PE B108 Jazz: Beginning Technique
PE B110 Jazz: Intermediate Technique
PE B111 Hip-hop Technique
PE B112 African Dance
PE B118 Movement Improvisation
PE B121 Tap I
PE B123 Tap II
PE B126 Rhythm & Style: Flamenco and Tap
PE B127 Social Dance Forms: Topics: Intro to Social Dance, Swing, Salsa, Latin
PE B129 The Gesture of Dance: Classical Indian and Polynesian Dance
PE B131 Tap: Learning and Performing
PE B145 Dance Ensemble: Modern
PE B146 Dance Ensemble: Ballet
PE B147 Dance Ensemble: Jazz
PE B148 Dance Ensemble: African
PE B149 Dance Ensemble: Outreach

PE B195 Movement for Theater
PE B196 Dance Composition Lab
PE B197 Directed Work in Dance

COURSES

ARTD B136 Introduction to Dance Techniques I: Modern
Students enrolling in this course take a full semester of beginning modern dance as their primary course and a second full semester dance technique class as a complementary course. The two courses together constitute .5 credit. Options for the complementary course can be found on the Dance department website. Students must meet the attendance requirement, attend two mandatory lectures and one live dance performance, and complete three short writing assignments. In lieu of books, students may incur $10-30 in performance ticket fees but may take advantage of free Tri-Co performances. Offered on a Pass/Fail basis only.

Approach: Course does not meet an Approach
Units: 0.5
Instructor(s): Cantor, M.
(Fall 2017, Spring 2018)

ARTD B137 Introduction to Dance Techniques I: Ballet
Students enrolling in this course take a full semester of beginning ballet as their primary course and a second full semester dance technique class as a complementary course. The two courses together constitute .5 credit. Options for the complementary course can be found on the Dance department website. Students must meet the attendance requirement, attend two mandatory lectures and one live dance performance, and complete three short writing assignments. In lieu of books, students may incur $10-30 in performance ticket fees but may take advantage of free Tri-Co performances. Offered on a Pass/Fail basis only.

Approach: Course does not meet an Approach
Units: 0.5
Instructor(s): Cantor, M., D'Angelo, D.
(Fall 2017, Spring 2018)

ARTD B138 Introduction to Dance Techniques II: Modern
Students enrolling in this course take a full semester of beginning modern dance as their primary course and a second full semester dance technique class as a complementary course. The two courses together constitute .5 credit. Options for the complementary course can be found on the Dance department website. Students must meet the attendance requirement, write a critique of one live dance event, and a short paper on a topic selected in consultation with the faculty coordinator. In lieu of books, students may incur $10-30 in performance ticket fees but may take advantage of free Tri-Co performances. Offered on a Pass/Fail basis only. Prerequisite: ARTD 136 or ARTD 137.

Approach: Course does not meet an Approach
Units: 0.5
Instructor(s): Cantor, M.
(Fall 2017, Spring 2018)

ARTD B139 Introduction to Dance Techniques II: Ballet
Students enrolling in this course take a full semester of beginning ballet as their primary course and a second full semester dance technique class as a complementary course. The two courses together constitute .5 credit. Students must meet the attendance requirement, write a critique of one live dance event, and a short paper on a topic selected in consultation with the faculty coordinator. In lieu of books, students may incur $10-30 in performance ticket fees but may take advantage of free Tri-Co performances. Offered on a Pass/Fail basis only. Prerequisite: ARTD B136 or ARTD B137 (Dance Techniques I) required.
ARTD B144 Dance Composition: Elements and Craft

This dance composition course develops knowledge and skill in the theory and craft of choreography. Basic elements of dancemaking such as space, timing, shaping, and relationship are explored and refined through structured and open movement experiences. Attention is given to developing movement invention skills and compositional strategies; considering form and structure; investigating music, language, images and objects as sources; experimenting with group design; and broadening critical understanding of their own work and the work of others. Students will work on weekly solo and group projects and will have some opportunity to revise work. Related viewing and reading will be assigned. Students may take ARTD B142 Dance Composition: Process and Presence or ARTD B144 Dance Composition: Elements and Craft in any order as a single course or to fulfill minor and major requirements. Concurrent participation in at least one class per week in any level technique course, either for credit or as an auditor, is required. Additional costs: In lieu of books, readings will be posted on Moodle; students may incur $10-30 in performance ticket fees but may take advantage of free Tri-Co performances.

Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Attentive
Units: 1.0
Instructor(s): Cantor,M.
(Spring 2018)
this level are also expected to begin demonstrating an intellectual and kinesthetic understanding of these technical challenges and their actual performance. Students will be evaluated on their openness and commitment to the learning process, increased understanding of the technique, and demonstration in class of their technical and stylistic progress as articulated within the field. Preparation: two semesters of beginning level ballet, its equivalent, or permission of the instructor.

Approach: Course does not meet an Approach
Units: 0.5
Instructor(s): Storz,M.
(Fall 2017, Spring 2018)

ARTD B231 Ballet: Intermediate Technique
Intermediate level dance technique courses focus on expanding the movement vocabulary, on introducing movement phrases that are increasingly complex and demanding, and on further attention to motional dynamics and spatial contexts. Students at this level are also expected to begin demonstrating an intellectual and kinesthetic understanding of these technical challenges and their actual performance. Students will be evaluated on their openness and commitment to the learning process, increased understanding of the technique, and demonstration in class of their technical and stylistic progress as articulated within the field. Preparation: two semesters of beginning level ballet, its equivalent, or permission of the instructor.

Approach: Course does not meet an Approach
Units: 0.5
(Fall 2017, Spring 2018)

ARTD B232 Jazz: Intermediate Technique
Intermediate level dance technique courses focus on expanding the movement vocabulary, on introducing movement phrases that are increasingly complex and demanding, and on further attention to motional dynamics and spatial contexts. Students at this level are also expected to begin demonstrating an intellectual and kinesthetic understanding of these technical challenges and their actual performance. Students will be evaluated on their openness and commitment to the learning process, increased understanding of the technique, and demonstration in class of their technical and stylistic progress as articulated within the field. Preparation: two semesters of beginning level jazz, its equivalent, or permission of the instructor.

Approach: Course does not meet an Approach
Units: 0.5
Instructor(s): Goodman,Y.
(Fall 2017)

ARTD B241 Dance History II: A History of Contemporary Western Theater Dance
This course investigates the history of dance with particular emphasis on its development in the twentieth and twenty-first centuries as a Western Theater Art form within a broader context of global art and culture. The course investigates the historical and cultural forces that shape both the form and function of dance as well as the reciprocal relationship of dance to or impact on those same forces. Dance will be considered both chronologically and theoretically as cultural, social, aesthetic, and personal phenomena. The course will provide students with an introduction to both traditional and more contemporary models of historiography with particular reference to the changing modes of documenting, researching and analyzing dance. In addition to lectures and discussion, the course will include film, video, slides, and some movement experiences.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Major Writing Requirement: Writing Attentive
Units: 1.0
Instructor(s): Caruso Haviland,L.
(Spring 2018)

ARTD B250 Performing the Political Body
Artists, activists, politicians, regents, intellectuals and just ordinary people have, throughout history and across cultures, used dance and performance to support political goals and ideologies or to perform social or cultural interventions in the private and public spheres. From a wide range of possibilities, this course focuses on how dance is a useful medium for both embodying and analyzing ideologies and practices of power, particularly with reference to gender, class, and ethnicity. Students will also investigate bodiedness as an active agent of social change and political action. Students will read excerpts from seminal and contemporary theory of performing bodiedness, ethnicity, and gender, as well as from theoreticians, performers, and other practitioners more specifically engaged with dance and performance. In addition to literary, dance historical, anthropological and political texts, the course includes media, guest lecturers, and introductory group improvisation and performance exercises, however, no prior training or experience in dance or performance is necessary. In lieu of books, students will be assigned to see a dance performance (typical costs: $12-30) but may take advantage of free Tri-Co performances.
Preparation: A previous dance lecture/seminar course or a course in a relevant discipline such as anthropology, sociology, or history is recommended but not required.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Major Writing Requirement: Writing Attentive
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ARTD B267 Diasporic Bodies, Grounding Freedom: The Black/African Dancing Body, Restoration, and Activism
Diasporic Bodies, Grounding Freedom: The Black/African Dancing Body, Restoration, and Activism take Marronage—the act of escaping from slavery in the Americas to create communities of freedom and autonomy—as its model. This course views Black/African diasporic movement and artistic practices as a form of contemporary marronage, providing spaces of activism and embodied restoration. These thriving, fertilizing spaces, communities, and artists center and reboots, with integrity, the connections among black/African diasporic bodies, traditions, and cultures across oceans and lands. While focusing on the black experience, this course will examine these temporal, Imaginative spaces, claiming them as essential to all people in societies that do not acknowledge multiplicity or diversity as societal norms, and capable of conjuring semi-lost histories waiting to be revived. It will examine marronage in diasporic communities as an effort to ground, re-ground, and free bodies. Together, we will explore other diasporic-based research and approaches to understanding and experiencing embodied restoration and we will also learn a meditative embodiment process with 3 elements: mining, archiving, and witnessing. We will examine literature, animation, and film resources to broaden our dialogue on how interdisciplinary, artistic spaces make fertile foundations for embodied and restorative activism. This course
will merge lecture, readings, viewings, and praxis as its main components. No dance experience is necessary but students should dress comfortably to move. In lieu of books, readings will be posted on Moodle and students will be assigned to see a performance (typical costs: $12-30) but may take advantage of free Tri-co performances. A previous dance lecture/seminar course or a course in a relevant discipline such as anthropology, sociology, or history is strongly recommended but not required.

Approach: Cross-Cultural Analysis (CC)
Major Writing Requirement: Writing Attentive
Counts towards: Africana Studies
Units: 1.0
Instructor(s): Jones, L.
(Fall 2017)

**ARTD B310 Performing the City: Theorizing Bodies in Space**

Building on the premise that space is a concern in performance, choreography, architecture and urban planning, this course will interrogate relationships between (performing) bodies and (city) spaces. Using perspectives from dance and performance studies, urban studies and cultural geography, it will introduce space, spatiality and the city as material and theoretical concepts and investigate how moving and performing bodies and city spaces intersect in political, social and cultural contexts. Lectures, discussion of assigned readings, attendance at a live performance, and 2-3 field trips are included. Prerequisites: One dance lecture/seminar course or one course in relevant discipline e.g. cities, anthropology, sociology, or permission of the instructor.

Major Writing Requirement: Writing Attentive
Units: 1.0
(Not Offered 2017-2018)

**ARTD B330 Modern: Advanced Technique**

Advanced level technique courses continue to expand movement vocabulary and to introduce increasingly challenging movement phrases and repertory. Students are also expected to begin recognizing and incorporating the varied gestural and dynamic markers of styles and genres, with an eye to both developing their facility for working with various choreographic models and for beginning to mark out their individual movement preferences. These courses continue to focus on both the intellectual and kinesthetic understanding and command of technical challenges and their actual performance. Preparation: three semesters of Modern: Intermediate Technique, its equivalent, or permission of the instructor.

Units: 0.5
Instructor(s): Malcolm-Naib, R.
(Fall 2017, Spring 2018)

**ARTD B331 Ballet: Advanced Technique**

Advanced level technique courses continue to expand movement vocabulary and to introduce increasingly challenging movement phrases and repertory. Students are also expected to begin recognizing and incorporating the varied gestural and dynamic markers of styles and genres, with an eye to both developing their facility for working with various choreographic models and for beginning to mark out their individual movement preferences. These courses continue to focus on both the intellectual and kinesthetic understanding and command of technical challenges and their actual performance. The last half hour of this class includes optional pointe or repertory work with permission of the instructor. Preparation: Minimum of three semesters of intermediate level ballet, its equivalent, or permission of the instructor. First year students must take a placement class.

Units: 0.5
(Fall 2017, Spring 2018)

**ARTD B342 Advanced Choreography**

Independent study in choreography under the guidance of the instructor. Students are expected to produce one major choreographic work and are responsible for all production considerations. Concurrent attendance in any level technique course is required. Pre-requisite: ARTD B142 and ARTD B144.

Units: 0.5, 1.0
Instructor(s): Caruso Haviland, L., Cantor, M.
(Fall 2017, Spring 2018)

**ARTD B345 Dance Ensemble: Modern**

Dance ensembles are designed to offer students significant opportunities to develop dance technique, particularly in relationship to dance as a performance art. Students audition for entrance into individual ensembles. Original works choreographed by faculty or guest choreographers or works reconstructed / restaged from classic or contemporary repertories are rehearsed and performed in concert. Students are evaluated on their participation in rehearsals, their demonstration of full commitment and openness to the choreographic and performance processes both in terms of attitude and technical practice, and their achieved level of performance. Preparation: This course is suitable for intermediate and advanced level dancers. Concurrent attendance in one technique class a week is required.

Units: 0.5
(Fall 2017, Spring 2018)

**ARTD B346 Dance Ensemble: Ballet**

Dance ensembles are designed to offer students significant opportunities to develop dance technique, particularly in relationship to dance as a performance art. Students audition for entrance into individual ensembles. Original works choreographed by faculty or guest choreographers or works reconstructed / restaged from classic or contemporary repertories are rehearsed and performed in concert. Students are evaluated on their participation in rehearsals, their demonstration of full commitment and openness to the choreographic and performance processes both in terms of attitude and technical practice, and achievement of expected levels of performance. Preparation: This course is suitable for intermediate and advanced level dancers. Concurrent attendance in at least one technique class per week is required.

Units: 0.5
(Fall 2017)

**ARTD B347 Dance Ensemble: Jazz**

Dance ensembles are designed to offer students significant opportunities to develop dance technique, particularly in relationship to dance as a performance art. Students audition for entrance into individual ensembles. Original works choreographed by faculty or guest choreographers or works reconstructed / restaged from classic or contemporary repertories are rehearsed and performed in concert. Students are evaluated on their participation in rehearsals, their demonstration of full commitment and openness to the choreographic and
performance processes both in terms of attitude and technical practice, and achievement of expected levels of performance.

Preparation: This course is suitable for intermediate and advanced level dancers. Concurrent attendance in at least one technique class per week is required.

Units: 0.5
(Spring 2018)

**ARTD B348 Dance Ensemble: African**

Dance ensembles are designed to offer students significant opportunities to develop dance technique, particularly in relationship to dance as a performance art. Students audition for entrance into individual ensembles. Original works choreographed by faculty or guest choreographers or works reconstructed / restaged from classic or contemporary repertories are rehearsed and performed in concert. Students are evaluated on their participation in rehearsals, their demonstration of full commitment and openness to the choreographic and performance processes both in terms of attitude and technical practice, and achievement of expected levels of performance.

Preparation: This course is suitable for intermediate and advanced level dancers. Concurrent attendance in at least one technique class per week is suggested.

Units: 0.5
(Spring 2018)

**ARTD B349 Dance Ensemble: Dance Outreach Project**

Dance Outreach Ensemble is a community-focused project in which students learn both a lecture-demonstration and a narrative dance work and tour this combined program to schools every Fall in the Philadelphia area, reaching 1500 to 2000 children each year. Dance Outreach introduces these children to dance through a program of original choreography that is supported by commissioned music and costuming. Interested students are expected to have some experience in a dance form or genre, enthusiasm for performance, and an interest in education in and through the arts. Students are selected after an initial group meeting and movement session in the Fall. Concurrent participation in at least one technique class per week is suggested.

Units: 0.5
Instructor(s): Cantor, M.
(Fall 2017)

**ARTD B350 Dance Ensemble: Special Topics**

This is a topics course. The genre or style content of this ensemble varies. Dance ensembles are designed to offer students significant opportunities to develop dance technique, particularly in relationship to dance as a performance art. Students audition for entrance into individual ensembles. Original works choreographed by faculty or guest choreographers or works reconstructed / restaged from classic or contemporary repertories are rehearsed and performed in concert. Students are evaluated on their participation in rehearsals, their demonstration of full commitment and openness to the choreographic and performance processes both in terms of attitude and technical practice, and achievement of expected levels of performance.

Preparation: This course is suitable for intermediate and advanced level dancers. Concurrent attendance in at least one technique class per week is suggested.

Units: 0.5
(Spring 2018)

**ARTD B390 Senior Project/Thesis**

Majors develop, in conjunction with a faculty advisor, a senior capstone experience that is complementary to and will expand and deepen their work and interests within the field of dance. This can range from a significant research or expository paper to a substantial choreographic work that will be supported in a full studio performance. Students who elect to do choreographic or performance work must submit a written reflection in consultation with the advisor. Work begins in the Fall semester and should be completed by the middle of the Spring semester. One outside evaluator will be invited to offer additional comment.

Units: 0.5, 1.0
(Fall 2017, Spring 2018)

**ARTD B403 Supervised Work**

Research in a particular topic of dance under the guidance of an instructor, resulting in a final paper or project. Permission of the instructor is required.

Units: 0.5, 1.0
(Fall 2017, Spring 2018)

**ARTA B251 Arts Teaching in Educational and Community Settings**

This is a Praxis II course intended for students who have substantial experience in an art form and are interested in extending that experience into teaching and learning at educational and community sites. Following an overview of the history of the arts in education, the course will investigate underlying theories. The praxis component will allow students to create a fluid relationship between theory and practice through observing, teaching and reflecting on arts practices in educational contexts. School or community placement 4 hours a week. Preparation: At least an intermediate level of experience in an art form. This course counts toward the minor in Dance or Theater.

Counts towards: Praxis Program
Units: 1.0
Instructor(s): Cantor, M.
(Fall 2017)

**ARTT B251 Fundamentals of Acting**

This studio course provides an introduction to the basic processes of acting to students of various experience levels. We develop tools and a shared vocabulary using performance exercises, games, improvisation and scene work.

Units: 1.0
Instructor(s): Slusar, C.
(Fall 2017)

**THEATER**

The curricular portion of the Bryn Mawr and Haverford Colleges’ Theater Program focuses on the point of contact between creative and analytic work. Courses combine theory (reading and discussion of dramatic literature, history and criticism) and practical work (creative exercises, scene study and performance) to provide viable theater training within a liberal-arts context.

**Minor Requirements**

Requirements for the minor in Theater are six units of course work, three required (ARTT 150, 251 and 252) and three elective. Students must consult with the Theater faculty to ensure that the necessary areas in the field are covered. Students may submit
an application to major in Theater through the independent major program.

**Theater Performance**

Numerous opportunities exist to act, direct, design and work in technical theater. In addition to the Theater Program’s mainstage productions, many student theater groups exist that are committed to musical theater, improvisation, community outreach, Shakespeare, film and video work, etc. All Theater Program productions are open and casting is routinely blind with respect to race and gender.

**COURSES**

**ARTT B151 Focus: Dramatic Structures in Plays, Performance, and Film**

This course is an introduction to techniques of dramatic structure that are used in the creation of plays, works of performance art, and films. We will have recourse in our work to some crucial theoretical documents as well as to play scripts both classic and contemporary and archived and live performances. Participants will make critical readings of works using the techniques of artistic analysis utilized by directors, dramaturgs, actors, playwrights and designers. This course is intended to be a touchstone for the study of any of these creative pursuits as well as an excellent opportunity for interested students to acquaint themselves with critical aspects of the creative process.

Approach: Critical Interpretation (CI)
Units: 0.5
Instructor(s): Lord,M.
(Spring 2018)

**ARTT B152 Focus: Writing about Theater and Performance**

This course will constitute an introduction to writing about theater and performance art events. Our work will be structured in relation to a number of live and archived performances which the class will see on and off-campus. Students will practice techniques for preparing to see a performance, discuss strategies for reading dramatic texts and for observing time-based art. We will read notable examples of occasional criticism by a diverse group of writers of the past fifty years, who publish in a wide variety of forms including on blogs and social media. We will examine their work for techniques and strategies. Students will also read and respond to each other’s writing. Central questions of the course include the evolution of critical vocabulary, the role of the critic’s bias, the development of a critical voice, and the likely trajectory of the fields of criticism and performance.

Approach: Critical Interpretation (CI)
Units: 0.5
Instructor(s): Lord,M.
(Spring 2018)

**ARTT B251 Fundamentals of Acting**

This studio course provides an introduction to the basic processes of acting to students of various experience levels. We develop tools and a shared vocabulary using performance exercises, games, improvisation and scene work.

Units: 1.0
Instructor(s): Slusar,C.
(Fall 2017)

**ARTT B254 Fundamentals of Theater Design**

An introduction to the creative process of visual design for theater, exploring dramatic context and influence of cultural, social, and ideological forces on theater and examining practical applications of various technical elements such as scenery, costume, and lighting while emphasizing their aesthetic integration.
Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): Matsushima,M.
(Spring 2018)

**ARTT B258 Intermediate Topics in Technical Theater Production**

This course is a deeper exploration of the process of technical theater production introduced in ARTT B252 – Fundamentals of Technical Theater Production. Through a combination of lecture, in-class and out-of-class analysis, and hands-on experience students will gain a more thorough understanding of the processes of technical theatrical production. The course focuses on five sections of technical production: basic technical drawing, advanced scenic construction techniques, electricity for the entertainment industry (lighting, sound, motors), basic rigging, and basic sound system design and execution. While mathematics is not the focus of the class, basic math and some algebra and trigonometry will be necessary. Prerequisite: ARTT B252 or Permission of Instructor

Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): McDaniel,J.
(Fall 2017)

**ARTT B265 Acting Across Culture**

This course examines how we access Shakespeare across culture and across language, as performers and audience members. We will explore the role of creator/performer using traditional and non-traditional means (text work and scansion, investigation of objective and actions, and first-folio technique).
Prerequisites: Fundamentals of Acting or its equivalent.

Approach: Cross-Cultural Analysis (CC)
Units: 1.0
Instructor(s): Slusar,C.
(Spring 2018)

**ARTT B312 Ladies’ Voices Give Pleasure: Plays by Women**

This course introduces students to the rich and multifarious tradition(s) of dramatic literature (broadly construed) by women (broadly construed). Through close readings of texts that diverge from what some feminist critics have called the dominant “ejaculatory” model of dramaturgy rooted in Aristotelian teleology and replicative of the male sexual experience, we will explore the formal and thematic preoccupations of 20th and 21st century playwrights who complicate notions of desire, community, history, identity, difference, and representation. Prerequisite: 200 level course in Theater, English, or Comparative Literature.

Units: 1.0
(Not Offered 2017-2018)

**ARTT B332 The Actor Creates: Performance Studio in Generating Original Work**

This course explores the actor as creator, inviting the performer to become a generative artist with agency to invent her own
work. Building on skills introduced in Fundamentals of Acting, we will introduce new methodologies to train and construct a framework in which students can approach making original solo and group work. Students will use processes employing visual art, found dialogue, music, autobiography, and more. Emphasizing guided, individual, and group collaboration, we will examine the role of the actor/creator through exercises and readings that relate the actor’s creative process to an understanding of self and the artist’s role in communities. Prerequisite: ARTT B251 (Fundamentals of Acting)

Units: 1.0
(Not Offered 2017-2018)

ARTT B353 Advanced Performance Ensemble
An advanced, intensive workshop in theater performance. Students explore a range of performance techniques in the context of rehearsing a performance project, and participate in weekly seminars in which the aesthetic and theatrical principles of the play and production will be developed and challenged. The course may be repeated. Prerequisite: ARTT B253 or permission of the instructor.

Units: 1.0
Instructor(s): Slusar,C.
(Fall 2017, Spring 2018)

ARTT B354 Shakespeare on the Stage
An exploration of Shakespeare’s texts from the point of view of the performer. A historical survey of the various approaches to producing Shakespeare from Elizabethan to contemporary times, with intensive scene work culminating in on-campus performances. Prerequisite: ARTT B251 Fundamentals of Acting or permission of the instructor.

Units: 1.0
Instructor(s): Slusar,C.
(Fall 2017)

ARTT B356 Endgames: Theater of Samuel Beckett
An exploration of Beckett’s theater work conducted through both reading and practical exercises in performance techniques. Points of special interest include the monologue form of the early novels and its translation into theater, Beckett’s influences (particularly silent film) and collaborations, and the relationship between the texts of the major dramatic works and the development of both modern and postmodern performance techniques.

Units: 1.0
(Not Offered 2017-2018)

ARTT B359 Directing for the Stage
A semiotic approach to the basic concepts and methods of stage direction. Topics explored through readings, discussion and creative exercises include directorial concept, script analysis and research, stage composition and movement, and casting and actor coaching. Students rehearse and present three major scenes. Prerequisite: ARTT B251 (Fundamentals of Acting) or permission of instructor.

Units: 1.0
Instructor(s): Lord,M.
(Spring 2018)

ARTT B425 Praxis III
Units: 1.0
(Not Offered 2017-2018)

ARTT B430 Practicum in Stage Management
Over the semester, the student will attend all auditions, rehearsals, and performances of the Bi-College Theater Program production, and will be responsible for managing all the details of same. With the guidance of a mentor and through reading and research, the student will learn to perform the many organizational and communications tasks involved in stage management. Students will be required to read a number of texts with the goal of understanding the vast scope of the job, the artistry and authority expected of a stage manager, the variations in styles of stage management, and the standard procedures a student stage manager can incorporate into a college setting. Each student will be expected to keep a daily journal of their experience—intellectual, artistic, and practical. The journal is their own and is meant to stimulate and deepen their thinking about the process. This practicum requires that a student be willing to engage in the production process both as an artist with an intellectual stake in the work and as an adult with a position of real authority in the group. The student will be expected to use that authority while always remaining calm, polite, kind, and generous to the artists with whom they are working.

Prerequisites: Prior academic work in theater and the permission of the instructor

Units: 1.0
(Fall 2017, Spring 2018)

ARTA B251 Arts Teaching in Educational and Community Settings
This is a Praxis II course intended for students who have substantial experience in an art form and are interested in extending that experience into teaching and learning at educational and community sites. Following an overview of the history of the arts in education, the course will investigate underlying theories. The praxis component will allow students to create a fluid relationship between theory and practice through observing, teaching and reflecting on arts practices in educational contexts. School or community placement 4 hours a week. Preparation: At least an intermediate level of experience in an art form. This course counts toward the minor in Dance or Theater.

Counts towards: Praxis Program
Units: 1.0
Instructor(s): Cantor,M.
(Fall 2017)

ARTD B144 Dance Composition: Elements and Craft
This dance composition course develops knowledge and skill in the theory and craft of choreography. Basic elements of dancemaking such as space, timing, shaping, and relationship are explored and refined through structured and open movement experiences. Attention is given to developing movement invention skills and compositional strategies; considering form and structure; investigating music, language, images and objects as sources; experimenting with group design; and broadening critical understanding of their own work and the work of others. Students will work on weekly solo and group projects and will have some opportunity to revise work. Related viewing and reading will be assigned. Students may take ARTD B142 Dance Composition: Process and Presence or ARTD B144 Dance Composition: Elements and Craft.
ARTT B250 Twentieth-Century Theories of Acting
An introduction to 20th-century theories of acting emphasizing the intellectual, aesthetic, and sociopolitical factors surrounding the emergence of each director’s approach to the study of human behavior on stage. Various theoretical approaches to the task of developing a role are applied in workshop and scene study.

Units: 1.0
(Not Offered 2017-2018)

ARTT B252 Fundamentals of Technical Theater
A practical, hands-on workshop in the creative process of turning a concept into a tangible, workable end through the physical execution of a design. Exploring new and traditional methods of achieving a coherent synthesis of all areas of technical production.

Units: 1.0
Instructor(s): McDaniel,J.
(Spring 2018)

ARTT B253 Performance Ensemble
An intensive workshop in the methodologies and aesthetics of theater performance, this course is open to students with significant experience in performance. In collaboration with the director of theater, students will explore a range of performance techniques and styles in the context of rehearsing a performance project. Admission to the class is by audition or permission of the instructor. The class is offered for a half-unit of credit.

Units: 0.5
Instructor(s): Slusar,C.
(Fall 2017, Spring 2018)

ARTT B270 Ecologies of Theater: Performance, Play, and Landscape
Students in this course will investigate the notion of theatrical landscape and its relation to plays and to the worlds that those landscapes refer to. Through readings in contemporary drama and performance and through the construction and evaluation of performances, the class will explore the relationship between human beings and the environments they imagine, and will study the ways in which those relationships impact how we think about our relationship to the world in which we live. The course will culminate in a series of public performances. Suggested Preparation: Any course in theater, design, film, dram, or permission of the instructor.

Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

ARTT B351 Acting II
A continuation of the methods of inquiry in Fundamentals of Acting, this course is structured as a series of project-based learning explorations in acting. Prerequisite: ARTT B251 (Fundamentals of Acting) or permission of instructor.

Units: 1.0
(Not Offered 2017-2018)

ARTT B403 Supervised Work
Research and work in a particular topic of theater under the guidance of an instructor.
ARTW B262 Playwriting I

An introduction to playwriting through a combination of reading assignments, writing exercises, discussions about craft and ultimately the creation of a complete one-act play. Students will work to discover and develop their own unique voices as they learn the technical aspects of the craft of playwriting. Short writing assignments will complement each reading assignment. The final assignment will be to write an original one-act play.

Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Feldman, L.
(Fall 2017)

ARTW B362 Playwriting II

This course challenges students of playwriting to further develop their unique voices and improve their technical skills in writing for the stage. We will examine how great playwrights captivate a live audience through their mastery of character, story and structure. Through a combination of weekly reading assignments, playwriting exercises, theater explorations, artist-driven feedback, and discussions of craft, this class will facilitate each student's completion of an original, full-length play. Prerequisite: ARTW 262; or suitable experience in directing, acting or playwriting; or submission of a work sample of 10 pages of dialogue. All students must complete the Creative Writing preregistration questionnaire during preregistration to be considered for the course.

Units: 1.0
(Not Offered 2017-2018)

ENGL B230 Topics in American Drama

Considers American plays of the 20th century, reading major playwrights of the canon alongside other dramatists who were less often read and produced. Will also study later 20th century dramatists whose plays both develop and resist the complex foundation established by canonical American playwrights and how American drama reflects and responds to cultural and political shifts. Considers how modern American identity has been constructed through dramatic performance, considering both written and performed versions of these plays.

Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Intensive
Units: 1.0
(Not Offered 2017-2018)

ENGL B296 Introduction to Medieval Drama

Introduces students to the major types of dramatic production in the Middle Ages: mystery plays, morality plays, and miracle plays. Also examines early Protestant political drama known as “interludes” and the translation of medieval plays into contemporary films and novels. Explores the construction of local communities around professional acting and production guilds, different strategies of performance, and the relationship between the medieval dramatic stage and other kinds of “stages.”

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)
range of career trajectories, but who do not necessarily intend to pursue graduate study in astronomy.

The astrophysics major is appropriate for students who wish to pursue the study of astronomy with additional attention to the physical principles that underlie astrophysical phenomena. The depth of the physics training required for a degree in astrophysics will prepare students who wish to pursue a career in astronomy or astrophysics, or to do graduate study in astronomy or astrophysics.

Although a variety of pathways can lead to a major in the department, we advise prospective astronomy or astrophysics majors to:

• study physics (PHYS 105 or 115 and 106, or PHYS 101 and 102, or Bryn Mawr equivalents), beginning in their first year.
• enroll in ASTR 205/206 and PHYS 213/214 in their sophomore year.
• take ASTR/PHYS 152 in the second semester of their first year.

Students may major in astronomy or astrophysics, but not both. Astrophysics majors may not double major in either physics or astronomy, nor can they minor in either physics or astronomy. Astronomy majors may pursue a double major or a minor in physics.

Astronomy Major Requirements

The astronomy major is appropriate for students that desire an in-depth education in astronomy that can be applied to a wide-range of career trajectories, but who do not necessarily intend to pursue graduate study in astronomy.

• PHYS 105 (or 101 or 115), PHYS 106 (or 102), PHYS 213, PHYS 214.
• Two mathematics courses; MATH 121 and all 200-level or higher mathematics courses can be used to satisfy this requirement.
• ASTR 205, ASTR 206, four 300-level astronomy courses, one of which may be replaced by an upper-level physics course. Majors can substitute 100-level Swarthmore astronomy seminars for 300-level astronomy courses.
• ASTR 404, which may be replaced by approved independent research either at Haverford or elsewhere.
• Written comprehensive examinations. Bryn Mawr equivalents may be substituted for the non-astronomy courses. ASTR/PHYS 152 is recommended but not required.

Astrophysics Major Requirements

The astrophysics major is appropriate for students who wish to pursue the study of astronomy with additional attention to the physical principles that underlie astrophysical phenomena. The depth of the physics training required for a degree in astrophysics will prepare students who wish to pursue a career in astronomy or astrophysics, or to enter graduate study in astronomy or astrophysics.

• PHYS 105 (or 115 or 101), PHYS 106 (or 102), PHYS 213, PHYS 214, PHYS 211 (usually taken concurrently with PHYS 213).
• Two mathematics courses. MATH 121 and all 200-level or higher mathematics courses can be used to satisfy this requirement.
• ASTR 205, ASTR 206, and any two 300-level astronomy courses. Majors can substitute 100-level Swarthmore astronomy seminars for 300-level astronomy courses.
• PHYS 302, PHYS 303, and PHYS 309.
• The Senior Seminar, PHYS 399, including a talk and senior thesis on research conducted by the student. This research can be undertaken in a 400-level research course with any member of the Physics and Astronomy Department or by doing extracurricular research at Haverford or elsewhere, e.g., an approved summer research internship at another institution. The thesis is to be written under the supervision of both the research adviser and a Haverford adviser if the research adviser is not a Haverford faculty member.

Bryn Mawr equivalents may be substituted for the non-astronomy courses. ASTR/PHYS 152 and PHYS 308 are recommended but not required.

Minor Requirements

• PHYS 105 (or 115 or 101); PHYS 106 (or 102).
• ASTR 205; ASTR 206; one 300-level astronomy course.

Minors may substitute a 100-level Swarthmore astronomy seminar for the 300-level astronomy course.

We strongly recommend (but do not require) ASTR/PHYS 152.

COURSES

ASTR H101 ASTRONOMICAL IDEAS

Fundamental concepts and observations of modern astronomy, such as the properties of planets, the birth and death of stars, and the properties and evolution of the Universe. Not intended for students majoring in the physical sciences. At least 30 spaces will be reserved for freshmen, perhaps more as space dictates. (Offered Spring 2018)

ASTR H152 FIRST-YEAR SEMINAR IN ASTROPHYSICS

This half-credit course is intended for prospective physical science majors with an interest in recent developments in astrophysics. Topics in modern astrophysics will be viewed in the context of underlying physical principles. Topics include black holes, quasars, neutron stars, supernovae, dark matter, the Big Bang, and Einstein’s relativity theories. Crosslisted: Astronomy, Physics;

Prerequisite(s): PHYS H101 or H105 and concurrent enrollment in PHYS H102, H106 or B121 (or Bryn Mawr equivalents).

(Offered Spring 2018)

ASTR H205 INTRODUCTION TO ASTROPHYSICS I

General introduction to astronomy including: the structure and evolution of stars; the properties and evolution of the solar system including planetary surfaces and atmospheres; exoplanets; and observational projects using the Strawbridge Observatory telescopes. Prerequisite(s): Prerequisite(s): MATH H118 or equivalent; PHYS H105 or PHYS B121; Co-requisite(s): PHYS H106 or B201. (Offered Fall 2017)

ASTR H206 INTRODUCTION TO ASTROPHYSICS II

Introduction to the study of: the structure and formation of the Milky Way galaxy; the interstellar medium; the properties of galaxies and their nuclei; and cosmology including the Hot Big Bang model. Prerequisite(s): ASTR H205A and MATH H118 or equivalent. (Offered Spring 2018)
ASTR H304 COMPUTATIONAL PHYSICS
An introduction to the methods and problems of computational physics, including matrix methods, ordinary differential equations, integration, eigensystems, Monte Carlo techniques, Fourier analysis, and iterative methods. Course will include a substantial independent project. Crosslisted: Physics, Astronomy, Computer Science;
Prerequisite(s): CMSC H105 (or equivalent) and either PHYS H213 or PHYS H306. (Offered Spring 2018)

ASTR H341 ADVANCED TOPICS: OBSERVATIONAL ASTRONOMY
Observing projects that involve using a CCD camera on a 16-inch Schmidt-Cassegrain telescope. Projects include spectroscopy; variable star photometry; H-alpha imaging; imaging and photometry of galaxies and star clusters; instruction in the use of image processing software and CCD camera operation. Students work in groups of two with minimal faculty supervision. Formal reports are required. Prerequisite(s): ASTR H206. (Typically offered every other fall)

ASTR H344 ADVANCED TOPICS IN ASTROPHYSICS
Topics drawn from one of the following areas in current astrophysics: stellar structure and evolution, galaxy structure and evolution, extragalactic astronomy and cosmology, radio astronomy, x-ray astronomy, and gravitational wave astronomy. Prerequisite(s): ASTR H205 and ASTR H206. (Offered Fall 2017)

ASTR H404 RESEARCH IN ASTROPHYSICS
Intended for those students who choose to complete an independent research project in astrophysics under the supervision of a faculty member. Prerequisite(s): Instructor consent. (Offered Fall 2017 and Spring 2018)

BIOCHEMISTRY AND MOLECULAR BIOLOGY
Students may complete a major in Biochemistry and Molecular Biology. Required courses are drawn principally from the Biology and Chemistry Departments and those interested in Biochemistry should consult both Biology and Chemistry web pages. Students may double major in Biology and Chemistry, but are not permitted to double major in Biology and Biochemistry or Chemistry and Biochemistry. There is no minor in Biochemistry and Molecular Biology. No more than two non Tri-Co courses may be counted towards the major.

Faculty
Sharon Burgmayer, Dean of Graduate Studies and the W. Alton Jones Professor of Chemistry (on leave semester I)
Monica Chander, Chair and Associate Professor of Biology (on leave semester II)
Greg Davis, Associate Professor of Biology
Tamara Davis, Professor of Biology
Karen Greif, Professor of Biology
Yan Kung, Assistant Professor of Chemistry

William Malachowski, Associate Provost and Professor of Chemistry
Joshua Shapiro, Assistant Professor of Biology
Susan A. White, Professor of Chemistry and Co-Director of Health Studies (fall) (on leave semester II)

The Biochemistry and Molecular Biology major allows the student to progress through a series of courses that emphasize understanding of life at the molecular level and utilize experimental approaches. Research may be a valuable experience for students considering graduate or professional studies or for those planning research or teaching careers.

Any Biology or Chemistry professor may be selected as a research adviser, but students are encouraged to consult departmental advisers for information on how to join research groups. Students may select either a one or two semester research experience.

With very careful advanced planning a student may enroll in Study Abroad. Typically a student will select a one-semester program in an English-speaking country such as England, Wales, Australia or Ghana.

Biochemistry and Molecular Biology Requirements and Opportunities
A student may qualify for an A. B. in Biochemistry and Molecular Biology by completing courses in Biology and Chemistry with the following distribution. Students must be mindful that some courses have pre-requisites.

Fundamental Courses
• Biology 110
• Chemistry 103, 104
• Chemistry 211 and 212 or 213, 214

Major Writing Requirement
Students will complete two writing-attentive laboratory courses before the end of their junior year. To satisfy this requirement, students typically select two courses from the following list: Biology 375, Biology 376, Chemistry 251, or Chemistry 252.

Core Biochemistry Courses
• Chemistry 242 and Chemistry 251 OR Biology 375
• Chemistry 376

Advanced Biology and Chemistry Courses
• Biology 201
• Biology 376
• Chemistry 221 OR Chemistry 222

Advanced Electives on Biochemically Related Topics
Two courses that provide depth and breadth are required and one must be at the 300 or 500 level OR have a laboratory component. Suggested courses include, but are not limited to:
• Biology 215
• Biology 216
• Biology 255
• Biology 271
• Biology 327
• Biology 340
• Biology 352
• Chemistry 221 or 222 (if not used as a Core course)
• Chemistry 251 (if not used as a Core course)
• Chemistry 331
• Chemistry 332
• Chemistry 345
• Chemistry 515

Students are encouraged to consider suitable course offerings at Haverford and Swarthmore and all choices must be approved by the major adviser.

Senior Experience
Option 1 or Option 2 are required for Honors.

Option 1—Biology 403 (2 semesters) or Chemistry 398, 399, plus all requirements associated with the senior thesis.

Option 2—Independent Study or Praxis on a biochemical topic arranged by the student, plus all requirements associated with the senior thesis.

Option 3—An additional biochemically-related advanced elective at the 300-level or with a laboratory component.

Courses in Allied Fields
• Mathematics 101, 102
• Mathematics 201

In consultation with the major adviser, two courses must be selected from the courses listed below. Students who plan to undertake graduate or medical studies should consider taking Physics.
• Physics 101, 102 or 121, 122
• Biology 111, 202, 220, 225, 236, 250
• Computer Science 110, 206
• Geology 101, 102, 103, 202, 203

Timetable for Meeting Requirements

There are a variety of ways to meet the major requirements provided that 100 level courses in Chemistry and Mathematics are completed by the end of the freshman year. Note that Mathematics 201 is required as a pre-requisite for Chemistry 221 or 222 and only two sample programs are shown here.

Sample 1
Freshman year: Biology 110 , Chemistry 103, 104, Mathematics 101, 102
Sophomore year: Chemistry 211, 212 (or 213, 214), Mathematics 201, Physics 121, 122
Junior year: Biology 201, 255, Chemistry 222, 242, 251
Senior year: Biology/Chemistry 377, Biology 340, 376, Senior Experience

Sample 2
Freshman year: Biology 110, 111, Chemistry 103, 104, Mathematics 101, 102

Sophomore year: Chemistry 211, 212, (or 214, 214) Mathematics 201, Biology 201
Junior year: Biology 216, 375, 377, Chemistry 222, CS110
Senior year: Biology 340, 376, Senior Experience

Honors

Students seeking to complete the Biochemistry and Molecular Biology Major must complete two semesters of research (Option 1) or an approved independent study or praxis (Option 2) and have a GPA of 3.6 in all major and allied courses.

Advanced Placement

Students are instructed to follow the policies described by individual departments.

COURSES

BIOL B110 Biological Exploration I

BIOL B110 is an introductory-level course designed to encourage students to explore the field of biology at multiple levels of organization: molecular, cellular, organismal and ecological. Each course will explore these areas of biology through a unifying theme. Lecture three hours, laboratory three hours a week. Quantitative readiness is required for this course. This is a topics course, course topic varies.

Approach: Quantitative Readiness Required (QR); Scientific Investigation (SI)
Counts towards: Biochemistry and Molecular Biology
Units: 1.0
Instructor(s): Greif,K., Davis,T., Skirkanich,J.
(Fall 2017)

BIOL B111 Biological Exploration II

BIOL 111 is an introductory-level course designed to encourage students to explore the field of biology at multiple levels of organization: molecular, cellular, organismal and ecological. Each course will explore these areas of biology through a unifying theme. Lecture three hours, laboratory three hours a week. Prerequisite: Quantitative readiness is required for this course. This course will examine the underlying physiology associated with specific animal behaviors such as bat echolocation, and thermoregulation and bee foraging.

Approach: Quantitative Readiness Required (QR); Scientific Investigation (SI)
Counts towards: Biochemistry and Molecular Biology
Units: 1.0
Instructor(s): Brodfuehrer,P., Skirkanich,J., Mozdzer,T.
(Spring 2018)

BIOL B201 Genetics

This course focuses on the principles of genetics, including classical genetics, population genetics and molecular genetics. Topics to be covered include the genetic and molecular nature of mutations and phenotypes, genetic mapping and gene identification, chromosome abnormalities, developmental genetics, genome editing and epigenetics. Examples of genetics analyses are drawn from a variety of organisms including
Drosophila, C. elegans, mice and humans. Lecture three hours a week. Prerequisite: BIOL B110 and CHEM B104.

Approach: Quantitative Readiness Required (QR); Scientific Investigation (SI)
Counts towards: Biochemistry and Molecular Biology; Health Studies
Units: 1.0
Instructor(s): Davis,T.
(Fall 2017)

BIOL B202 Introduction to Neuroscience
An introduction to the nervous system and its broad contributions to function. The class will explore fundamentals of neural anatomy and signaling, sensory and motor processing and control, nervous system development and examples of complex brain functions. Lecture three hours a week. Prerequisite: One semester of BIOL 110-111 or permission of instructor.

Approach: Scientific Investigation (SI)
Counts towards: Biochemistry and Molecular Biology; Neuroscience
Units: 1.0
Instructor(s): Greif,K.
(Fall 2017)

BIOL B215 Experimental Design and Statistics
An introductory course in designing experiments and analyzing experimental data. This course is structured to develop students’ understanding of when to apply different quantitative methods, and how to implement those methods using the R statistics environment. Topics include summary statistics, distributions, randomization, replication, parametric and nonparametric tests, and introductory topics in multivariate and Bayesian statistics. The course is geared around weekly problem sets and interactive learning. Suggested Preparation: BIOL B110 or B111 is highly recommended.

Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR); Scientific Investigation (SI)
Major Writing Requirement: Writing Attentive
Counts towards: Biochemistry and Molecular Biology; Health Studies
Units: 1.0
Instructor(s): Shapiro,J.
(Spring 2018)

BIOL B216 Genomics
An introduction to the study of genomes and genomic data. This course will examine the types of biological questions that can be answered using large biological data sets and complete genome sequences as well as the techniques and technologies that make such studies possible. Topics include genome organization and evolution, comparative genomics, and analysis of transcriptomes and proteomes. Prerequisite: One semester of BIOL 110-111. BIOL 201 highly recommended.

Approach: Quantitative Methods (QM); Scientific Investigation (SI)
Counts towards: Biochemistry and Molecular Biology; Health Studies
Units: 1.0
Instructor(s): Shapiro,J.
(Fall 2017)

BIOL B220 Ecology
A study of the interactions between organisms and their environments. The scientific underpinnings of current environmental issues, with regard to human impacts, are also discussed. Students will also become familiar with ecological principles and with the methods ecologists use. Students will apply these principles through the design and implementation of experiments both in the laboratory and the field. Lecture three hours a week, laboratory/field investigation three hours a week. There will be optional field trips throughout the semester. Prerequisite: One semester of BIOL B110 or B111 or permission of instructor.

Approach: Scientific Investigation (SI)
Major Writing Requirement: Writing Attentive
Counts towards: Biochemistry and Molecular Biology; Environmental Studies
Units: 1.0
Instructor(s): Mozdzer,T.
(Fall 2017)

BIOL B225 Biology and Ecology of Plants
Plants are critical to numerous contemporary issues, such as ecological sustainability, economic stability, and human health. Students will examine the fundamentals of how plants are structured, how they function, how they interact with other organisms, and how they respond to environmental stimuli. In addition, students will be taught to identify important local species, and will explore the role of plants in human society and ecological systems. One semester of BIOL 110/111.

Approach: Scientific Investigation (SI)
Counts towards: Biochemistry and Molecular Biology; Environmental Studies
Units: 1.0
(Not Offered 2017-2018)

BIOL B236 Evolution
A lecture/discussion course on the development of evolutionary biology. This course will cover the history of evolutionary theory, population genetics, molecular and developmental evolution, paleontology, and phylogenetic analysis. Lecture three hours a week.

Approach: Scientific Investigation (SI)
Counts towards: Biochemistry and Molecular Biology
Units: 1.0
Instructor(s): Davis,G.
(Spring 2018)

BIOL B250 Computational Methods in the Sciences
A study of how and why modern computation methods are used in scientific inquiry. Students will learn basic principles of visualizing and analyzing scientific data through hands-on programming exercises. The majority of the course will use the R programming language and corresponding open source statistical software. Content will focus on data sets from across the sciences. Six hours of combined lecture/lab per week.

Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR); Scientific Investigation (SI)
Major Writing Requirement: Writing Attentive
Counts towards: Biochemistry and Molecular Biology; Environmental Studies; Neuroscience
Units: 1.0
(Not Offered 2017-2018)
BIOL B255 Microbiology
Invisible to the naked eye, microbes occupy every niche on the planet. This course will examine how microbes have become successful colonizers; review aspects of interactions between microbes, humans and the environment; and explore practical uses of microbes in industry, medicine and environmental management. The course will combine lecture, discussion of primary literature and student presentations. Three hours of lecture and three hours of laboratory per week. Prerequisites: One semester of BIOL 110 and CHEM B104.
Approach: Scientific Investigation (SI)
Major Writing Requirement: Writing Attentive
Counts towards: Biochemistry and Molecular Biology; Environmental Studies; Health Studies
Units: 1.0
(Instructor(s): Davis,G.
(Fall 2017-2018)

BIOL B271 Developmental Biology
An introduction to embryology and the concepts of developmental biology. Concepts are illustrated by analyzing the experimental observations that support them. Topics include gametogenesis and fertilization, morphogenesis, cell fate specification and differentiation, pattern formation, regulation of gene expression, neural development, and developmental plasticity. The laboratory focuses on observations and experiments on living embryos. Lecture three hours, laboratory three scheduled hours a week; most weeks require additional hours outside of the regularly scheduled lab. Prerequisite: one semester of BIOL 110-111 or permission of instructor.
Approach: Scientific Investigation (SI)
Major Writing Requirement: Writing Attentive
Counts towards: Biochemistry and Molecular Biology; Health Studies
Units: 1.0
(Instructor(s): Davis,T.
(Fall 2017)

BIOL B340 Cell Biology
A lecture course with laboratory emphasizing current knowledge in cell biology. Among topics discussed are cell membranes, cell surface specializations, cell motility and the cytoskeleton, regulation of cell activity and cell signaling. Laboratory experiments are focused on studies of the cytoskeleton making use of techniques in cell culture and immunocytochemistry. A student-designed project is a major component. Lecture three hours, laboratory four hours a week. Prerequisite: One semester of Organic Chemistry (CHEM B211/B212), and BIOL B201 or B271, or permission of instructor.
Major Writing Requirement: Writing Attentive
Counts towards: Biochemistry and Molecular Biology
Units: 1.0
(Instructor(s): Greif,K.
(Spring 2018)

BIOL B375 Integrated Biochemistry and Molecular Biology I
The first semester of a two-semester course that focuses on the structure and function of proteins, carbohydrates, lipids and nucleic acids, enzyme kinetics, metabolic pathways, gene regulation and recombinant DNA techniques. Students will explore these topics via lecture, critical reading and discussion of primary literature and laboratory experimentation. Three hours of lecture, three hours of lab per week. Prerequisite: One semester of BIOL B110 and two semesters of Organic Chemistry (CHEM B211/B212)
Major Writing Requirement: Writing Attentive
Counts towards: Biochemistry and Molecular Biology
Units: 1.0
Instructor(s): Chander,M.
(Fall 2017)

BIOL B376 Integrated Biochemistry and Molecular Biology II
This second semester of a two-semester sequence will continue with analysis of nucleic acids and gene regulation through lecture, critical reading, discussion of primary literature and laboratory experimentation. Three hours of lecture, three hours of lab per week. Prerequisite: BIOL 201 or BIOL B375 or permission of instructor.
Major Writing Requirement: Writing Attentive
Counts towards: Biochemistry and Molecular Biology
Units: 1.0
Instructor(s): Davis,T.
(Spring 2018)

BIOL B398 Senior Seminar in Science and Society
A seminar that addresses a variety of topics at the interface of biology and society. Students write, defend and publicly present a research project. The topic for Fall 2017 is Global Change Biology. Students examine issues through readings from the research literature and oral presentations in class. Students also prepare, defend and publicly present a research project. Three hours of discussion per week, supplemented by frequent meetings with individual students. Prerequisite: Biology or Biochemistry major.
Units: 1.0
Instructor(s): Mozdzer,T.
(Fall 2017)

BIOL B399 Senior Seminar in Laboratory Investigations
This seminar provides students with a collaborative forum to facilitate the exchange of ideas and broaden their perspective and understanding of research approaches used in various sub-disciplines of biology. There will be a focus on the presentation, interpretation and discussion of data, and communication of scientific findings to diverse audiences. In addition, students write, defend and publicly present a paper on their supervised research project. Three hours of class discussion each week. Corequisite: enrollment in BIOL B403.
Counts towards: Biochemistry and Molecular Biology
Units: 1.0
Instructor(s): Davis,T.
(Spring 2018)

CHEM B103 General Chemistry I
For students with some back ground in chemistry who are motivated, self-directed learners. Topics include aqueous solutions and solubility; the electronic structure of atoms and molecules; chemical reactions and energy; intermolecular forces. Examples discussed in lecture and laboratory workshop include environmental sciences, material sciences and biological chemistry. Lecture three hours and Chemistry workshop three hours a week. The laboratory workshop period will be used for traditional chemical experimentation or related problem solving. The course may include individual conferences, evening peer-

Approach: Quantitative Methods (QM); Quantitative Readiness Required. 

led instruction sessions. Prerequisite: Quantitative Readiness Required. 

Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR); Scientific Investigation (SI) 

Counts towards: Biochemistry and Molecular Biology Units: 1.0 

Instructor(s): White,S., Karagiaridi,O., Watkins,L., Miller,B. (Fall 2017) 

CHEM B104 General Chemistry II 

For students with some background in chemistry. Topics include aqueous solutions and solubility; the electronic structure of atoms and molecules; chemical reactions and energy; intermolecular forces. Examples discussed in lecture and laboratory workshop include environmental sciences, material sciences and biological chemistry. Lecture three hours and Chemistry laboratory three hours a week. The laboratory period will be used for traditional chemical experimentation or related problem solving. The course may include individual conferences, evening problem or peer-led instruction sessions. Prerequisite CHEM B103 with a grade of at least 2.0. 

Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR); Scientific Investigation (SI) 

Counts towards: Biochemistry and Molecular Biology Units: 1.0 

Instructor(s): Franci,M., Goldsmith,J., Watkins,L. (Spring 2018) 

CHEM B211 Organic Chemistry I 

An introduction to the basic concepts of organic chemistry, including acid-base principles; functional groups; alkane and cycloalkane structures; alkene reactions; alkenes; dienes and aromatic structures; substitution and elimination reactions; alcohol reactivity; and radical reactions. The laboratory course introduces basic operations in the organic chemistry lab, spectroscopy, and reactions discussed in lecture. Lecture three hours, recitation one hour and laboratory five hours a week. Prerequisite: CHEM 104 with a grade of at least 2.0. 

Approach: Quantitative Readiness Required (QR); Scientific Investigation (SI) 

Counts towards: Biochemistry and Molecular Biology Units: 1.0 

Instructor(s): Benner,B., Nerz-Stormes,M., Malachowski,B., Karagiaridi,O. (Fall 2017) 

CHEM B212 Organic Chemistry II: Biological Organic Chemistry 

The second semester (biological organic chemistry) is broken into two modules. In the first module, the reactivity of carbonyl carbon is discussed, including ketones, aldehydes, carboxylic acids and derivatives, saccharides and enolate chemistry. Traditional biochemistry coverage begins with the second module. Amino acids (pI, electrophoresis, side chain pKa), protein structure (1°, 2°, 3°, 4°), and enzymatic catalysis, kinetics and inhibition are introduced. The reactivity of the co-enzymes (vitamins) is also covered as individual case studies in bio-organic reactivity. Lecture three hours, recitation one hour and laboratory five hours a week. Prerequisite: CHEM 211 with a grade of at least 2.0. 

Approach: Scientific Investigation (SI) 

Counts towards: Biochemistry and Molecular Biology Units: 1.0 

Instructor(s): Nerz-Stormes,M., Malachowski,B., Karagiaridi,O. (Spring 2018) 

CHEM B213 Organic Chemistry II for Chem/Biochemistry Majors 

A student should register for CHEM 213 if they are planning on taking the complementary quarter course, CHEM 214, in the second half of the semester. CHEM 213 mirrors the content of the first module of CHEM 212, Organic Chemistry II: Biological Organic Chemistry. In the first module, the reactivity of carbonyl carbon is discussed, including ketones, aldehydes, carboxylic acids and derivatives, saccharides and enolate chemistry. Prerequisite: CHEM B211 

Approach: Scientific Investigation (SI) 

Counts towards: Biochemistry and Molecular Biology Units: 0.5 

(Not Offered 2017-2018) 

CHEM B214 Intermediate Organic Chemistry for Chem/ Biochemistry Majors 

A student should register for CHEM 214 if she will be completing CHEM 213 in the first quarter. CHEM 214 deals with intermediate concepts in organic chemistry, including transition-metal catalyzed reactions, molecular orbital theory, and advanced treatment of enolate chemistry with a special emphasis on predicting stereochemical outcomes of reactions. 

Approach: Scientific Investigation (SI) 

Counts towards: Biochemistry and Molecular Biology Units: 0.5 

(Not Offered 2017-2018) 

CHEM B221 Physical Chemistry I 

Introduction to quantum theory and spectroscopy. Atomic and molecular structure; molecular modeling; rotational, vibrational, electronic and magnetic resonance spectroscopy. Lecture three hours. Prerequisites: CHEM B104 and MATH B201. 

Approach: Quantitative Methods (QM) 

Counts towards: Biochemistry and Molecular Biology Units: 1.0 

Instructor(s): Franci,M. (Fall 2017) 

CHEM B222 Physical Chemistry II 

Modern thermodynamics, with application to phase equilibria, interfacial phenomena and chemical equilibria; statistical mechanics; chemical dynamics. Kinetic theory of gases; chemical kinetics. Lecture three hours. Prerequisite: CHEM B104, PHYS 122 or 102 and MATH 201. May be taken concurrently with CHEM B212 and PHYS 122 or 102. 

Approach: Quantitative Methods (QM) 

Counts towards: Biochemistry and Molecular Biology Units: 1.0 

Instructor(s): Goldsmith,J. (Spring 2018) 

CHEM B231 Inorganic Chemistry 

Bonding theory; structures and properties of ionic solids; symmetry; crystal field theory; structures, spectroscopy, stereochemistry, reactions and reaction mechanisms of coordination compounds; acid-base concepts; descriptive chemistry of main group elements. Lecture three hours a week. Prerequisite: CHEM 212.
CHEM B242 Biological Chemistry
The structure, chemistry and function of amino acids, proteins, lipids, polysaccharides and nucleic acids; enzyme kinetics; metabolic relationships of carbohydrates, lipids and amino acids, and the control of various pathways. Lecture three hours a week. Prerequisite: CHEM B212. Co-requisite: CHEM B221 or B231 or B242. Attendance at departmental colloquia is expected of all students.

Approach: Course does not meet an Approach
Counts towards: Biochemistry and Molecular Biology; Health Studies
Units: 1.0
Instructor(s): Kung,Y.
(Fall 2017)

CHEM B251 Research Methodology in Chemistry
This is a laboratory topics course integrating advanced concepts in chemistry from biological, inorganic, organic and physical chemistry. Students gain experience in the use of departmental research instruments and in scientific literature searches, quantitative data analysis, record keeping and writing. Prerequisite CHEM B212. Co-requisite: CHEM B221 or B231 or B242. Attendance at departmental colloquia is expected of all students.

Approach: Quantitative Readiness Required (QR) Major Writing Requirement: Writing Attentive
Counts towards: Biochemistry and Molecular Biology
Units: 1.0
Instructor(s): Goldsmith,J., Kung,Y.
(Fall 2017)

CHEM B252 Research Methodology II
This laboratory course integrates advanced concepts in chemistry from biological, inorganic, organic and physical chemistry. Students gain experience in the use of departmental research instruments and in scientific literature searches, quantitative data analysis, record-keeping, and writing. Attendance at departmental colloquia is expected of all students.

Course Prerequisites: CHEM B212. Course Co-requisites: CHEM B222 or CHEM B231 or CHEM B242.

Approach: Quantitative Readiness Required (QR) Major Writing Requirement: Writing Attentive
Counts towards: Biochemistry and Molecular Biology
Units: 1.0
Instructor(s): Franci,M., Miller,B.
(Spring 2018)

CHEM B345 Advanced Biological Chemistry
This is a topics course. Topics vary. Prerequisite: CHEM B242 or BIOL B375.

Counts towards: Biochemistry and Molecular Biology
Units: 1.0
Instructor(s): Kung,Y.
(Fall 2017)

CHEM B377 Biochemistry II: Biochemical Pathways and Metabolism
This course is a continuation of CHEM B242 or BIOL B375. Biochemical pathways involved in cellular metabolism will be explored in molecular detail. Energy producing, degradation, and biosynthetic pathways involving sugars, fats, amino acids, and nucleotides will be discussed with an emphasis on structures and mechanisms, experimental methods, regulation, and integration. Additional topics, drawn from the primary research literature, may be covered. Readings will be drawn from textbooks and from the primary literature and assessments may include oral presentations, problem sets, written examinations, and writing assignments. This is a second course in Biochemistry and assumes a strong foundation in the fundamentals of Biochemistry. Prerequisite: BIO 375 or CHEM 375, or permission of instructor.

Counts towards: Biochemistry and Molecular Biology
Units: 1.0
Instructor(s): Kung,Y.
(Fall 2017)

CHEM B515 Topics in Organic Chemistry
This is a topics course. Topics may vary. Prerequisite: CHEM B242 or equivalent.

Counts towards: Biochemistry and Molecular Biology
Units: 1.0
(Not Offered 2017-2018)

CMSC B110 Introduction to Computing
The course is an introduction to computing: how we can describe and solve problems using a computer. Students will learn how to write algorithms, manipulate data, and design programs to make computers useful tools as well as mediums of creativity. Contemporary, diverse examples of computing in a modern context will be used, with particular focus on graphics and visual media. The Processing/Java programming language will be used in lectures, class examples and weekly programming projects, where students will learn and master fundamental computer programming principals.

Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR); Scientific Investigation (SI)
Counts towards: Biochemistry and Molecular Biology
Units: 1.0
Instructor(s): Eisenberg,R., Blank,D.
(Fall 2017, Spring 2018)

CMSC B206 Introduction to Data Structures
Introduction to the fundamental algorithms and data structures using Java. Topics include: Object-Oriented programming, program design, fundamental data structures and complexity analysis. In particular, searching, sorting, the design and implementation of linked lists, stacks, queues, trees and hash maps and all corresponding complexity analysis. In addition, students will also become familiar with Java’s built-in data structures and how to use them, and acquire competency using the shell, command-line scripting and a debugger without any IDE. Required: 2 hour lab. Prerequisites: CMSC B110 or H105, or permission of instructor.

Approach: Quantitative Methods (QM); Scientific Investigation (SI)
Counts towards: Biochemistry and Molecular Biology
Units: 1.0
Instructor(s): Eisenberg,R., Kumar,D.
(Fall 2017, Spring 2018)

GEOL B101 How the Earth Works
An introduction to the study of planet Earth—the materials of which it is made, the forces that shape its surface and interior, the relationship of geological processes to people, and the
application of geological knowledge to the search for useful materials. Laboratory and fieldwork focus on learning the tools for geological investigations and applying them to the local area and selected areas around the world. Three lectures and one afternoon of laboratory or fieldwork a week. One required one-day field trip on a weekend.

Approach: Quantitative Readiness Required (QR); Scientific Investigation (SI)
Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Marenco,K., Weil,A.
(Fall 2017)

GEOL B102 Earth: Life of a Planet

The history of the Earth from its beginning, including its climate and tectonic history and the evolution of the living forms that have populated it. Three lectures, one afternoon of laboratory a week. A required two-day (Sat-Sun) field trip is taken in April.

Approach: Scientific Investigation (SI)
Units: 1.0
(Not Offered 2017-2018)

GEOL B103 Earth Systems and the Environment

This integrated approach to studying the Earth focuses on interactions among geology, oceanography, and biology. Also discussed are the consequences of human energy consumption, industrial development, and land use. Two lectures and one afternoon of laboratory or fieldwork per week. A required field trip is taken in April.

Approach: Scientific Investigation (SI)
Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)

GEOL B202 Mineralogy and Crystal Chemistry

The crystal chemistry of representative minerals as well as the relationship between the physical properties of minerals and their structures and chemical compositions. Emphasis is placed on mineral identification and interpretation. The occurrence and petrography of typical mineral associations and rocks is also covered. Lecture three hours, laboratory at least three hours a week. One required field trip on a weekend. Prerequisite: introductory course in Geology or Chemistry (both recommended, one required).

Approach: Quantitative Readiness Required (QR); Scientific Investigation (SI)
Counts towards: Geoarchaeology
Units: 1.0
(Not Offered 2017-2018)

GEOL B203 Biosphere Through Time

We will explore how the Earth-life system has evolved through time by studying the interactions between life, climate, and tectonic processes. During the lab component of the course, we will study important fossil groups to better understand their paleoecology and roles in the Earth-life system.

Approach: Scientific Investigation (SI)
Major Writing Requirement: Writing Intensive
Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Marenco,K., Marenco,P.
(Fall 2017)

GEOL B205 Sedimentary Materials and Environments

An introduction to sediment transport, depositional processes, and stratigraphic analysis, with emphasis on interpretation of sedimentary sequences and the reconstruction of past environments. Three lectures and one lab a week, plus a one-day field trip. Prerequisite: GEOL 101, 102, or 103 or permission of instructor. Recommended: GEOL B202 and B203.

Approach: Course does not meet an Approach
Counts towards: Geoarchaeology
Units: 1.0
Instructor(s): Barber,D.
(Spring 2018)

MATH B101 Calculus I

A first course in one-variable calculus: functions, limits, continuity, the derivative, differentiation formulas, applications of the derivative, the integral, integration by substitution, fundamental theorem of calculus. May include a computer component. Prerequisite: adequate score on calculus placement exam, or permission of the instructor. Students should have a reasonable command of high school algebra, geometry and trigonometry.

Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR)
Units: 1.0
Instructor(s): Myers,A.
(Fall 2017)

MATH B102 Calculus II

A continuation of Calculus I: transcendental functions, techniques of integration, applications of integration, infinite sequences and series, convergence tests, power series. May include a computer component. Math 102 assumes familiarity of the content covered in Math 101 or its equivalent.

Approach: Quantitative Methods (QM)
Units: 1.0
Instructor(s): Kasius,P.
(Fall 2017, Spring 2018)

MATH B201 Multivariable Calculus

Vectors and geometry in two and three dimensions, partial derivatives, extremal problems, double and triple integrals, vector analysis (gradients, curl and divergence), line and surface integrals, the theorems of Gauss, Green and Stokes. May include a computer component. Prerequisite: MATH 102 or permission of instructor.

Approach: Quantitative Methods (QM)
Units: 1.0
Instructor(s): Kasius,P., Donnay,V.
(Fall 2017)

PHYS B101 Introductory Physics I

PHYS 101/102 is an introductory sequence intended primarily for students on the pre-health professions track. Emphasis is on developing an understanding of how we study the universe, the ideas that have arisen from that study, and on problem solving. Topics are taken from among Newtonian kinematics and dynamics, relativity, gravitation, fluid mechanics, waves and sound, electricity and magnetism, electrical circuits, light and optics, quantum mechanics, and atomic and nuclear physics. An effective and usable understanding of algebra and trigonometry is assumed. First year students who will take or place out
of MATH 101 should take PHYS 121. Lecture three hours, laboratory two hours.

Approach: Quantitative Methods (QM); Quantitative Readiness
Required (QR); Scientific Investigation (SI)
Units: 1.0
Instructor(s): Matlin,M., Noel,M., Cheng,X., Bahreyni,N.
(Fall 2017)

PHYS B102 Introductory Physics II

PHYS 101/102 is an introductory sequence intended primarily
for students on the pre-health professions track. Emphasis is
on developing an understanding of how we study the universe,
the ideas that have arisen from that study, and on problem
solving. Topics are taken from among Newtonian kinematics
and dynamics, relativity, gravitation, fluid mechanics, waves and
sound, electricity and magnetism, electrical circuits, light and
optics, quantum mechanics, and atomic and nuclear physics. An
effective and usable understanding of algebra and trigonometry
is assumed. Lecture three hours, laboratory two hours.

Approach: Quantitative Methods (QM); Quantitative Readiness
Required (QR); Scientific Investigation (SI)
Units: 1.0
Instructor(s): Matlin,M., Daniel,K., Schaffner,D.
(Spring 2018)

PHYS B121 Modern Physics

This course presents current conceptual understandings and
mathematical formulations of fundamental ideas used in physics.
Students will develop physical intuition and problem-solving
skills by exploring key concepts in physics such as conservation
laws, symmetries and relativistic space-time, as well as topics
in modern physics taken from the following: fundamental forces,
nuclear physics, particle physics, and cosmology. This course
can serve as a stand-alone survey of physics or as the first of
a four-semester sequence designed for those majoring in the
physical sciences. The laboratory involves quantum mechanics,
solid state physics, and optics experiments. Lecture three hours,
laboratory three hours. Co-requisite: MATH B101.

Approach: Quantitative Methods (QM); Quantitative Readiness
Required (QR); Scientific Investigation (SI)
Units: 1.0
Instructor(s): Daniel,K., Cheng,X., Bahreyni,N.
(Fall 2017)

PHYS B122 Classical Mechanics

The lecture material covers Newtonian Mechanics of single
particles, systems of particles, rigid bodies, and continuous
media with applications, one-dimensional systems including
forced oscillators, scattering and orbit problems. Lecture three
hours, laboratory two hours. Prerequisites: PHYS 121 and MATH

Approach: Quantitative Methods (QM); Quantitative Readiness
Required (QR); Scientific Investigation (SI)
Units: 1.0
Instructor(s): Matlin,M.
(Spring 2018)

BIOLOGY

Students may complete a major or minor in Biology. Within the
major, students may complete a minor in computational methods,
environmental studies or neuroscience.

Faculty

Peter Brodfuehrer, Eleanor A. Bliss Professor of Biology
Monica Chander, Chair and Associate Professor of Biology (on
leave semester II)
Gregory Davis, Associate Professor of Biology
Tamara Davis, Professor of Biology
Karen Greif, Professor of Biology
Thomas Mozdzer, Assistant Professor of Biology
Sydne Record, Assistant Professor of Biology (on leave
semesters I & II)
Joshua Shapiro, Assistant Professor of Biology
Jennifer Skirkanich, Lecturer in Biology
Michelle Wien, Lecturer in Biology
Melinda Yin, Lecturer

The programs of the Department are designed to introduce
students to unifying concepts and broad issues in biology,
and to provide the opportunity for in-depth inquiry into topics
of particular interest through coursework and independent
research. Introductory- and intermediate-level courses examine
the structures and functions of living systems at all levels
of organization, from molecules, cells, and organisms, to
populations. Advanced courses encourage students to gain
proficiency in the critical reading of research literature, leading
to the development, defense and presentation of a senior
paper as the capstone experience. Opportunities for supervised
research with faculty are available and encouraged. Students
considering majoring in Biology are encouraged to meet with the
Department’s major advisor to determine the best sequence of
courses based on their interests and goals.

Major Requirements for Students Declaring
Before Fall 2017

• Two semesters of introductory biology (BIOL 110 and BIOL
111/BIOL 115)
• Must be completed with merit grades before the beginning
of junior year.
• A score of 5 on the Advanced Placement examination, or
7 on the International Baccalaureate examination, can be
used to satisfy one semester of introductory biology. An
additional semester of BIOL 110/111/115 is required to fulfill
the introductory biology requirement. The Department highly
recommends both semesters for majors since placement
out of one semester of introductory biology does not
necessarily satisfy the introductory biology pre-requisite for
200/300-level courses.
• Six courses at the 200 and 300 level (excluding BIOL 390-
399)
At least two of these upper-level courses must be at the
300-level.
At least three of these upper-level courses must be
laboratory courses (two semesters of supervised laboratory
research, BIOL 403, may be substituted for one of the
required laboratory courses).
• The Writing within the Major requirement is fulfilled by
completion of two 200/300-level laboratory courses in
Biology, all of which are writing attentive.
• No more than two upper-level courses may be taken outside the Bryn Mawr Biology Department.

• One senior seminar course (BIOL 390-399)
  Students taking BIOL 399 must be concurrently enrolled in BIOL 403 (supervised laboratory research) in their senior year.

• Two semester courses in general chemistry (CHEM103 and CHEM104)
  Must be completed with merit grades before the beginning of junior year.

• Three semester courses in allied sciences to be selected from Anthropology, Chemistry, Computer Science, Geology, Mathematics, Physics, or Psychology. Selection of the three additional allied science courses must be done in consultation with the student's major adviser, and be approved by the Department.

Major Requirements for Students Declaring During or After Fall 2017 (Class of 2020 on)

• Two semesters of introductory biology (BIOL110 and BIOL111/BIOL115)
  Must be completed with merit grades before the beginning of junior year.

• A score of 5 on the Advanced Placement examination, or 7 on the International Baccalaureate examination, can be used to satisfy one semester of introductory biology. An additional semester of BIOL 110/111/115 is required to fulfill the introductory biology requirement. The Department highly recommends both semesters for majors since placement out of one semester of introductory biology does not necessarily satisfy the introductory biology pre-requisite for 200/300-level courses.

• Six courses at the 200 and 300 level (excluding BIOL 390-398)
  At least two of these upper-level courses must be at the 300-level.
  At least three of these upper-level courses must be laboratory courses. For students enrolled in two semesters of BIOL 403, only two upper-level laboratory courses are required.

• The Writing within the Major requirement is fulfilled by completion of two 200/300-level laboratory courses in Biology, all of which are writing attentive.

• No more than two upper-level courses may be taken outside the Bryn Mawr Biology Department.

Senior Capstone Experience (two options)

Option 1: Two semesters of independent laboratory research (BIOL 403) in the senior year, which includes written and oral presentation of a senior paper based on this research.

Option 2: A topics-based senior seminar course (BIOL 390-398) taken in the senior year, which includes written and oral presentation of a senior paper based on an in-depth investigation of a topic.

• Two semester courses in general chemistry (CHEM103 and CHEM104)
  Must be completed with merit grades before the beginning of junior year.

• Three semester courses in allied sciences to be selected from Anthropology, Chemistry, Computer Science, Geology, Mathematics, Physics, or Psychology. Selection of the three additional allied science courses must be done in consultation with the student's major adviser, and be approved by the Department.

Honors

Departmental honors are awarded to students who have distinguished themselves academically or via their participation in departmental activities. As part of the process for awarding honors in Biology, interested seniors are required to write a short (one-page maximum) essay identifying ways in which they have distinguished themselves within the Biology Department, including activities and scholarship beyond the classroom that exemplify their engagement and growth as a Biology major. In order to be considered for honors, Biology majors are required to attend at least six STEM-focused seminars at Bryn Mawr College or Haverford College over the course of their junior and senior years. In addition, students are required to submit a one-paragraph summary of each seminar they attend to this link—https://brynmawr.qualtrics.com/SE/?SID=SV_d1fni5ZqFprdYhf within 48 hours of attendance.

Final selection for honors is made by the Biology faculty.

Minor Requirements

• Six semester courses in Biology (including introductory biology)

• No more than two of these courses may be taken outside the Bryn Mawr Biology Department

Minors in Environmental Studies, Computational Methods, and Neuroscience

These minors are available for students interested in interdisciplinary exploration in these areas. Check relevant sections of the course catalog for complete descriptions of the minors.

Teacher Certification

The College offers a certification program in secondary teacher education. Consult catalog for further information.

Animal Experimentation Policy

Students who object to participating directly in laboratory activities involving the use of animals in a course required for the major are required to notify the faculty member of her or his objections at the beginning of the course. If alternative activities are available and deemed consistent with the pedagogic objectives of the course by the faculty member, then the student will be allowed to pursue alternative laboratory activities without penalty.

4+1 Master of Engineering Program with the University of Pennsylvania

Students enrolled in this program may begin coursework towards their master’s degree at University of Pennsylvania as a Bryn Mawr undergraduate. After graduation from Bryn Mawr, students will complete their master’s coursework over the course of a year as a full-time student at UPenn. Biology majors interested in the 4+1 Program with Penn Engineering should contact Jennifer Skirkanich.
Summer Science Research Program at Bryn Mawr College

Bryn Mawr and Haverford students are eligible to apply to the Summer Science Research (SSR) program. SSR is a 10-week program that supports students who are doing discovery-based research in the laboratory or field with Bryn Mawr faculty. The program provides support for students along with a speaker series and professional development programming.

COURSES

BIOL B101 Introduction to Biology I: Genetics & the Central Dogma

For post-baccalaureate premedical students only. A comprehensive examination of topics in genetics, molecular biology and cancer biology. Lecture three hours, laboratory three hours a week.

Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): Wien,M.
(Fall 2017)

BIOL B102 Introduction to Biology II: Biochemistry & Human Physiology

For post-baccalaureate premedical students only. A comprehensive examination of topics in biochemistry, cell biology and human physiology. Lecture three hours, laboratory three hours a week. BIOL B101 is strongly recommended.

Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): Wien,M.
(Spring 2018)

BIOL B110 Biological Exploration I

BIOL B110 is an introductory-level course designed to encourage students to explore the field of biology at multiple levels of organization: molecular, cellular, organismal and ecological. Each course will explore these areas of biology through a unifying theme. Lecture three hours, laboratory three hours a week. Quantitative readiness is required for this course. This is a topics course, course topic varies.

Approach: Quantitative Readiness Required (QR); Scientific Investigation (SI)
Counts towards: Biochemistry and Molecular Biology
Units: 1.0
Instructor(s): Greif,K., Davis,T., Skirkanich,J.

Fall 2017: **Biology of Cancer.** Biology B110-001 will explore the biology underlying cancer through examination of areas of biochemistry, cell biology, genetics and genomics, building a picture of cell function that helps explain the physiology of cancer.

Fall 2017: **From Genotype to Phenotype.** Biology B110-002 will explore the relationship between phenotype and genotype through analyses of inheritance patterns in families and populations, the underlying molecular basis of phenotypes, and an examination of the regulation and decoding of genetic information that ultimately produces the proteins whose structure/function dictate cellular activity.

BIOL B111 Biological Exploration II

BIOL 111 is an introductory-level course designed to encourage students to explore the field of biology at multiple levels of organization: molecular, cellular, organismal and ecological. Each course will explore these areas of biology through a unifying theme. Lecture three hours, laboratory three hours a week. Prerequisite: Quantitative readiness is required for this course. This is a topics course, course topic varies.

Approach: Quantitative Readiness Required (QR); Scientific Investigation (SI)
Counts towards: Biochemistry and Molecular Biology
Units: 1.0
Instructor(s): Brodfuehrer,P., Skirkanich,J., Mozdzer,T.

Spring 2018: **Global Change and Ecosystems.** Taking an ecological approach, we will use invasive species as our central theme in order to predict how organisms can affect multiple levels for biological organization from the organismal to the ecosystem level.

Spring 2018: **Biological Invasions.** This course will examine the underlying physiology associated with specific animal behaviors such as bat echolocation, and thermoregulation and bee foraging.

BIOL B115 Computing Through Biology: An Introduction

This course is an introduction to biology through computer science, or an introduction to computer science through biology. The course will examine biological systems through the use of computer science, exploring concepts and solving problems from bioinformatics, evolution, ecology, and molecular biology through the practice of writing and modifying code in the Python programming language. The course will introduce students to the subject matter and branches of computer science as an academic discipline, and the nature, development, coding, testing, documenting and analysis of the efficiency and limitations of algorithms. Additional Meeting Time: (Lab) 2 hours.

Approach: Quantitative Methods (QM); Scientific Investigation (SI)
Units: 1.0
Instructor(s): Shapiro,J.
(Spring 2018)

BIOL B201 Genetics

This course focuses on the principles of genetics, including classical genetics, population genetics and molecular genetics. Topics to be covered include the genetic and molecular nature of mutations and phenotypes, genetic mapping and gene identification, chromosome abnormalities, developmental genetics, genome editing and epigenetics. Examples of genetics analyses are drawn from a variety of organisms including Drosophila, C. elegans, mice and humans. Lecture three hours a week. Prerequisite: BIOL B110 and CHEM B104.

Approach: Quantitative Readiness Required (QR); Scientific Investigation (SI)
Counts towards: Biochemistry and Molecular Biology; Health Studies
Units: 1.0
Instructor(s): Davis,T.
(Fall 2017)

BIOL B202 Introduction to Neuroscience

An introduction to the nervous system and its broad contributions to function. The class will explore fundamentals of neural anatomy and signaling, sensory and motor processing and control, nervous system development and examples of complex
Instructor(s): Greif,K.  
Approach: Scientific Investigation (SI)  
Counts towards: Biochemistry and Molecular Biology; Neuroscience  
Units: 1.0  
Instructor(s): Greif,K.  
(Fall 2017)

**BIOL B210 Biology and Public Policy**

A lecture/discussion course on major issues and advances in biology and their implications for public policy decisions. Topics discussed include reproductive technologies, the Human Genome project, environmental health hazards, bioterrorism, and euthanasia and organ transplantation. Readings include scientific articles, public policy and ethical considerations, and lay publications. Lecture three hours a week. This class involves considerable writing. Prerequisite: One semester of BIOL 110-111, or permission of instructor.

Counts towards: Environmental Studies; Health Studies  
Units: 1.0  
Instructor(s): Greif,K.  
(Spring 2018)

**BIOL B214 The History of Genetics and Embryology**

This course provides a general history of genetics and embryology in Germany, Britain and the United States from the late 19th to the mid-20th century. The course will include a focus on the role that women scientists and technicians played in the development of these sub-disciplines. We will look at the lives of well known and lesser-known individuals, asking how factors such as their educational experiences and mentor relationships influenced the roles these women played in the scientific enterprise. We will also examine specific scientific contributions in historical context, requiring a review of core concepts in genetics and developmental biology.

Approach: Inquiry into the Past (IP); Scientific Investigation (SI)  
Counts towards: Gender and Sexuality Studies  
Units: 1.0  
Instructor(s): Davis,G.  
(Spring 2018)

**BIOL B215 Experimental Design and Statistics**

An introductory course in designing experiments and analyzing biological data. This course is structured to develop students’ understanding of when to apply different quantitative methods, and how to implement those methods using the R statistics environment. Topics include summary statistics, distributions, randomization, replication, parametric and nonparametric tests, and introductory topics in multivariate and Bayesian statistics.

The course is geared around weekly problem sets and interactive learning. Suggested Preparation: BIOL B110 or B111 is highly recommended.

Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR); Scientific Investigation (SI)  
Major Writing Requirement: Writing Attentive  
Counts towards: Biochemistry and Molecular Biology; Health Studies  
Units: 1.0  
Instructor(s): Shapiro,J.  
(Spring 2018)

**BIOL B216 Genomics**

An introduction to the study of genomes and genomic data. This course will examine the types of biological questions that can be answered using large biological data sets and complete genome sequences as well as the techniques and technologies that make such studies possible. Topics include genome organization and evolution, comparative genomics, and analysis of transcriptomes and proteomes. Prerequisite: One semester of BIOL 110-111. BIOL 201 highly recommended.

Approach: Quantitative Methods (QM); Scientific Investigation (SI)  
Counts towards: Biochemistry and Molecular Biology; Health Studies  
Units: 1.0  
Instructor(s): Shapiro,J.  
(Fall 2017)

**BIOL B220 Ecology**

A study of the interactions between organisms and their environments. The scientific underpinnings of current environmental issues, with regard to human impacts, are also discussed. Students will also become familiar with ecological principles and with the methods ecologists use. Students will apply these principles through the design and implementation of experiments both in the laboratory and the field. Lecture three hours a week, laboratory/field investigation three hours a week. There will be optional field trips throughout the semester. Prerequisite: One semester of BIOL B110 or B111 or permission of instructor.

Approach: Scientific Investigation (SI)  
Major Writing Requirement: Writing Attentive  
Counts towards: Biochemistry and Molecular Biology; Environmental Studies  
Units: 1.0  
Instructor(s): Mozdzer,T.  
(Fall 2017)

**BIOL B225 Biology and Ecology of Plants**

A study of the interactions between organisms and their environments. The scientific underpinnings of current environmental issues, with regard to human impacts, are also discussed. Students will also become familiar with ecological principles and with the methods ecologists use. Students will apply these principles through the design and implementation of experiments both in the laboratory and the field. Lecture three hours a week, laboratory/field investigation three hours a week. There will be optional field trips throughout the semester. Prerequisite: One semester of BIOL B110 or B111 or permission of instructor.

Approach: Scientific Investigation (SI)  
Counts towards: Biochemistry and Molecular Biology; Environmental Studies  
Units: 1.0  
Instructor(s): Shapiro,J.  
(Not Offered 2017-2018)

**BIOL B236 Evolution**

A lecture/discussion course on the development of evolutionary biology. This course will cover the history of evolutionary theory, population genetics, molecular and developmental evolution, paleontology, and phylogenetic analysis. Lecture three hours a week.

Approach: Scientific Investigation (SI)  
Counts towards: Biochemistry and Molecular Biology  
Units: 1.0  
Instructor(s): Davis,G.  
(Spring 2018)
BIOL B244 Behavioral Endocrinology
An interdisciplinary-based analysis of the nature of hormones, how hormones affect cells and systems, and how these effects alter the behavior of animals. Topics will be covered from a research perspective using a combination of lectures, discussions and student presentations. Prerequisites: One semester of BIOL 110-111 or one of the following courses: BIOL B202, PSYC B218 or PSYC H217.
Approach: Scientific Investigation (SI)
Counts towards: Neuroscience
Units: 1.0
(Not Offered 2017-2018)

BIOL B250 Computational Methods in the Sciences
A study of how and why modern computation methods are used in scientific inquiry. Students will learn basic principles of visualizing and analyzing scientific data through hands-on programming exercises. The majority of the course will use the R programming language and corresponding open source statistical software. Content will focus on data sets from across the sciences. Six hours of combined lecture/lab per week.
Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR); Scientific Investigation (SI)
Major Writing Requirement: Writing Attentive
Counts towards: Biochemistry and Molecular Biology; Environmental Studies; Neuroscience
Units: 1.0
(Not Offered 2017-2018)

BIOL B255 Microbiology
Invisible to the naked eye, microbes occupy every niche on the planet. This course will examine how microbes have become successful colonizers; review aspects of interactions between microbes, humans and the environment; and explore practical uses of microbes in industry, medicine and environmental management. The course will combine lecture, discussion of primary literature and student presentations. Three hours of lecture and three hours of laboratory per week. Prerequisites: One semester of BIOL 110 and CHEM B104.
Approach: Scientific Investigation (SI)
Major Writing Requirement: Writing Attentive
Counts towards: Biochemistry and Molecular Biology; Environmental Studies; Health Studies
Units: 1.0
(Not Offered 2017-2018)

BIOL B262 Urban Ecosystems
Cities can be considered ecosystems whose functions are highly influenced by human activity. This course will address many of the living and non-living components of urban ecosystems, as well as their unique processes. Using an approach focused on case studies, the course will explore the ecological and environmental problems that arise from urbanization, and also examine solutions that have been attempted. Prerequisite: BIOL B110 or B111 or ENVS B101.
Approach: Course does not meet an Approach
Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)

BIOL B271 Developmental Biology
An introduction to embryology and the concepts of developmental biology. Concepts are illustrated by analyzing the experimental observations that support them. Topics include gametogenesis and fertilization, morphogenesis, cell fate specification and differentiation, pattern formation, regulation of gene expression, neural development, and developmental plasticity. The laboratory focuses on observations and experiments on living embryos. Lecture three hours, laboratory three scheduled hours a week; most weeks require additional hours outside of the regularly scheduled lab. Prerequisite: one semester of BIOL 110-111 or permission of instructor.
Approach: Scientific Investigation (SI)
Major Writing Requirement: Writing Attentive
Counts towards: Biochemistry and Molecular Biology; Health Studies
Units: 1.0
Instructor(s): Davis, G.
(Fall 2017)

BIOL B303 Human Physiology
A comprehensive study of the physical and chemical processes in tissues, organs and organ systems that form the basis of animal and human function. Homeostasis, control systems and the structural basis of function are emphasized. Laboratories are designed to introduce basic physiological techniques and the practice of scientific inquiry. Lecture three hours, laboratory three hours a week. Prerequisites: One semester of BIOL 110-111, CHEM 103, 104 and one 200-level biology course.
Major Writing Requirement: Writing Attentive
Counts towards: Health Studies
Units: 1.0
(Not Offered 2017-2018)

BIOL B313 Integrative Organismal Biology I
The first semester of a two-semester course focusing on the anatomical and physiological properties of cells, tissues, organs and organ systems that form the basis of human function. Homeostasis, control systems and the structural basis of function are emphasized. Lecture: three hours, laboratory: three hours a week. Prerequisites: One semester of BIOL 110-111, CHEM 103, 104 and one 200-level biology course.
Units: 1.0
(Not Offered 2017-2018)

BIOL B314 Integrative Organismal Biology II
The second semester of Integrative Organismal Biology. Lecture three hours, laboratory three hours a week. Prerequisite: BIOL 313 or permission of instructor.
Units: 1.0
(Not Offered 2017-2018)

BIOL B321 Neuroethology
This course provides an opportunity for students to understand the neuronal basis of behavior through the examination of how particular animals have evolved neural solutions to specific problems posed to them by their environments. The topics will be covered from a research perspective using a combination of lectures, discussions and student presentations. Prerequisite: BIOL 202, PSYC 218 or PSYC 217 at Haverford.
Counts towards: Neuroscience
Units: 1.0
Instructor(s): Brodfuehrer, P. (Spring 2018)

BIOI B323 Coastal and Marine Ecology
An interdisciplinary course exploring the ecological, biogeochemical, and physical aspects of coastal and marine ecosystems. We will compare intertidal habitats in both temperate and tropical environments, with a specific emphasis on global change impacts on coastal systems (e.g. sea level rise, warming, and species shifts). In 2015 the course will have a mandatory field trip to a tropical marine field station and an overnight field trip to a temperate field station in the mid-Atlantic. Prerequisite: BIOL B220 (Ecology)
Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)

BIOI B325 Virology
This course is intended to familiarize students with the cellular and molecular biology of viruses. This course will focus on general aspects of the viral life cycle, aspects of specific viruses and the diseases they cause. The course will consist of interactive lectures, discussions, and short writing assignments to help you gain a comprehensive introduction to the field of virology.
Units: 1.0
(Not Offered 2017-2018)

BIOI B326 From Channels to Behavior
Introduces the principles, research approaches, and methodologies of cellular and behavioral neuroscience. The first half of the course will cover the cellular properties of neurons using current and voltage clamp techniques along with neuron simulations. The second half of the course will introduce students to state-of-the-art techniques for acquiring and analyzing data in a variety of rodent models linking brain and behavior. Prerequisites: one semester of BIOL 110-111 and one of the following: PSYC B218/PSYC H217, or BIOL 202.
Major Writing Requirement: Writing Attentive
Counts towards: Neuroscience
Units: 1.0
Instructor(s): Brodfuehrer, P. (Fall 2017)

BIOI B332 Global Change Biology
Global changes to our environment present omnipresent environmental challenges. We are only beginning to understand the complex interactions between organisms and the rapidly changing environment. Students will explore the effects of global change on ecosystems by analyzing the primary literature and the latest IPCC report. In 2017, there will be a mandatory one-day field trip to the Smithsonian Global Change Research Wetland. Prerequisites: BIOL B220, BIOL 225 or BIOL B262, or permission of instructor.
Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Mozdzer, T. (Spring 2018)

BIOI B340 Cell Biology
A lecture course with laboratory emphasizing current knowledge in cell biology. Among topics discussed are cell membranes, cell surface specializations, cell motility and the cytoskeleton, regulation of cell activity and cell signaling. Laboratory experiments are focused on studies of the cytoskeleton making use of techniques in cell culture and immunocytochemistry. A student-designed project is a major component. Lecture three hours, laboratory four hours a week. Prerequisites: One semester of Organic Chemistry (CHEM B211/B212), and BIOL B201 or B271, or permission of instructor.
Major Writing Requirement: Writing Attentive
Counts towards: Biochemistry and Molecular Biology
Units: 1.0
Instructor(s): Greif, K. (Spring 2018)

BIOI B352 Immunology
This course is intended to familiarize students with the cellular, molecular, and biochemical aspects of the innate and adaptive components of the immune system. The course will consist of interactive lectures and discussions to gain a comprehensive introduction to the underlying principles of immunology. Lectures will be supplemented with analysis of primary literature, group presentations, and discussion. The first half of the course will focus on the immune system and the functions of its major components. The second half will focus on how the various components of the immune system function during their response to infections agents and how the system is deregulated during non-infections immune diseases. Prerequisite: BIOL B110 or B111, and one 200 level Biology course.
Units: 1.0
Instructor(s): Yin, M. (Fall 2017)

BIOI B364 Developmental Neurobiology
A lecture/discussion course on major topics in the development of the nervous system. Lecture three hours a week. Prerequisite: BIOL 201 or 271, BIOL 202 or equivalent, or permission of instructor.
Counts towards: Neuroscience
Units: 1.0
(Not Offered 2017-2018)

BIOI B375 Integrated Biochemistry and Molecular Biology I
The first semester of a two-semester course that focuses on the structure and function of proteins, carbohydrates, lipids and nucleic acids, enzyme kinetics, metabolic pathways, gene regulation and recombinant DNA techniques. Students will explore these topics via lecture, critical reading and discussion of primary literature and laboratory experimentation. Three hours of lecture, three hours of lab per week. Prerequisite: One semester of BIOL B110 and two semesters of Organic Chemistry (CHEM B211/B212)
Major Writing Requirement: Writing Attentive
Counts towards: Biochemistry and Molecular Biology
Units: 1.0
Instructor(s): Chander, M. (Fall 2017)

BIOI B376 Integrated Biochemistry and Molecular Biology II
This second semester of a two-semester sequence will continue with analysis of nucleic acids and gene regulation through lecture, critical reading, discussion of primary literature and laboratory experimentation. Three hours of lecture, three hours of
lab per week. Prerequisite: BIOL 201 or BIOL B375 or permission of instructor.

Major Writing Requirement: Writing Attentive
Counts towards: Biochemistry and Molecular Biology
Units: 1.0
Instructor(s): Davis,T.
(Spring 2018)

BIOL B380 Topics in Cellular and Organismal Physiology

Physiology is the study of the normal functioning of a living organism and its components, including all its physical and chemical processes. The integration of function across many levels of organization will be emphasized. Prerequisite: One semester of BIOL 110-111, CHEM 103, 104 and one 200-level biology course

Major Writing Requirement: Writing Attentive
Counts towards: Health Studies
Units: 1.0
(Not Offered 2017-2018)

BIOL B390 Senior Seminar in Ecology

A focus on the interactions among organisms and their environments. Students read and discuss current and classic papers from the primary literature. Topics may include biogeographic patterns, population and community dynamics, and ecosystem functioning. We may explore current issues such as global warming, habitat degradation and fragmentation, loss of biodiversity and the introduction of alien species. The effects of these human induced changes on the biota are examined. Students write, defend and publicly present one long research paper. Three hours of class lecture and discussion a week, supplemented by frequent meetings with individual students. Prerequisite: BIOL 220 or permission of instructor.

Units: 1.0
(Not Offered 2017-2018)

BIOL B392 Senior Seminar

An advanced course in the study of the organization and function of physiological systems from the molecular level to the organismal level. Specific topics related to the organization and function of physiological systems are examined in detail using the primary literature. In addition, students write, defend and publicly present one long research paper. Three hours of class lecture and discussion a week, supplemented by frequent meetings with individual students.

Units: 1.0
(Not Offered 2017-2018)

BIOL B393 Senior Seminar in Molecular Genetics

This seminar course focuses on topics of current interest and significance in genetics, molecular genetics and genomics. Topics vary, and may include the characterization of functional DNA elements, the effects of allelic variation, mechanisms of gene regulation, and/or genetics as a tool for understanding development. Students investigate topics of interest through critical reading of primary literature and hone written and oral communication skills via the presentation and discussion of scientific information and ideas. In addition, students write, defend, and publicly present one long research paper. Three hours of discussion per week, supplemented by regular meetings with individual students. Prerequisites: BIOL 201, 216 or Biology 376, or permission of instructor.

Units: 1.0
Instructor(s): Shapiro,J.
(Fall 2017)

BIOL B394 Senior Seminar in Evolutionary Developmental Biology

Topics of current interest and significance in evolutionary developmental biology are examined with critical readings and oral presentations of work from the research literature. In addition, students write, defend and publicly present a research paper based on their readings. Three hours of class lecture and discussion a week, supplemented by frequent meetings with individual students. Prerequisite: BIOL 201, 216, 236, 271 or permission of instructor.

Units: 1.0
(Not Offered 2017-2018)

BIOL B398 Senior Seminar in Science and Society

A seminar that addresses a variety of topics at the interface of biology and society. Students write, defend and publicly present a research project. The topic for Fall 2017 is Global Change Biology. Students examine issues through readings from the research literature and oral presentations in class. Students also prepare, defend and publicly present a research project. Three hours of discussion per week, supplemented by frequent meetings with individual students. Prerequisite: Biology or Biochemistry major.

Units: 1.0
Instructor(s): Mozdzer,T.
(Fall 2017)

BIOL B399 Senior Seminar in Laboratory Investigations

This seminar provides students with a collaborative forum to facilitate the exchange of ideas and broaden their perspective and understanding of research approaches used in various sub-disciplines of biology. There will be a focus on the presentation, interpretation and discussion of data, and communication of scientific findings to diverse audiences. In addition, students write, defend and publicly present a paper on their supervised research project. Three hours of class discussion each week. Corequisite: enrollment in BIOL B403.

Counts towards: Biochemistry and Molecular Biology
Units: 1.0
Instructor(s): Davis,T.
(Spring 2018)

BIOL B401 Supervised Research in Neuroscience

Laboratory or library research under the supervision of a member of the Neuroscience committee. Required for those with the concentration. Prerequisite: permission of instructor.

Counts towards: Neuroscience
Units: 1.0
(Fall 2017)

BIOL B425 Praxis III: Independent Study

Praxis III courses are Independent Study courses and are developed by individual students, in collaboration with faculty and field supervisors. A Praxis courses is distinguished by genuine collaboration with fieldsite organizations and by a dynamic process of reflection that incorporates lessons learned in the field into the classroom setting and applies theoretical understanding gained through classroom study to work done in the broader community.
Counts towards: Praxis Program
Units: 1.0
(Not Offered 2017-2018)

ANTH B208 Human Biology
This course will be a survey of modern human biological variation. We will examine the patterns of morphological and genetic variation in modern human populations and discuss the evolutionary explanations for the observed patterns. A major component of the class will be the discussion of the social implications of these patterns of biological variation, particularly in the construction and application of the concept of race. Prerequisite: ANTH 101 or permission of instructor.
Counts towards: Health Studies
Units: 1.0
(Not Offered 2017-2018)

ANTH B209 Human Evolution
This course explores the biological and cultural evolution of humans as viewed from the fossil and archaeological record, beginning with our earliest ancestors and continuing to the dispersal of modern humans around the globe. We will use comparative, functional, and evolutionary anatomy to interpret past behaviors and relationships among fossil hominins, as well as their relationship to modern humans. Furthermore, we will use geology, archaeology, and paleoecology to reconstruct behavioral aspects of fossil hominins and their environmental influences. Throughout the course, we will focus our discussions on major debates in paleoanthropology. Prerequisite: ANTH 101 or permission of instructor.
Approach: Scientific Investigation (SI)
Units: 1.0
Instructor(s): VanSickle, C.
(Spring 2018)

BIOL B354 Basic Concepts and Special Topics in Biochemistry
For post-baccalaureate premedical students and non-majors who meet the prerequisites. Course does not count toward the biology major, majors should take BIOL B375. Prerequisites: one semester of BIOL 110/B111, and CHEM 211 or permission of the instructor.
Units: 1.0
Instructor(s): Yin, M.
(Spring 2018)

CHEM B103 General Chemistry I
For students with some background in chemistry. Topics include aqueous solutions and solubility; the electronic structure of atoms and molecules; chemical reactions and energy; intermolecular forces. Examples discussed in lecture and laboratory workshop include environmental sciences, material sciences and biological chemistry. Lecture three hours and Chemistry laboratory three hours a week. The laboratory period will be used for traditional chemical experimentation or related problem solving. The course may include individual conferences, evening problem or peer-led instruction sessions. Prerequisite CHEM B103 with a grade of at least 2.0.
Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR); Scientific Investigation (SI)
Counts towards: Biochemistry and Molecular Biology
Units: 1.0
Instructor(s): Francl, M., Goldsmith, J., Watkins, L.
(Spring 2018)

CHEM B377 Biochemistry II: Biochemical Pathways and Metabolism
This course is a continuation of CHEM B242 or BIOL B375. Biochemical pathways involved in cellular metabolism will be explored in molecular detail. Energy producing, degradation, and biosynthetic pathways involving sugars, fats, amino acids, and nucleotides will be discussed with an emphasis on structures and mechanisms, experimental methods, regulation, and integration. Additional topics, drawn from the primary research literature, may be covered. Readings will be drawn from textbooks and from the primary literature and assessments may include oral presentations, problem sets, written examinations, and writing assignments. This is a second course in Biochemistry and assumes a strong foundation in the fundamentals of Biochemistry. Prerequisite: BIO 375 or CHEM 375, or permission of instructor.
Counts towards: Biochemistry and Molecular Biology
Units: 1.0
Instructor(s): Kung, Y.
(Spring 2018)

CMSC B115 Computing Through Biology: An Introduction
This course is an introduction to biology through computer science, or an introduction to computer science through biology. The course will examine biological systems through the use of computer science, exploring concepts and solving problems from bioinformatics, evolution, ecology, and molecular biology through the practice of writing and modifying code in the Python programming language. The course will introduce students to the subject matter and branches of computer science as an academic discipline, and the nature, development, coding, testing, documenting and analysis of the efficiency and limitations of algorithms. Additional Meeting Time: (Lab) 2 hours.
Approach: Quantitative Methods (QM); Scientific Investigation (SI)
Units: 1.0
(Not Offered 2017-2018)
PHIL B310 Philosophy of Science
This course investigates philosophical problems arising from reflection about the practice of science and the inferences used in scientific reasoning. Typical topics include the nature of scientific laws and theories, the character of explanation and prediction, the role of idealization in science, the goals of scientific inquiry, the existence of “non-observable” theoretical entities such as electrons and genes, the problem of justifying induction, scientific realism vs. constructivism, the role of values and ethics in science, the evolution of scientific knowledge over time, the social structures of science, and some puzzles associated with probability. We will also look at more specific philosophical issues within particular scientific disciplines (e.g. philosophy of physics, biology, or social science) as they arise throughout the course.
Units: 1.0
Instructor(s): Rice, C. (Fall 2017)

PSYC B401 Supervised Research in Neuroscience
Laboratory or field research on a wide variety of topics. Students should consult with faculty members to determine their topic and faculty supervisor, early in the semester prior to when they will begin.
Counts towards: Neuroscience
Units: 1.0
(Fall 2017, Spring 2018)

CHEMISTRY

Students may complete a major or minor in Chemistry. Within the major, students may complete a minor in computational methods or education. Concentrations in biological chemistry, environmental studies, or geochemistry may be completed within the major. Students may complete an M.A. in the combined A.B./M.A. program.

Faculty
Bradley Miller Bucher-Jacoson, Post-Doctoral Fellow in the Sciences
Sharon Burgmayer, Dean of Graduate Studies and the W. Alton Jones Professor of Chemistry (on leave semester I)
Michelle Franch, Professor of Chemistry
Jonas Goldsmith, Associate Professor of Chemistry
Lisa Hernandez-Cuevas, Watkins Lecturer in Chemistry
Olga Karagiard, Lecturer in Chemistry
Yan Kung, Assistant Professor of Chemistry
Bill Malachowski, Associate Provost and Professor of Chemistry
Maryellen Nerz-Stormes, Senior Lecturer in Chemistry
Susan A. White, Professor of Chemistry and Co-Director of Health Studies (fall) (on leave semester II)

Chemistry Program Requirements and Opportunities
The Chemistry major is offered with several different options:
• American Chemical Society Certified A.B., recommended for graduate school
• Chemistry major, A.B. Only
• Chemistry minor
• Chemistry major with concentration in biochemistry
• Chemistry major with concentration in geochemistry
For all degree options, merit level work is expected in every chemistry, math, biology, geology, and physics course.

ACS Certified A.B. Major Requirements
A student may qualify for a major in chemistry by completing a total of 13 units in chemistry with the distribution:
• Chem 103, 104
• Chem 211, 212
• Chem 221, 222
• Chem 231
• Chem 242
• Chem 251, 252
• Chem 398, 399
• two other Chem 3xx
Chem 213/214 can replace Chem 212 for all major, minor and concentration requirements.
• Other required courses: Math 101, 102, 201. Students who plan to do graduate work in chemistry should also consider taking Physics 121/122 (preferred) or 101/102 and Physics 201.

Students majoring in Chemistry fulfill the disciplinary writing requirement by satisfactorily completing Chem 251 and 252, which are writing attentive courses.

Major, A.B. only
A non-ACS certified major requires all of the above coursework except Chem 398, 399.

Timetables for Meeting Major Requirements
Students may follow various schedules to meet their major requirements. However, a fairly typical one is:
• freshman year: Chem 103 and 104, Math 101 and 102
• sophomore year: Chem 211 and 212, Math 201
• junior year: Chem 221, 222, 231, 242, 251, 252
• senior year: two or more Chem 3xx

In particular note that Math 201 must be completed before taking Chem 221. Math 201 is offered at Bryn Mawr only in the fall, but an equivalent course is offered at Haverford in the spring term. Chem 221/222 can be taken concurrently with Chem 211/212 and this arrangement allows for the completion of all major requirements in three years.

The required 300x courses all have prerequisites that generally include Chem 212 and/or Chem 222.

Students who wish to deviate from the usual schedule should consult with the major adviser as early as possible to devise an alternative.

Honors
The requirements for departmental honors are:
• Complete one of the major plans.
Minor
A student may qualify for a minor in chemistry by completing a total of 7 units in chemistry with the distribution:

- Chem 103, 104
- Chem 211, 212
- Chem 221* or 222*
- Chem 231 or 242**
- Chem 251 or 252

*Pre-requisite: Math 201
**Biol 375 may be substituted for Chem 242

Other required courses: Math 101, 102

Major with Concentration in Biochemistry

- Chem 103, 104
- Chem 211, 212
- Chem 221*, 222*, 231 or 242** (choose 3 of 4)
- Chem 251, 252
- Chem 345 or 377
- Chem 3xx
- Biol 201
- Biol 376***

*Pre-requisite: Math 201
**Biol 375 may be substituted for Chem 242
***Chem 242 satisfies the pre-requisite for this course

- Other required courses: Math 101, 102

Equivalent biology courses at Haverford may be substituted.

Major with Concentration in Geochemistry

- Chem 103, 104
- Chem 211, 212
- Chem 221*, 222*, 231 or 242** (choose 3 of 4)
- Chem 251, 252
- Chem 322 or 332
- Chem 3xx
- Geol 101
- Geol 202
- Geol 302, 305, 350 (choose 2 of 3; Geol 350 requires Geology major adviser approval)

*Pre-requisite: Math 201
**Bio 375 may be substituted for Chem 242

3-2 Program in Engineering and Applied Science
The 3-2 Program in Engineering and Applied Science is offered in cooperation with the California Institute of Technology and awards both an A.B. at Bryn Mawr and a B.S. at Cal Tech. For more information, see 3-2 Program in Engineering and Applied Science. Chemistry students considering this program should contact Professor Michelle Francl for class of 2017, Chemistry Laboratory Lecturer Lisa Watkins for class of 2018 and Professor Jason Schmink for class of 2019.

4+1 Program in Engineering at UPenn
The University of Pennsylvania 4+1 engineering program allows students to earn an A.B. at Bryn Mawr and an M.S. in Engineering (M.S.E) at UPenn. Students apply between the beginning of the sophomore year and end of the junior year. For more information, see 4+1 Partnership with Penn’s School of Engineering and Applied Science. Chemistry students considering this program should contact Professor Michelle Francl. See also the description of the 4+1 Program in Engineering at UPenn.

COURSES

CHEM B103 General Chemistry I
For students with some back ground in chemistry who are motivated, self-directed learners. Topics include aqueous solutions and solubility; the electronic structure of atoms and molecules; chemical reactions and energy; intermolecular forces. Examples discussed in lecture and laboratory workshop include environmental sciences, material sciences and biological chemistry. Lecture three hours and Chemistry workshop three hours a week. The laboratory workshop period will be used for traditional chemical experimentation or related problem solving. The course may include individual conferences, evening peer-led instruction sessions. Prerequisite: Quantitative Readiness Required.

Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR); Scientific Investigation (SI)
Counts towards: Biochemistry and Molecular Biology
Units: 1.0
CHEM B231 Inorganic Chemistry

Bonding theory; structures and properties of ionic solids; symmetry; crystal field theory; structures, spectroscopy, stereochemistry, reactions and reaction mechanisms of coordination compounds; acid-base concepts; descriptive chemistry of main group elements. Lecture three hours a week. Prerequisite: CHEM 212.

Approach: Course does not meet an Approach
Counts towards: Biochemistry and Molecular Biology
Units: 1.0
CHEM B321 Topics: Advanced Physical Chemistry
This is a topics course, course content varies. Lecture/seminar / laboratory three hours per week. Prerequisites: CHEM 221 and 222 or permission of the instructor.
Units: 1.0
(Not Offered 2017-2018)

CHEM B332 Advanced Inorganic Chemistry
This is a topics course covering topics in advanced inorganic chemistry. Prerequisites: CHEM 231 and 242 or permission of the instructor.
Units: 1.0
(Not Offered 2017-2018)

CHEM B334 Organometallic Chemistry
Fundamental concepts in organometallic chemistry, including structure and bonding, reaction types, and catalysis, and applications to current problems in organic synthesis. Lecture three hours a week. Prerequisite: CHEM 212 and 231.
Units: 1.0
(Not Offered 2017-2018)

CHEM B345 Advanced Biological Chemistry
This is a topics course. Topics vary. Prerequisite: CHEM B242 or BIOL B375. Count towards: Biochemistry and Molecular Biology
Units: 1.0
Instructor(s): Kung,Y.
(Fall 2017)

CHEM B350 Selected Topics in Current Chemical Research
This is a topics course, course content varies. Lecture three hours a week. Prerequisites: CHEM 221-222 or permission of instructor.
Units: 1.0
(Spring 2018)

CHEM B377 Biochemistry II: Biochemical Pathways and Metabolism
This course is a continuation of CHEM B242 or BIOL B375. Biochemical pathways involved in cellular metabolism will be explored in molecular detail. Energy producing, degradation, and biosynthetic pathways involving sugars, fats, amino acids, and nucleotides will be discussed with an emphasis on structures and mechanisms, experimental methods, regulation, and integration. Additional topics, drawn from the primary research literature, may be covered. Readings will be drawn from textbooks and from the primary literature and assessments may include oral presentations, problem sets, written examinations, and writing assignments. This is a second course in Biochemistry and assumes a strong foundation in the fundamentals of Biochemistry. Prerequisite: BIO 375 or CHEM 375, or permission of instructor.
Units: 1.0
(Spring 2018)

CHEM B251 Research Methodology in Chemistry
This is a laboratory topics course integrating advanced concepts in chemistry from biological, inorganic, organic and physical chemistry. Students gain experience in the use of departmental research instruments and in scientific literature searches, quantitative data analysis, record keeping and writing. Prerequisite CHEM B212. Co-requisite: CHEM B221 or B231 or B242. Attendance at departmental colloquia is expected of all students.
Approach: Quantitative Readiness Required (QR)
Major Writing Requirement: Writing Attentive
Counts towards: Biochemistry and Molecular Biology
Units: 1.0
Instructor(s): Goldsmith,J., Kung,Y.
(Fall 2017)

CHEM B252 Research Methodology II
This laboratory course integrates advanced concepts in chemistry from biological, inorganic, organic and physical chemistry. Students will gain experience in the use of departmental research instruments and in scientific literature searches, quantitative data analysis, record-keeping, and writing. Attendance at departmental colloquia is expected of all students. Course Prerequisites: CHEM B212. Course Co-requisites: CHEM B222 or CHEM B231 or CHEM B242.
Approach: Quantitative Readiness Required (QR)
Major Writing Requirement: Writing Attentive
Counts towards: Biochemistry and Molecular Biology
Units: 1.0
Instructor(s): Francl,M., Miller,B.
(Spring 2018)

CHEM B311 Advanced Organic Chemistry
A survey of the methods and concepts used in the synthesis of complex organic molecules. Lecture three hours a week. Prerequisites: CHEM 212 and 222.
Units: 1.0
Instructor(s): Malachowski,B.
(Fall 2017)

CHEM B312 Advanced Organic Chemistry
Principles of physical organic chemistry with emphasis on reaction mechanisms, reactive intermediates, stereochemistry, and qualitative molecular orbital theory reasoning. Prerequisites: a standard two-semester course in organic chemistry (such as CHEM B211/B212), and some coursework in physical chemistry.
CHEM B398 Senior Seminar
Prerequisite: BM undergrad Chemistry or Biochemistry and Molecular Biology major.
Units: 1.0
Instructor(s): Francl,M., Burgmayer,S., White,S., Malachowski,B., Goldsmith,J., Kung,Y.
(Fall 2017)

CHEM B399 Senior Seminar
Prerequisite: BM undergrad Chemistry or Biochemistry and Molecular Biology major.
Units: 1.0
Instructor(s): Francl,M., Burgmayer,S., White,S., Malachowski,B., Goldsmith,J., Kung,Y.
(Spring 2018)

CHEM B511 Advanced Organic Chemistry I
A survey of the methods and concepts used in the synthesis of complex organic molecules. Lecture three hours a week.
Units: 1.0
Instructor(s): Malachowski,B.
(Fall 2017)

CHEM B512 Advanced Organic Chemistry
Principles of physical organic chemistry with emphasis on reaction mechanisms, reactive intermediates, stereochemistry, and qualitative molecular orbital theory reasoning. Prerequisites: a standard two-semester course in organic chemistry (such as BMC Chemistry 211/212), and some coursework in physical chemistry.
Units: 1.0
(Not Offered 2017-2018)

CHEM B515 Topics in Organic Chemistry
This is a topics course. Topics may vary. Prerequisite: CHEM B242 or equivalent.
Counts towards: Biochemistry and Molecular Biology
Units: 1.0
(Not Offered 2017-2018)

CHEM B521 Advanced Physical Chemistry
Quantum mechanics and its application to problems in chemistry. Topics will include molecular orbital theory, density functional theory. Readings and problem sets will be supplemented with material from the current research literature. Students will gain experience with programming in Mathematica. Prerequisites: CHEM 221 and 222 or permission of the instructor. Lecture/seminar three hours per week.
Units: 1.0
(Not Offered 2017-2018)

CHEM B532 Advanced Inorganic Chemistry
This is a topics course covering topics in advanced inorganic chemistry. Prerequisites: CHEM 231 and 242 or permission of the instructor.
Units: 1.0
(Not Offered 2017-2018)

CHEM B534 Organometallic Chemistry
Fundamental concepts in organometallic chemistry, including structure and bonding, reaction types, and catalysis, and applications to current problems in organic synthesis. Lecture three hours a week. Course is open to graduate students and those undergraduates with CHEM B231 or permission from the instructor.
Units: 1.0
(Not Offered 2017-2018)

CHEM B545 Advanced Biological Chemistry
This is a topics course. Topics vary. Prerequisite: Any course in Biochemistry.
Units: 1.0
Instructor(s): Kung,Y.
(Fall 2017)

CHEM B550 Selected Topics in Current Chemical Research
This is a topics course, content varies. A combination lecture/seminar course on physical, structural and spectroscopic properties of organic compounds, including oral presentations by students on very recently published research articles. Prerequisites: CHEM 221 and CHEM222 or Graduate Standing in Chemistry or permission of the instructor
Units: 1.0
Instructor(s): Schmink,J.
(Spring 2018)

CHEM B577 Biochemistry II: Biochemical Pathways and Metabolism
This course is a continuation of CHEM B242 or BIOL B375. Biochemical pathways involved in cellular metabolism will be explored in molecular detail. Energy producing, degradation, and biosynthetic pathways involving sugars, fats, amino acids, and nucleotides will be discussed with an emphasis on structures and mechanisms, experimental methods, regulation, and integration. Additional topics, drawn from the primary research literature, may be covered. Readings will be drawn from textbooks and from the primary literature and assessments may include oral presentations, problem sets, written examinations, and writing assignments. This is a second course in Biochemistry and assumes a strong foundation in the fundamentals of Biochemistry. Prerequisite: BIO 375 or CHEM 375, or permission of instructor.
Units: 1.0
Instructor(s): Kung,Y.
(Spring 2018)

CHEM B701 Supervised Work
Units: 1.0
Instructor(s): Francl,M., Burgmayer,S., White,S., Malachowski,B., Goldsmith,J., Schmink,J., Kung,Y.
(Fall 2017, Spring 2018)

MATH B101 Calculus I
A first course in one-variable calculus: functions, limits, continuity, the derivative, differentiation formulas, applications of the derivative, the integral, integration by substitution, fundamental theorem of calculus. May include a computer component. Prerequisite: adequate score on calculus placement exam, or permission of the instructor. Students should have a reasonable command of high school algebra, geometry and trigonometry.
Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR)
Units: 1.0
Instructor(s): Myers, A.
(Fall 2017)

MATH B102 Calculus II
A continuation of Calculus I: transcendental functions, techniques of integration, applications of integration, infinite sequences and series, convergence tests, power series. May include a computer component. Math 102 assumes familiarity of the content covered in Math 101 or its equivalent.
Approach: Quantitative Methods (QM)
Units: 1.0
Instructor(s): Kasius, P.
(Fall 2017, Spring 2018)

MATH B201 Multivariable Calculus
Vectors and geometry in two and three dimensions, partial derivatives, extremal problems, double and triple integrals, vector analysis (gradients, curl and divergence), line and surface integrals, the theorems of Gauss, Green and Stokes. May include a computer component. Prerequisite: MATH 102 or permission of instructor.
Approach: Quantitative Methods (QM)
Units: 1.0
Instructor(s): Kasius, P., Donnay, V.
(Fall 2017)

PHYS B350 Computational Methods in the Physical Sciences
This course provides an introduction to a variety of computational tools and programming techniques that physical science graduates might encounter in graduate work or employment in STEM-related fields. Tools explored will include both command-line and GUI programming environments, both scripting and scientific programming languages, basic programming concepts such as loops and function calls, and key scientific programming applications such as integration, finding of roots and minima/maxima, least-square fitting, solution of differential equations, boundary-value problems, finite-element analysis, Fourier analysis, matrix operations, Monte Carlo techniques, and possibly neural networks. Where possible, examples will be taken from multiple scientific disciplines, in addition to physics. This course is intended for second semester sophomores, juniors and seniors. Co-requisite: MATH B203 and three units of science (Biology, Physics, Chemistry or Geology).
Units: 1.0
(Not Offered 2017-2018)

CHILD AND FAMILY STUDIES

Students may complete a Child and Family Studies minor as an adjunct to any major at Bryn Mawr, Haverford or Swarthmore pending approval of the student's coursework plan by the Director of Child and Family Studies, Leslie Rescorla.

Faculty

Leslie Rescorla, Professor of Psychology on the Class of 1897 Professorship of Science and Director of Child and Family Studies and the Director of the Child Study Institute

Steering Committee

Dustin Albert, Assistant Professor of Psychology
Alice Lesnick, Director and Term Professor in the Bryn Mawr/Haverford Education Program and Faculty Convener of International Programs
Veronica Montes, Assistant Professor of Sociology and Co-Director of the Latin American, Latina/o and Iberian Studies Program
Heejung Park, Assistant Professor of Psychology
Deborah Roberts, Professor of Classics and Comparative Literature, Haverford College
Bethany Schneider, Associate Professor of English
Janet Shapiro, Dean and Professor of Social Work and Director of the Center for Child and Family Wellbeing
Amanda Weidman, Chair and Associate Professor of Anthropology

The Child and Family Studies (CFS) minor provides a curricular mechanism for inter-disciplinary work focused on the contributions of biological, familial, psychological, socioeconomic, political, and educational factors to child and family well-being. The minor not only addresses the life stages and cultural contexts of infancy through adolescence but also includes issues of parenting; child and family well-being; gender, schooling and informal education; risk and resilience; and the place, representation, and voice of children in society and culture.

Requirements for the Child and Family Studies Minor

The minor comprises six courses: one gateway course (PSYCH 206 Developmental Psychology, PSYCH 203 Educational Psychology, EDUC 200 Critical Issues in Education, or SOCL 201 Study of Gender in Society), plus five additional courses, at least two of which must be outside of the major department and at least one of which must be at the 300 level. Advanced Haverford and Swarthmore courses typically taken by juniors and seniors that are more specific than introductory and survey courses will count as 300 level courses. Only two CFS courses may be double-counted with any major, minor, or other degree credential.

Students craft a pathway in the minor as they engage in course selection through ongoing discussions with the CFS Director. Sample pathways might include: political science/child and family law; sociology/educational policy; child and family mental health; depictions of children/families in literature and film; child and family public health issues; social work/child welfare; anthropology/cross-cultural child and family issues; gender issues affecting children and families; social justice/diversity issues affecting children and families; or economic factors affecting children and families.

The minor also requires participation in at least one semester or summer of volunteer, practicum, praxis, community-based work study, or internship experience related to Child and Family Studies. Students are expected to discuss their placement choices with the CFS Director.

To foster the inter-disciplinary nature of Child and Family Studies, students enrolled in the minor must also complete the following requirements:
• Attendance at periodic CFS evening meetings for discussion sessions, guest speakers, "minor teas", etc.
• Participation during senior year in an annual CFS Poster Session during which students will share highlights of their CFS campus and field-based experiences.

(Note: it is important to check the Trico course guide for updated course information as not every course is taught every year. In some cases, courses relevant to the CFS minor will have changed, or been added. Students should explore freely and consult with their advisor on curricular choices).

Courses that Can Be Counted Toward the Child and Family Studies Minor

Bryn Mawr College Courses and Seminars
ANTH 102 Introduction to Cultural Anthropology
ANTH 268 Cultural Perspectives on Marriage and Family
ANTH 279 Anthropology of Childhood and Youth
ANTH 312 Anthropology of Reproduction
ARTS 269 Writing for Children
EDUC 200 Critical Issues in Education
EDUC 210 Perspectives on Special Education
EDUC 260 Multicultural Education
EDUC 266 Schools in American Cities
EDUC 302 Practice Teaching Seminar
EDUC 311 Fieldwork Seminar
ENGL 247 Shakespeare's Teenagers
ENGL 270 American Girl: Childhood in U.S. Literatures, 1690-1935
POLS 375 Gender, Work and Family
PSYC 203 Educational Psychology
PSYC 206 Developmental Psychology
PSYC 209 Abnormal Psychology
PSYC 250 Autism Spectrum Disorders
PSYC 303 Portraits of Maladjustment
PSYC 322 Culture and Development
PSYC 340 Women's Mental Health
PSYC 346 Pediatric Psychology
PSYC 350 Developmental Cognitive Disorders
PSYC 351 Developmental Psychopathology
PSYC 375 Movies and Madness
SOCL 102 Society, Culture, and the Individual
SOCL 201 The Study of Gender in Society
SOCL 205 Social Inequality
SOCL 217 The Family in Social Context
SOCL 225 Women in Society
SOCL 229 Black America in Sociological Perspective
SOCL 258 Sociology of Education
SOCL 266 Schools in American Cities

COURSES

ANTH B102 Introduction to Cultural Anthropology
An introduction to the methods and theories of cultural anthropology in order to understand and explain cultural similarities and differences among contemporary societies.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Child and Family Studies; Gender and Sexuality Studies; International Studies
Units: 1.0
Instructor(s): Pashigian,M., Campoamor,L.
(Spring 2018)
anth b279 anthropology of childhood and youth
this course will challenge you to think about childhood and youth as a diverse global experience by exploring a set of fundamental questions. how do children's daily lives differ from place to place, and how are race, class and gender linked to discourses and experiences of childhood? how do children stand in as symbols for broader political and cultural concerns? the course will explore these questions by considering the ways childhood is constructed and experienced in relation to controversial topics such as education, labor, migration, human rights, violence, consumerism, and media.
approach: cross-cultural analysis (cc)
counts towards: child and family studies; gender and sexuality studies
units: 1.0
instructor(s): campoamor,l.
(fall 2017)

anth b312 anthropology of reproduction
an examination of social and cultural constructions of reproduction, and how power and politics in everyday life shapes reproductive behavior and its meaning in western and non-western cultures. the influence of competing interests within households, communities, states, and institutions on reproduction is considered. prerequisite: anth b102 (or anth h103) or permission of instructor.
counts towards: child and family studies; gender and sexuality studies; health studies
units: 1.0
(not offered 2017-2018)

educ b200 critical issues in education
designed to be the first course for students interested in pursuing one of the options offered through the education program, this course is also open to students exploring an interest in educational practice, theory, research, and policy. the course examines major issues and questions in education in the united states by investigating the purposes of education. fieldwork in an area school required (eight visits, 1.5-2 hours per visit).
approach: cross-cultural analysis (cc)
major writing requirement: writing attentive
counts towards: africana studies; child and family studies
units: 1.0
instructor(s): cohen,j.
(spring 2018)

educ b210 perspectives on special education
the goal of this course is to introduce students to a range of topics, challenges, dilemmas, and strategies to understand and educate all learners—those considered typical learners as well as those considered "special" learners. students will learn about: how students' learning profiles affect their ability to learn in school from a functional perspective; how and why students' educational experience is affected by education law (especially special education law); major issues in special education; and how to meet diverse students' needs in an inclusive classroom.
two hours of fieldwork per week required.
approach: cross-cultural analysis (cc)
counts towards: child and family studies; praxis program
units: 1.0
instructor(s): flaks,d.
(fall 2017)

educ b266 schools in american cities
this course examines issues, challenges, and possibilities of urban education in contemporary america. we use as critical lenses issues of race, class, and culture; urban learners, teachers, and school systems; and restructuring and reform. while we look at urban education nationally over several decades, we use philadelphia as a focal case that students investigate through documents and school placements. this is a praxis ii course (weekly fieldwork in a school required)
approach: cross-cultural analysis (cc)
counts towards: africana studies; child and family studies; praxis program
units: 1.0
(spring 2018)

educ b302 practice teaching seminar
drawing on participants' diverse student teaching placements, this seminar invites exploration and analysis of ideas, perspectives and approaches to teaching at the middle and secondary levels. taken concurrently with practice teaching.
open only to students engaged in practice teaching.
counts towards: child and family studies
units: 1.0
(spring 2018)

engl b270 american girl: childhood in u.s. literatures, 1690-1935
this course will focus on the "american girl" as a particularly contested model for the nascent american. through examination of religious tracts, slave and captivity narratives, literatures for children and adult literatures about childhood, we will analyze u.s. investments in girlhood as a site for national self-fashioning.
approach: critical interpretation (ci)
counts towards: africana studies; child and family studies; gender and sexuality studies
units: 1.0
instructor(s): schneider,b.
(spring 2018)

pols b375 gender, work and family
as the number of women participating in the paid workforce who are also mothers exceeds 50 percent, it becomes increasingly important to study the issues raised by these dual roles. this seminar will examine the experiences of working and nonworking mothers in the united states, the roles of fathers, the impact of working mothers on children, and the policy implications of women, work, and family.
counts towards: child and family studies; gender and sexuality studies
units: 1.0
(not offered 2017-2018)

psyc b203 educational psychology
topics in the psychology of human cognitive, social, and affective behavior are examined and related to educational practice. issues covered include learning theories, memory, attention, thinking, motivation, social/emotional issues in adolescence, and assessment/learning disabilities. this course provides a praxis level i opportunity. classroom observation is required.
prerequisite: psyc b105 (introductory psychology)
approach: course does not meet an approach
counts towards: child and family studies; praxis program
PSYC B206 Developmental Psychology
A topical survey of psychological development from infancy through adolescence, focusing on the interaction of personal and environmental factors in the ontogeny of perception, language, cognition, and social interactions within the family and with peers. Topics include developmental theories; infant perception; attachment; language development; theory of mind; memory development; peer relations, schools and the family as contexts of development; and identity and the adolescent transition. Prerequisite: PSYC B105 or PSYC H100
Approach: Course does not meet an Approach
Counts towards: Child and Family Studies
Units: 1.0
Instructor(s): Albert, D.
(Fall 2017)

PSYC B209 Abnormal Psychology
This course examines the experience, origins and consequences of psychological difficulties and problems. Among the questions we will explore are: What do we mean by abnormal behavior or psychopathology? What are the strengths and limitations of the ways in which psychopathology is assessed and classified? What are the major forms of psychopathology? How do psychologists study and treat psychopathology? How is psychopathology experienced by individuals? What causes psychological difficulties and what are their consequences? How do we integrate social, biological and psychological perspectives on the causes of psychopathology? Do psychological treatments (therapies) work? How do we study the effectiveness of psychology treatments? Prerequisite: Introductory Psychology (PSYC B105 or H100).
Approach: Course does not meet an Approach
Counts towards: Child and Family Studies; Health Studies
Units: 1.0
(Not Offered 2017-2018)

PSYC B250 Autism Spectrum Disorders
Focuses on theory of and research on Autism Spectrum Disorders (ASD). Topics include the history of autism; classification and diagnosis; epidemiology and etiology; major theories; investigations of sensory and motor atypicalities, early social communicative skills, affective, cognitive, symbolic and social factors; the neuropsychology of ASD; and current approaches to intervention. Prerequisite: Introductory Psychology (PSYC 105).
Approach: Course does not meet an Approach
Counts towards: Child and Family Studies
Units: 1.0
Instructor(s): Wozniak, R.
(Spring 2018)

PSYC B303 Portraits of Maladjustment in Classic Children’s Novels
This writing-intensive seminar (maximum enrollment = 16 students) .5 unit course deals with critical analysis of how various forms of psychological maladjustment and health are depicted in selected classic novels for children. Many such novels were written in the Victorian period. Long before developmental psychopathology was a scientific discipline, its main questions were insightfully probed by 19th and early 20th century novelists in books such as "The Secret Garden." In this course, each book will be analyzed for the literary devices used to portray healthy adjustment and maladjustment, the implicit theories of psychological causation captured in the narratives, and the ways the novelist depicts life experiences that bring about mental health and personal growth. Each book will be discussed in its historical/literary contexts, and compared with current views drawn from psychological research. The course integrates literary analysis of classic children’s novels with important concepts derived from the field of developmental psychopathology.
Major Writing Requirement: Writing Intensive
Counts towards: Child and Family Studies; Health Studies
Units: 0.5
(Not Offered 2017-2018)

PSYC B322 Culture and Development
This course focuses on adolescents and their families in cultural, social, and ecological contexts. Topics include family dynamics, parent-adolescent relationship, socioeconomic status, immigration, social change, and globalization. Prerequisites: PSYC 105, and PSYC 206 or PSYC 224.
Counts towards: Child and Family Studies
Units: 1.0
Instructor(s): Park, H.
(Fall 2017)

PSYC B351 Developmental Psychopathology
This course will examine emotional and behavioral disorders of children and adolescents, including autism, attention deficit disorder, conduct disorder, phobias, obsessive-compulsive disorder, depression, anorexia, and schizophrenia. Major topics covered will include: contrasting models of psychopathology; empirical and categorical approaches to assessment and diagnosis; outcome of childhood disorders; risk, resilience, and prevention; and therapeutic approaches and their efficacy. Prerequisite: PSYC 206 or 209.
Counts towards: Child and Family Studies; Health Studies; Neuroscience
Units: 1.0
(Not Offered 2017-2018)

PSYC B375 Movies and Madness: Abnormal Psychology Through Films
This writing-intensive seminar (maximum enrollment = 16 students) deals with critical analysis of how various forms of psychopathology are depicted in films. The primary focus of the seminar will be evaluating the degree of correspondence between the cinematic presentation and current research knowledge about the disorder, taking into account the historical period in which the film was made. For example, we will discuss how accurately the symptoms of the disorder are presented and how representative the protagonist is of people who typically manifest this disorder based on current research. We will also address the theory of etiology of the disorder depicted in the film, including discussion of the relevant intellectual history in the period when the film was made and the prevailing accounts of psychopathology in that period. Another focus will be how the film portrays the course of the disorder and how it depicts treatment for the disorder. This cinematic presentation will be evaluated with respect to current research on treatment for the disorder as well as the historical context of prevailing treatment for the
disorder at the time the film was made. Prerequisite: PSYC B209.

Major Writing Requirement: Writing Intensive
Counts towards: Child and Family Studies; Film Studies; Health Studies
Units: 1.0
Instructor(s): Rescorla,L.
(Fall 2017)

SOCL B201 The Study of Gender in Society
The definition of male and female social roles and sociological approaches to the study of gender in the United States, with attention to gender in the economy and work place, the division of labor in families and households, and analysis of class and ethnic differences in gender roles. Of particular interest in this course is the comparative exploration of the experiences of women of color in the United States.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Child and Family Studies; Gender and Sexuality Studies
Units: 1.0
Instructor(s): Sledge,P.
(Fall 2017)

SOCL B217 The Family in Social Context
A consideration of the family as a social institution in the United States, looking at how societal and cultural characteristics and dynamics influence families; how the family reinforces or changes the society in which it is located; and how the family operates as a social organization. Included is an analysis of family roles and social interaction within the family. Major problems related to contemporary families are addressed, such as domestic violence and divorce. Cross-cultural and subcultural variations in the family are considered.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Child and Family Studies; Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

SOCL B225 Women in Society
A study of the contemporary experiences of women of color in the Global South. The household, workplace, community, and the nation-state, and the positions of women in the private and public spheres are compared cross-culturally. Topics include feminism, identity and self-esteem; globalization and transnational social movements and tensions and transitions encountered as nations embark upon development.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Africana Studies; Child and Family Studies; Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Montes,V.
(Spring 2018)

SOCL B229 Black America in Sociological Perspective
This course presents sociological perspectives on various issues affecting black America as a historically unique minority group in the United States: the legacy of slavery and the Jim Crow era; the formation of urban black ghettos; the civil rights reforms; the problems of poverty and unemployment; the problems of crime and other social problems; the problems of criminal justice; the continuing significance of race; the varied covert modern forms of racial discrimination; and the role of race in American politics.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Africana Studies; Child and Family Studies
Units: 1.0
(Not Offered 2017-2018)

SOCL B258 Sociology of Education
Major sociological theories of the relationships between education and society, focusing on the effects of education on inequality in the United States and the historical development of primary, secondary, and post-secondary education in the United States. Other topics include education and social selection, testing and tracking, and micro- and macro-explanations of differences in educational outcomes. This is a Praxis I I course; placements are in local schools.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Child and Family Studies; Praxis Program
Units: 1.0
Instructor(s): Karen,D.
(Fall 2017)

CLASSICAL AND NEAR EASTERN ARCHAEOLOGY

Students may complete a major or minor in Classical and Near Eastern Archaeology.

Faculty
Alice Donohue, Rhys Carpenter Professor of Classical and Near Eastern Archaeology
Astrid Lindenlauf, Associate Professor of Classical and Near Eastern Archaeology
Peter Magee, Chair and Professor of Classical and Near Eastern Archaeology (on leave semester II)
Susanna McFadden, Visiting Assistant Professor

The curriculum of the department focuses on the cultures of the Mediterranean regions and the Near East in antiquity. Courses treat aspects of society and material culture of these civilizations as well as issues of theory, method, and interpretation.

Major Requirements
The major requires a minimum of 10 courses. Core requirements are two 100-level courses distributed between the ancient Near East and Egypt (either ARCH 101 or 104) and ancient Greece and Rome (ARCH 102), and two semesters of the senior conference. At least two upper-level courses should be distributed between Classical and Near Eastern subjects. Additional requirements are determined in consultation with the major advisor. Additional coursework in allied subjects may be presented for major credit but must be approved in writing by the major advisor; such courses are offered in the Departments of Anthropology, Geology, Greek, Latin and Classical Studies, Growth and Structure of Cities, and History of Art. In consultation with the major advisor, one course taken in study abroad may be accepted for credit in the major.

The writing requirement for the major consists of two one-semester Writing Attentive courses offered within the department.
Each student's course of study to meet major requirements will be determined in consultation with the undergraduate major advisor in the spring semester of the sophomore year, at which time a written plan will be designed. Students considering majoring in the department are encouraged to take the introductory courses (ARCH 101 or 104 and 102) early in their undergraduate career and should also seek advice from departmental faculty. Students who are interested in interdisciplinary concentrations or in study abroad during the junior year are strongly advised to seek assistance in planning their major early in their sophomore year.

**Minor Requirements**

The minor requires six courses. Core requirements are two 100-level courses distributed between the ancient Near East and Egypt and ancient Greece and Rome, in addition to four other courses selected in consultation with the major advisor.

**Annual Field Trip**

As of 2015/6, the Department has been organizing an annual field trip for registered majors in their Junior Year. The trip involves a city (e.g., Athens or Rome) which features in our teaching program, or a city which contains relevant museums (e.g., London, Paris, Berlin). Details for the upcoming trip will be made available at the beginning of the Fall Semester. The airfare and accommodations costs are covered by the Department.

**Concentration in Geoarcheology**

The Departments of Anthropology, Classical and Near Eastern Archaeology, and Geology offer a concentration in geoarchaeology for existing majors in these departments. Please consult with Professor Magee regarding this program. Please note that these requirements are separate from those for the major and cannot be double counted.

**Requirements for the concentration:**

- Two 100-level units from Anthropology, Classical and Near Eastern Archaeology (including ARCH 135, a half-credit course) or Geology, of which one must be from the department outside the student’s major.
- ANTH/ARCH/GEOL 270: Geoarchaeology (Magee, Barber).
- BIOL/ARCH/GEOL 328: Geospatial Data Analysis and GIS (staff).
- Two elective courses, to be chosen in consultation with the major advisor, from among current offerings in Anthropology, Classical and Near Eastern Archaeology and Geology. One of these two courses must be from outside the student’s major. Suggested courses include but are not limited to ARCH 135 (HALF-CREDIT: Archaeological Fieldwork and Methods), ANTH 203 (Human Ecology), ANTH 220 (Methods and Theory), ARCH 330 (History of Archaeology and Theory), ANTH 225 (Paleolithic Archaeology), ANTH 240 (Traditional Technologies), ARCH 308 (Ceramic Analysis), ARCH 332 (Field Techniques), GEOL 202 (Mineralogy), GEOL 205 (Sedimentology), GEOL 310 (Geophysics), and GEOL 312 (Quaternary Climates).

**Honors**

Honors are granted on the basis of academic performance as demonstrated by a cumulative average of 3.5 or better in the major.

**Independent Research**

Majors who wish to undertake independent research, especially for researching and writing a lengthy paper, must arrange with a professor who is willing to advise them, and consult with the major advisor. Such research normally would be conducted by seniors as a unit of supervised work (403), which must be approved by the advising professor before registration. Students planning to do such research should consult with professors in the department in the spring semester of their junior year or no later than the beginning of the fall semester of the senior year.

**Languages**

Majors who contemplate graduate study in Classical fields should incorporate Greek and Latin into their programs. Those who plan graduate work in Near Eastern or Egyptian may take appropriate ancient languages at the University of Pennsylvania, such as Middle Egyptian, Akkadian and Sumerian. Any student considering graduate study in Classical and Near Eastern archaeology should study French and German.

**Study Abroad**

A semester of study abroad is encouraged if the program is approved by the department. Students are encouraged to consult with faculty, since some programs the department may approve may not yet be listed at the Office of International Programs. Students who seek major credit for courses taken abroad must consult with the major advisor before enrolling in a program. Major credit is given on a case-by-case basis after review of the syllabus, work submitted for a grade, and a transcript. Credit will not be given for more than one course and not for courses that are ordinarily offered by the department.

**Fieldwork**

The department strongly encourages students to gain fieldwork experience and assists them in getting positions on field projects in North America and overseas. The department is undertaking several field projects in which undergraduates may be invited to participate.

Professor Peter Magee conducts a for-credit field school at Muweilah, al-Hamriya and Tell Abraq in the United Arab Emirates. Undergraduate and graduate students participate in this project, which usually takes place during the winter break. He sends an announcement about how to apply for a position in the fall of each year. Students who participate for credit sign up for a 403 independent study with Professor Magee.

Professor Astrid Lindenlauf also conducts an excavation project at ancient Greek trading post of Naukratis in Egypt, and there are opportunities for work there.

**Museum Internships**

The department is awarded annually two internships by the Nicholas P. Goulandris Foundation for students to work for a month in the Museum of Cycladic Art in Athens, Greece, with an additional two weeks at an archaeological field project. This is an all-expense paid internship for which students may submit an application. An announcement inviting applications is sent in the late fall or beginning of the second semester.

Opportunities to work with the College’s archaeology collections are available throughout the academic year and during the summer. Students wishing to work with the collections should consult Marianne Weldon, Collections Manager for Special Collections.
Funding for Internships and Special Projects

The department has two funds that support students for internships and special projects of their own design. One, the Elisabeth Packard Fund for internships in Art History and Archaeology is shared with the Department of the History of Art, while the other is the Anna Lelah Keys Memorial Prize. Any declared major may apply for these funds. An announcement calling for applications is sent to majors in the spring, and the awards are made at the annual college awards ceremony in April.

COURSES

ARCH B101 Introduction to Egyptian and Near Eastern Archaeology

A historical survey of the archaeology and art of the ancient Near East and Egypt.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Africana Studies
Units: 1.0
(Not Offered 2017-2018)

ARCH B102 Introduction to Classical Archaeology

A historical survey of the archaeology and art of Greece, Etruria, and Rome.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Museum Studies
Units: 1.0
Instructor(s): Lindenlauf, A.
(Spring 2018)

ARCH B104 Archaeology of Agricultural and Urban Revolutions

This course examines the archaeology of the two most fundamental changes that have occurred in human society in the last 12,000 years, agriculture and urbanism, and we explore these in Egypt and the Near East as far as India. We also explore those societies that did not experience these changes.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Geoarchaeology; Middle Eastern & Islamic Studies
Units: 1.0
(Not Offered 2017-2018)

ARCH B110 The World Through Classical Eyes

A survey of the ways in which the ancient Greeks and Romans perceived and constructed their physical and social world. The evidence of ancient texts and monuments will form the basis for exploring such subjects as cosmology, geography, travel and commerce, ancient ethnography and anthropology, the idea of natural and artificial wonders, and the self-definition of the classical cultures in the context of the oikoumene, the “inhabited world.”

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Donohue, A.
(Fall 2017)

ARCH B125 Classical Myths in Art and in the Sky

This course explores Greek and Roman mythology using an archaeological and art historical approach, focusing on the ways in which the traditional tales of the gods and heroes were depicted, developed and transmitted in the visual arts such as vase painting and architectural sculpture, as well as projected into the natural environment.

Approach: Inquiry into the Past (IP)
Counts towards: Museum Studies
Units: 1.0
(Not Offered 2017-2018)

ARCH B135 Focus: Archaeological Fieldwork and Methods

The fundamentals of the practice of archaeology through readings and case studies and participatory demonstrations. Case studies will be drawn from the archives of the Nemea Valley Archaeological Project and material in the College’s collections. Each week there will be a 1-hour laboratory that will introduce students to a variety of fieldwork methods and forms of analysis. This is a half semester Focus course.

Approach: Inquiry into the Past (IP)
Counts towards: Geoarchaeology
Units: 0.5
Instructor(s): Lindenlauf, A.
(Fall 2017)

ARCH B137 Focus: Introduction into Principles of Preservation & Conservation

This half-unit introductory course provides insights into the fundamentals of the practices of archaeological preservation and conservation and enhances the understanding of their significance in the archaeological process. This half-course deals exclusively with excavated materials that are still on-site or have been moved to a storage facility or a museum. Materials considered in this course include architecture, textiles, and portable objects made of clay, stone, and metal. While most of the finds are from land sites, occasional references to marine material are made. Most of the material used in the hands-on sessions comes from the Special Collections. Suggested preparation: basic understanding of chemistry is helpful.

Approach: Course does not meet an Approach
Units: 0.5
(Not Offered 2017-2018)

ARCH B203 Ancient Greek Cities and Sanctuaries

A study of the development of the Greek city-states and sanctuaries. Archaeological evidence is surveyed in its historic context. The political formation of the city-state and the role of religion is presented, and the political, economic, and religious institutions of the city-states are explored in their urban settings. The city-state is considered as a particular political economy of the Mediterranean and in comparison to the utility of the concept of city-state in other cultures.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

ARCH B204 Animals in the Ancient Greek World

This course focuses on perceptions of animals in ancient Greece from the Geometric to the Classical periods. It examines representations of animals in painting, sculpture, and the minor arts, the treatment of animals as attested in the archaeological record, and how these types of evidence relate to the featuring of animals in contemporary poetry, tragedy, comedy, and medical and philosophical writings. By analyzing this rich body of evidence, the course develops a context in which...
One of the best preserved categories of evidence for ancient Greek culture is sculpture. The Greeks devoted immense resources to producing sculpture that encompassed many materials and forms and served a variety of important social functions. This course examines sculptural production in Greece and neighboring lands from the Bronze Age through the fourth century B.C.E. with special attention to style, iconography and historical and social context.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Donohue,A.
(Fall 2017)

ARCH B206 Hellenistic and Roman Sculpture

This course surveys the sculpture produced from the fourth century B.C.E. to the fourth century C.E., the period, beginning with the death of Alexander the Great, that saw the transformation of the classical world through the rise of Rome and the establishment and expansion of the Roman Empire. Style, iconography, and production will be studied in the contexts of the culture of the Hellenistic kingdoms, the Roman appropriation of Greek culture, the role of art in Roman society, and the significance of Hellenistic and Roman sculpture in the post-antique classical tradition.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Major Writing Requirement: Writing Attentive
Units: 1.0
(Instructor(s): Donohue,A.
(Fall 2017)

ARCH B211 The Archaeology and Anthropology of Rubbish and Recycling

This course serves as an introduction to a range of approaches to the study of waste and dirt as well as practices and processes of disposal and recycling in past and present societies. Particular attention will be paid to the interpretation of spatial disposal patterns, the power of dirty waste to create boundaries and difference, and types of recycling.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Lindenlauf,A.
(Fall 2017)

ARCH B215 Classical Art

A survey of the visual arts of ancient Greece and Rome from the Bronze Age through Late Imperial times (circa 3000 B.C.E. to 300 C.E.). Major categories of artistic production are examined in historical and social context, including interactions with neighboring areas and cultures; methodological and interpretive issues are highlighted.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

ARCH B217 Captive Greece, Captor Rome?

The Western classical tradition is not monolithic, but contains elements from both ancient Greek and Roman culture. This course examines the relationship between the two, from the Hellenistic era through the Roman Empire, and its later consequences, emphasizing the primary evidence of the visual arts and contemporary texts. Suggested preparation: 100-level coursework in history of art, classics, archaeology, or comparative literature.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Major Writing Requirement: Writing Attentive
Units: 1.0
Instructor(s): Donohue,A.
(Spring 2018)

ARCH B226 Archaeology of Anatolia

One of the cradles of civilization, Anatolia witnessed the rise and fall of many cultures and states throughout its ancient history. This course approaches the ancient material remains of pre-classical Anatolia from the perspective of Near Eastern archaeology, examining the art, artifacts, architecture, cities, and settlements of this land from the Neolithic through the Lydian periods. Some emphasis will be on the Late Bronze Age and the Iron Age, especially phases of Hittite and Assyrian imperialism, Late Hittite states, Phrygia, and the Urartu.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

ARCH B230 Archaeology and History of Ancient Egypt

A survey of the art and archaeology of ancient Egypt from the Pre-Dynastic through the Graeco-Roman periods, with special emphasis on Egypt's Empire and its outside connections, especially the Aegean and Near Eastern worlds.

Approach: Inquiry into the Past (IP)
Major Writing Requirement: Writing Attentive
Counts towards: Africana Studies; Middle Eastern & Islamic Studies
Units: 1.0
(Not Offered 2017-2018)

ARCH B238 Land of Buddha: The Archaeology of South Asia, First Millenium B.C.E.

This course uses archaeological evidence to reconstruct social and economic life in South Asia from ca. 1200 to 0 B.C.E. We examine the roles of religion, economy and foreign trade in the establishment of powerful kingdoms and empires that characterized this region during this period.

Approach: Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

ARCH B240 Archaeology and History of Ancient Mesopotamia

A survey of the material culture of ancient Mesopotamia, modern Iraq, from the earliest phases of state formation (circa 3500 B.C.E.) through the Achaemenid Persian occupation of the Near East (circa 331 B.C.E.). Emphasis will be on art, artifacts, monuments, religion, kingship, and the cuneiform tradition. The
survival of the cultural legacy of Mesopotamia into later ancient and Islamic traditions will also be addressed.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Middle Eastern & Islamic Studies
Units: 1.0
(Not Offered 2017-2018)

ARCH B244 Great Empires of the Ancient Near East
A survey of the history, material culture, political and religious ideologies of, and interactions among, the five great empires of the ancient Near East of the second and first millennia B.C.E.: New Kingdom Egypt, the Hittite Empire in Anatolia, the Assyrian and Babylonian Empires in Mesopotamia, and the Persian Empire in Iran.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Middle Eastern & Islamic Studies
Units: 1.0
(Not Offered 2017-2018)

ARCH B252 Pompeii
Introduces students to a nearly intact archaeological site whose destruction by the eruption of Mt. Vesuvius in 79 C.E. was recorded by contemporaries. The discovery of Pompeii in the mid-1700s had an enormous impact on 18th- and 19th-century views of the Roman past as well as styles and preferences of the modern era. Informs students in classical antiquity, urban life, city structure, residential architecture, home decoration and furnishing, wall painting, minor arts and craft and mercantile activities within a Roman city.
Units: 1.0
(Not Offered 2017-2018)

ARCH B254 Cleopatra
This course examines the life and rule of Cleopatra VII, the last queen of Ptolemaic Egypt, and the reception of her legacy in the Early Roman Empire and the western world from the Renaissance to modern times. The first part of the course explores extant literary evidence regarding the upbringing, education, and rule of Cleopatra within the contexts of Egyptian and Ptolemaic cultures, her relationships with Julius Caesar and Marc Antony, her conflict with Octavian, and her death by suicide in 30 BCE. The second part examines constructions of Cleopatra in Roman literature, her iconography in surviving art, and her contributions to and influence on both Ptolemaic and Roman art. A detailed account is also provided of the afterlife of Cleopatra in the literature, visual arts, scholarship, and film of both Europe and the United States, extending from the papal courts of Renaissance Italy and Shakespearean drama, to Thomas Jefferson’s art collection at Monticello and Joseph Mankiewicz’s 1963 epic film, Cleopatra.
Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ARCH B260 Daily Life in Ancient Greece and Rome
The often-praised achievements of the classical cultures arose from the realities of day-to-day life. This course surveys the rich body of material and textual evidence pertaining to how ancient Greeks and Romans -- famous and obscure alike -- lived and died. Topics include housing, food, clothing, work, leisure, and family and social life.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

ARCH B301 Greek Vase-Painting
This course is an introduction to the world of painted pottery of the Greek world, from the 10th to the 4th centuries B.C.E. We will interpret these images from an art-historical and socio-economic viewpoint. We will also explore how these images relate to other forms of representation. Prerequisite: one course in classical archaeology or permission of instructor.
Major Writing Requirement: Writing Attentive
Units: 1.0
Instructor(s): Lindenlauf, A.
(Spring 2018)

ARCH B303 Classical Bodies
An examination of the conceptions of the human body evidenced in Greek and Roman art and literature, with emphasis on issues that have persisted in the Western tradition. Topics include the fashioning of concepts of male and female standards of beauty and their implications; conventions of visual representation; the nude; clothing and its symbolism; the athletic ideal; physiognomy; medical theory and practice; the visible expression of character and emotions; and the formulation of the "classical ideal" in antiquity and later times.
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ARCH B304 Archaeology of Greek Religion
This course approaches the topic of ancient Greek religion by focusing on surviving archaeological, architectural, epigraphical, artistic and literary evidence that dates from the Archaic and Classical periods. By examining a wealth of diverse evidence that ranges, for example, from temple architecture, and feasting and banqueting equipment to inscriptions, statues, vase paintings, and descriptive texts, the course enables the participants to analyze the value and complexity of the archaeology of Greek religion and to recognize its significance for the reconstruction of daily life in ancient Greece. Special emphasis is placed on subjects such as the duties of priests and priestesses, the violence of animal sacrifice, the function of cult statues and votive offerings and also the important position of festivals and hero and mystery cults in ancient Greek religious thought and experience.
Units: 1.0
(Not Offered 2017-2018)

ARCH B305 Topics in Ancient Athens
This is a topics course. Course content varies.
Major Writing Requirement: Writing Attentive
Units: 1.0
(Not Offered 2017-2018)

ARCH B306 Monumental Painting
The Mediterranean tradition of large-scale painting begins in prehistoric times and continues through Late Antiquity and beyond. Important examples survive on the walls of houses, tombs and other structures at sites in the Bronze Age Aegean, in Archaic, Classical and Hellenistic Anatolia, Macedonia, Magna Graecia, and Etruria, Rome and the famous sites of Pompeii and Hercul- aneum preserved by the eruption of Mount
Instructor(s): McFadden, S.
Units: 1.0
Counts towards: Museum Studies

ARCH B308 Ceramic Analysis
Pottery is a fundamental means of establishing the relative chronology of archaeological sites and of understanding past human behavior. Included are theories, methods and techniques of pottery description, analysis and interpretation. Topics include typology, seriation, ceramic characterization, production, function, exchange and the use of computers in pottery analysis. Laboratory work on pottery in the department collections. Prerequisite: permission of instructor.
Counts towards: Geoarchaeology
Units: 1.0
(Not Offered 2017-2018)

ARCH B312 Bronze Age Internationalism
This course explores the rise and fall of the first international age in the eastern Mediterranean. We will focus on the cultural and diplomatic connections between Egypt, Syria, Anatolia and the Aegean during the Bronze Age, c. 2000-1200 BCE. Prerequisites: ARCH B101 or B216 or B226 or B230 or B240 or B244.
Major Writing Requirement: Writing Attentive
Units: 1.0
(Not Offered 2017-2018)

ARCH B314 Ancient Greek Seafaring and Shipwrecks
This course examines the diverse evidence for ancient Greek seafaring and shipwrecks in the Mediterranean Sea from prehistory to the beginning of the Roman Empire. By focusing on archaeological, literary, iconographic, and epigraphic evidence, the course explores ancient Greek, Phoenician, Etruscan, and Roman interconnections in the Mediterranean Sea, through special attention to trade routes, commerce, colonization, economy, naval and maritime technology, cultural interactions, sea exploration, and piracy.
Major Writing Requirement: Writing Attentive
Units: 1.0
(Not Offered 2017-2018)

ARCH B316 Trade and Transport in the Ancient World
Issues of trade, commerce and production of export goods are addressed with regard to the Bronze Age and Iron Age cultures of Mesopotamia, Arabia, Iran and south Asia. Crucial to these systems is the development of means of transport via maritime routes and on land. Archaeological evidence for traded goods and shipwrecks is used to map the emergence of sea-faring across the Indian Ocean and Gulf while bio-archaeological data is employed to examine the transformative role that Bactrian and Dromedary camels played in ancient trade and transport.
Units: 1.0
Instructor(s): Magee, P.
(Fall 2017)

ARCH B329 Archaeology and National Imagination in Modern Greece
This course explores the link between archaeology, antiquity and the national imagination in modern Greece from the establishment of the Greek state in the early nineteenth century to present times. Drawing from a variety of disciplines, including history, archaeology, art history, sociology, anthropology, ethnography, and political science, the course examines the pivotal role of archaeology and the classical past in the construction of national Greek identity. Special emphasis is placed on the concepts of Hellenism and nationalism, the European rediscovery of Greece in the Romantic era, and the connection between classical archaeology and Philhellenism from the eighteenth to the twentieth centuries. Additional topics of study include the presence of foreign archaeological schools in Greece, the Greek perception of archaeology, the politics of display in Greek museums, and the importance and power of specific ancient sites, monuments, and events, such as the Athenian Acropolis, the Parthenon, and the Olympic Games, in the construction and preservation of Greek national identity.
Units: 1.0
(Not Offered 2017-2018)

ARCH B359 Topics in Classical Art and Archaeology
This is a topics course. Topics vary. A research-oriented course taught in seminar format, treating issues of current interest in Greek and Roman art and archaeology. Prerequisites: 200-level coursework in some aspect of classical or related cultures, archaeology, art history, or Cities. Current topic description: TA research-oriented course taught in seminar format, treating issues of current interest in Greek and Roman art and archaeology. Prerequisites: 200-level coursework in some aspect of classical or related cultures, archaeology, art history, or Cities.
Units: 1.0
Instructor(s): Donohue, A.
(Spring 2018)

ARCH B398 Senior Seminar
A weekly seminar on topics to be determined with assigned readings and oral and written reports.
Units: 1.0
Instructor(s): Lindenlauf, A.
(Fall 2017)

ARCH B399 Senior Seminar
A weekly seminar on common topics with assigned readings and oral and written reports.
Units: 1.0
(Spring 2018)

ARCH B403 Supervised Work
Supervised Work
Units: 1.0
(Fall 2017, Spring 2018)

ARCH B501 Greek Vase Painting
This course is an introduction to the world of painted pottery of the Greek world, from the 10th to the 4th centuries B.C.E. We will interpret these images from an art-historical and socio-economic viewpoint. We will also explore how these images relate to other forms of representation. Prerequisite: one course in classical archaeology or permission of instructor.
ARCH B504 Archaeology of Greek Religion
This course approaches the topic of ancient Greek religion by focusing on surviving archaeological, architectural, epigraphical, artistic and literary evidence that dates from the Archaic and Classical periods. By examining a wealth of diverse evidence that ranges, for example, from temple architecture, and feasting and banqueting equipment to inscriptions, statues, vase paintings, and descriptive texts, the course enables the participants to analyze the value and complexity of the archaeology of Greek religion and to recognize its significance for the reconstruction of daily life in ancient Greece. Special emphasis is placed on subjects such as the duties of priests and priestesses, the violence of animal sacrifice, the function of cult statues and votive offerings and also the important position of festivals and hero and mystery cults in ancient Greek religious thought and experience.
Units: 1.0
(Not Offered 2017-2018)

ARCH B505 Topics in Ancient Athens
This is a topics course. Topics vary.
Units: 1.0
(Not Offered 2017-2018)

ARCH B506 The Archaeology of Greece and Asia Minor during the Archaic and Classical Periods
This course discusses the material culture discovered in Archaic and Classical sanctuaries, cemeteries, and settlements in Greece and Asia Minor, taking into consideration past and present archaeological theory and interpretive trends. Key topics include human interaction with material culture, social change, and the use of space, landscape, and religion.
Units: 1.0
Instructor(s): Lindenlauf,A.
(Fall 2017)

ARCH B508 Ceramic Analysis
Pottery is fundamental for establishing the relative chronology of archaeological sites and past human behavior. Included are theories, methods and techniques of pottery description, analysis, and interpretation. Topics are typology, seniation, ceramic characterization, production, function, exchange and the use of computers in pottery analysis. Laboratory in the collections.
Units: 1.0
(Not Offered 2017-2018)

ARCH B516 Trade and Transport in the Ancient World
Issues of trade, commerce and production of export goods are addressed with regard to the Bronze Age and Iron Age cultures of Mesopotamia, Arabia, Iran and south Asia. Crucial to these systems is the development of means of transport via maritime routes and on land. Archaeological evidence for traded goods and shipwrecks is used to map the emergence of sea-faring across the Indian Ocean and Gulf while bio-archaeological data is employed to examine the transformative role that Bactrian and Dromedary camels played in ancient trade and transport.
Units: 1.0
(Not Offered 2017-2018)

ARCH B529 Archaeology and National Imagination in Modern Greece
This course explores the link between archaeology, antiquity and the national imagination in modern Greece from the establishment of the Greek state in the early nineteenth century to present times. Drawing from a variety of disciplines, including history, archaeology, art history, sociology, anthropology, ethnography, and political science, the course examines the pivotal role of archaeology and the classical past in the construction of national Greek identity. Special emphasis is placed on the concepts of Hellenism and nationalism, the European rediscovery of Greece in the Romantic era, and the connection between classical archaeology and Philhellenism from the eighteenth to the twentieth centuries. Additional topics of study include the presence of foreign archaeological schools in Greece, the Greek perception of archaeology, the politics of display in Greek museums, and the importance and power of specific ancient sites, monuments, and events, such as the Athenian Acropolis, the Parthenon, and the Olympic Games, in the construction and preservation of Greek national identity.
Units: 1.0
(Not Offered 2017-2018)

ARCH B552 Egyptian Architecture: New Kingdom
A proseminar that concentrates on the principles of ancient Egyptian monumental architecture with an emphasis on the New Kingdom. The primary focus of the course is temple design, but palaces, representative settlements, and examples of Graeco-Roman temples of the Nile Valley will also be dealt with.
Units: 1.0
(Not Offered 2017-2018)

ARCH B605 The Concept of Style
Style is a fundamental concern for historians of art. This seminar examines concepts of style in ancient and post-antique art historiography, focusing on the historical and intellectual contexts in which they arose. Special attention is paid to the recognition and description of style, explanations of stylistic change, and the meanings attached to style, particularly in classical and related art.
Units: 1.0
(Not Offered 2017-2018)

ARCH B634 Problems in Classical Art
This is a topics course. Topics vary. A seminar dealing with current issues in the art of ancient Greece and related traditions. Current topic description: The visual art of the classical cultures may be characterized as "representational" in both prevailing forms and content. Much of its representational content is classified as "narrative," a category that has long occupied historians of Western art and culture. This seminar examines narrative art in ancient Greek and Roman art and related traditions, with emphasis on primary materials and on the historiographic context of the associated scholarship.
Prerequisite: Graduate Students Only
Units: 1.0
Instructor(s): Donohue,A.
(Spring 2018)
ARCH B669 Ancient Greece and the Near East
Approaches to the study of interconnections between Ancient Greece and the Near East, mainly in the Iron Age, with emphasis on art, architecture, and intellectual perspective.
Units: 1.0
(Not Offered 2017-2018)

ARCH B692 Archaeology of Achaemenid Era
The course explores the archaeology of the Achaemenid Empire. It will be offered in conjunction with Professor Lauren Ristvet (UPENN) and will cover the archaeology of the regions from Libya to India fro 538 to 332 BC. Students will be expected to provide presentations as well as written work.
Units: 1.0
(Not Offered 2017-2018)

ARCH B101 Introduction to Egyptian and Near Eastern Archaeology
A historical survey of the archaeology and art of the ancient Near East and Egypt.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Africana Studies
Units: 1.0
(Not Offered 2017-2018)

ARCH B102 Introduction to Classical Archaeology
A historical survey of the archaeology and art of Greece, Etruria, and Rome.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Museum Studies
Units: 1.0
Instructor(s): Lindenlauf,A.
(Spring 2018)

ARCH B110 The World Through Classical Eyes
A survey of the ways in which the ancient Greeks and Romans perceived and constructed their physical and social world. The evidence of ancient texts and monuments will form the basis for exploring such subjects as cosmology, geography, travel and commerce, ancient ethnography and anthropology, the idea of natural and artificial wonders, and the self-definition of the classical cultures in the context of the oikoumene, the "inhabited world."
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Donohue,A.
(Fall 2017)

ARCH B125 Classical Myths in Art and in the Sky
This course explores Greek and Roman mythology using an archaeological and art historical approach, focusing on the ways in which the traditional tales of the gods and heroes were depicted, developed and transmitted in the visual arts such as vase painting and architectural sculpture, as well as projected into the natural environment.
Approach: Inquiry into the Past (IP)
Counts towards: Museum Studies
Units: 1.0
(Not Offered 2017-2018)

ARCH B215 Classical Art
A survey of the visual arts of ancient Greece and Rome from the Bronze Age through Late Imperial times (circa 3000 B.C.E. to 300 C.E.). Major categories of artistic production are examined in historical and social context, including interactions with neighboring areas and cultures; methodological and interpretive issues are highlighted.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

ARCH B260 Daily Life in Ancient Greece and Rome
The often-praised achievements of the classical cultures arose from the realities of day-to-day life. This course surveys the rich body of material and textual evidence pertaining to how ancient Greeks and Romans -- famous and obscure alike -- lived and died. Topics include housing, food, clothing, work, leisure, and family and social life.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

ARCH B308 Ceramic Analysis
Pottery is a fundamental means of establishing the relative chronology of archaeological sites and of understanding past human behavior. Included are theories, methods and techniques of pottery description, analysis and interpretation. Topics include typology, seriation, ceramic characterization, production, function, exchange and the use of computers in pottery analysis. Laboratory work on pottery in the department collections.
Prerequisite: permission of instructor.
Counts towards: Geoarchaeology
Units: 1.0
(Not Offered 2017-2018)

ARCH B359 Topics in Classical Art and Archaeology
This is a topics course. Topics vary. A research-oriented course taught in seminar format, treating issues of current interest in Greek and Roman art and archaeology. Prerequisites: 200-level coursework in some aspect of classical or related cultures, archeology, art history, or Cities. Current topic description: TA research-oriented course taught in seminar format, treating issues of current interest in Greek and Roman art and archaeology. Prerequisites: 200-level coursework in some aspect of classical or related cultures, archeology, art history, or Cities.
Units: 1.0
Instructor(s): Donohue,A.
(Spring 2018)

ARCH B512 Bronze Age Internationalism
This course explores the rise and fall of the first international age in the eastern Mediterranean. We will focus on the cultural and diplomatic connections between Egypt, Syria, Anatolia and the Aegean during the Bronze Age, c. 2000-1200BCE.
Units: 1.0
(Not Offered 2017-2018)

ARCH B514 Ancient Greek Seafaring and Shipwrecks
This course examines the diverse evidence for ancient Greek seafaring and shipwrecks in the Mediterranean Sea from prehistory to the beginning of the Roman Empire. By focusing on archaeological, literary, iconographic, and epigraphic evidence,
the course explores ancient Greek, Phoenician, Etruscan, and Roman interconnections in the Mediterranean Sea, through special attention to trade routes, commerce, colonization, economy, naval and maritime technology, cultural interactions, sea exploration, and piracy.

Units: 1.0  
(Not Offered 2017-2018)

ARCH B516 Trade and Transport in the Ancient World
Issues of trade, commerce and production of export goods are addressed with regard to the Bronze Age and Iron Age cultures of Mesopotamia, Arabia, Iran and south Asia. Crucial to these systems is the development of means of transport via maritime routes and on land. Archaeological evidence for traded goods and shipwrecks is used to map the emergence of sea-faring across the Indian Ocean and Gulf while bio-archaeological data is employed to examine the transformative role that Bactrian and Dromedary camels played in ancient trade and transport.

Units: 1.0  
(Not Offered 2017-2018)

ARCH B608 Mediterranean Landscape Archaeology
This course explores a range of approaches to the study of landscapes that relates to core principles of the field of archaeology. It also discusses the construction of specific landscapes in the Mediterranean (e.g., gardens, sacred landscapes, and memoryscapes).

Units: 1.0  
(Not Offered 2017-2018)

ARCH B615 Mystery Cults
An investigation of the phenomenon of mystery cults, their foundation and dispersal from the Classical through Hellenistic and early Roman periods. A study of the topography and monuments of specific cults and of representation of mysteries in sculpture and painting.

Units: 1.0  
Instructor(s): McFadden, S.  
(Fall 2017)

ARCH B617 Herculaneum: Villa dei Papiri
The Villa of the Papyri is a 'villa suburbana' that housed a large collection of sculptures. Its reconstruction became famous as the Getty Villa. This Villa will serve as an 'exemplum' of a Roman villa to explore topics including early excavation techniques, libraries and the Epicurean philosophy, the concepts and meanings of villae, as well as the placement of statues and copy criticism.

Units: 1.0  
(Not Offered 2017-2018)

ARCH B628 Assyria and the West: Neo-Hittite States
This seminar revolves around the art and architecture of the Neo-Hittite states of the Iron Age in Syro-Anatolia from the lens of their relations with the Neo-Assyrian Empire.

Units: 1.0  
(Not Offered 2017-2018)

ARCH B643 Mortuary Practices
This seminar focuses on the mortuary practices of the ancient Greek and Macedonian worlds from the Iron Age to the end of the Hellenistic period. Special emphasis is placed on the examination of skeletal remains, funerary offerings, the art, and architecture of specific archaeological sites and on the study of various issues in the archaeology of death.

Units: 1.0  
(Not Offered 2017-2018)

ARCH B654 The Archaeology of Prehistoric Arabia
In this course we examine the archaeology of prehistoric Arabia from c. 8000 to 500 BC. Particular emphasis is placed upon how the archaeological evidence illuminates social and economic structures.

Units: 1.0  
Instructor(s): Magee, P.  
(Fall 2017)

ARCH B701 Supervised Work
Unit of supervised work

Units: 1.0  
Instructor(s): Donohue, A., Lindenlauf, A., Magee, P.  
(Fall 2017, Spring 2018)

CSTS B156 Roman Law in Action
An introduction to Roman public and private law from the early republic to the high empire. The development of legal institutions, including the public courts, the role of the jurists and the importance of case law, is stressed.

Approach: Cross-Cultural Analysis (CC)  
Units: 1.0  
(Not Offered 2017-2018)

CSTS B205 Greek History
This course traces the rise of the city-state (polis) in the Greek-speaking world beginning in the seventh-century BC down to its full blossoming in classical Athens and Sparta. Students should gain an understanding of the formation and development of Greek identity, from the Panhellenic trends in archaic epic and religion through its crystallization during the heroic defense against two Persian invasions and its subsequent disintegration during the Peloponnesian war. The class will also explore the ways in which the evolution of political, philosophical, religious, and artistic institutions reflect the changing socio-political circumstances of Greece. The latter part of the course will focus on Athens in particular: its rise to imperial power under Pericles, its tragic decline from the Peloponnesian War and its important role as a center for the teaching of rhetoric and philosophy. Since the study of history involves the analysis, evaluation, and synthesis of the sources available for the culture studied, students will concentrate upon the primary sources available for Greek history, exploring the strengths and weakness of these sources and the ways in which their evidence can be used to create an understanding of ancient Greece. Students should learn how to analyze and evaluate the evidence from primary texts and to synthesize the information from multiple sources in a critical way.

Approach: Inquiry into the Past (IP)  
Units: 1.0  
(Not Offered 2017-2018)

CSTS B207 Early Rome and the Roman Republic
This course surveys the history of Rome from its origins to the end of the Republic, with special emphasis on the rise of Rome in Italy and the evolution of the Roman state. The course also
examine the Hellenistic world in which the rise of Rome takes place. The methods of historical investigation using the ancient sources, both literary and archaeological, are emphasized.

**Approach:** Inquiry into the Past (IP)

**Units:** 1.0

**CSTS B228 The Roman Empire**

Imperial history from the principate of Augustus to the House of Constantine with focus on the evolution of Roman culture and society as presented in the surviving ancient evidence, both literary and archaeological.

**Approach:** Inquiry into the Past (IP)

**Units:** 1.0

**Instructor(s):** Scott, R.

**(Spring 2018)**

**CSTS B213 Persia and The Greeks**

This course explores interactions between Greeks and Persians in the Mediterranean and Near East from the Archaic Period to the Hellenistic Age. Through a variety of sources (from Greek histories, tragedies, and ethnography, to Persian royal inscriptions and administrative documents and the Hebrew Bible), we shall work to illuminate the interface between these two distinct yet complementary cultures. Our aim will be to gain familiarity not only with a general narrative of Greco-Persian history, from the foundation of the Achaemenid Empire in the middle of the sixth century BCE to the Macedonian conquest of Persia some 250 years later, but also with the materials (archaeological, numismatic, epigraphical, artistic, and literary) from which we build such a narrative. At the same time, we shall work to understand how contact between Persia and the Greeks in antiquity has influenced discourse about the opposition between East and West in the modern world.

**Approach:** Cross-Cultural Analysis (CC); Inquiry into the Past (IP)

**Units:** 1.0

**(Not Offered 2017-2018)**

**CSTS B214 Remembering the Saints: Reading Pilgrimage & Tourism**

This course is divided into two parts. In the first half of the semester, it will trace the rise and function of the holy women and men of late antiquity (300–600 CE), with an emphasis on the literary portrayal of their lives, a genre called hagiography (sacred biography). Methods for reading and interpreting this large body of literature will play a key role in this part of the course. In the second half of the semester, the focus will shift from saint to devotee. Saints were like magnets that set the people of late antiquity into motion. By reading pilgrim travelogues and catalogues of miraculous healings, studying the archeological and artistic evidence for pilgrimage, we will explore the profound social and cultural impact the cults of the saints had on the peoples of this period. In addition to gaining a familiarity with the history of early Christian saints and the cults that arose around them, students will also investigate the many issues at stake in the study of late antique Christianity. This includes but is not limited to: the conflict between history and literature in hagiography, gender and sanctity in late antiquity, self-harm as religious practice in early Christianity, and the intersection of medicine, magic, and miracle.

**Approach:** Inquiry into the Past (IP)

**Major Writing Requirement:** Writing Attentive

**Units:** 1.0

**(Not Offered 2017-2018)**

**CSTS B228 Utopia: Good Place or No Place?**

What is the ideal human society? What is the role and status of man and woman there? Is such a society purely hypothetical or should we strive to make it viable in our modern world? This course will address these questions by exploring the historic development of the concept of utopia.

**Approach:** Critical Interpretation (CI)

**Units:** 1.0

**(Not Offered 2017-2018)**

**CSTS B230 Food and Drink in the Ancient World**

This course explores practices of eating and drinking in the ancient Mediterranean world both from a socio-cultural and environmental perspective. Since we are not only what we eat, but also where, when, why, with whom, and how we eat, we will examine the wider implications of patterns of food production, preparation, consumption, availability, and taboos, considering issues like gender, health, financial situation, geographical variability, and political status. Anthropological, archaeological, literary, and art historical approaches will be used to analyze the evidence and shed light on the role of food and drink in ancient culture and society. In addition, we will discuss how this affects our contemporary customs and practices and how our identity is still shaped by what we eat.

**Approach:** Cross-Cultural Analysis (CC)

**Counts towards:** Gender and Sexuality Studies

**Units:** 1.0

**(Not Offered 2017-2018)**

**CSTS B237 Underworlds in Virgil & After**

What is a `literary tradition’, and what sense may we make of one? In this course we focus on an influential episode in the Western literary tradition: the hero’s journey into the underworld in Virgil’s epic poem, the Aeneid. Keeping in mind a master metaphor by which ‘underworld’ stands for ‘afterlife’, we consider that perilous ‘journey below’ on its own, in context of the complete poem, and in contexts provided by other authors’ visions of ‘what lies beneath’, including Homer (Odyssey), Ovid (Metamorphoses), Dante (Inferno), Milton (Paradise Lost), Shakespeare (The Tempest), Jules Verne (Journey to the Center of the Earth), Joseph Conrad (Heart of Darkness), J. R. R. Tolkien (The Hobbit), and the nameless author of the Epic of Gilgamesh.

**Approach:** Critical Interpretation (CI)

**Units:** 1.0

**(Not Offered 2017-2018)**

**CSTS B242 Magic in the Greco-Roman World**

Bindings and curses, love charms and healing potions, amulets and talismans - from the simple spells designed to meet the needs of the poor and desperate to the complex theurgies of the philosophers, the people of the Greco-Roman World made use of magic to try to influence the world around them. In this course students will gain an understanding of the magicians of the ancient world and the techniques and devices they used to serve their clientele, as well as the cultural contexts in which these ideas of magic arose. We shall consider ancient tablets and spell books as well as literary descriptions of magic in the light of theories relating to the religious, political, and social contexts in which magic was used.
**CSTS B274 Greek Tragedy in Global Cinema**

This course explores how contemporary film, a creative medium appealing to the entire demographic spectrum like Greek drama, looks back to the ancient origins. Examining both films that are directly based on Greek plays and films that make use of classical material without being explicitly classical in plot or setting, we will discuss how Greek mythology is reconstructed and appropriated for modern audiences and how the classical past continues to be culturally significant. A variety of methodological approaches such as film and gender theory, psychoanalysis, and feminist theory will be applied in addition to more straightforward literary-historical interpretation.

Approach: Critical Interpretation (CI)
Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

**CSTS B324 Roman Architecture**

The course gives special attention to the architecture and topography of ancient Rome from the origins of the city to the later Roman Empire. At the same time, general issues in architecture and planning with particular reference to Italy and the provinces from republic to empire are also addressed. These include public and domestic spaces, structures, settings and uses, urban infrastructure, the relationship of towns and territories, "suburban" and working villas, and frontier settlements. Prerequisite: ARCH 102.

Units: 1.0
Instructor(s): Scott, R.
(Fall 2017)

**Grek B101 Herodotus**

Greek 101 introduces the student to one of the greatest prose authors of ancient Greece, the historian, Herodotus. The "Father of History," as Herodotus is sometimes called, wrote one of the earliest lengthy prose texts extant in Greek literature, in the Ionian dialect of Greek. The "Father of Lies," as he is also sometimes known, wove into his history a number of fabulous and entertaining anecdotes and tales. His 'historie' or inquiry into the events surrounding the invasions by the Persian empire against the Greek city-states set the precedent for all subsequent historical writings. This course meets three times a week with a required fourth hour to be arranged. Prerequisite: GREK B010 and B011 or equivalent.

Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

**CSTS B398 Senior Seminar**

This is a bi-college seminar devoted to readings in and discussion of selected topics in the various sub-fields of Classics (e.g. literature, religion, philosophy, law, social history) and of how to apply contemporary critical approaches to the primary sources. Students will also begin developing a topic for their senior thesis, composing a prospectus and giving a preliminary presentation of their findings.

Units: 1.0
Instructor(s): Conybeare, C.
(Fall 2017)

**CSTS B399 Senior Seminar**

This is the continuation of CSTS B398. Working with individual advisors from the bi-college classics departments, students will continue to develop the topic sketched out in the fall semester. By the end of the course, they will have completed at least one draft and a full, polished version of the senior thesis, of which they will give a final oral presentation.

Units: 1.0
(Not Offered 2017-2018)

**Grek B104 Homer**

Greek 104 is designed to introduce the student to the epic poetry attributed to Homer, the greatest poet of ancient Greece, through selections from the Odyssey. Since Homer's poetic form is so important to the shape and texture of the Odyssey, we will examine the mechanics of Homeric poetry, both the intricacies of dactylic hexameter and the patterns of oral formulaic composition. We will also spend time discussing the characters and ideas that animate this text, since the value of Homer lies not merely in his incomparable mastery of his poetic form, but in the values and patterns of behavior in his story, patterns which remained remarkably influential in the Greek world for centuries. Prerequisite: One year of college level Greek or equivalent.

Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Attentive
Units: 1.0

**GREK B201 Plato and Thucydides**
This course is designed to introduce the student to two of the greatest prose authors of ancient Greece, the philosopher, Plato, and the historian, Thucydides. These two writers set the terms in the disciplines of philosophy and history for millennia, and philosophers and historians today continue to grapple with their ideas and influence. The brilliant and controversial statesman Alcibiades provides a link between the two texts in this course (Plato's Symposium and Thucydides' History of the Peloponnesian War), and we examine the ways in which both authors handle the figure of Alcibiades as a point of entry into the comparison of the varying styles and modes of thought of these two great writers. Suggested Prerequisites: At least 2 years of college Greek or the equivalent.

Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Attentive
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Edmonds, R.
(Fall 2017)

**GREK B202 The Form of Tragedy**
This course will introduce the student to two of the three great Athenian tragedians—Sophocles and Euripides. Their dramas, composed two-and-a-half millenia ago, continue to be performed regularly on modern stages around the world and exert a profound influence on current day theatre. We will read Sophocles’ Oedipus Tyrannos and Euripides’ Bacchae in full, focusing on language, poetics, meter, and performance studies.

Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Attentive
Units: 1.0
(Not Offered 2017-2018)

**GREK B403 Supervised Work**
Units: 1.0
(Fall 2017)

**GREK B653 Athens in the Hellenistic Period**
Surveys of Athenian history tend to conclude if not at the Battle of Chaeronea at any rate at the death of Alexander. Yet Athens did not disappear with the imposition of the Macedonian garrison in 322. Democracy resurfaced periodically over the course of the next century (in 318, 307, 288, and 229), and, more to the point, even under periods of oligarchic rule and Macedonian control, Athenian institutions remained intact, and Athenians continued to make significant contributions to the greater Greek world. Indeed, the century that followed Alexander’s death saw the flowering of Athenian historiography (e.g. Demochares, Dylitus, Philochorus, Timaeus, and Phylarchus) and new comedy (e.g. Menander and Poseidippus), as well as the advent of important philosophical schools (Epicureanism and Stoicism). This course will focus on Athens between the Battle of Chaeronea (338 BCE) and its liberation from Macedonian rule ca. 229 BCE. By way of a variety of contemporary sources, we shall have the opportunity to familiarize ourselves both with the historical narrative and with the intellectual climate of the polis in the early Hellenistic period.

Units: 1.0
(Not Offered 2017-2018)

**GSEM B623 Figures of Resistance: Classical and Modern**
The GSem will explore classical figures of resistance such as Prometheus, Antigone, Electra, Medea, and Lysistrata and their reception in modern art and cinema. The focus will be on films and other works of art that re-appropriate and transform the ancient characters and their stories. We will discuss in particular how modern filmmakers re-contextualize the classical figures to shed light on contemporary historical, political, and social issues. Films will include Tony Harrison, Prometheus (Great Britain, 1998), Liliana Cavani, The Year of the Cannibals (Italy, 1970), Amy Greenfield, Antigone/Rites of Passion (USA, 1991), Ingmar Bergman, Persona (Sweden, 1966), Miklós Jancsó, Electra, My Love (Hungary, 1974), Arthur Ripstein, Asi Es La Vida (Mexico, 2000), and Spike Lee, Chi-raq (USA, 2015). Readings will be drawn from texts on reception studies, film and gender theory, psychoanalysis, and political theory.

Units: 1.0
Instructor(s): King, H., Baertschi, A.
(Fall 2017)

**HIST B123 The Early Medieval World**
The first of a two-course sequence introducing medieval European history. The chronological span of this course is from the early 4th century and the Christianization of the Roman Empire to the early 10th century and the disintegration of the Carolingian Empire. This course number was previously HIST B223.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Middle Eastern & Islamic Studies
Units: 1.0
Instructor(s): Truitt, E.
(Fall 2017)

**HIST B124 High Middle Ages**
This course will cover the second half of the European Middle Ages, often called the High and Late Middle Ages, from roughly 1000-1400. The course has a general chronological framework, and is based on important themes of medieval history. These include feudalism and the feudal economy; the social transformation of the millennium; monastic reform; the rise of the papacy; trade, exchange, and exploration; urbanism and the growth of towns. The course number was previously HIST B224.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

**HIST B231 Medicine, Magic & Miracles in the Middle Ages**
A lecture and discussion course on the therapeutic systems (humoral theory, faith healing, natural magic), the medical marketplace, and the social context for understanding health and disease in the medieval period. Topics covered include Greek, Arabic, and Latin medical textual traditions, the rise of hospitals and public health, and the Black Death.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Health Studies
Units: 1.0
Instructor(s): Truitt, E.
(Fall 2017)

**HIST B231 Medicine, Magic & Miracles in the Middle Ages**
A lecture and discussion course on the therapeutic systems (humoral theory, faith healing, natural magic), the medical
marketplace, and the social context for understanding health and disease in the medieval period. Topics covered include Greek, Arabic, and Latin medical textual traditions, the rise of hospitals and public health, and the Black Death.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Health Studies
Units: 1.0
Instructor(s): Truitt,E.
(Fall 2017)

HIST B364 Magical Mechanisms
A reading and research seminar focused on different examples of artificial life in medieval cultures. Primary sources will be from a variety of genres, and secondary sources will include significant theoretical works in art history, critical theory and science studies. Prerequisite: at least one course in medieval history, or the permission of the instructor.
Units: 1.0
Instructor(s): Truitt,E.
(Spring 2018)

HIST B368 Topics in Medieval History
This is a topics course. Topics vary. Current topic description: A reading and research-based seminar on the intellectual and cultural history of medieval magic, including natural and demonic magic, astral science, alchemy, and other forms of “the occult sciences.” Primary sources will be from a variety of genres, including visual culture, and secondary sources will include significant works in philosophy, religious studies, and medieval historiography. Prerequisite: at least one course in medieval history, or the permission of the instructor.
Units: 1.0
Instructor(s): Truitt,E.
(Spring 2018)

LATN B110 Intermediate Latin
Intensive review of grammar, reading in classical prose and poetry. For students who have had the equivalent of several years of high school Latin or are not adequately prepared to take LATN 101. This course meets three times a week with a required fourth hour to be arranged. Prerequisite: One year of college level Latin or equivalent.
Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): Scott,R.
(Fall 2017)

LATN B112 Latin Literature
In the second semester of the intermediate Latin sequence, readings in prose and poetry are frequently drawn from a period, such as the age of Augustus, that illustrate in different ways the leading political and cultural concerns of the time. The Latin readings and discussion are supplemented by readings in the secondary literature. This course meets three times a week with a required fourth hour to be arranged. Prerequisite: LATN 101 or 110 or placement by the department.
Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Attentive
Units: 1.0
Instructor(s): Baertschi,A.
(Spring 2018)

LATN B201 Topics: Advanced Latin Literature
This is a topics course, course content varies. In this course typically a variety of Latin prose and poetry of the high and later Roman empire (first to fourth centuries CE) is read. Single or multiple authors may be featured in a given semester. Suggested Preparation: two years of college Latin or equivalent.
Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Attentive
Units: 1.0
(In Not Offered 2017-2018)

LATN B202 Topics: Advanced Latin Literature
In this course typically a variety of Latin prose and poetry of the high and later Roman empire (first to fourth centuries CE) is read. Single or multiple authors may be featured in a given semester. This is a topics course, course content varies. Prerequisite: At least one 200-level Latin course or equivalent. Current topic description: Readings will be drawn from the following authors: Lucan, De Bello Civili Book 7, Seneca’s Letters to Lucilius, and Cornelius Tacitus, the Agricola and the Histories (Selections).
Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Attentive
Units: 1.0
Instructor(s): Scott,R.
(Spring 2018)

LATN B312 Roman Satire
Satire is the most slippery and subversive of genres. It is richly entertaining to read; but if we engage with it seriously it is often abrasive, shocking, shattering. Reading Roman satire requires an energetic exercise in cultural translation: we are confronted with the alienness of the Roman world, as well as its perverse literary vigour. This course will span four turbulent centuries of Roman imperialism in its reading of Roman satire. We will range from the sharp minutenia of social observation in Horace’s Sermones to the calculated public abuse of a eunuch consul in Claudian’s In Eutropium; from the swirling filthy riches of Persius and Juvenal to the nastily eloquent Christian condemnation of riches (and much else) in St Jerome. Students are warned: the language is difficult, the content often excoriating, even if exquisitely expressed. Reading this material challenges any comfortable separation between “literature” and “life”.
Units: 1.0
(Not Offered 2017-2018)

LATN B350 Topics in Latin Literature
This is a topics course. Course content varies.
Prerequisites: At least two 200-level Latin courses or permission of instructor.
Units: 1.0
Instructor(s): Mulligan,B.
(Spring 2018)

LATN B403 Supervised Work
Units: 1.0
(Fall 2017)

LATN B637 Vergil Aeneid
A complete reading and close study of Virgil, whose “afterlife,” it has been said with little exaggeration, “is Western literature.” We
read all of the certain poems—Eclogues (c. 39 BCE), Georgics (c. 29 BCE), and Aeneid (c. 19 BCE)—completely in English, substantial portions of each in the Latin, and scholarship and criticism. Aiming at increased fluency in reading Latin poetry, we also seek to deepen our capacity to respond to this astonishing ancient poet rigorously and meaningfully. Attention is paid to some of Virgil’s models in Latin and Greek and to some imitators especially in the European epic tradition.

Units: 1.0
(Not Offered 2017-2018)

COMPARATIVE LITERATURE

Students may complete a major or minor in Comparative Literature.

Faculty

Chair and Adviser: Maud McInerney, Associate Professor of English (Haverford College)

Steering Committee

Bryn Mawr College

Martin Gaspar, Assistant Professor of Spanish

Jennifer Harford Vargas, Associate Professor of English on the Rosabeth Moss Kanter Change Master Fund and Co-Director of the Latin American, Latina/o and Iberian Studies Program (on leave semesters I & II)

Timothy Harte, Chair and Associate Professor of Russian on the Myra T. Cooley Lectureship in Russian

Shiamin Kwa, Assistant Professor of East Asian Studies

María Cristina Quintero, Chair and Professor of Spanish

Roberta Ricci, Chair and Associate Professor of Italian

Azade Seyhan, Fairbank Professor in the Humanities and Chair and Professor of German and Comparative Literature

Haverford

Imke Brust, Assistant Professor of German

Israel Burshatin, Professor of Spanish

Roberto Castillo Sandoval, Associate Professor of Spanish & Comparative Literature

Maud McInerney, Associate Professor of English

Jerry Miller, Associate Professor of Philosophy

Deborah Roberts, Professor of Classics and Comparative Literature

Ulrich Schoenherr, Professor of German and Comparative Literature

David Sedley, Associate Professor of French

The study of Comparative Literature situates literature in an international perspective; examines transnational cultural connections through literary history, literary criticism, critical theory, and poetics; and works toward a nuanced understanding of the socio-cultural functions of literature. The structure of the program allows students to engage in such diverse areas of critical inquiry as East-West cultural relations, global censorship and human rights, diaspora studies, film history and theory, and aesthetics of modernity. Therefore, interpretive methods from other disciplines also play a role in the comparative study of literature; among these are anthropology, ethnology, philosophy, history, history of art, religion, classical studies, area studies (Africania studies, Middle Eastern studies, Latin American studies, among others), gender studies, and other arts.

Comparative Literature students are required to have a reading knowledge of at one language other than English, adequate to the advanced study of literature in that language. Some Comparative Literature courses may require reading knowledge of a foreign language as a prerequisite for admission. Students considering graduate work in Comparative Literature should also study a second language other than English.

Major Requirements

Requirements for the Comparative Literature major are:

COML 200: Introduction to Comparative Literature (normally taken in the sophomore year)

Six literature courses at the 200 or 300-levels taken in the original languages and balanced between two literature departments (of which English may be one)—at least two of these (one in each national literature) must be at the 300 level or above, or its equivalent as approved in advance by the adviser; one course in critical theory; two electives; COML 398: Theories and Methods in Comparative Literature and 399: Senior Seminar in Comparative Literature.

Students must further complete a writing requirement in the major. Students will work with their major advisors in order to identify either two writing attentive or one writing intensive course within their major plan of study.

*In the case of languages for which literature courses in the original language are not readily available in the Tri-Co, students may on occasion be allowed to count a course taught in English translation for which they do at least part of the reading in the original language.

Honors

Students who, in the judgment of the advisory committee, have done distinguished work in their courses and in the senior seminar will be considered for departmental honors.

Minor Requirements

Requirements for the minor are COML 200 and 398, plus four additional courses—two each in the literature of two languages. At least one of these four courses must be at the 300 level. Students who minor in comparative literature are encouraged to choose their national literature courses from those with a comparative component.

Both majors and minors are encouraged to work closely with the chairs and members of the advisory committee in shaping their programs.

NOTE: Please note that not all topics courses (B223, 299, 321, 325, 326, 340) count toward COML elective requirements. See adviser.

COURSES

COML B200 Introduction to Comparative Literature

This course explores a variety of approaches to the comparative or transnational study of literature through readings of several kinds: texts from different cultural traditions that raise questions
about the nature and function of storytelling and literature; texts that comment on, respond to, and rewrite other texts from different historical periods and nations; translations; and readings in critical theory.

Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Seyhan, A.
(Fall 2017)

COML B225 Censorship: Historical Contexts, Local Practices and Global Resonance

The course is in English. It examines the ban on books and art in a global context through a study of the historical and sociopolitical conditions of censorship practices. The course raises such questions as how censorship is used to fortify political power, how it is practiced locally and globally, who censors, what are the categories of censorship, how censorship succeeds and fails, and how writers and artists write and create against and within censorship. The last question leads to an analysis of rhetorical strategies that writers and artists employ to translate the expression of repression, trauma, and torture into idioms of resistance. German majors/minors can get German Studies credit. Prerequisite: EMLY B001 or a 100-level intensive writing course.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Latin American, Iberian and Latina/o Studies; Middle Eastern & Islamic Studies
Units: 1.0
(Not Offered 2017-2018)

COML B293 The Play of Interpretation

Designated theory course. A study of the methodologies and regimes of interpretation in the arts, humanistic sciences, and media and cultural studies, this course focuses on common problems of text, authorship, reader/spectator, and translation in their historical and formal contexts. Literary, oral, and visual texts from different cultural traditions and histories will be studied through interpretive approaches informed by modern critical theories. Readings in literature, philosophy, popular culture, and film will illustrate how theory enhances our understanding of the complexities of history, memory, identity, and the trials of modernity.

Approach: Critical Interpretation (CI)
Counts towards: International Studies
Units: 1.0
(Not Offered 2017-2018)

COML B398 Theories and Methods in Comparative Literature

This course, required of all senior comparative literature majors in preparation for writing the senior thesis in the spring semester, has a twofold purpose: to review interpretive approaches informed by critical theories that enhance our understanding of literary and cultural texts; and to help students prepare a preliminary outline of their senior theses. Throughout the semester, students research theoretical paradigms that bear on their own comparative thesis topics in order to situate those topics in an appropriate critical context. This is a required for majors and minors.

Units: 1.0
Instructor(s): Seyhan, A.
(Fall 2017)

COML B399 Senior Seminar in Comparative Literature

Thesis writing seminar. Research methods. This course will be offered at Haverford College in 2017-18.

Units: 1.0
(Not Offered 2017-2018)

COML B403 Supervised Work

Units: 1.0
(Fall 2017)

ARCH B217 Captive Greece, Captor Rome?

The Western classical tradition is not monolithic, but contains elements from both ancient Greek and Roman culture. This course examines the relationship between the two, from the Hellenistic era through the Roman Empire, and its later consequences, emphasizing the primary evidence of the visual arts and contemporary texts. Suggested preparation: 100-level coursework in history of art, classics, archaeology, or comparative literature.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Major Writing Requirement: Writing Attentive
Units: 1.0
Instructor(s): Donohue, A.
(Spring 2018)

ARCH B303 Classical Bodies

An examination of the conceptions of the human body evidenced in Greek and Roman art and literature, with emphasis on issues that have persisted in the Western tradition. Topics include the fashioning of concepts of male and female standards of beauty and their implications; conventions of visual representation; the nude; clothing and its symbolism; the athletic ideal; physiognomy; medical theory and practice; the visible expression of character and emotions; and the formulation of the “classical ideal” in antiquity and later times.

Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ARTW B261 Writing Poetry I

In this course students will learn to “read like a writer,” while grappling with the work of accomplished poets, and providing substantive commentary on peers’ work. Through diverse readings, students will examine craft strategies at work in both formal and free verse poems, such as diction, metaphor, imagery, lineation, metrical patterns, irony, and syntax. The course will cover shaping forms (such as elegy and pastoral) as well as given forms, such as the sonnet, ghazal, villanelle, etc. Students will discuss strategies for conveying the literal meaning of a poem (e.g., through sensory description and clear, compelling language) and the concealed meaning of a text (e.g., through metaphor, imagery, meter, irony, and shifts in diction and syntax). By the end of the course, students will have generated new material, shaped and revised draft poems, and significantly grown as writers by experimenting with various aspects of craft.

Prerequisite: Students interested in a Creative Writing course must register for ARTW B999 and turn in the creative writing questionnaire by the end of registration.

Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Matthews, A.
(Fall 2017)
CSTS B274 Greek Tragedy in Global Cinema
This course explores how contemporary film, a creative medium appealing to the entire demographic spectrum like Greek drama, looks back to the ancient origins. Examining both films that are directly based on Greek plays and films that make use of classical material without being explicitly classical in plot or setting, we will discuss how Greek mythology is reconstructed and appropriated for modern audiences and how the classical past continues to be culturally significant. A variety of methodological approaches such as film and gender theory, psychoanalysis, and feminist theory will be applied in addition to more straightforward literary-historical interpretation.
Approach: Critical Interpretation (CI)
Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

CSTS B375 Interpreting Mythology
The myths of the Greeks have provoked outrage and fascination, interpretation and retelling, censorship and elaboration, beginning with the Greeks themselves. We will see how some of these stories have been read and understood, recounted and revised, in various cultures and eras, from ancient tellings to modern movies. We will also explore some of the interpretive theories by which these tales have been understood, from ancient allegory to modern structural and semiotic theories. The student should gain a more profound understanding of the meaning of these myths to the Greeks themselves, of the cultural context in which they were formulated. At the same time, this course should provide the student with some familiarity with the range of interpretations and strategies of understanding that people of various cultures and times have applied to the Greek myths during the more than two millennia in which they have been preserved. Preference to upperclassmen, previous coursework in myth required.
Units: 1.0
Instructor(s): Edmonds, R.
(Fall 2017)

EALC B240 Topics in Chinese Film
This is a topics course. Course content varies.
Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies; Film Studies
Units: 1.0
Instructor(s): Kwa, S.
(Spring 2018)

EALC B255 Understanding Comics: Introduction to Reading the Graphic Novel
The graphic narrative form has proliferated at a breathtaking rate in the last several decades. Called "comics," "graphic novels," and many other terms in between, these word-image hybrids have been embraced by both popular and critical audiences. But what is a graphic novel? How do we conceive of these texts and, more importantly, how do we read, interpret and write about them? This course is focused on approaches to reading the graphic novel, with a focus on a subgenre called the "literary comic." Our first approach is to consider different kinds of primary source texts and ask if and how they fulfill our understanding of the graphic narrative. This consideration will include various test cases, from wordless comics, to texts used as images, to the many varieties of word-image hybrids that are called comic books. Our second approach is to examine different scholarly approaches to analyzing graphic narratives, base d in different disciplines such as memoir studies, trauma studies, visual and material culture, history, semiotics, and, especially, narratology. Primary source readings include texts by Ware, Barry, Clowes, and Burns. Secondary readings include Hirsch, McCloud, Barthes, Iser, and Groensteen. Three short assignments due during the semester, and a final project due at the end of exam period (see description below). Students will also rotate responsibilities for starting discussions with small presentations aimed at discussing readings in depth. Students taking this course for their major in EALC or COML should meet with the instructor to discuss specific requirements.
Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Attentive
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Kwa, S.
(Spring 2018)

EALC B281 Food in Translation: Theory and Practice
This semester we will explore the connections between what we eat and how we define ourselves in the context of global culture. We will proceed from the assumption that food is an object of culture, and that our contemplation of its transformations and translations in production, preparation, consumption, and distribution will inform our notions of personal and group identity. This course takes Chinese food as a case study, and examines the way that Chinese food moves from its host country to diasporic communities all over the world, using theories of translation as our theoretical and empirical foundation. From analyzing menu and ingredient translations to producing a short film based on interviews, we will consider the relationship between food and communication in a multilingual and multicultural world. Readings include theoretical texts on translation (Apter), recipe books and menus, Chinese and Chinese-American literature (Classic of Poetry, Mo Yan, Hong Kingston). Films include Ian Cheney’s “Searching for General Tso,” Wayne Wang’s “Soul of a Banquet” and “Eat a Bowl of Tea,” Ang Li’s “Eat Drink Man Woman,” and Wong Karwai’s “In the Mood for Love.”
Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

EALC B355 Animals, Vegetables, Minerals in East Asian Literature
This semester, we will explore how artists question, explore, celebrate, and critique the relationships between humans and the environment. Through a topics-focused course, students will examine the ways that narratives about environment have shaped the way that humans have defined themselves. We will be reading novels and short stories and viewing films that contest conventional binaries of man and animal, civilization and nature, tradition and technology, and even truth and fiction. “Animals, Vegetables, Minerals” does not follow chronological or geographical frameworks, but chooses texts that engage the three categories enumerated as the major themes of our course. We will read and discuss animal theory, theories of place and landscape, and theories of modernization or mechanization; and there will be frequent (and intentional) overlap between these categories. We will also be watching films that extend our
ENGL B229 Movies and Mass Politics

Movies and mass politics emerged together, altering entertainment and government in strangely similar ways. Fascism and Communism claimed an inherent relation to the masses and hence to movies; Hollywood rejected such claims. We will examine films that allude to Communism and Fascism, seeking to understand how they join in political debates and comment upon the mass experience of movie going.

Approach: Critical Interpretation (CI)
Counts towards: Film Studies
Units: 1.0
Instructor(s): Kwa, S.
(Fall 2017)

ENGL B234 Postcolonial Literature in English

This course will survey a broad range of novels and poems written while countries were breaking free of British colonial rule. Readings will also include cultural theorists interested in defining literary issues that arise from the postcolonial situation.

Approach: Critical Interpretation (CI)
Counts towards: Africana Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B239 Introduction to African Literature

Taking into account the oral, written, aural, and visual forms of African “texts” over several thousand years, this course will explore literary production, intertextuality, translation, and audience/critical reception. Representative works to be studied include oral traditions, the Sundiata and Mwindo epics, the plays of Wole Soyinka and his Burden of History, the Muse of Forgiveness; and the work of Sembène Ousmane, Bessie Head, Ayi Kwei Armah, Mariama Bâ, Naguib Mahfouz, Ngugi wa Thiong’o, Chimamanda Ngozi Adichie, Yvonne Vera, and others.

Approach: Critical Interpretation (CI)
Counts towards: Africana Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B345 Topics in Narrative Theory

This is a topics course. Course content varies.
Counts towards: Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B381 Post-Apartheid Literature

South African texts from several language communities which anticipate a post-apartheid polity and texts by contemporary South African writers which explore the complexities of life in “the new South Africa.” Several films emphasize the minefield of post-apartheid reconciliation and accountability.
Counts towards: Africana Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B388 Contemporary African Fiction

Noting that the official colonial independence of most African countries dates back only half a century, this course focuses on the fictive experiments of the most recent decade. A few highly controversial works from the 90’s serve as an introduction to very recent work. Most works are in English. To experience depth as well as breadth, there is a small cluster of works from South Africa. With novels and tales from elsewhere on the huge African continent, we will get a glimpse of “living in the present” in history and letters.
Counts towards: Africana Studies
Units: 1.0
Instructor(s): Beard, L-S.
(Spring 2018)

FREN B213 Theory in Practice: Critical Discourses in the Humanities

By bringing together the study of major theoretical currents of the 20th century and the practice of analyzing literary works in the light of theory, this course aims at providing students with skills to use literary theory in their own scholarship. The selection of theoretical readings reflects the history of theory (psychoanalysis, structuralism, narratology), as well as the currents most relevant to the contemporary academic field: Post-structuralism, Post-colonialism, Gender Studies, and Ecocriticism. They are paired with a diverse range of short stories (Poe, Kafka, Camus, Borges, Calvino, Morrison, Djebar, Ngozi Adichie) that we discuss along with our study of theoretical texts. The class will be conducted in English with an additional hour in French for students wishing to take it for French credit.
Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Sanquer, M.
(Fall 2017)

FREN B302 Le printemps de la parole féminine: femmes écrivains des débuts

This study of selected women authors from Latin CE-Carolingian period through the Middle Ages, Renaissance and 17th century—among them, Perpetua, Hrotsithwa, Marie de France, the trobaritiz, Christine de Pisan, Louise Labé, Marguerite de Navarre, and Madame de Lafayette—examines the way in which they appropriate and transform the male writing tradition and define themselves as self-conscious artists within or outside it. Particular attention will be paid to identifying recurring concerns and structures in their works, and to assessing their importance to women’s writing in general: among them, the poetics of silence, reproduction as a metaphor for artistic creation, and sociopolitical engagement. Prerequisite: two 200-level courses or permission of instructor.
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)
FREN B325 Topics: Études avancées

An in-depth study of a particular topic, event or historical figure in French civilization. This is a topics course. Course content varies. The seminar topic rotates among many subjects: La Révolution française: Histoire, littérature et culture; L’environnement naturel dans la culture française; Mal et valeurs éthiques; Le Cinéma et la politique, 1940-1968; Le Nationalisme en France et dans les pays francophones; Étude socio-culturelle des arts du manger en France du Moyen Age à nos jours; Crimes et criminalité; Écrire la Grande Guerre: 1914-10; Le “Rentrée Littéraire”; Proustl Baudelaire.

Prerequisite: Two 200-level courses.
Units: 1.0
Instructor(s): Le Menthéour,R., Sanquer,M.

Fall 2017: Les femmes au Maghreb. This course offers an insight into Francophone North-African colonial and post-colonial literature by focusing on the role of women in society, particularly through the lens of topics such as politics, religion and sexuality. In addition to literary texts by Moroccan, Algerian and Tunisian writers, we will study historical and sociological sources as well as North African feminist traditions. Course will be taught in French.

FREN B350 Voix médiévales et échos modernes

A study of selected 19th- and 20th-century works inspired by medieval subjects, such as the Grail and Arthurian legends and the Tristan and Yseut stories, and by medieval genres, such as the roman, saints’ lives, or the miracle play. Among the texts and films studied are works by Bonnefoy, Cocteau, Flaubert, Genevoix, Giono, and Gracq.

Units: 1.0
Instructor(s): Armstrong,P.
(Spring 2018)

GERM B223 Topics in German Cultural Studies

This is a topics course. Course content varies. Recent topics include Remembered Violence, Global Masculinities, and Crime and Detection in German.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

GERM B231 Cultural Profiles in Modern Exile

This course investigates the anthropological, philosophical, psychological, cultural, and literary aspects of modern exile. It studies exile as experience and metaphor in the context of modernity, and examines the structure of the relationship between imagined/remembered homelands and transnational identities, and the dialectics of language loss and bi- and multi-lingualism. Particular attention is given to the psychocultural dimensions of linguistic exclusion and loss. Readings of works by Julia Alvarez, Albert Camus, Ana Castillo, Sigmund Freud, Eva Hoffman, Maxine Hong Kingston, Milan Kundera, Friedrich Nietzsche, Salman Rushdie, W. G. Sebald, Kurbani Said, and others.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Major Writing Requirement: Writing Attentive
Counts towards: Latin American, Iberian and Latina/o Studies; International Studies
Units: 1.0
(Not Offered 2017-2018)

GERM B245 Interdisciplinary Approaches to German Literature and Culture

This is a topics course. Taught in English. Course content varies. Previous topics include, Women’s Narratives on Modern Migrancy, Exile, and Diasporas; Nation and Identity in Post-War Austria. Current topic: Crime and Courtroom Drama. This is a film-based course about political trials at critical junctures of German history. Current topic description: This is a film-based course about political trials at critical junctures of German history.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Shen,Q.
(Spring 2018)

GERM B320 Topics in German Literature and Culture

This is a topics course. Course content varies. Previous topics include: Romantic Literary Theory and Literary Modernity; Configurations of Femininity in German Literature; Nietzsche and Modern Cultural Criticism; Contemporary German Fiction; German Literary Culture in Exile (1933-1945). Taught in English. Students wanting German credit will meet for additional hour per week. Current topic description: This course focuses on the development of strong international and cross-cultural trends in German literature of modernity.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Major Writing Requirement: Writing Attentive
Units: 1.0
(Spring 2018)

HART B110 Critical Approaches to Visual Representation: Identification in the Cinema

An introduction to the analysis of film through particular attention to the role of the spectator. Why do moving images compel our fascination? How exactly do film spectators relate to the people, objects, and places that appear on the screen? Wherein lies the power of images to move, attract, repel, persuade, or transform its viewers? In this course, students will be introduced to film theory through the rich and complex topic of identification. We will explore how points of view are framed in cinema, and how those viewing positions differ from those of still photography, advertising, video games, and other forms of media. Students will be encouraged to consider the role the cinematic medium plays in influencing our experience of a film: how it is not simply a film’s content, but the very form of representation that creates interactions between the spectator and the images on the screen. Film screenings include Psycho, Being John Malkovich, and others. Course is geared to freshman and those with no prior film instruction. Fulfills History of Art major 100-level course requirement, Film Studies minor Introductory course or Theory course requirement.
ITAL B214 The Myth of Venice (1800-2000)

In English. The Republic of Venice existed for over a millennium. This course begins in the year 1797 at the end of the Republic and the emerging of an extensive body of literature centered on Venice and its mythical facets. Readings will include the Romantic views of Venice (excerpts from Lord Byron, Fredrick Schiller, Wolfang von Goethe, Ugo Foscolo, Alessandro Manzoni) and the 20th century reshaping of the literary myth (readings from Thomas Mann, Filippo Tommaso Marinetti, Gabriele D’Annunzio, Henry James, and others). A journey into this fascinating tradition will shed light on how the literary and visual representation of Venice, rather than focusing on a nostalgic evocation of the death of the Republic, became a territory of exploration for literary modernity. The course is offered in English; all texts are provided in translation. One additional hour for students who want Italian credit. Suggested Preparation: Counts toward Comp Lit. Counts toward Film Studies.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

ITAL B310 Detective Fiction

In English. Why is detective fiction so popular? What explains the continuing multiplication of detective texts despite the seemingly finite number of available plots? This course will explore the worldwide fascination with this genre beginning with European writers before turning to the more distant mystery stories from around the world. The international scope of the readings will highlight how authors in different countries have developed their own national detective typologies while simultaneously responding to international influence of the British-American model. Italian majors taking this course for Italian credit will be required to meet for an additional hour with the instructor and to do the readings and writing in Italian. Prerequisite: One literature course at the 200 level or permission by the instructor. One additional hour for students who want Italian credit.

Major Writing Requirement: Writing Intensive
Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

PHIL B323 Culture and Interpretation

This course will discuss these questions. What are the aims of interpretation? Must we assume that, for cultural objects—like artworks, music, or literature—there must be a single right interpretation? If not, what is to prevent one from sliding into an interpretive anarchism? What is the role of a creator’s intentions in fixing upon admissible interpretations? Does interpretation
affect the identity of the object of interpretation? If an object of interpretation exists independently of interpretive practice, must it answer to only one right interpretation? In turn, if an object of interpretation is constituted by interpretive practice, must it answer to more than one right interpretation? This course encourages active discussions of these questions.

Major Writing Requirement: Writing Intensive
Counts towards: International Studies
Units: 1.0
(Not Offered 2017-2018)

RUSS B214 Anna Karenina and the Tasks of Literature
This course takes Lev Tolstoy’s Anna Karenina as its centerpiece and most sustained point of interest. We will begin with a few of Tolstoy’s important early works (notably, his Childhood. Boyhood. Youth.), then read Anna Karenina slowly and in detail, identifying its chief formal and thematic characteristics and thinking about the novel’s aesthetics in relation to the ethical questions it raises. These questions traverse a broad range of topics from marital infidelity and legally recognized forms of kinship to a critique of Russian imperial geopolitics and military interventions from a standpoint that prefigures Tolstoy’s late-in-life radical pacifism. Next, we will read three novels (Gustave Flaubert’s Madame Bovary, Nathaniel Hawthorne’s The Scarlet Letter, Alexander Pushkin’s Eugene Onegin) that, much as they predate Tolstoy’s masterpiece, help us bring the central preoccupations of Anna Karenina into sharper focus. We will conclude the course with Tolstoy’s late short works, a short story by Anton Chekhov, and Virginia Woolf’s Mrs. Dalloway, which we will contemplate as a reply to and a potential re-writing of Anna Karenina, since the English modernist famously declared that she had “nearly every scene of Anna Karenina branded in [her.]” All readings in English.

Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Grigoryan, B.
(Spring 2018)

RUSS B238 Topics: The History of Cinema 1895 to 1945
This is a topics course. Course content varies.
Approach: Inquiry into the Past (IP)
Major Writing Requirement: Writing Attentive
Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

SPAN B211 Borges y sus lectores
Primary emphasis on Borges and his poetics of reading; other writers are considered to illustrate the semiotics of texts, society, and traditions. Prerequisite: SPAN B110 and/or B120 (previously SPAN B200/B202); or another SPAN 200-level course.

Approach: Critical Interpretation (CI)
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

SPAN B260 Ariel/Calibán y el discurso americano
A study of the transformations of Ariel/Calibán as images of Latin American culture. Prerequisite: SPAN B110 and/or B120 (previously SPAN B200/B202); or another SPAN 200-level course.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Sacerio-Gari, E.
(Fall 2017)

SPAN B311 Crimen y detectives en la narrativa hispánica contemporánea
An analysis of the rise of the hard-boiled genre in contemporary Hispanic narrative and its contrast to classic detective fiction, as a context for understanding contemporary Spanish and Latin American culture. Discussion of pertinent theoretical implications and the social and political factors that contributed to the genre’s evolution and popularity. Prerequisite: at least one SPAN 200-level course.

Units: 1.0
(Not Offered 2017-2018)

SPAN B317 Poéticas del deseo y el poder en la lírica del Siglo de Oro
A study of the evolution of the lyric in Spain during the Renaissance and Baroque periods beginning with the oral tradition and the imitation of Petrarch. Topics include: the representation of women as objects of desire and pre-texts for writing, the political and national subtexts for lyric production, the self-fashioning and subjectivity of the lyric voice, theories of parody and imitation, and the feminine appropriation of the Petrarchan tradition. Although concentrating on the poetry of Spain, reading will include texts from Italy, France, England and Mexico. Taught in Spanish. Prerequisites: at least one 200-level course. Counts toward Latin American, Iberian, and Latina/o Studies

Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

SPAN B322 Queens, Nuns, and Other Deviants in the Early Modern Iberian World
The course examines literary, historical, and legal texts from the early modern Iberian world (Spain, Mexico, Peru) through the lens of gender studies. The course is divided among three topics: royal bodies (women in power), cloistered bodies (women in the convent), and delinquent bodies (figures who defy legal and gender normativity). Course is taught in English and is open to all juniors or seniors who have taken at least one 200-level course in a literature department. Students seeking Spanish credit must have taken BMC Spanish 110 and/or 120 and at least one other Spanish course at a 200-level, or received permission from instructor.

Counts towards: Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

SPAN B332 Novelas de las Américas
What do we gain by reading a Latin American or a US novel as “American” in the continental sense? What do we learn by comparing novels from “this” America to classics of the “other” Americas? Can we find through this Panamericanist perspective common aesthetics, interests, conflicts? In this course we will explore these questions by connecting and comparing major US novels with Latin American classics of the 20th and 21st century. We will read these works in clusters to illuminate aesthetic, political and cultural resonances and affinities. This course is
taught in Spanish. Prerequisite: at least one SPAN 200-level course.
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

SPAN B370 Literatura y delincuencia
A study of the origins, development and transformation of the
picaresque genre from its origins in 16th- and 17th-century Spain
through the 21st century. Using texts, literature, painting, and
film from Spain and Latin America, we will explore topics such
as the construction of the fictive self, the poetics and politics of
criminality, transgression in gender and class. Among the topics
to be discussed: criminalization of poverty, prostitution, and the
feminine picaresque. Prerequisite: At least one SPAN 200-level
course.
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Quintero,M.
(Fall 2017)

COMPUTER SCIENCE

Students may complete a major or minor in Computer Science or
a minor in Computational Methods.

Faculty

Douglas Blank, Associate Professor of Computer Science (on
leave semester II)
Richard Eisenberg, Assistant Professor of Computer Science
Deepak Kumar, Professor of Computer Science
Dianna Xu, Chair and Professor of Computer Science

Computer Science consists of the science of computer
algorithms (theory, analysis, design, and implementation) as
well as the design and implementation of computer systems. As
such it is an interdisciplinary field with roots in mathematics
and engineering and applications in many other academic disciplines. The department at Bryn Mawr is founded on the belief that Computer Science should transcend from being a subfield of mathematics and engineering and play a broader role in all forms of human inquiry.

The Computer Science Department is supported jointly by faculty
at both Bryn Mawr and Haverford Colleges. The department
welcomes students who wish to pursue a major in Computer Science. Additionally, the department also offers a minor in Computer Science, a concentration in Computer Science (at Haverford College) and a minor in Computational Methods (at Bryn Mawr College). The department also strives to facilitate double majors and evolving interdisciplinary majors. Students can further specialize their majors by selecting elective courses that focus on specific disciplinary tracks or pathways within the discipline.

All majors, minors and concentrations offered by the department
emphasize foundations and basic principles of information
science with the goal of providing students with skills that
transcend short-term trends in computer hardware and software.

Major in Computer Science
Students are encouraged to prepare a major course plan in consultation with their academic adviser in Computer Science. The requirements for a major in computer science are:

Three introductory courses:
• CMSC B110 (or H105): Introduction to Computing, or CMSC B113: Computer Science I, or BIOL B115: Computing through Biology
• CMSC B206 (or H106 or H107): Data Structures
• CMSC/MATH B/H231: Discrete Mathematics

Three core courses:
• Any two of
  CMSC B/H240: Principles of Computer Organization
  CMSC B/H245: Principles of Programming Languages
  CMSC B246: Systems Programming
• Any one of
  CMSC B330: Algorithms: Design & Practice
  CMSC B/H340: Analysis of Algorithms
  CMSC H345: Theory of Computation
• Six electives in Computer Science and a senior thesis.
• Additionally, all Computer Science majors must take CMSC B330 or B340, a writing intensive course, to fulfill the writing requirement.

Students can specialize in specific disciplinary tracks or pathways by carefully choosing their elective courses. Such pathways can enable specialization in areas such as: computational theory, computer systems, computer graphics, computational geometry, artificial intelligence, information visualization, computational linguistics, cognitive science, etc. Students should ensure that they have completed at least three courses in computer science by the end of their sophomore year (we highly recommend CMSC 110/113, 206 and 231).

Minor in Computer Science
Students in any major are encouraged to complete a minor in computer science. Completing a minor in computer science enables students to pursue graduate studies in computer science, in addition to their own major. The requirements for a minor in computer science at Bryn Mawr are (Haverford equivalents are not listed, please see above): CMSC 110/113 or BIOL 115, CMSC 206 and CMSC 231, any two of CMSC 240, 245, 246, 330, 340 or 345, and one elective chosen from any course in computer science, approved by the student's adviser in computer science. As mentioned above, these requirements can be combined with any major, depending on the student's interest and preparation.

Minor in Computational Methods
This minor is designed to enable students majoring in any discipline to learn computational methods and applications in their major area of study. The requirements for a minor in computational methods are (Haverford equivalents are not listed, please see above): CMSC 110/113 or BIOL 115, CMSC 206 and CMSC 231; one of CMSC 245, 246, 330, 340 or 345; any two additional computational courses depending on a student's major and interests (there are many such courses to choose from in various departments).
Students can declare a minor at the end of their sophomore year or soon after. Students should prepare a course plan and have it approved by at least two faculty advisers. Students minoring in computational methods are encouraged to propose senior projects/theses that involve the application of computational modeling in their major field of study.

COURSES

CMSC B110 Introduction to Computing

The course is an introduction to computing: how we can describe and solve problems using a computer. Students will learn how to write algorithms, manipulate data, and design programs to make computers useful tools as well as mediums of creativity. Contemporary, diverse examples of computing in a modern context will be used, with particular focus on graphics and visual media. The Processing/Java programming language will be used in lectures, class examples and weekly programming projects, where students will learn and master fundamental computer programming principals.

Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR); Scientific Investigation (SI)
Units: 1.0
Instructor(s): Eisenberg,R., Blank,D.
(Fall 2017, Spring 2018)

CMSC B113 Computer Science I

This is an introduction to the discipline of computer science, suitable for those students with a mature quantitative ability. This fast-paced course covers the basics of computer programming, with an emphasis on program design and problem decomposition. Graduates of this course will be able to write small computer programs independently; examples include data processing for a data-based science course, small games, or basic communications programs (such as a chat client). No computer programming experience is necessary or expected. Prerequisite: Must pass either the Quantitative Readiness Assessment or the Quantitative Seminar (QUAN B001)

Approach: Course does not meet an Approach; Quantitative Methods (QM); Quantitative Readiness Required (QR)
Units: 1.0
Instructor(s): Eisenberg,R.
(Fall 2017)

CMSC B115 Computing Through Biology: An Introduction

This course is an introduction to biology through computer science, or an introduction to computer science through biology. The course will examine biological systems through the use of computer science, exploring concepts and solving problems from bioinformatics, evolution, ecology, and molecular biology through the practice of writing and modifying code in the Python programming language. The course will introduce students to the subject matter and branches of computer science as an academic discipline, and the nature, development, coding, testing, documenting and analysis of the efficiency and limitations of algorithms. Additional Meeting Time: (Lab) 2 hours.

Approach: Quantitative Methods (QM); Scientific Investigation (SI)
Units: 1.0
(Not Offered 2017-2018)

CMSC B206 Introduction to Data Structures

Introduction to the fundamental algorithms and data structures using Java. Topics include: Object-Oriented programming, program design, fundamental data structures and complexity analysis. In particular, searching, sorting, the design and implementation of linked lists, stacks, queues, trees and hash maps and all corresponding complexity analysis. In addition, students will also become familiar with Java’s built-in data structures and how to use them, and acquire competency using the shell, commandline scripting and a debugger without any IDE. Required: 2 hour lab. Prerequisites: CMSC B110 or H105, or permission of instructor.

Approach: Quantitative Methods (QM); Scientific Investigation (SI)
Units: 1.0
Instructor(s): Eisenberg,R., Kumar,D.
(Fall 2017, Spring 2018)

CMSC B231 Discrete Mathematics

An introduction to discrete mathematics with strong applications to computer science. Topics include propositional logic, proof techniques, recursion, set theory, counting, probability theory and graph theory. Co-requisites: CMSC B110 or H105 or H107.

Approach: Quantitative Methods (QM)
Units: 1.0
Instructor(s): Eisenberg,R.
(Fall 2017)

CMSC B240 Principles of Computer Organization

A lecture/laboratory course studying the hierarchical design of modern digital computers. Combinatorial and sequential logic elements; construction of microprocessors; instruction sets; assembly language programming. Lectures cover the theoretical aspects of machine architecture. In the laboratory, designs discussed in lecture are constructed in software. Prerequisite: CMSC B206 or H106 and CMSC B231

Units: 1.0
Instructor(s): Blank,D.
(Fall 2017)

CMSC B245 Principles of Programming Languages

An introduction to a wide range of topics relating to programming languages with an emphasis on abstraction and design. Design issues relevant to the implementation of programming languages are discussed, including a review and in-depth treatment of mechanisms for sequence control, the run-time structure of programming languages, and programming in the large. The course has a strong lab component where students explore a variety of programming languages and concepts. Prerequisite: CMSC B206 or H106 and CMSC B231

Approach: Course does not meet an Approach
Units: 1.0
(Not Offered 2017-2018)

CMSC B246 Systems Programming

A more advanced programming course using C/C++. Topics include memory management, design and implementation of additional data structures and algorithms, including priority queues, graphs and advanced trees. In addition, students will be introduced to C++’s STL. There will be emphasis on more significant programming assignments, program design, and other fundamental software engineering principles. Makefiles,
interactive debugging, version control, and command-line shell interaction round out the technical skills developed in this course. Prerequisites: CMSC B206 or H106 or H107, and MATH/CMSC 231.

Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): Kumar,D.
(Spring 2018)

CMSC B310 Computational Geometry
A study of algorithms and mathematical theories that focus on solving geometric problems in computing, which arise naturally from a variety of disciplines such as Computer Graphics, Computer Aided Geometric Design, Computer Vision, Robotics and Visualization. The materials covered sit at the intersection of pure Mathematics and application-driven Computer Science and efforts will be made to accommodate Math majors and Computer Science majors of varying math/computational backgrounds. Topics include: graph theory, triangulation, convex hulls, geometric structures such as Voronoi diagrams and Delaunay triangulations, as well as curves and polyhedra surface topology. Prerequisite: CMSC B231/ MATH B231.

Approach: Quantitative Readiness Required (QR)
Units: 1.0
(Not Offered 2017-2018)

CMSC B312 Computer Graphics
An introduction to the fundamental principles of computer graphics: including 3D modeling, rendering, and animation. Topics cover: 2D and 3D transformations; rendering techniques; geometric algorithms; 3D object models (surface and volume); visible surface algorithms; shading and mapping; ray tracing; and select others. Prerequisites: CMSC/MATH B231, CMSC B246 and MATH B203 or H215, or permission of instructor.

Units: 1.0
(Not Offered 2017-2018)

CMSC B330 Algorithms: Design and Practice
This course examines the applications of algorithms to the accomplishments of various programming tasks. The focus will be on understanding of problem-solving methods, along with the construction of algorithms, rather than emphasizing formal proving methodologies. Topics include divide and conquer, approximations for NP-Complete problems, data mining and parallel algorithms. Prerequisites: CMSC B206 or H106 and B231.

Major Writing Requirement: Writing Intensive
Units: 1.0
Instructor(s): Kumar,D.
(Spring 2018)

CMSC B340 Analysis of Algorithms
This course will cover qualitative and quantitative analysis of algorithms and their corresponding data structures from a precise mathematical point of view. Topics include: performance bounds, asymptotic and probabilistic analysis, worst case and average case behavior and correctness and complexity. Particular classes of algorithms will be studied in detail.
Prerequisite: CMSC B206 or H106 or H107, and B231 or H231 or permission from instructor.
Approach: Quantitative Readiness Required (QR)
Major Writing Requirement: Writing Intensive
Units: 1.0
Instructor(s): Xu,D.
(Fall 2017)

CMSC B355 Operating Systems
A practical introduction to modern operating systems, using case studies from UNIX, MSDOS and the Macintosh. Topics include computer and OS structures, process and thread management, process synchronization and communication, resource allocations, memory management, file systems, and select examples in protection and security. Prerequisite: CMSC B246 or permission of instructor.
Units: 1.0
Instructor(s): Xu,D.
(Spring 2018)

CMSC B371 Cognitive Science
Cognitive science is the interdisciplinary study of intelligence in mechanical and organic systems. In this introductory course, we examine many topics from computer science, linguistics, neuroscience, mathematics, philosophy, and psychology. Can a computer be intelligent? How do neurons give rise to thinking? What is consciousness? These are some of the questions we will examine. No prior knowledge or experience with any of the subfields is assumed or necessary. Prerequisite: CMSC B206 or H106 and CMSC B231 or permission of instructor.

Counts towards: Neuroscience
Units: 1.0
(Not Offered 2017-2018)

CMSC B372 Artificial Intelligence
Survey of Artificial Intelligence (AI), the study of how to program computers to behave in ways normally attributed to "intelligence" when observed in humans. Topics include heuristic versus algorithmic programming; cognitive simulation versus machine intelligence; problem-solving; inference; natural language understanding; scene analysis; learning; decision-making. Topics are illustrated by programs from literature, programming projects in appropriate languages and building small robots. Prerequisites: CMSC B206 or H106 and CMSC B231.

Counts towards: Neuroscience
Units: 1.0
Instructor(s): Kumar,D.
(Fall 2017)

CMSC B380 Recent Advances in Computer Science
Simplify your language and free your mind. This course will cover an alternative style of programming: typed functional programming. Typed functional programming languages are quickly gaining currency in industry, including at Google, Facebook, a variety of financial services companies, and across a range of startups. They are particularly good at maintaining security guarantees and for writing concurrent programs. This course will explore the ease and wonder of typed functional programming through one such language: Haskell. We will cover higher-order functions, purity, generalized algebraic datatypes, type inference, laziness, monads, and more. Once you have used these techniques, programming will never feel the same again. Prerequisites: CMSC B206 or H106 or H107, and MATH/CMSC 231.
Units: 1.0
(Not Offered 2017-2018)
CMSC B399 Senior Conference
An independent project in computer science culminating in a written report/thesis and oral presentation. Class discussions of work in progress and oral and written presentations of research results will be emphasized. Required for all computer science majors in the spring semester of their senior year.
Prerequisite: BM undergraduate Computer Science major.
Units: 1.0
Instructor(s): Xu,D.
(Spring 2018)

CMSC B403 Supervised Work/Independent Study
Units: 1.0
(Fall 2017)

BIOL B115 Computing Through Biology: An Introduction
This course is an introduction to biology through computer science, or an introduction to computer science through biology. The course will examine biological systems through the use of computer science, exploring concepts and solving problems from bioinformatics, evolution, ecology, and molecular biology through the practice of writing and modifying code in the Python programming language. The course will introduce students to the subject matter and branches of computer science as an academic discipline, and the nature, development, coding, testing, documenting and analysis of the efficiency and limitations of algorithms. Additional Meeting Time: (Lab) 2 hours.
Approach: Quantitative Methods (QM); Scientific Investigation (SI)
Units: 1.0
Instructor(s): Shapiro,J.
(Spring 2018)

EAST ASIAN LANGUAGES AND CULTURES
Students may complete a major in East Asian Languages and Cultures, a minor in Chinese language or Japanese language, or a (non-language) minor in East Asian Languages and Cultures.

Faculty
Tz’u Chiang, Senior Lecturer in East Asian Studies
Rebecca Shuang Fu, Visiting Assistant Professor
Yonglin Jiang, Co-Chair and Associate Professor of East Asian Studies
Shiamin Kwa, Assistant Professor of East Asian Studies
Ying Liu, Lecturer
Changchun Zhang, Instructor of Chinese

The East Asian Languages and Culture Studies welcomes students who wish to combine their interests in East Asian languages with the study of an East Asian culture. These students are urged to consult the Co-Chair of East Asian Languages and Culture Studies on either campus, who will advise them on creating individual plans of study in appropriate departments.

Students of East Asia are inspired by an infinite number of formative encounters, be it with the elegance of a Japanese classic novel like the Tale of Genji or the controlled mayhem of a sumo match; the brashness of a K-pop tune or the intensity of a Korean tv drama; or the succulence of a Chinese landscape painting. Whatever it is that first attracts us, once hooked we are drawn into a world of singular cultural richness and historical depth, represented in a variety of languages all unified by the common use of that extraordinary means of communication, the Chinese script. And the deeper in we are drawn, the better we understand how closely the present ‘Rise of East Asia’ – a resurgence that is inexorably moving the demographic, economic, and even political center of gravity back from West to East – is inextricably bound up with the region’s history, culture, and languages. It is those three spheres – history, culture, and language – that we in the Bi-College Department of East Asian Languages and Cultures put at the forefront of our academic mission. Our goal is to couple rigorous language training to the study of East Asian, particularly Chinese and Japanese, culture and society. In addition to our intensive programs in Chinese and Japanese languages, departmental faculty offer courses in East Asian literature, religion, film, art and visual culture, and history. The intellectual orientation of the Department of East Asian Languages and Cultures is centered on primary textural and visual sources; that is, we focus on East Asia’s rich cultural traditions as a way to understand its present, through the study of a wide range of literary and historical texts (in translation and in the original), images, film, and scholarly books and articles. But we also provide a focal point, through the Asian Studies Minor, for students to approach Asia writ large through a variety of disciplines. Although the faculty of our Bi-College department is divided between Bryn Mawr and Haverford, the EALC program is fully integrated: we work as one to provide a complementary curriculum and careful and collaborative student guidance.

Learning Goals
EALC has four learning goals:
• Laying the foundations for proficiency in Japanese or Chinese language and culture.
• Gaining broad knowledge of the East Asian cultural sphere across time and in its global context.
• Becoming familiar with basic bibliographic skills and protocols and learning how to identify, evaluate, and interpret primary textual and visual sources.
• Embarking on and completing a major independent research project that pulls together past coursework and demonstrates mastery of a particular aspect of East Asian culture.

Curriculum
Chinese Program
The Bi-Co Chinese Program offers five years of instruction in Mandarin Chinese.
• First-year Chinese (CNSE 001-002) and Second-year Chinese (CNSE 003–004) both have master and drill sections.
• First-year Chinese (CNSE 001–002) is a year-long course. Students must complete both semesters to receive credit.
• We offer Advanced Chinese each semester with a different topic; students can take this as Fourth- or Fifth-year Chinese, with one credit per semester, and repeat the course as long as the topics differ.
Japanese Program

The Bi-Co Japanese Program offers five years of instruction in modern Japanese.

- First-year Japanese (JNSE 001–002) and Second-year Japanese (JNSE 003–004), taught at Haverford, both meet six hours per week, including drill sections.
- Advanced Japanese takes a different topic each term; students can take it any term as Fourth- or Fifth-year Japanese, with one credit per semester, and repeat the course with different topic headings.
- The first-year and second-year courses in Japanese (JNSE 001–002 and 003–004, respectively) meet five days a week.
- For the first-year courses, students must complete both semesters in order to obtain credit, whereas students earn credit for each semester for the second-year courses and above.

Major Requirements

I. Language requirement (2 credits)

We require EALC majors to take two semesters of either Chinese or Japanese, at a level appropriate to their in-coming language abilities. Native speakers of either Chinese or Japanese may forego the two semesters of an East Asian language (they will still have to fulfill their College language requirement), but must substitute two additional East Asian culture courses. The University of Pennsylvania offers Korean language instruction, but it does not count towards the Bi-Co EALC major language requirement.

II. Three core courses (3 credits)

EALC majors must take THREE core courses from the following:

- One 100-level course on China from among 110 (Introduction to Chinese Literature), 120 (Confucianizing China), or 131 (Chinese Civilization); and
- One 100-level course on Japan: either 111 (Myth, Folklore, and Legend in Japan) or 132 (Japanese Civilization); and
- EALC 200 (Methods and Approaches to East Asian Cultures).
- EALC 200 is required of all EALC majors and is recommended for Asian Studies minors. We urge majors to take 200 in the spring of their JUNIOR year. Majors who plan to be abroad in spring term junior year must take EALC 200 spring term sophomore year.
- EALC 200 is the designated departmental Writing Intensive course (30 pages of writing), which Bryn Mawr now requires of all departments.

Students must earn a grade of 2.0 or higher in each of these courses to continue in the major and be eligible to write a senior thesis.

III. Three departmental elective courses (3 credits)

Majors must take THREE additional non-language courses offered by members of the Bi-Co EALC Department.

- One of these courses must be at the 300-level;
- One of the 200-level electives may be fulfilled with an advanced topics course in Chinese or Japanese.

Majors cannot satisfy the departmental electives with courses outside the department, or by taking courses abroad.

IV. Two non-departmental courses related to global Asia (2 credits)

Majors must choose two non-Departmental electives at the 200 or 300 level that are related to their study of East Asia or the wider Asian world. These two courses may be in a department or program in the Quaker Consortium (Tri-Co plus Penn), or an approved study abroad program.

V. The Senior Thesis (1 credit)

In the capstone experience undertaken in the Fall term of the senior year, students employ their skills and undertake a scholarly investigation. The aim is to create and execute an extended research project centered on a primary written or visual “text” in Chinese or Japanese. The senior thesis brings together threads of conversations among scholars on the student’s chosen topic. The student combines language and research skills to think about and interpret the meanings of sources in context. At the end of the term, seniors present their findings to the faculty and other students in final oral presentations.

Minor Requirements

The EALC Department certifies three minors: Chinese language, Japanese language, and Asian Studies.

- The Chinese language and Japanese language minors both require six language courses. Students must take at least four language courses in our Bi-Co programs, and can take at most two at the Quaker Consortium or our approved off-campus domestic or Study Abroad programs. (Please consult the language program directors for details.). Students must maintain a 3.0 or above for each of the six language courses for the minor.
- The EALC Department hosts an interdisciplinary Asian Studies minor for students who are majoring in other fields but are interested in consolidating their study of Asia or its diasporas from a variety of perspectives. The minor requires six courses centrally concerned with Asia, at least one of which is at the 300 level. They may be drawn from any department in the Quaker Consortium. Each Spring there will be a convocation of graduating Asian Studies minors, each of whom will be expected to give a short presentation based on an Asia-related paper produced in the course of their studies. Those interested in minoring in Asian Studies should consult with the convener (currently Professor Smith at Haverford) no later than the Fall of their senior year.

Senior Project

Students majoring in EALC are required to take EALC 200 (Methods and Approaches to the Study of East Asia), ideally in the spring term of their junior year. This course serves to familiarize majors with our expectations regarding research and writing and criteria for evaluation. Students use the skills acquired in this course in the framing of their senior thesis.

A main emphasis of this proseminar is the use of secondary
sources to explicate and interpret primary sources, that is, engagement with existing scholarship on a text or artifact to put forward new ideas. Most students should emerge from the seminar in their junior year with a good idea of the sort of topic they will pursue for the senior thesis essay. The main purpose of the thesis is to use a body of secondary literature to situate, analyze, and interpret a primary source or set of primary sources.

The senior thesis is a one-term process that takes place in the fall semester. In EALC 398 (Thesis Seminar), students work closely with an adviser to establish a topic, perform bibliographic research, and write an essay of 30 to 40 pages. Students also present their work in a formal 20-minute talk at the close of the semester. While most majors will have settled on a topic and begun to do some research over the summer, all must commit to a topic approved by their adviser by the second week of the fall term. The order of required work leading up to the final submission of the thesis incremental and builds on itself. The weekly schedule for senior thesis work is available on the departmental website.

You will settle on a topic by the end of the second week and will submit various exercises such as a work schedule, a close reading of a piece of the primary source, annotated bibliography, literature survey, and so on.

We meet four times as a group over the course of the semester. Most of the term consists of individually scheduled meetings with the primary adviser. As explained below, the project and research are independent, but these nearly weekly meetings with the thesis adviser are absolutely essential. The seminar culminates in a public presentation of the student’s project; two bound copies and one electronic copy in PDF format are due at the end of the term. Careful planning and conscientious work during this semester are absolutely essential. A project of this scope requires independence, discipline, and steady, consistent effort. The incremental assignments outlined in the weekly schedule for senior thesis are designed to help enforce that discipline, but the student is ultimately responsible for the success of the final thesis.

Senior Project Learning Goals
You will learn how to: frame, research, and write a worthwhile research project centered on a primary source and using an array of secondary sources. This involves surveying literature in the field, discerning an interesting topic, and presenting findings or results in writing and in a brief formal talk.

Four Goals of the EALC Senior Experience:

- Independence
  You will devise your own thesis topic and are responsible for researching it. You will receive guidance from your adviser, from the department members leading your seminar, and from librarians. You will construct your own customized bibliographies appropriate to your topic. The research and writing process, while overseen by faculty, is clearly one that is largely independent in nature.

- Connection to the Field
  This thesis is your way of joining the scholarly conversation about the text you have chosen. This means reviewing secondary literature in the relevant subfields and engaging it critically. (Examples of these subfields might be areas of such scope as, for instance, “the history of the family in Song China” or “avant-garde art circles in 1960’s Tokyo.”)

- Creative use of knowledge and skills acquired in the major
  You will draw on your previous study of East Asian languages and your coursework in specific areas to choose your topic and research and write your thesis. In part two above, we urge you to join a scholarly conversation, here we ask you to make explicit what you have been able to contribute to that conversation. These contributions often involve the reevaluation of earlier scholarship or the application of the existing theoretical insights of others to new source materials. Your contribution might also include the translation of significant portions of your primary source.

- Sharing the work
  Seniors are required to orally present their work to their fellows and to the department in a panel format based on the academic conference model. In these public presentations, you will take twenty minutes to introduce your topic, your methodological approach, selected aspects of your bibliography, and some of the particulars of your analysis of the text at hand. Each presentation will be very different from the next as it is uniquely your own. You are required to devise a slideshow with text and images to accompany your oral presentation. It is here that we are able to encourage and assess your ability to communicate the substance of your work to peers and mentors in a clear, concise, and engaging fashion. You will prepare both bound and electronic copies of your final draft and may choose to make the work available on the web.

Senior Project Assessment
If all of the incremental tasks in the thesis project are done satisfactorily and submitted on time, the student should expect to reach a baseline grade of 3.0. Assuming that all assignments are successfully completed, thesis grades 3.3 and above will be awarded based on merit, with 3.7 being excellent and 4.0 being outstanding. The incremental assignments are there to guide students through the process of researching and writing a long, complex essay, and not to guarantee that students get an “A.” The grade for the semester will therefore be assessed both for the quality of final thesis and for the student’s ability to meet the deadlines, submitting satisfactory work along the way. Please note that successful completion of all incremental assignments is a minimum requirement for passing the class.

The thesis is the student’s chance to demonstrate the skills acquired in four years of college. We expect to see an original contribution to the discussion of a topic, not a mere reiteration of the opinions and findings of others. Students are expected to demonstrate that they have joined the scholarly conversation on a topic. Among other qualities, we are looking for five basic elements in evaluating the theses:

- Ability to present an articulate and original argument.
- Accuracy in the use of scholarly conventions of citation and documentation.
- Clear and effective writing.
- The critical use of sources.
- Consultation of scholarship in Japanese or Chinese.

In order to assess the student’s performance in the senior thesis project, the three or four faculty members involved in the seminar gather in late December to discuss three aspects of the students’ work: 1) the quality of the thesis as a finished product (this is the foremost criterion for evaluation); 2) the ability of the student throughout the term to submit satisfactory work in a timely fashion while incorporating feedback from the faculty adviser and peer readers; 3) the content and performance of the final
oral presentation. The faculty members typically spend between 30 to 40 minutes on each student in these conversations, so it is often extended into two meetings. During the conversations, the faculty members focus on details of the student's thesis, including but not limited to: clarity of argument, quality of writing, accuracy of citation style, skill in use of secondary sources. (See supplemental materials for a fuller description.)

Requirements for honors
The departmental faculty awards honors on the basis of superior performance in two areas: coursework in major-related courses (including language classes), and the senior thesis. The faculty requires a minimum 3.7 average in major-related coursework to consider a student for honors.

Study Abroad
The EALC Department strongly recommends that majors study abroad to maximize their language proficiency and cultural familiarity. We require formal approval by the study abroad adviser prior to the student’s travel. Without this approval, credit for courses taken abroad may not be accepted by EALC. If study abroad is not practical, students may consider attending certain intensive summer schools that EALC has approved. Students must work out these plans in concert with the department’s study abroad adviser and the student's dean.

Language Placement Tests
The two language programs conduct placement tests for first-time students at all levels in the week before classes start in the fall semester.

- To qualify for third-year language courses, students need to finish second-year courses with a score of 3.0 or above in all four areas of training: listening, speaking, reading, and writing.
- In the event that students do not meet the minimum grade at the conclusion of second-year language study, they must consult with the director of the respective language program and work out a summer study plan that may include taking summer courses or studying on their own under supervision.
- Students must take a placement test before starting third-year language study in the fall.

COURSES

EALC B110 Intro to Chinese Literature (in English)
Students will study a wide range of texts from the beginnings through the Qing dynasty. The course focuses on the genres of poetry, prose, fiction and drama, and considers how both the forms and their content overlap and interact. Taught in English.
Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Fu,R.
(Fall 2017)

EALC B131 Chinese Civilization
A broad chronological survey of Chinese culture and society from the Bronze Age to the 1800s, with special reference to such topics as belief, family, language, the arts and sociopolitical organization. Readings include primary sources in English translation and secondary studies.

EALC B240 Topics in Chinese Film
This is a topics course. Course content varies.
Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies; Film Studies
Units: 1.0
Instructor(s): Kwa,S.
(Spring 2018)

EALC B255 Understanding Comics: Introduction to Reading the Graphic Novel
The graphic narrative form has proliferated at a breathtaking rate in the last several decades. Called “comics,” “graphic novels,” and many other terms in between, these word-image hybrids have been embraced by both popular and critical audiences. But what is a graphic novel? How do we conceive of these texts and, more importantly, how do we read, interpret and write about them? This course is focused on approaches to reading the graphic novel, with a focus on a subgenre called the “literary comic.” Our first approach is to consider different kinds of primary source texts and ask if and how they fulfill our understanding of the graphic narrative. This consideration will include various test cases, from wordless comics, to texts used as images, to the many varieties of word-image hybrids that are called comic books. Our second approach is to examine different scholarly approaches to analyzing graphic narratives, based on different disciplines such as memoir studies, trauma studies, visual and material culture, history, semiotics, and, especially, narratology. Primary source readings include texts by Ware, Barry, Clowes, and Burns. Secondary readings include Hirsch, McCloud, Barthes, Iser, and Groensteen. Three short assignments due during the semester, and a final project due at the end of exam period (see description below). Students will also rotate responsibilities for starting discussions with small presentations aimed at discussing readings in depth. Students taking this course for their major in EALC or COML should meet with the instructor to discuss specific requirements.
Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Attentive
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Kwa,S.
(Spring 2018)

EALC B264 Human Rights in China
This course will examine China’s human rights issues from a historical perspective. The topics include diverse perspectives on human rights, historical background, civil rights, religious practice, justice system, education, as well as the problems concerning some social groups such as migrant laborers, women, ethnic minorities and peasants.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Jiang,Y.
(Fall 2017)
EALC B355 Animals, Vegetables, Minerals in East Asian Literature

This semester, we will explore how artists question, explore, and critique the relationships between humans and the environment. Through a topics-focused course, students will examine the ways that narratives about environment have shaped the way that humans have defined themselves. We will be reading novels and short stories and viewing films that contest conventional binaries of man and animal, civilization and nature, tradition and technology, and even truth and fiction. “Animals, Vegetables, Minerals” does not follow chronological or geographical frameworks, but chooses texts that engage the three categories enumerated as the major themes of our course. We will read and discuss animal theory, theories of place and landscape, and theories of modernization or mechanization; and there will be frequent (and intentional) overlap between these categories. We will also be watching films that extend our theoretical questions of these themes beyond national, linguistic, and generic borders. You are expected to view this course as a collaborative process in which you share responsibility for leading discussion. There are no prerequisites or language expectations, but students should have some basic knowledge of East Asian, especially Sinophone, history and culture, or be willing to do some additional reading (suggested by the instructor) to achieve an adequate contextual background for exploring these texts.

Major Writing Requirement: Writing Attentive Counts towards: Environmental Studies Units: 1.0 Instructor(s): Kwa,S. (Fall 2017)

EALC B398 Senior Seminar

A research workshop culminating in the writing and presentation of a senior thesis. Required of all majors; open to concentrators and others by permission.

Units: 1.0 Instructor(s): Kwa,S. (Fall 2017)

Chinese Language

The Bi-Co Chinese Program offers five years of instruction in Mandarin Chinese. In addition to First-Year, Second-Year, and Third-Year Chinese, we offer Advanced Chinese, which is a two-year, four-course series, covering topics such as food, music, and language in Chinese culture, as well as other contemporary topics. This curricular design maximizes our teaching resources to meet the needs of our students who, in increasing numbers, either arrive at college with multiple years of Chinese in secondary schools or who have accelerated their Chinese training by studying abroad in their junior year. We also offer a year-long course for those who have facility in speaking Chinese, but have had no or limited training in reading and writing (CNSE007-008). Upon completing CNSE007-008, this group of students will continue their training in Second-Year Chinese.

The faculty in our program are seasoned and hard-working professionals dedicated to providing rigorous training in all four areas of Chinese language studies--speaking, listening, reading, and writing, in a caring and individually tailored environment. (Both First-Year and Second-Year Chinese have mandatory weekly one-on-one sessions between students and their teachers.) We take pride in our students, as our students take pride in their achievements. One indication of their level of proficiency is that we have trained true beginners (students with no prior training or knowledge of Chinese when they enter our program) who, in their senior year, can serve as peer tutors to our lower level students in various aspects of Chinese learning.

The Bi-Co Chinese program is nested within the Bi-Co East Asian Languages and Cultures Department. We serve EALC majors, Chinese minors, and any student who wishes to study the Chinese language. The Chinese minor is robust with many students coming from other departments, such as Economics, History, Linguistics, Anthropology, Growth and Structure of Cities, Psychology, Sociology, and other majors. We have students from the Natural Science departments in our classes and we would like to welcome more such students into our Minor.

Chinese Minor

Students who major in any discipline may minor in Chinese. A Chinese minor must do the following:

- Take six semesters of Chinese language courses in our program.
- Receive a minimum grade of 3.0 for each course.
- Attain the minimum proficiency level of Third-Year Chinese upon completion.

Language credits from the approved Study-Abroad programs such as CET are acceptable if prior approval by the director of the Chinese program is obtained. Students who have prior knowledge of the language and are placed into Second-Year or higher level Chinese courses when they enter college still have enough courses to take to complete the minor requirement, since our Advanced Chinese series can be repeated for credits as topics vary from semester to semester.

Study Abroad

Our approved Study Abroad program is CET, which has a language program in four cities in China: Beijing, which also has a Chinese Studies program, Harbin, Shanghai, and Kunming. CET is well-known for its language pledge and its rigorous implementation of this requirement. Our students have a strong reputation at CET for honoring their language pledge and therefore benefiting enormously from this practice.

Other highly regarded and rigorous study abroad programs in other Chinese speaking regions might be considered but prior approval by the director of the program is required.

COURSES

ANTH B238 Chinese Culture and Society

This course encourages students to think critically about major developments in Chinese culture and society that have occurred during the twentieth and twenty-first centuries, with an emphasis on understanding both cultural change and continuity in China. Drawing on ethnographic material and case studies from rural and urban China over the traditional, revolutionary, and reform periods, this course examines a variety of topics including family and kinship; marriage, reproduction, and death; popular religion; women and gender; the Cultural Revolution; social and economic reforms and development; gift exchange and guanxi networks; changing perceptions of space and place; as well as globalization and modernity. Prerequisite: Sophomore standing or higher.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies; International Studies
Units: 1.0
(Not Offered 2017-2018)

CNSE B007 First-Year Chinese Non-Intensive
This course is designed for students who have some facility in
listening, speaking, reading and writing Chinese but have not yet
achieved sufficient proficiency to take Second Year Chinese. It is
a year-long course that covers the same lessons as the intensive
First Year Chinese, but the class meets only three hours a week.
Students must place into Chinese B007 through the Chinese
Language Placement exam.
Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): Liu,Y.
(Fall 2017)

CNSE B008 First Year Chinese (Non-intensive)
This course is designed for students who have some facility in
listening, speaking, reading and writing Chinese but have not yet
achieved sufficient proficiency to take Second Year Chinese. It is
a year-long course that covers the same lessons as the intensive
First Year Chinese, but the class meets only three hours a week.
Prerequisite: CNSE B007
Approach: Course does not meet an Approach
Units: 1.0
(Not Offered 2017-2018)

EALC B110 Intro to Chinese Literature (in English)
Students will study a wide range of texts from the beginnings
through the Qing dynasty. The course focuses on the genres
of poetry, prose, fiction and drama, and considers how both the
forms and their content overlap and interact. Taught in English.
Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Fu,R.
(Fall 2017)

EALC B131 Chinese Civilization
A broad chronological survey of Chinese culture and society
from the Bronze Age to the 1800s, with special reference to
such topics as belief, family, language, the arts and sociopolitical
organization. Readings include primary sources in English
translation and secondary studies.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Jiang,Y.
(Spring 2018)

EALC B212 Topics: Introduction to Chinese Literature
This is a topics course. Topics may vary.
Approach: Cross-Cultural Analysis (CC); Critical Interpretation
Units: 1.0
(Not Offered 2017-2018)

EALC B225 Topics in Modern Chinese Literature
This a topics course. This course explores modern China from
the early 20th century to the present through its literature, art
and films, reading them as commentaries of their own time. Topics
vary.
Approach: Cross-Cultural Analysis (CC); Critical Interpretation
Units: 1.0
(Not Offered 2017-2018)

EALC B240 Topics in Chinese Film
This is a topics course. Course content varies.
Approach: Cross-Cultural Analysis (CC); Critical Interpretation

EALC B260 The History and Rhetoric of Buddhist
Meditation
While Buddhist meditation is often seen as a neutral technology,
free of ties to any one spiritual path or worldview, we will examine
the practice through the cosmological and soteriological contexts
that gave rise to it. This course examines a great variety of
discourses surrounding meditation in traditional Buddhist texts.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

EALC B264 Human Rights in China
This course will examine China’s human rights issues from a
historical perspective. The topics include diverse perspectives
on human rights, historical background, civil rights, religious
practice, justice system, education, as well as the problems concerning some social groups such as migrant laborers, women, ethnic minorities and peasants.

EALC B270 Topics in Chinese History
This is a topics course, course content varies.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

EALC B281 Food in Translation: Theory and Practice
This semester we will explore the connections between what we eat and how we define ourselves in the context of global culture. We will proceed from the assumption that food is an object of culture, and that our contemplation of its transformations and translations in production, preparation, consumption, and distribution will inform our notions of personal and group identity. This course takes Chinese food as a case study, and examines the way that Chinese food moves from its host country to diasporic communities all over the world, using theories of translation as our theoretical and empirical foundation. From analyzing menu and ingredient translations to producing a short film based on interviews, we will consider the relationship between food and communication in a multilingual and multicultural world. Readings include theoretical texts on translation (Apter), recipe books and menus, Chinese and Chinese-American literature (Classic of Poetry, Mo Yan, Hong Kingston). Films include Ian Cheney’s “Searching for General Tso,” Wayne Wang’s “Soul of a Banquet” and “Eat a Bowl of Tea,” Ang Li’s “Eat Drink Man Woman,” and Wong Karwal’s “In the Mood for Love.”
Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

EALC B322 Topics: Considering the Dream of Red Chambers
The Dream of Red Chambers (Hongloumeng) is arguably the most important novel in Chinese literary history. The novel tells the story of the waxing and waning of fortunes of the Jia family and their networks of family and social relations, and in its finely articulated details also serves as a chronicle of the Qing dynasty, an examination of visual culture, environment, kinship, sociology, economics, religious and cultural beliefs, and the structures of domestic life. In addition to addressing these aspects that we might categorize as external, the novel also turns inwards and examines the human heart and mind. How can we know another? How do we define ourselves? These questions, and many others, have occupied scholars for the last two centuries. We will spend the semester reading all five volumes of the David Hawkes translation, with secondary readings assigned to guide the discussion based on the semester’s theme. Course topics vary.
Units: 1.0
(Not Offered 2017-2018)

EALC B325 Topics in Chinese History and Culture
This is a topics course. Course content varies.
Units: 1.0
(Not Offered 2017-2018)

EALC B345 Topics in East Asian Culture
This is a topics course. Course contents vary.
Units: 1.0
(Not Offered 2017-2018)

EALC B352 China’s Environment
This seminar explores China’s environmental issues from a historical perspective. It begins by considering a range of analytical approaches, and then explores three general periods in China’s environmental changes, imperial times, Mao’s socialist experiments during the first thirty years of the People’s Republic, and the post-Mao reforms. Prerequisite: Sophomore standing.
Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)

EALC B353 The Environment on China’s Frontiers
This seminar explores environmental issues on China’s frontiers from a historical perspective. It focuses on the particular relationship between the environment and the frontier, examining how these two variables have interacted. The course will deal with the issues such as the relationship between the environment and human ethnic and cultural traditions, social movements, economic growth, political and legal institutions and practices, and changing perceptions. The frontier regions under discussion include Tibet, Xinjiang, Inner Mongolia, and the southwestern ethnic areas, which are all important in defining what China is and who the Chinese are.
Units: 1.0
(Not Offered 2017-2018)

EALC B355 Animals, Vegetables, Minerals in East Asian Literature
This semester, we will explore how artists question, explore, celebrate, and critique the relationships between humans and the environment. Through a topics-focused course, students will examine the ways that narratives about environment have shaped the way that humans have defined themselves. We will be reading novels and short stories and viewing films that contest conventional binaries of man and animal, civilization and nature, tradition and technology, and even truth and fiction. “Animals, Vegetables, Minerals” does not follow chronological or geographical frameworks, but chooses texts that engage the three categories enumerated as the major themes of our course. We will read and discuss animal theory, theories of place and landscape, and theories of modernization or mechanization; and there will be frequent (and intentional) overlap between these categories. We will also be watching films that extend our theoretical questions of theses themes beyond national, linguistic, and generic borders. GERM B321 Advanced Topics in German Cultural Studies

This is a topics course. Course content varies. Current topic description: This film course of transnational scope focuses specifically on cultural encounters between the West and the East in the 20th and 21st centuries. It uses visual material related to East Asia produced mainly by German filmmakers. Using film as the main medium, the course touches on issues that are at the center of contemporary cultural debates, such as orientalism, race, gender, class, and identity, as well as postcolonialism, nationalism, travel, exile, multiculturalism, and globalization.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: East Asian Languages and Cultures
Units: 1.0
Instructor(s): Shen,Q.
(Fall 2017)

(Fall 2017)

CHINESE

COURSES

CNSE B001 Intensive First-Year Chinese

An intensive introductory course in modern spoken and written Chinese. The development of oral-aural skills is integrated through grammar explanations and drill sessions designed to reinforce new material through active practice. Six hours a week of lecture and oral practice plus one-on-one sessions with the instructor. This is a year-long course; both semesters are required for credit. Requires attendance at class and drills.

Approach: Course does not meet an Approach
Units: 1.5
(Fall 2017)

CNSE B002 Intensive First-Year Chinese

An intensive introductory course in modern spoken and written Chinese. The development of oral-aural skills is integrated through grammar explanations and drill sessions designed to reinforce new material through active practice. Six hours a week of lecture and oral practice plus one-on-one sessions with the instructor. This is a year-long course; both semesters are required for credit. Attendance required at class and drills.

Approach: Course does not meet an Approach
Units: 1.5
Instructor(s): Chiang,T.
(Spring 2018)

CNSE B003 Second-Year Chinese

Second-year Chinese aims for further development of language skills in speaking, listening, reading, and writing. Five hours of class plus individual conference. This is a year-long course; both semesters (CNSE 003 and 004) are required for credit. Prerequisite: First-year Chinese or a passing score on the Placement Exam. Requires attendance at class and drills.

Approach: Course does not meet an Approach
Instructor(s): Chiang, T.
Units: 1.0
(Not Offered 2017-2018)

CNSE B004 Second-Year Chinese
Second-year Chinese aims for further development of language skills in speaking, listening, reading, and writing. Five hours of class plus individual conference. This is a year-long course; both semesters (CNSE 003 and 004) are required for credit. Prerequisite: First-year Chinese or a passing score on the Placement Exam. Attendance required at class and drills.

Approach: Course does not meet an Approach
Units: 1.0
(Not Offered 2017-2018)

CNSE B007 First-Year Chinese Non-Intensive
This course is designed for students who have some facility in listening, speaking, reading and writing Chinese but have not yet achieved sufficient proficiency to take Second Year Chinese. It is a year-long course that covers the same lessons as the intensive First Year Chinese, but the class meets only three hours a week. Students must place into Chinese B007 through the Chinese Language Placement exam.

Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): Liu, Y.
(Fall 2017)

CNSE B008 First Year Chinese (Non-intensive)
This course is designed for students who have some facility in listening, speaking, reading and writing Chinese but have not yet achieved sufficient proficiency to take Second Year Chinese. It is a year-long course that covers the same lessons as the intensive First Year Chinese, but the class meets only three hours a week. Prerequisite: CNSE B007.

Approach: Course does not meet an Approach
Units: 1.0
(Not Offered 2017-2018)

CNSE B101 Third-Year Chinese: Readings in the Modern Chinese Short Story and Theater
A focus on overall language skills through reading and discussion of modern short stories, as well as on students’ facility in written and oral expression through readings in modern drama and screenplays. Readings include representative works from the May Fourth Period (1919-27) to the present. Audio- and videotapes of drama and films are used as study aids. Prerequisite: Second-Year Chinese or consent of instructor.

Units: 1.0
Instructor(s): Chiang, T.
(Fall 2017)

CNSE B102 Third-Year Chinese: Readings in the Modern Chinese Short Story and Theater
A focus on overall language skills through reading and discussion of modern short stories, as well as on students’ facility in written and oral expression through readings in modern drama and screenplays. Readings include representative works from the May Fourth Period (1919-27) to the present. Audio- and videotapes of drama and films are used as study aids. Prerequisite: Second-Year Chinese or consent of instructor.

(Offered at Haverford)
Units: 1.0
Instructor(s): Chiang, T.
(Spring 2018)

JAPANESE
The East Asian Studies Program welcomes students who wish to combine their interests in East Asian languages with the study of an East Asian culture. These students are urged to consult the Co-Chair of East Asian studies on either campus, who will advise them on creating individual plans of study in appropriate departments.

The Japanese Language Program offers a full undergraduate curriculum of courses in Modern Japanese. Students who will combine language study with focused work on East Asian society and culture may wish to consider the major in East Asian Studies. Information about specific study abroad opportunities can be obtained from the director.

College Foreign Language Requirement
The College’s foreign language requirement may be satisfied by completing JNSE 003 and 004 with an average grade of at least 2.0 or with a grade of 2.0 or better in JNSE 004.

COURSES

JNSE H001 FIRST-YEAR JAPANESE (INTENSIVE)
Tetsuya Sato, Yuka Usami-Casey, Minako Kobayashi
Humanities (HU)

Class meets five days a week: one hour on MWF 8:30-9:30, 9:30-10:30, or 11:30-12:30 and 90 minutes on TTh; students must choose TTh 8:30-10:00 slot, 10:00-11:30 slot, or 1:00-2:30 slot. An introduction to the four basic skills (reading, writing, speaking, and listening), with special emphasis on the development of conversational fluency in socio-cultural contexts. This is a year-long course; both semesters (001 and 002) are required for credit. (Offered Fall 2017)

JNSE H002 FIRST-YEAR JAPANESE (INTENSIVE)
Tetsuya Sato, Yuka Usami-Casey, Minako Kobayashi
Humanities (HU)

Class meets five days a week: one hour on MWF 8:30-9:30, 9:30-10:30, or 11:30-12:30 and 90 minutes on TTh; students must choose TTh 8:30-10:00 slot, 10:00-11:30 slot, or 1:00-2:30 slot. An introduction to the four basic skills (reading, writing, speaking, and listening), with special emphasis on the development of conversational fluency in socio-cultural contexts. This is a year-long course; both semesters (001 and 002) are required for credit. (Offered Spring 2018)

JNSE H003 SECOND-YEAR JAPANESE
Kimiko Suzuki, Minako Kobayashi
Humanities (HU)

Class meets five days a week: students must attend MWF 8:30-9:30 or 9:30-10:30 and choose either TTh 10:00-11:00 slot or TTh 11:30-12:30 slot. A continuation of First-year Japanese, with a focus on the further development of oral proficiency, along with reading and writing skills. (Students are not required to take both semesters.) Prerequisite(s): First-year Japanese or equivalent or instructor consent. (Offered Fall 2017)

JNSE H004 SECOND-YEAR JAPANESE
Kimiko Suzuki, Minako Kobayashi
The Economics curriculum is designed to provide an understanding of economic processes and institutions and the interactions among economic, political and social structures. The curriculum helps students master the methods used by economists to analyze economic issues and it enables them to make reasoned assessments of alternative public policies in a wide range of fields.

Major Requirements

The economics major consists of 10 semester courses in economics and one semester of college-level calculus. The required courses for the economics major are:

- ECON 105 Introduction to Economics
- ECON B200 Intermediate Microeconomic
- ECON B202 Intermediate Macroeconomics
- ECON 253 Introduction to Econometrics or ECON B304 Econometrics
- A research seminar in economics (ECON 390-399) that fulfills the thesis requirement. Each seminar focuses on a specific field in economics and requires that a student has successfully completed prior coursework in that field. For example, ECON 316 or 348 is a prerequisite for ECON 396. In exceptional cases, ECON 403 Independent Research may be substituted for this requirement; this requires preapproval of the instructor and the department chair.
- At least two 300-level electives for which ECON 200 or 202 is a prerequisite
- At least one Writing Intensive 300-level elective
- Three additional 200- and/or 300-level economics electives
- A minimum of one semester of college-level calculus (or its equivalent)

Majors are advised to complete ECON 200, 202, and 253 during sophomore year. They must be completed by the end of junior year or before any study away. These three courses should be taken at Bryn Mawr or Haverford. The department does not grant credit for Swarthmore’s intermediate microeconomics course, ECON SW011, because it is not calculus-based.

Students who earn a grade below 2.7 in ECON 105 are advised not to major in Economics.

Minor Requirements

The minor in economics consists of ECON 105; either ECON 200 or 202; either ECON 253 or 304 and three electives, one of which must have ECON 200 or 202 as a prerequisite. A minor plan must be approved before the start of the senior year.

More Important Information for Majors and Minors

Students with questions about the Economics major or minor are encouraged to meet with an Economics faculty member. ECON 202 requires sophomore standing to enroll, and ECON 200 and 253 have a 200-level economics elective as a prerequisite. Thus, majors are encouraged to enroll in a 200-level...
Most courses offered by the Haverford economics department count toward the Bryn Mawr economics major and minor. An exception is Econ H247 (Financial and Managerial Accounting). H300 covers the same material as B200; H302 the same material as B202; and H304 the same material as B304.

Most courses offered by the Swarthmore economics department may also be counted toward the Bryn Mawr economics major and minor; two important exceptions are SWO11 (Intermediate Microeconomics), because it does not draw on the same quantitative tools and SWO33 (Financial Accounting).

Students may substitute ECON H203 or H204 for ECON 253 as a major requirement if they also take ECON 304 as an elective.

Most of our 300-level electives assume that you have been exposed to the regression model, which is covered at some length in ECON 253 (Introduction to Econometrics), but only briefly in ECON H203 or H204 (Statistical Methods) at Haverford. Therefore, you should take ECON 253 unless you are confident you will be able to complete ECON 304 before taking one of those other 300-level courses.

If a student has taken ECON 105 or H106, she cannot take another introductory course elsewhere for credit.

No more than two courses that do not have Econ 105 as a prerequisite can be counted toward an economics major or minor at Bryn Mawr.

At least one semester of calculus (MATH 101) is a prerequisite for ECON B200, B202, and B304. Two semesters of calculus (MATH 102) are a prerequisite for ECON H300 and H302.

An economics major with a minimum GPA of 3.70 in economics, including economics courses taken in the second semester of the senior year, will graduate with honors in economics.

Advanced Placement

The department will waive the ECON 105 prerequisite for students who score a 5 on both the Microeconomics and Macroeconomics AP exams or a 6 or 7 on the Economics Higher Learning Exam of the International Baccalaureate. The waiver does not count as course credit toward the major or minor; majors and minors receiving advanced placement must still take a total of ten and six courses in economics, respectively. Students qualifying for advanced placement should see the department chair to confirm the waiver, plan their course work in economics and receive a permission number to enroll in the elective that will substitute for Econ 105.

Study Away and Transfer Credits

Planning ahead is the key to successfully balancing a semester or year away with the economics major. Students planning a semester or year away must complete the statistical methods and intermediate theory courses (200, 202 and 253) before going away and must consult with the department chair well before the application deadline for study away. If a student wants a particular course to count toward the economics major or minor, the student must obtain approval from the department chair before confirming registration at the host institution.

COURSES

ECON B105 Introduction to Economics
An introduction to micro- and macroeconomics: opportunity cost, supply and demand; consumer choice, the firm and output decisions; market structures; efficiency and market failure; the determination of national income, including government spending, money and interest rates; unemployment, inflation and public policy. Prerequisites: Quantitative Readiness Required.
Approach: Quantitative Readiness Required (QR)
Units: 1.0
Instructor(s): Nutting,A., Sfekas,A., Ceglowski,J.
(Fall 2017, Spring 2018)

ECON B200 Intermediate Microeconomics
Systematic development of the analytical framework economists use to explain the behavior of consumers and firms. Determination of price; partial and general equilibria; welfare economics. Application to current economic problems. Prerequisite: ECON B105, MATH B101 (or equivalent), one 200-level economics elective.
Units: 1.0
Instructor(s): Nutting,A.
(Fall 2017)

ECON B202 Intermediate Macroeconomics
The goal of this course is to provide a thorough understanding of the behavior of the aggregate economy and the likely effects of government stabilization policies. Models of output, inflation, unemployment and interest rates are developed, along with theories of consumption, investment, economic growth, exchange rates and the trade balance. These models are used to analyze the likely macroeconomic effects of fiscal and monetary policies and to explore current macroeconomic issues and problems. Prerequisites: ECON 105, MATH B101 (or equivalent), and one 200-level economics elective (most 200 level courses, excluding required courses for the major).
Units: 1.0
Instructor(s): Ceglowski,J.
(Spring 2018)

ECON B207 Money and Banking
Analysis of the development and present organization of the financial system of the United States, focusing on the monetary and payment systems, financial markets, and financial intermediaries. May not be taken by students who have completed ECON 307. Prerequisites: ECON 105.
Units: 1.0
(Spring 2018)

ECON B208 Labor Economics
Analysis of labor markets. Focuses on the economic forces and public policies that determine wage rates and unemployment. Specific topics include: human capital, family decision making, discrimination, immigration, technological change, compensating differentials, and signaling. Prerequisite: ECON B105.
Units: 1.0
(Not Offered 2017-2018)

ECON B213 Taming the Modern Corporation
Introduction to the economics of industrial organization and regulation, focusing on policy options for ensuring that
ECON B242 Economics of Local Environmental Programs

Considers the determinants of human impact on the environment at the neighborhood or community level and policy responses available to local government. How can economics help solve and learn from the problems facing rural and suburban communities? The instructor was a local township supervisor who will share the day-to-day challenges of coping with land use planning, waste disposal, dispute resolution, and the provision of basic services. Prerequisite: ECON B105.

Counts towards: Environmental Studies; Praxis Program
Units: 1.0
Instructor(s): Ross, D.
(Spring 2018)

ECON B234 Environmental Economics

Introduction to the use of economic analysis to explain the underlying behavioral causes of environmental and natural resource problems and to evaluate policy responses to them. Topics may include air and water pollution; the economic theory of externalities, public goods and the depletion of resources; cost-benefit analysis; valuing non-market benefits and costs; economic justice; and sustainable development. Prerequisites: ECON B105.

Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Ross, D.
(Spring 2018)

ECON B236 The Economics of Globalization

An introduction to international economics through theory, policy issues, and problems. The course surveys international trade and finance, as well as topics in international economics. It investigates why and what a nation trades, the consequences of such trade, the role of trade policy, the behavior and effects of exchange rates, and the macroeconomic implications of trade and capital flows. Topics may include the economics of free trade areas, world financial crises, outsourcing, immigration, and foreign investment. Prerequisites: ECON B105. The course is not open to students who have taken ECON B316 or B348.

Counts towards: International Studies
Units: 1.0
Instructor(s): Ceglowski, J.
(Spring 2018)

ECON B243 Economic Inequality and Government Policy Choices

This course will examine the U.S. economy and the effects of government policy choices. The class will focus on the potential trade-offs between economic efficiency and greater economic equality. Some of the issues that will be explored include tax, education, and health care policies. Different perspectives on issues will be examined. Prerequisite: ECON B105.

Units: 1.0
(Not Offered 2017-2018)

ECON B253 Introduction to Econometrics

An introduction to econometric terminology and reasoning. Topics include descriptive statistics, probability, and statistical inference. Particular emphasis is placed on regression analysis and on the use of data to address economic issues. The required computational techniques are developed as part of the
course. Class cannot be taken if you have taken H203 or H204.
Prerequisites: ECON B105 and a 200-level elective.

Approach: Quantitative Methods (QM)
Units: 1.0
Instructor(s): Ross,D.
(Spring 2018)

**ECON B304 Econometrics**

The econometric theory presented in ECON 253 is further developed and its most important empirical applications are considered. Each student does an empirical research project using multiple regression and other statistical techniques. Prerequisites: ECON 203 or 204 or 253; ECON 200 or both 202 and MATH 201.

Units: 1.0
Instructor(s): Sfekas,A.
(Spring 2018)

**ECON B313 Industrial Organization and Public Policy**

The study of the interaction of buyers, sellers and government in imperfectly competitive markets. Prerequisites: ECON 200 and ECON B253 or 304.

Major Writing Requirement: Writing Intensive
Units: 1.0
Instructor(s): Ross,D.
(Fall 2017)

**ECON B314 The Economics of Social Policy**

Introduces students to the economic rationale behind government programs and the evaluation of government programs. Topics include health insurance, social security, unemployment and disability insurance, and education. Additionally, the instructor and students will jointly select topics of special interest to the class. Emphasis will be placed on the use of statistics to evaluate social policy. Prerequisites: ECON 200; ECON 253 or 304.

Major Writing Requirement: Writing Intensive
Units: 1.0
Instructor(s): Sfekas,A.
(Fall 2017)

**ECON B316 International Macroeconomics**

Examines the theory of, and current issues in, international macroeconomics and international finance. Considers the role of international factors in macroeconomic performance; policy-making in an open economy; exchange rate systems and exchange rate behavior; international financial integration; and international financial crises. Prerequisite: ECON B202; ECON 253 or 304.

Major Writing Requirement: Writing Intensive
Units: 1.0
Instructor(s): Ceglowski,J.
(Fall 2017)

**ECON B324 The Economics of Discrimination and Inequality**

Explores the causes and consequences of discrimination and inequality in economic markets. Topics include economic theories of discrimination and inequality, evidence of contemporary race- and gender-based inequality, detecting discrimination, identifying sources of racial and gender inequality, and identifying sources of overall economic inequality.

Additionally, the instructor and students will jointly select supplementary topics of specific interest to the class. Possible topics include: discrimination in historical markets, disparity in legal treatments, issues of family structure, and education gaps. Writing Intensive. Prerequisites: At least one 200-level applied microeconomics elective; ECON 253 or 304; ECON 200.

Major Writing Requirement: Writing Intensive
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Nutting,A.
(Fall 2017)

**ECON B331 Human Capital Accumulation and Development**

Education stands at the center of a range of important policy and methodological issues in low and high income countries alike. To what extent does human capital accumulation contribute to economic growth, reduce income inequality and increase intergenerational mobility? Why do some groups in low income economies, e.g., men and children from relatively high income families, tend to accumulate more human capital than other groups, e.g., women and children of the poor? Why have governments intervened in the market for education, and what have been the efficiency and equity consequences? Prerequisites: ECON 200 and (ECON 253 or ECON 304).

Major Writing Requirement: Writing Intensive
Units: 1.0
(Not Offered 2017-2018)

**ECON B335 East Asian Development**

Identifies the core economic and political elements of an East Asian newly industrializing economies (NIEs) development model. Assesses the performance of this development model in Northeast (China, South Korea and Taiwan) and Southeast Asia (Indonesia, Malaysia, Singapore, Thailand and Vietnam) in a comparative perspective. Considers the debate over the impact of interventionist and selective development policies associated with this model on the development successes and failures of the East Asian NIEs. Evaluates the impact of democratization in several of these polities on both the core development model identified as well as on development performance. Prerequisite:ECON 225; ECON 200 or 202; and ECON 253 or 304; or permission of instructor.

Major Writing Requirement: Writing Intensive
Units: 1.0
(Not Offered 2017-2018)

**ECON B338 Democracy and Development**

From 1974 to the late 1990's the number of democracies grew from 39 to 117. This “third wave,” the collapse of communism and developmental successes in East Asia have led some to argue the triumph of democracy and markets. Since the late 1990’s, democracy's third wave has stalled, and some fear a reverse wave and democratic breakdowns. We will question this phenomenon through the disciplines of economics, history, political science and sociology drawing from theoretical, case study and classical literature. Prerequisites: ECON 200; ECON 253 or 304; and one course in Political Science OR Junior or Senior Standing in Political Science OR Permission of the Instructor.

Counts towards: International Studies; Peace, Justice and Human Rights
Units: 1.0
Students may complete a minor in education, in which there are two tracks: the minor in educational studies and the minor in education leading to secondary teacher certification. Alumnae may also complete the requirements for secondary teacher certification after they graduate through the Post-baccalaureate Teacher Education Program.

Faculty

Jody Cohen, Term Professor in the Bryn Mawr/Haverford Education Program
Alison Cook-Sather, Mary Katherine Woodworth Chair and Professor in the Bryn Mawr/Haverford Education Program and Director of Peace, Conflict and Social Justice Program
Heather Curl, Lecturer
Debbie Flaks, Instructor
Alice Lesnick, Director and Term Professor in the Bryn Mawr/Haverford Education Program and Faculty Convener of International Programs
Chanelle Wilson-Poe, Instructor
Kelly Zuckerman, Lecturer

The field of education is about teaching people how to teach and more. The Bryn Mawr/Haverford Education Program is built around four mutually-informing pursuits: teacher preparation; the interdisciplinary study of learning as a central human and cultural activity; the investigation of the politics of schooling; and students’ growth as reflective facilitators, learners, researchers and change agents.

Courses in the Education Program address students interested in:

- The theory, process and transformation of education
- Social justice, activism and working within and against systems
- Future work as educators in schools, public or mental health, community, or other settings
- Examining and reclaiming their own learning and educational goals
- Integrating experiential and academic learning

Each education course includes a field component through which instructors seek continuously to integrate theory and practice, asking students to bridge academic and experiential knowledge in the classroom and beyond it. Field placements in schools and other educational settings range from two hours per week in the introductory course to full-time student teaching in the certification program.

The Bi-College Education Program offers several options. Students may:

- Explore one or more aspects of education in areas of particular interest, such as urban schooling, by enrolling in single courses
- Pursue a minor in educational studies
- Pursue a minor in education leading to secondary teacher certification
• Complete the secondary teacher certification program after they graduate through the Post-baccalaureate Teacher Education Program

or

• In a five-year program, complete both the A.B./M.A. program in French, mathematics, physics, or possibly other departments that offer the AB/MA option and the secondary teaching certification program.

Students in the tri-college community may also apply to sub-matriculate as juniors or seniors into the University of Pennsylvania, Graduate School of Education’s elementary or secondary education Master’s program.

The requirements for the minor in education and teacher certification are described below. Students interested in these options, or the other options named above, should meet with the Education Program Adviser as early as possible for advice on scheduling, preferably by the sophomore year.

Requirements for the Minor in Educational Studies

The bi-college minor in educational studies is an interdisciplinary exploration of the cultural, political, developmental, and interactional dimensions of teaching and learning and is designed for students with a broad range of education-related interests, such as graduate study in education, pursuit of elementary or secondary certification after graduation, or a host of activities that require educational expertise. Many professions and pursuits—management and training positions, research, administration and policy work, and careers in social work, health and law—involves using an educator’s skills and knowledge. Civic engagement, community development, and work towards social justice also require knowledge of how people learn and change. Because students interested in these or other education-related pursuits major in different subject areas and have different aspirations, they are encouraged to design a minor appropriate to their major area of study and their anticipated futures.

Requirements for the minor in educational studies include:

• EDUC 200 Critical Issues in Education

• Four education courses. At least two must be offered by Education Program or affiliated faculty (J. Cohen/A. Cook-Sather/H. Curl/V. Donnay/D. Flaks/A. Lesnick). Up to two may be education courses offered by faculty in other departments (of these, one may be taken at Swarthmore, Penn, or while studying away).

• One of the following as a culminating course: EDUC 311( Theories of Change in Educational Institutions), EDUC 301 (Curriculum and Pedagogy Seminar), SOWKBB676 (Making Space for Learning: Pedagogical Planning and Facilitation), or an intensified version of EDUCB295 (Advocating Diversity in Higher Education).

Requirements for Secondary Certification

The Bryn Mawr/Haverford Education Program is accredited by the state of Pennsylvania to prepare undergraduates and alumnae for certification in the following subject areas: English; languages, including French, Latin, and Spanish; mathematics; the sciences, including biology, chemistry, and physics; and social studies. Pursuit of certification in Chinese and Russian is also possible but subject to availability of student teaching placements. Students certified in a language have K-12 certification.

To qualify for a teaching certificate, students must complete an academic major in the subject area in which they seek certification (or, in the case of social studies, students must major in history, political science, economics, anthropology, psychology, sociology, or Growth and Structure of Cities and take courses outside their major in the other areas). Within their major, students must select courses that help them meet the state standards for teachers in that subject area. Students must also complete the secondary teacher certification track of the minor in education, taking these courses:

• EDUC 200 Critical Issues in Education
• PSYC 203 Educational Psychology
• EDUC 210 Perspectives on Special Education
• EDUC 275 English Learners in U.S. Schools
• EDUC 301 Curriculum and Pedagogy Seminar (fall semester, prior to student teaching)
• EDUC 302 Practice Teaching Seminar and EDUC 303 Practice Teaching. These courses are taken concurrently for three credits.

Students preparing for certification must also take two courses in English and two courses in math, maintain a grade point average of 3.0 or higher, and pass a series of exams for beginning teachers (state requirements). To be admitted to the culminating student teaching phase of the program, students must earn a grade of a 2.7 or higher in both EDUC 200 (Critical Issues in Education) and EDUC 301 (Curriculum and Pedagogy) and be recommended by their major department and the director of the Education Program. To be recommended for certification, students must earn a grade of 2.7 or higher in EDUC 302 (Practice Teaching Seminar) and a grade of Satisfactory in EDUC 303 (Practice Teaching).

Note: Students practice-teach full time for 12 weeks in a local school during the spring semester of their senior year. Given this demanding schedule, students are not able to take courses other than the Practice Teaching Seminar and senior seminar for their major.

Graduates may complete the requirements for secondary teacher certification at Bryn Mawr in a post-baccalaureate program.

Title II Reporting

Title II of the Higher Education Act (HEA) requires that a full teacher preparation report, including the institution’s pass rate as well as the state’s pass rate, be available to the public on request. Copies of the report may be requested from the Education Department at (610) 526-5010.

COURSES

EDUC B200 Critical Issues in Education

Designed to be the first course for students interested in pursuing one of the options offered through the Education Program, this course is also open to students exploring an interest in educational practice, theory, research, and policy. The course examines major issues and questions in education in the United States by investigating the purposes of education. Fieldwork in an area school required (eight visits, 1.5-2 hours per visit).

Approach: Cross-Cultural Analysis (CC)

Major Writing Requirement: Writing Attentive

Counts towards: Africana Studies; Child and Family Studies
EDUC B208 Race-ing Education
This course investigates education as part of processes of racialization and marginalization and also as a space for challenging these processes. How do race and schooling intersect and interact? How can educators -- along with students, parents, and communities -- learn and teach critical awareness of race as an idea and a system? With a focus on the U.S., we look at ways in which race as a way of creating power is embedded in earlier iterations of schooling, as in cases regarding access to education for Black, Latinx, and Asian students and in American Indian boarding schools, and how race is differently taken up in the work of such thinkers/educators as W.E.B. DuBois, James Baldwin, and Paulo Freire. We consider how such issues play out in the recent past and contemporary moment through ongoing cases on affirmative action; work in Critical Race Theory and LatCrit by such educators as Patricia Williams and Tara Yosso, and in decolonizing education by Eve Tuck and Gloria Anzaldúa; and curriculum and pedagogy in the theory and practice of such educators as Kevin Kunishiro and movements such as Black Lives Matter. We also consider Bryn Mawr’s own history, in light of how to move forward through critically engaged education.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Africana Studies
Units: 1.0
(Note Offered 2017-2018)

EDUC B210 Perspectives on Special Education
The goal of this course is to introduce students to a range of topics, challenges, dilemmas, and strategies to understand and educate all learners—those considered typical learners as well as those considered “special” learners. Students will learn about: how students' learning profiles affect their ability to learn in school from a functional perspective; how and why students’ educational experience is affected by education law (especially special education law); major issues in special education; and how to meet diverse students’ needs in an inclusive classroom. Two hours of fieldwork per week required.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Child and Family Studies; Praxis Program
Units: 1.0
Instructor(s): Flaks,D.
(Fall 2017)

EDUC B220 Changing Pedagogies in Mathematics and Science
This Praxis course will examine research-based approaches to teaching mathematics and science. What does research tell us about how people learn? How can one translate this learning theory into teaching approaches that will help all students learn mathematics and science? How are these new approaches, that often involve active, hands-on, inquiry based learning, being implemented in the classroom? What challenges arise when one tries to bring about these types of changes in education? How do issues of equity, discrimination, and social justice impact math and science education? The Praxis component of the course usually involves two (2) two hour visits per week for 8 weeks to a local math or science classroom.
Approach: Cross-Cultural Analysis (CC)
EDUC B260 Multicultural Education
In our era of globalization, increased standardization of education, and perpetual discrimination, this course investigates the following key question: What does multicultural education mean today? We will investigate globalization, reflect on notions of power and privilege, critique understandings of difference, and examine the multi-faceted ways in which multicultural education is enacted in pedagogy, curriculum and educational organization. We will also examine the intersections between race, class, gender, sexuality, language, and citizenship status and try to assess their impact on teaching and learning. Fieldwork of two to three hours per week.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Africana Studies; Praxis Program
Units: 1.0
(Spring 2018)

EDUC B266 Schools in American Cities
This course examines issues, challenges, and possibilities of urban education in contemporary America. We use as critical lenses issues of race, class, and culture; urban learners, teachers, and school systems; and restructuring and reform. While we look at urban education nationally over several decades, we use Philadelphia as a focal "case" that students investigate through documents and school placements. This is a Praxis II course (weekly fieldwork in a school required)
Approach: Cross-Cultural Analysis (CC)
Counts towards: Africana Studies; Child and Family Studies; Praxis Program
Units: 1.0
(Spring 2018)

EDUC B270 Identity, Access, and Innovation in Education
This course explores formal policies that address dimensions of identity such as race, class, gender, language and dis/ ability in education, and the informal ways that such policies play out in access to education and in knowledge construction and production. Praxis placements will provide students with opportunities to work in participatory ways in relation to these issues.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Praxis Program
Units: 1.0
(Not Offered 2017-2018)

EDUC B290 Learning in Institutional Spaces
This course considers how institutions such as schools and prisons operate as sites of both constraint and learning. Beginning with an examination of educational and penitential institutions, we inquire into how these structures inhibit, propel, and shape learning, and how human beings take up, take on and alter their surroundings. We consider explicit curricula alongside implicit, hidden curricula; how do people inside these spaces collude with, subvert, and challenge official agendas as they create their own agendas for learning? We investigate the role of "voice"--speaking out, expressing, engaging in dialogue—in teaching and learning: In what ways can "voice" instigate understanding and change, and how might this be problematic? Students will engage in Praxis placements in schools or prisons.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Gender and Sexuality Studies; Praxis Program
Units: 1.0

EDUC B295 Advocating Diversity in Higher Education
As institutions of higher education embrace and even seek greater diversity, we also see an increase in tensions born of differences across which we have little preparation to communicate, learn, and live. This course will be co-created by students enrolled and the instructor, and it will provide a forum for exploration of diversity and difference and a platform for action and campus-wide education. Extensive, informal writing and more formal research and presentations will afford you the opportunity to craft empowering narratives for yourselves and your lives and to take research and teaching beyond the classroom. Two to three hours of campus-based field work required each week.
Approach: Cross-Cultural Analysis (CC)
Units: 1.0
Instructor(s): Cohen, J.
(Spring 2018)

EDUC B302 Practice Teaching Seminar
Drawing on participants’ diverse student teaching placements, this seminar invites exploration and analysis of ideas, perspectives and approaches to teaching at the middle and secondary levels. Taken concurrently with Practice Teaching. Open only to students engaged in practice teaching.
Counts towards: Child and Family Studies
Units: 1.0
(Spring 2018)

EDUC B303 Practice Teaching in Secondary Schools
Supervised teaching in secondary schools (12 weeks). Two units of credit are given for this course. Open only to students preparing for state certification.
Units: 2.0
(Spring 2018)

EDUC B403 Supervised Work
Units: 1.0
(Spring 2018)

EDUC B425 Praxis III: Independent Study
Praxis III courses are Independent Study courses and are developed by individual students, in collaboration with faculty and field supervisors. A Praxis courses is distinguished by genuine collaboration with fieldsite organizations and by a dynamic process of reflection that incorporates lessons learned in the field into the classroom setting and applies theoretical understanding gained through classroom study to work done in the broader community.
Counts towards: Praxis Program
Units: 1.0
(Not Offered 2017-2018)

ANTH B271 Museum Anthropology: History, Politics, Practices
This course provides an in-depth exploration of museum anthropology: the critical study of museum practices from an anthropological perspective. The course will fundamentally consider the role of museums in exhibiting culture—the politics of placing cultures on display, from living humans and human
remains to cultural objects and artifacts. The course will also consider changing practices in museum anthropology, including repatriation efforts, shifting notions of heritage and identity and the emergence of community-curated exhibitions. This course complements the theoretical explorations of the museum with visits to area museums and hands-on work in Special Collections.

Approach: Course does not meet an Approach
Counts towards: Museum Studies
Units: 1.0
(Not Offered 2017-2018)

ARTA B251 Arts Teaching in Educational and Community Settings

This is a Praxis II course intended for students who have substantial experience in an art form and are interested in extending that experience into teaching and learning at educational and community sites. Following an overview of the history of the arts in education, the course will investigate underlying theories. The praxis component will allow students to create a fluid relationship between theory and practice through observing, teaching and reflecting on arts practices in educational contexts. School or community placement 4 hours a week. Preparation: At least an intermediate level of experience in an art form. This course counts toward the minor in Dance or Theater.

Counts towards: Praxis Program
Units: 1.0
Instructor(s): Cantor,M.
(Fall 2017)

ENGL B220 Writing in Theory/Writing in Practice

This Praxis course is designed for students interested in teaching or tutoring writing at the high-school or college level. The course focuses on understanding the relationship between high school and college-level writing. Readings focus on the theory and pedagogy of writing, on literacy issues, and on writing culture.

Approach: Critical Interpretation (CI)
Counts towards: Praxis Program
Units: 1.0
Instructor(s): Hemmeter,G.
(Spring 2018)

ENGL B244 Unsettling Literacy

These two linked courses, co-designed by teachers in the Education Program and English Department, offer the Bi-Co alongside three placement sites—a correctional facility, a re-entry program, and a youth art and advocacy project—as comparative contexts for experiences and reflections on the meanings of "literacy": What gives us access, to texts and selves? What are the outcomes of such educational processes? Do we imagine "learning our letters," in Frederick Douglas's words, as providing "the pathway from slavery to freedom," and/or (as claimed by a contemporary criminologist) as "training good workers for a problematic system"? How might literacy take on different meanings in different contexts? Does it enable learners to fill roles in stratified, normalizing institutions, and/or give us increased leeway in living our lives—perhaps even opening up what educator Jean Anyon calls "radical possibilities"?

Placements will involve a weekly off-campus commitment of 3-4 hours. For more info, see https://serendip.brynmawr.edu/oneworld/unsettling-literacies/unsettling-literacies-two-linked-courses-bryn-mawr-college-spring-2017

Approach: Critical Interpretation (CI)
Counts towards: Praxis Program
Units: 1.0
(Not Offered 2017-2018)

POLS B374 Education Politics & Policy

This course will examine education policy through the lens of federalism and federalism through a case study of education policy. The dual aims are to enhance our understanding of this specific policy area and our understanding of the impact that our federal system of government has on policy effectiveness.

Units: 1.0
(Not Offered 2017-2018)

SOCL B317 Comparative Social Policy: Cuba, China, US, Scandinavia

This course will examine different countries' policy choices to address different societal challenges. Four societal types - socialist (Cuba), post-socialist (China), capitalist (US), and social-democratic (Scandinavia) - will be studies to help us understand how these different kinds of societies conceive of social problems and propose and implement attempted solutions. We will examine particular problems/solutions in four domains: health/sports; education; environment; technological development. As we explore these domains, we will attend to methodological issues involved in making historical and institutional comparisons.

Counts towards: Education; Health Studies
Units: 1.0
(Not Offered 2017-2018)

SOWK B676 Making Space for Learning: Pedagogical Planning and Facilitation

Supported by the Teaching and Learning Institute (TLI) and a grant from The Andrew W. Mellon Foundation, this series of pedagogy workshops for graduate students may be taken in its entirety for course credit, or individual workshops may be attended as stand-alone sessions. Seven two-hour workshops focused on a variety of pedagogical issues (e.g., course design, teaching styles, creating culturally responsive classrooms, grading) are scheduled for both the fall and the spring semesters.* These are interactive workshops, some of which require the completion of reading in advance and some of which include discussion of texts during the workshops themselves, but all of which focus on active, collaborative explorations of pedagogical issues. A full list of the workshop topics is available through the Dean's Office. These workshops count toward the completion of the Dean's Certificate in Pedagogy.

Units: 1.0
Instructor(s): Cook-Sather,A.
(Fall 2017)

ENGLISH

Students may complete a major or minor in English. Within the major, students may complete a concentration in Creative Writing. Students may also combine an English major with a minor in Africana Studies, Environmental Studies, or Gender and Sexuality Studies; alternatively, a concentration in Gender and Sexuality Studies is available.
Faculty
Linda-Susan Beard, Associate Professor of English and Director of Africana Studies
Sara Louise Bryant, Visiting Assistant Professor
Jennefer Callaghan, Lecturer
Colby J. Gordon, Assistant Professor of English
Jody Griffith, Lecturer
Jennifer Harford Vargas, Associate Professor of English on the Rosabeth Moss Kanter Change Master Fund and Co-Director of the Latin American, Latina/o and Iberian Studies Program (on leave semesters I & II)
Gail Hemmeter, Senior Lecturer in English and Director of Writing
Betty Lou Litsinger, Instructor
Matthew Ruben, Lecturer in English and the Emily Balch Seminars
Bethany Schneider, Associate Professor of English
Eleanor Stanford, Instructor
Mecca Jamilah Sullivan, Assistant Professor of English
Jamie Taylor, Associate Professor of English
Kate Thomas, Chair and Associate Professor of English
Michael Tratner, Mary E. Garrett Alumnae Professor of English

The English Department offers a wide range of courses in British, American, and Anglophone literatures, from medieval romance to contemporary novels and film. Students develop their own paths through the major, experimenting with historical periods, genres, and forms while also developing expertise in specific areas.

The department stresses critical thinking, incisive writing and speaking, and a sense of initiative and responsibility for the enterprise of interpretation. With their advisers, English majors design a program of study that deepens their understanding of diverse genres, textual traditions, and periods. We encourage students to explore the history of cultural production and reception and also to question the presuppositions of literary study. The major culminates in an independently written essay of 30-40 pages, developed during a senior research seminar in the fall semester and individually mentored by a faculty member in the spring. Students are expected to take at least two English courses at Bryn Mawr before signing up for the major or minor.

Summary of the Major
The major requires a total of eleven courses. Three courses are required: 250, 398 and 399. Of the other eight courses, at least three must be at the 300 level (exclusive of 398 and 399). All 300 level courses must be taken at BMC or HC. 250 must be taken before the senior year. One 100 level class may be taken as a first year or sophomore, and only one may be taken. Note: One 200 level Creative Writing course can count towards the major.

• ENGL B250 Methods of Literary Study, (must be taken before the senior year. Prerequisite: at least one 200 level course)
• ENGL B398 Senior Seminar (offered Mondays in the fall, 2:30-4pm)
• ENGL B399 Senior Essay (taken in the spring, with an individual adviser)

Summary of the Minor
Students must declare their minor by the end of their junior year.

• Five English courses (at least one at the 300 level). 300 levels must be taken at BMC or HC. One 200 level Creative Writing course may count towards the minor.
• ENGL B250 Methods of Literary Study (must be taken before the senior year. Prerequisite: 1 or preferably 2 200-level English courses)

Writing Requirement
By the end of their junior year, English majors must satisfy the College’s Writing Intensive Requirement by taking one Writing Intensive (WI) course taught by English Department faculty.

Minor in Film Studies
There is no limit to the number of courses in film studies that may count toward the English major, except for a student majoring in English who is also seeking to declare a minor in film studies. In that case two (and only two) of the courses that comprise the six-course film studies minor may also count towards the 11-course English major. The minimum number of courses required to complete an English major and a minor in film studies is thus 15 courses.

Concentration in Creative Writing
Students may elect a concentration in creative writing. (In addition to the eight English courses, students must take English 250, English 398, and English 399, as described above) One of the creative writing units at the 300 level may count as one of the three required 300-level courses for the major. Students enrolling in this concentration must seek the approval of their major adviser in English and of the director of the Creative Writing Program; they must enroll in the concentration before the end of their sophomore year.

Other Concentrations
The Department of English contributes courses toward minors in Africana Studies, in Environmental Studies, and in the Program in Gender and Sexuality.

Students Going Abroad
Students should complete both English 250 and one 300-level course before leaving for a semester or year abroad.

English Majors and the Education Certification Program
English majors planning to complete an education certification in their senior year should file a work plan with the chairs of the Education and English Departments no later than December 1 of their junior year. English majors on this path will follow an accelerated writing schedule in their senior year.

Extended Research
Some students seek a longer horizon and a chance to dig deeper into their research interests. Rising juniors and seniors in English frequently apply for fellowship support from the Hanna Holborn Gray program, to pursue original research over the summer or through the year. The projects may be stand-alone or may lead to a senior essay. In either case, students work closely with faculty advisers to define the goals, methods, and potential outcomes of their research.
Approach: Critical Interpretation (CI)
films like "Brokeback Mountain" and buddy comedies.
also discuss the ongoing publication of Harlequin romances, the
and Romance Letters on Chivalry, Richard Hurd's eighteenth-century
include Chaucer's Troilus and Criseyde, Marlowe's Hero and Leander,
challenges, exploring how various historical moments and
and discussion skills necessary to an English major, through
examining the genre from the Middle Ages to contemporary
work will be the major undertakings of the semester.
Major Writing Requirement: Writing Intensive
Units: 1.0
Instructor(s): Schneider,B.
(Spring 2018)

ENGL B106 Romance to Bromance
This course examines the ongoing popularity of romance,
to examining the genre from the Middle Ages to contemporary
imagined society to a dystopian world. In doing so, we will pay particular attention
to the gender politics romance produces, supports, and
challenges, exploring how various historical moments and
media conceptualize love, desire, sex, and marriage. Texts will
include Chaucer's Troilus and Criseyde, Marlowe's Hero and Leander,
Richard Hurd's eighteenth-century Letters on Chivalry and Romance, and nineteenth-century bodice rippers. We will
discuss the ongoing publication of Harlequin romances, the
popularity of romantic comedy in film (from the 1930s to now) as
well as the reimagining of romance tropes and male intimacy in
films like "Brokeback Mountain" and buddy comedies.
Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Taylor,J.
(Fall 2017)

ENGL B202 Understanding Poetry
This course is for students who wish to develop their skills
in reading and writing critically about poetry. The course will
provide grounding in the traditional skills of prosody (i.e., reading
accentual, syllabic, and accentual-syllabic verse) as well as
tactics for reading and understanding the breath-based or image-
based prosody of free verse. Lyric, narrative, and dramatic poetry
will be discussed and differentiated. We will be using close
reading and oral performance to highlight the unique fusion of
language, rhythm (sound), and image that makes poetry different
from prose.
Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

ENGL B202 The Language of Loss: Mourning and Melancholia in Elegy
Elegy is the genre of poetry tasked with performing the work of
mourning in the aftermath of profound loss. Elegies are crucial
for our understanding of literary history because in addition
to coping with individual loss they address larger themes and
problems about literature, including what form mourning should
take in verse. These poems range from meditating on the vision
of someone dying to lamenting the loss of a fellow poet, and
they take on excruciating subjects such as the loss of a child
or coming to terms with the violent death of a beloved person.
An elegy can be both intensely personal and political, forcing
us to confront our own mortality and the grief of others. This
course examines the rich history of this genre, starting with
Elizabethans, including Ben Jonson's heartbreaking poem
"On My First Son," and ending with Helen Macdonald's recent
memoir, H is for Hawk, that connects her own personal grief with
the global ecological crisis. Our readings will address a wide
array of social and cultural contexts from the problem of faith
in the Victorian period to the AIDS epidemic of the 1980s and
1990s. We will also consider how the genre of elegy extends
beyond poetic form to include narrative and memoir. Major
elegies might include Milton's Lycidas, Thomas Gray's "Elegy
Written in a Country Churchyard," Percy Shelley's Adonais,
Alfred Lord Tennyson's In Memoriam, Donald Hall's Without,
Joan Didion's In the Year of Magical Thinking, and Anne Carson's
Nox. We will also engage shorter works by Shakespeare, John
Donne, Anne Bradstreet, William Wordsworth, John Keats, Emily
Dickinson, Walt Whitman, Christina Rossetti, Thomas Hardy,
Anne Sexton, Claude McKay, Edna St. Vincent Millay, Elizabeth
Bishop, Theodore Roethke, John Berryman, Mark Doty, Li-Young
Lee, Marilyn Hacker, and others. In addition to these primary
texts, we will touch on theories of loss and mourning, including
the work of Sigmund Freud and Judith Butler.
Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

ENGL B203 Imagined Worlds: Utopia and Dystopia in Literature
When Thomas More coined the term "Utopia" in 1516, it meant
both "good place" and "no place" – an ideal society, and an
unreachable one. Since then, the term (as well as its opposite,
dystopia) has been applied to representations of imagined
worlds that hold a mirror up to our own. In this class, we'll read
texts from the early modern period (Utopia, The Blazing World)
through the present day (The Handmaid's Tale, The Hunger
Games) that use invented societies to critique the 'real world.'
We will pay particular attention to how descriptions of imagined
ENGL B205 Introduction to Film
This course is intended to provide students with the tools of critical film analysis. Through readings of images and sounds, sections of films and entire narratives, students will cultivate the habits of critical viewing and establish a foundation for focused work in film studies. The course introduces formal and technical units of cinematic meaning and categories of genre and history that add up to the experiences and meanings we call cinema. Although much of the course material will focus on the Hollywood style of film, examples will be drawn from the history of cinema. Attendance at weekly screenings is mandatory.
Approach: Critical Interpretation (CI)
Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B207 Eating Empire: Food, Diaspora and Victorian Britain
This class will explore British culinary culture across the long nineteenth century, focusing on how food culture was used in the ordering and Othering of the world and its populations. Our lens is the relationship of food to nineteenth-century colonial and imperial discourse and we will analyze how food both traced and guided global networks of power, politics and trade. We will be particularly interested in theorizing the paradox that the trademark English comestibles – the sweet cup of tea, the curry – are colonial imports, and we will also construct a history of the industrialization of food that facilitated exportation. As we are tracing the flows of capital and foodstuffs, we will also consider the power of resisting food, by studying anti-saccharite abolitionist protests, hunger strikes and food adulteration campaigns. Organizing units will include sugar, chocolate, tea, spices. Texts will include slave narratives, nineteenth century cookbooks and colonial culinary memoirs, Thackeray's Vanity Fair, Stoker's Dracula, Carroll's Alice in Wonderland.
Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Units: 1.0
Instructor(s): Bryant, S. (Fall 2017)

ENGL B208 Big Books of American Literature
This course focuses on the "big books" of mid-19th-century American literature, viewed through the lenses of contemporary theory and culture. Throughout the course, as we explore the role that classics play in the construction of our culture, we will consider American literature as an institutional apparatus, under debate and by no means settled. This will involve a certain amount of interdisciplinary work: interrogating books as naturalized objects, asking how they reproduce conventional categories and how we might re-imagine the cultural work they perform. We will look at the problems of exceptionalism as we examine traditional texts relationally, comparatively, and interactively.
Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

ENGL B210 Renaissance Literature: Performances of Gender
Readings chosen to highlight the construction and performance of gender identity during the period from 1550 to 1650 and the ways in which the gender anxieties of 16th- and 17th-century men and women differ from, yet speak to, our own. Texts will include plays, poems, prose fiction, diaries, and polemical writing of the period.
Approach: Inquiry into the Past (IP)
Major Writing Requirement: Writing Intensive
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B211 The Lives of Nineteenth-Century Monsters
This course explores the centrality of monstrosity to the nineteenth-century British novel. Our work will involve placing these monsters in the tradition of the Gothic in order to understand the cultural, social, and literary metaphors they represent. In some cases, we will read about monsters with hideous bodies, but our work will also include reading about monstrosity that is kept hidden from view. To aid our work—and to provide adequate protection—we will read about the sublime, the uncanny, and the other topics that monstrosity veils and exposes such as gender and sexuality. Literary texts might include Mary Shelley’s Frankenstein, James Hogg’s The Private Memoirs and Confessions of a Justified Sinner, Jane Austen’s Northanger Abbey, Emily Brontë’s Wuthering Heights, George Eliot’s The Lifted Veil, Thomas Hardy’s Tess of the d’Urbervilles, Bram Stoker’s Dracula, Robert Louis Stevenson’s Dr. Jekyll and Mr. Hyde, and Oscar Wilde’s The Picture of Dorian Gray.
Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Intensive
Units: 1.0
(Not Offered 2017-2018)

ENGL B212 Renaissance Erotic Poetry
In this class we will examine our ability to put sexual experience into language. As we look at the various ways in which sexuality can be expressed linguistically, we will ask whether (and if so, why) it is “necessary” to “put sex into” language and explore what various scientific, social-scientific and literary discourses of desire look and sound like. What are the capacities and limitations of each? What other languages might be used? Can we imagine a curriculum to do this work? Can we teach such a curriculum? Praxis I course.
Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Gordon, C. (Spring 2018)

ENGL B214 Refuse and Refusal in Victorian Literature
The florid wealth of Britain in the nineteenth century was fed by income from slave trade, industrial exploitation, and imperial expansion. It was also an era that was horrified by its own growth; abolitionism, the women’s suffrage movement, the arts and crafts movement, the inception of the welfare state were all nineteenth century protests against the waste of human life and
ENGL B215 Early Modern Crime Narratives: Vice, Villains, and Law
This course taps into our continuing collective obsession with criminality, unpacking the complicated web of feelings attached to crime and punishment through early modern literary treatments of villains, scoundrels, predators, pimps, witches, king-killers, poisoners, mobs, and adulterers. By reading literary accounts of vice alongside contemporary and historical theories of criminal justice, we will chart the deep history of criminology and track competing ideas about punishment and the criminal mind. This course pays particular attention to the ways that people in this historical moment mapped criminality onto dynamics of gender, race, sexuality, disability, religion, and mental illness according to cultural conventions very different from our own. Authors may include Shakespeare, Marlowe, Massinger, Middleton, Dekker, Webster, and Behn.

Approach: Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B217 Narratives of Latinidad
This course explores how Latina/o writers fashion bicultural and transnational identities and narrate the intertwined histories of the U.S. and Latin America. We will focus on topics of shared concern among Latino groups such as struggles for social justice, the damaging effects of machismo and racial hierarchies, the politics of Spanglish, and the affective experience of migration. By analyzing a range of cultural production, including novels, poetry, testimonial narratives, films, activist art, and essays, we will unpack the complexity of Latinidad in the Americas.

Approach: Critical Interpretation (CI)
Counts towards: Africana Studies; Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B218 Ecological Imaginings
Re-thinking the evolving nature of representation, with a focus on language as a link between natural and cultural ecosystems. We will observe the world; read classical and cutting edge ecocritical, ecocultural, ecofeminist, and ecocriminal theory, along with a wide range of exploratory, speculative, and imaginative essays and stories; and seek a variety of ways of expressing our own ecological interests.

Approach: Critical Interpretation (CI)
Counts towards: Environmental Studies; Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B220 Writing in Theory/Writing in Practice
This Praxis course is designed for students interested in teaching or tutoring writing at the high-school or college level. The course focuses on understanding the relationship between high school and college-level writing. Readings focus on the theory and pedagogy of writing, on literacy issues, and on writing culture.

Approach: Critical Interpretation (CI)
Counts towards: Praxis Program
Units: 1.0
Instructor(s): Praxis Program
(Spring 2018)

ENGL B227 Poverty and Precarious Lives on Screen
The cinema and the mainstream film industry have been well suited to depicting glamour, opulence, and wealth. But what about the widespread condition of being poor and living on the brink of being even worse off? In this course, we will explore cinematic depictions of poverty and inequality to ask whether and how films can go beyond romanticizing poverty or merely rehearsing rags-to-riches narratives. How does the awareness of poverty shape aesthetic form in film? What are the social and political implications of how cinema treats the condition of being poor? Subtopics will include: the Great Depression and Hollywood; social realism and fantasies of escape; representing labor in late capitalism; global inequality and a “world” cinema; and precarity in the 21st-century U.S. Film will include Gold Diggers of 1933, Sullivan’s Travels, Ratcatcher, Slumdog Millionaire, Wendy and Lucy, and Beasts of the Southern Wild.

Approach: Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies; Praxis Program
Units: 1.0
Instructor(s): Praxis Program
(Spring 2018)

ENGL B228 Silence: The Rhetorics of Class, Gender, Culture, Religion
This course will consider silence as a rhetorical art and political act, an imaginative space and expressive power that can serve many functions, including that of opening new possibilities among us. We will share our own experiences of silence, re-thinking them through the lenses of how it is explained in philosophy, enacted in classrooms and performed by various genders, cultures, and religions.

Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Intensive
Counts towards: Gender and Sexuality Studies; Praxis Program
Units: 1.0
(Not Offered 2017-2018)

ENGL B229 Movies and Mass Politics
Movies and mass politics emerged together, altering entertainment and government in strangely similar ways. Fascism and Communism claimed an inherent relation to the masses and hence to movies; Hollywood rejected such claims. We will examine films that allude to Communism and Fascism, seeking to understand how they join in political debates and comment upon the mass experience of movie going.

Approach: Critical Interpretation (CI)
Counts towards: Film Studies
Units: 1.0
Instructor(s): Tratner,M.
(Spring 2018)
ENGL B230 Topics in American Drama

Considers American plays of the 20th century, reading major playwrights of the canon alongside other dramatists who were less often read and produced. Will also study later 20th century dramatists whose plays both develop and resist the complex foundation established by canonical American playwrights and how American drama reflects and responds to cultural and political shifts. Considers how modern American identity has been constructed through dramatic performance, considering both written and performed versions of these plays.

Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Intensive
Units: 1.0
(Not Offered 2017-2018)

ENGL B232 Pirates in the Popular Imagination

This course will explore popular representations of pirates from the seventeenth century to the present, in memoirs, first-hand and fictional accounts (including children's literature), and films. The context will be global, with an emphasis on the transatlantic world. Topics will include slavery, gender/sexuality, captivity, class/status, race, and imperialism/colonialism.

Approach: Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B233 Spenser and Milton

The course is equally divided between Spenser's Faerie Queene and Milton's Paradise Lost, with additional short readings from each poet's other work.

Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

ENGL B234 Postcolonial Literature in English

This course will survey a broad range of novels and poems written while countries were breaking free of British colonial rule. Readings will also include cultural theorists interested in defining literary issues that arise from the postcolonial situation.

Approach: Critical Interpretation (CI)
Counts towards: Africana Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Sullivan,M.
(Spring 2018)

ENGL B236 Latina/o Culture and the Art of Migration

Gloria Anzaldúa has famously described the U.S.-Mexico border as an open wound and the border culture that arises from this fraught site as a third country. This course will explore how Chicana/os and Latina/os creatively represent different kinds of migrations across geo-political borders and between cultural traditions to forge transnational identities and communities. We will use cultural production as a lens for understanding how citizenship status, class, gender, race, and language shape the experiences of Latin American migrants and their Latina/o children. We will also analyze alternative metaphors and discourses of resistance that challenge anti-immigrant rhetoric and reimagine the place of undocumented migrants and Latina/os in contemporary U.S. society. Over the course of the semester, we will probe the role that literature, art, film, and music can play in the struggle for migrants' rights and minority civil rights, querying how the imagination and aesthetics can contribute to social justice. We will examine a number of different genres, as well as read and apply key theoretical texts on the borderlands and undocumented migration.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B239 African American Poetry

This course explores the work of black poets in the Americas. Focusing on a range of poetic forms from the 18th century through the present, we will consider key questions that have animated the works of black poets in North America and the Caribbean, and how they have used poetic strategy to engage these questions. How do black poets explore black political and social life in various historical and geographical contexts? How do they use particular formal strategies (for example, form poetry, free verse, narrative poetry, and experimental modes) to interrogate notions of blackness? How do political movements around gender, class, and sexuality factor in? As we approach these questions, we will consider important critical conversations on African American poetry and poetics, examining how both well-known and underexplored poets use form to complicate blackness and imagine various forms of freedom. Our work will take us through several poetic genres and forms, including print works, performance poetry, hip hop music, and digital media. Throughout our analysis, we will consider how discourses on gender, sexuality, class, national and transnational identity, and other engagements with difference shape black poetic expression, both historically and in our current moment.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Africana Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Sullivan,M.
(Not Offered 2017-2018)

ENGL B240 Wit and Witness: English Literature 1660-1744

The rise of new literary genres and the contemporary efforts to find new definitions of heroism and wit, good taste and good manners, sin and salvation, individual identity and social responsibility, and the pressure exerted by changing social, intellectual and political contexts of literature. Readings from Defoe, Dryden, early feminist writers, Pope, Restoration dramatists and Swift.

Approach: Critical Interpretation (CI)
Counts towards: Africana Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B242 Historical Introduction to English Poetry I

This course traces the development of English poetry from 1360 to 1700, emphasizing forms, themes, and conventions that have become part of the continuing vocabulary of poetry, and exploring the strengths and limitations of different strategies of interpretation. Featured poets: Chaucer, Jonson, Shakespeare, Donne, and Milton.

Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)
ENGL B243 Historical Introduction to English Poetry II
The development of English poetry from 1700 to the present. This course is a continuation of ENGL 242 but can be taken independently. Featured poets: Wordsworth, Browning, Christina Rossetti, Yeats, Heaney, Walcott.
Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

ENGL B244 Unsettling Literacy
These two linked courses, co-designed by teachers in the Education Program and English Department, offer the Bi-Co alongside three placement sites-- a correctional facility, a re-entry program, and a youth art and advocacy project--as comparative contexts for experiences and reflections on the meanings of "literacy": What gives us access, to texts and selves? What are the outcomes of such educational processes? Do we imagine "learning our letters," in Frederick Douglas's words, as providing "the pathway from slavery to freedom," and/or (as claimed by a contemporary criminologist) as "training good workers for a problematic system"? How might "literacy" take on different meanings in different contexts? Does it enable learners to fill roles in stratified, normalizing institutions, and/or give us increased leeway in living our lives--perhaps even opening up what educator Jean Anyon calls "radical possibilities"? Placements will involve a weekly off-campus commitment of 3-4 hours. For more info, see https://serendip.brynmawr.edu/unsettling-literacies-unsettling-literacies-two-linked-courses-bryn-mawr-college-spring-2017
Approach: Critical Interpretation (CI)
Counts towards: Praxis Program
Units: 1.0
(Not Offered 2017-2018)

ENGL B247 Shakespeare's Teenagers
There was no such thing as a teenager in Shakespeare's England; the word doesn't enter the English language until the 20th century. Yet present-day writers and filmmakers often cast Shakespeare's young adults as teenaged characters, using adaptations to tell the story of today's teens coming of age. In this course, we'll study several Shakespeare plays and current versions them, including film, fiction, music and even a production of Romeo and Juliet conducted entirely over Twitter. Why do so many artists choose to represent present-day teen culture through Shakespeare? And can the notion of a "teen" protagonist productively be applied to Shakespeare's plays?
Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

ENGL B249 Love and Madness in Victorian Poetry
We commonly associate Victorian Britain with great works of fiction by writers such as Charles Dickens and Charlotte Brontë. However, the development of Victorian poetry over the same period of time, roughly 1830-1901, is a frequently overlooked site of immense creativity. This course will cover a broad array of topics from the Victorian Poetess to the Pre-Raphaelite School with a particular emphasis on the innovation of the dramatic monologue. Unlike the Romantic lyric, the dramatic monologue enables us to hear directly from a diversity of speakers who are frequently lovesick and mad. From murderers to narcissistic painters, the dramatic monologue represents the nuances of human thought that surface in language. Readings will include texts by Alfred Tennyson, Robert Browning, Elizabeth Barret Browning, Christina Rossetti, Dante Gabriel Rossetti, William Morris, George Meredith, Matthew Arnold, Augusta Webster, Amy Levy, and Oscar Wilde.
Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

ENGL B250 Methods of Literary Study
We will explore the power of language in a variety of linguistic, historical, disciplinary, social, and cultural contexts, focusing on the power of the written word to provide a foundational basis for the critical and creative analysis of literary studies. This course will help to broaden our ideas of what texts and language accomplish socially, historically, and aesthetically. Students will thus refine their faculties of reading closely, writing incisively and passionately, asking productive questions, producing their own compelling interpretations, and listening to the insights offered by others. Prerequisite: One English course or permission of instructor. English Majors and Minors must take before their senior year.
Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): Thomas,K., Taylor,J.
(Fall 2017, Spring 2018)

ENGL B254 Female Subjects: American Literature 1750-1900
This course explores the subject, subjection, and subjectivity of women and female sexualities in U.S. literatures between the signing of the Constitution and the ratification of the 19th Amendment. While the representation of women in fiction grew and the number of female authors soared, the culture found itself at pains to define the appropriate moments for female speech and silence, action and passivity. We will engage a variety of pre-suffrage literatures that place women at the nexus of national narratives of slavery and freedom, foreignness and domesticity, wealth and power, masculinity and citizenship, and sex and race "purity."
Approach: Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B259 Victorian Literature and Culture
Examines a broad range of Victorian poetry, prose, and fiction in the context of the cultural practices, social institutions, and critical thought of the time. Of particular interest are the revisions of gender, sexuality, class, nation, race, empire, and public and private life that occurred during this period.
Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

ENGL B260 Origin Stories: Human Perspectives On Beginnings
This course is part of the "Origin Stories" 360. It will begin with an examination of "Western" origin stories and philosophies of progress and history, with the intention of both historicizing and "making strange" the cultural inheritances most prevalent in Europe and post-contact North America. We will then turn to an in-depth analysis of the Diné Bahane', or "Story of the People," the creation cycle of the Navajo, focusing attention on
a geographically specific and temporally non-linear philosophy of origin and continuity. We will conclude with a series of contemporary Science Fiction and Fantasy engagements with the problem of origin, asking how we continue to reinvent our beginnings, and why. Throughout the course we will turn our attention to origin stories from various parts of the world that might specifically illuminate the science in the other two courses.

Approach: Cross-Cultural Analysis (CC)
Units: 1.0
(Not Offered 2017-2018)

ENGL B262 Survey in African American Literature

English 262 is a topics course that allows for multiple themes to be taught. Each topic will have its own description and students may enroll for credit in the course as long as the topics vary.

Current topic description: Nineteenth-Century African American Narrative. A study of the interplay of history, politics, art, and fiction, this course traces a chronological, new historicist path between the forging of a literary identity in a new nation and Pauline Hopkins’ Contending Forces (1900).

Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Intensive
Counts towards: Africana Studies; Gender and Sexuality Studies
Units: 1.0
Instructor(s): Beard, L-S.
(Spring 2018)

ENGL B263 Toni Morrison and the Art of Narrative Conjure

A comprehensive study of Morrison’s narrative experiments in fiction, this course traces her entire oeuvre from “Recitatif” to God Help the Child. We read the works in publication order with three main foci: Morrison-as-epistemologist questioning what it is that constitutes knowing and being known, Morrison-as-revisionary-teacher-of-reading-strategies, and Morrison in intertextual dialogue with several oral and literary traditions. In addition to critical essays, students complete a “Pilate Project” – a creative response to the works under study.

Approach: Critical Interpretation (CI)
Counts towards: Africana Studies; Gender and Sexuality Studies
Units: 1.0
Instructor(s): Beard, L-S.
(Fall 2017)

ENGL B264 Black Bards: Poetry in the Diaspora

An interrogation of poetic utterance in works of the African diaspora, primarily in English, this course addresses a multiplicity of genres, including epic, lyric, sonnet, rap, and mimetic jazz. The development of poetic theories at key moments such as the Harlem Renaissance and the Black Arts Movement will be explored.

Approach: Critical Interpretation (CI)
Counts towards: Africana Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B265 Wayward Youth: Criminalizing Adolescence in American Culture

This course looks at literary, cinematic, journalistic, and social science depictions of delinquent, runaway, homeless, and otherwise criminalized young people, from the early 1800s to the present. How did ideas about “youth” and “adolescence” emerge and how have they evolved in opposition to childhood and adulthood? How have ideas about “wayward” youth shaped and revealed conceptions of “normal” development? And how have representations and experiences of wayward youth, and responses by the police, social workers, and others, been inflected by race, gender, and sexuality? The course centers on four case studies of criminalized young people: first, the case of James “Little Jim” Guild, who was executed for murder in New Jersey in 1828, nine years before he would have been freed from slavery under the state’s gradual emancipation law; second, Alice Mitchell, who was convicted of murdering her lover Freda Ward in 1898 in Memphis; third, Trayvon Martin, who was fatally shot in Florida in 2012; and fourth, Gavin Grimm, a transgender teenager who sued his school for the right to use the boy’s bathroom in Virginia in 2016. Primary texts include Mark Twain’s Huckleberry Finn, G. Stanley Hall’s Adolescence, Rebel Without a Cause, and Jo Sinclair’s The Changelings. Secondary sources include works by Robin Bernstein, Lisa Duggan, Don Romesburg, Regina Kunzel, Miroslava Chávez-Garcia, and Eric Schneider.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Vider,S.
(Spring 2018)

ENGL B267 The Romantic Imagination

Many of our contemporary ideas about both the imagination and the power of art to change the world originate from British Romantic literature. These ideas developed in a short but intensely creative period of literary and cultural history spanning from the 1790s to the 1820s. This is an age of political upheaval, scientific discovery, and social revolution. We will foreground our discussion of these radical transformations in art and politics by reading the prose of Edmund Burke, Mary Wollstonecraft, and William Godwin. We will then examine the rise of Romanticism in the poetry of William Wordsworth and Samuel Taylor Coleridge by focusing on their groundbreaking text _Lyrical Ballads_. We will use this poetry to define the power of what these writers called the “imagination.” The course will then turn toward the later Romantics, who responded to these artistic and political ideals in surprising ways. Readings may include Percy By sside Shelley’s _The Cenci_, John Keats’s _Odes_, and Lord Byron’s _Childe Harold’s Pilgrimage_. Our study of verse will be complemented by fiction writers of the period such as Jane Austen and Mary Shelley. An assortment of critical texts will enable us to situate these works in their cultural, social, and literary contexts.

Approach: Critical Interpretation (CI)
Counts towards: Africana Studies; Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B270 American Girl: Childhood in U.S. Literatures, 1690-1935

This course will focus on the “American Girl” as a particularly contested model for the nascent American. Through examination of religious tracts, slave and captivity narratives, literatures for children and adult literatures about childhood, we will analyze U. S. investments in girlhood as a site for national self-fashioning.

Approach: Critical Interpretation (CI)
Counts towards: Child and Family Studies; Gender and Sexuality Studies
Units: 1.0
Instructor(s): Schneider,B.
(Spring 2018)

ENGL B279 Introduction to African Literature

Taking into account the oral, written, aural, and visual forms
Instructor(s): Schneider, B.
Units: 1.0
(Not Offered 2017-2018)

ENGL B293 Critical Feminist Studies: An Introduction
Combines the study of specific literary texts with larger questions about feminist forms of theorizing. Three book length texts will be supplemented by on-line readings. Students will review current scholarship, identify their own stake in the conversation and define a critical question they want to pursue at length.
Approach: Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B296 Introduction to Medieval Drama
Introduces students to the major types of dramatic production in the Middle Ages: mystery plays, morality plays, and miracle plays. Also examines early Protestant political drama known as "interludes" and the translation of medieval plays into contemporary films and novellas. Explores the construction of local communities around professional acting and production guilds, different strategies of performance, and the relationship between the medieval dramatic stage and other kinds of "stages."
Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

ENGL B297 Terror, Pleasure, and the Gothic Imagination
Introduces students to the 18th-century origins of Gothic literature and its development across genres, media and time. Exploring the formal contours and cultural contexts of the enduring imaginative mode in literature, film, art, and architecture, the course will also investigate the Gothic's connection to the radical and conservative cultural agendas.
Approach: Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B302 Moby Dick
"It was the whiteness of the whale that above all things appalled me," Ishmael muses as he tries to understand the monomaniacal hunt that drives Captain Ahab and his crew of whalers of every race and creed to their watery doom. Herman Melville's 1851 Moby Dick and historical and critical materials surrounding it, will be the entire subject of this course. An allegory of a nation charging toward Civil War, a nation founded on ideals of freedom and equality, but built on capitalist expansion, white supremacy, slavery and genocide, Moby Dick is hailed by many (and many who have never read it) as "The Great American Novel." But which America, whose America? Written for the generation that would fight the Civil War, how does this novel continue to describe America, today? By turns comic, tragic, epic, mundane, thuddingly literal and gorgeously spiritual and metaphysical, the novel rewards both intricate close reading and an intense historical and critical analysis. We will take up questions of race, gender and sexuality, colonialism, the animal and the human, the oceanic, freedom, individuality, totalitarianism, capitalism, nation and belonging. Students will write a midterm and a final research paper.
Units: 1.0
Instructor(s): Schneider, B.
(Fall 2017)
ENGL B307 Philadelphia Freedom: Slavery, Liberty, Literature 1682-1899
Philadelphia, the City of Brotherly Love, a space of religious diversity, the hotbed of the American Revolution, the first large “free” city north of the slave states, a major center of free Black culture. In this course we will examine literature written in and about Philadelphia before the Civil War, exploring how and why Philadelphians engaged questions of freedom and non-freedom. Beginning with William Penn and the colonial city, moving through the literatures of Revolution and the Civil War, we will conclude with W. E. B. DuBois’ The Philadelphia Negro. We will take two field trips to the city and students will be expected to pursue city-based research projects.
Units: 1.0
(Not Offered 2017-2018)

ENGL B308 Islam and Europe in Premodern Literature
This course taps into early modern European literature’s fascination with Islam as a point of entry into contemporary theoretical debates about religion, secularization, migration, race, and nationalism. We will address topics such as: the Crusades; the fall of Granada; conversion; anti-Semitism and Islamophobia; settler colonialism; blood purity laws; and piracy and privateering. Authors may include Camaoes, Tasso, Massinger, Shakespeare, Marlowe, Cervantes, Ercilla, Percy, and de Hita.
Units: 1.0
Instructor(s): Gordon, C.
(Fall 2017)

ENGL B309 Native American Literature
This course focuses on late-20th-century Native literatures that attempt to remember and redress earlier histories of dispersal and genocide. We will ask how various writers with different tribal affiliations engage in discourses of humor, memory, repetition, and cultural performance to refuse, rework, or lampoon inherited constructions of the “Indian” and “Indian” history and culture. We will read fiction, film, and contemporary critical approaches to Native literatures alongside much earlier texts, including oral histories, political speeches, law, and autobiography. Readings may include works by Sherman Alexie, Diane Glancy, Thomas King, N. Scott Momaday, Leslie Marmon Silko, and Gerald Vizenor.
Units: 1.0
(Not Offered 2017-2018)

ENGL B310 Confessional Poetry
Poetry written since 1950 that deploys an autobiographical subject to engage with the psychological and political dynamics of family life and with states of psychic extremity and mental illness. Poets will include Lowell, Ginsberg, Sexton, and Plath. The impact of this ‘movement’ on late twentieth century American poetry will also receive attention. A prior course in poetry is desirable but not required.
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B311 Renaissance Lyric
For roughly half the semester we will focus on the sonnet, a form that was domesticated in England during the sixteenth century. The other half of the course will focus on the “metaphysical” poetry of John Donne, George Herbert, and Andrew Marvell.

ENGL B312 The Pencil of Nature: Victorian Literature and Photography
This seminar examines the complex and mutually-informing relationship between Victorian literature and photography. For example, to what extent is the realist novel indebted to photography’s invention, or alternatively, how has the novel shaped photography? To approach questions of this magnitude, the course is divided into a series of foundational thematic units that examine works of poetry, fiction, and non-fiction. We begin by thinking about the history of photography in several key texts by Susan Sontag, Carol Mavor, Roland Barthes, and Walter Benjamin. After we develop a vocabulary to discuss the medium’s history, we turn to its conception and how photography stems from the literature of Romanticism. This grounding in photography’s early language will help us to read fiction and poetry of the 1830s and 1840s. Other units will address photography’s role in constructing visions of the city, the use of photography in the Victorian culture of mourning, the ways in which the photograph can engender desire, the influence of photography on Pre-Raphaelite artists, and the sensationalism of Victorian crime depicted in photographs and stories.
Units: 1.0
(Not Offered 2017-2018)

ENGL B320 Black Feminist Literature
This course explores contemporary black feminist literature and culture on a transnational stage. We will consider the works of prominent, emerging, and underexplored black feminist writers from various African diaspora locations, including South Africa, West Africa, Europe, North America, and the Caribbean. How do these writers engage with key currents in global black feminist politics, including understandings of gender, sexuality, class, nationality and colonialism? How do they complicate these discussions in their work? We will ground our exploration in close study of black feminist poetics—the specific formal and creative choices that black feminist poets, fiction writers, visual artists, hip hop artists, webseries producers and others use to examine gender and sexuality in their art. Paying particular attention to the work of queer and LGBTI+ (Lesbian, Gay, Bisexual, Trans* and Intersex) artists, we will consider the various meanings of terms such as “black,” “feminist,” and “queer” in various parts of the African Diaspora. Our work will emphasize close analysis of black feminist writers’ works, as well as collaborative exercises and invited in-class discussions with several contemporary black diasporic feminist writers themselves. Requirements include two short papers, regular response papers, and a final project.
Counts towards: Africana Studies; Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Sullivan, M.
(Fall 2017)

ENGL B322 Love and Money
This course focuses on literary works that explore the relationship between love and money. We will seek to understand the separate and intertwined histories of these two arenas of human behavior and will read, along with literary texts,
essays by influential figures in the history of economics and sexuality. The course will begin with The Merchant of Venice, proceed through Pride and Prejudice to The Great Gatsby, and end with Hollywood movies.

Units: 1.0
(Not Offered 2017-2018)

ENGL B324 Topics in Shakespeare:
Films and play texts vary from year to year. The course assumes significant prior experience of Shakespearean drama and/or Renaissance drama.
Counts towards: Film Studies
Units: 1.0
Instructor(s): Gordon,C.
(Spring 2018)

ENGL B325 Why Shakespeare?
Shakespeare has been widely proclaimed the greatest playwright in the English language — but why and how did this come to be? Did Shakespeare really, as one famous critic has claimed, “invent the human,” or have a series of historical circumstances conspired to set the playwright on a pedestal? This course has two aims: first, we will perform close readings of selected Shakespeare sonnets and plays through the lens of cultural history; second, we will draw on critical theory (e.g. Barthes, Foucault) to investigate theories of authorship and “genius,” exploring how the posthumous construction of Shakespeare as an author shaped how we understand these very categories.

Units: 1.0
(Not Offered 2017-2018)

ENGL B326 Topics in Renaissance Literature
This is a topics course. Course content varies.
Units: 1.0
(Not Offered 2017-2018)

ENGL B330 Sidekicks: Natives in the American Literary Canon from Crusoe to Moby Dick
How have written Indians — the Tontos, Fridays, Pocahontases and Queequegs of the American canon — been adopted, mimicked, performed and undermined by Native American authors? This course will examine how canonical and counter-canonical texts invent and reinvent the place of the Indian across the continuing literary “discovery” of America from 1620 to the present. Readings include The Last of the Mohicans, The Lone Ranger and Tonto Fistfight in Heaven, Moby Dick and Robinson Crusoe. Critical texts, research presentations, written assignments and intensive seminar discussion will address questions of cultural sovereignty, mimesis, literacy versus orality, literary hybridity, intertextuality and citation.

Units: 1.0
(Not Offered 2017-2018)

ENGL B333 Lesbian Immortal
Lesbian literature has repeatedly figured itself in alliance with tropes of immortality and eternity. Using recent queer theory on temporality, and 19th and 20th century primary texts, we will explore topics such as: fame and notoriety; feminism and mythology; epistemes, erotics and sexual seasonality; the death drive and the uncanny; fin de siecle manias for mummies and seances.
Counts towards: Gender and Sexuality Studies

Units: 1.0
(Not Offered 2017-2018)

ENGL B335 Beyond the Human
This course will explore recent “materialist” approaches to literature which reject the notion that what is human is better than what is non-human. Generally what supposedly makes humans valuable is the mind, so we will look at works that treat the mind as just another body part. We will also read some critical theory that explains how valuing the mind over the body, the human over the animal, has been used to support racism, sexism, and colonialism — and has led to the destruction of the ecological system. The course will include both works that present the social, political, and biological horrors resulting from the separation of the non-human from the human, and works that imagine humans merging with nature. The reading in the course will include selections from books of “materialist” theory (such as Jane Bennett’s Vibrant Matter: A Political Ecology of Things), novels (Djuna Barnes, Nightwood, Franz Kafka, Metamorphosis), nonfiction (Annie Dillard, Pilgrim at Tinker Creek), and movies (Ousmane Sembene, Xala, James Cameron, Avatar).

Units: 1.0
Instructor(s): Tratner,M.
(Spring 2018)

ENGL B336 Topics in Film
This is a topics course. Course content varies. Current topic description: We’ll consider how voice has changed film & how film has changed the voice, studying cinema from 1920s to now & theories about voice.
Counts towards: Film Studies
Units: 1.0
Instructor(s): Bryant,S.
(Spring 2018)

ENGL B338 Literate Images—Literature and Visual Culture
This course examines the complex and mutually-informing relationship between literature and images, especially in the nineteenth through twenty-first centuries. We will read broadly in visual culture to elucidate not only written texts, but also photographs, films, paintings, and graphic narratives. We will also consider images that are invisible or that cannot otherwise be seen. Our investigation will begin with questions that are both imaginative and ethical: How does a Victorian poet help us to understand the photographs taken by a contemporary serial killer? What can we see in the literary description of an image that cannot be seen in the image itself? Should we look at the last moments of a human life? The syllabus is divided into a series of foundational thematic units. We will begin the semester thinking about sight and how to look at an image in terms of narrative. To this end, we will read an account written by an art model who describes her experience of posing nude, a narrative that will inform our work with Laura Mulvey’s influential essay, Visual Pleasure and Narrative Cinema.” This theoretical grounding in the gaze and its troubling power will help us to confront Robert Browning’s dramatic monologues read with and against photographs taken by criminals. Our next unit will focus on definitions of reality and objectivity in images and narrative accounts of the Holocaust. Readings might include Primo Levi’s The Drowned and the Saved, Art Spiegelman’s Maus, Marianne Hirsch’s The Generation of Postmemory, Susan Sontag’s Regarding the Pain of Others, and Georges Didi-Huberman’s Images in Spite of All. We then consider the
problem of representation by drawing on the tradition of poetic ekphrasis to think about visualizing art in literature by John Keats, P. B. Shelley, W. H. Auden, Adam Kirsch, and Natasha Trethewey. Our next unit takes us into the media of reproduction, and we read Walter Benjamin and Roland Barthes along with a novel by W. G. Sebald. Our discussion continues as we address spectacle, surveillance, and consumption in the imagery and literature created in the aftermath of September 11th, including Art Spiegelman’s In the Shadow of No Towers, W. J. T. Mitchell's Cloning Terror, Jonathan Crary’s 24/7, and Judith Butler’s Precarious Life. Our final unit takes us back to the foundation of the course—the relationship between art and illusion—that we find in Paul Auster’s novel, The Book of Illusions, and E. H. Gombrich

**ENGL B345 Topics in Narrative Theory**

This is a topics course. Course content varies.

Counts towards: Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies

Units: 1.0

(Not Offered 2017-2018)

**ENGL B347 Medievalisms**

This course assesses how the “Middle Ages” has been and continues to be constructed as a period of history, an object of inquiry, and a category of analysis. It considers how the past is formulated and called upon to conduct the ideological and cultural work of the present, and it reads historical documents and literary texts in dialogue with one another. Suggested Preparation: At least one 200-level course in any area of medieval studies (although more than one course is preferred), or by permission of the instructors. Additionally, this course is not open to students who took ENG/HIST 246 in 2013.

Units: 1.0

(Not Offered 2017-2018)

**ENGL B354 Virginia Woolf**

Virginia Woolf has been interpreted as a feminist, a modernist, a crazy person, a resident of Bloomsbury, a victim of child abuse, a snob, a socialist, and a creation of literary and popular history. We will try out all these approaches and examine the features of our contemporary world that influence the way Woolf, her work, and her era are perceived. We will also attempt to theorize about why we favor certain interpretations over others.

Counts towards: Gender and Sexuality Studies

Units: 1.0

(Not Offered 2017-2018)

**ENGL B355 Performance Studies**

Introduces students to the field of performance studies, a multidisciplinary species of cultural studies which theorizes human actions as performances that both construct and resist cultural norms of race, gender, and sexuality. The course will explore “performativity” in everyday life as well as in the performing arts, and will include multiple viewings of dance and theater both on- and off-campus. In addition, we will consider the performative aspects of film and video productions.

Counts towards: Gender and Sexuality Studies; Film Studies

Units: 1.0

(Not Offered 2017-2018)

**ENGL B359 Dead Presidents**

Framed by the extravagant funerals of Presidents Washington and Lincoln, this course explores the cultural importance of the figure of the President and the Presidential body, and of the 19th-century preoccupations with death and mourning, in the U.S. cultural imaginary from the Revolutionary movement through the Civil War.

Units: 1.0

(Not Offered 2017-2018)

**ENGL B361 Literature of Dissent**

This course examines literary and historical texts engaged with the social, political, and religious upheavals in late medieval England, including the Black Death, the Hundred Years War, the Peasants’ Revolt of 1381, the tyranny and deposition of Richard II, and religious repression. In doing so, this course asks students to think about relationships between literary production and political resistance, legal threat, and social change. In what ways can literature formulate and foment social dissent? How does literature comment on contemporary political, religious, or social controversies? What literary opportunities and forms emerged from the peculiar instability of this period? Suggested Preparation: At least one 200-level English or literature course.

Units: 1.0

(Not Offered 2017-2018)

**ENGL B362 African American Literature: Hypercanonical Codes**

Intensive study of six 18th-21st century hypercanonical African American written and visual texts (and critical responses) with specific attention to the tradition’s long use of speaking in code and in multiple registers simultaneously. Focus on language as a tool of opacity as well as transparency, translation, transliteration, invention and resistance. Previous reading required.

Counts towards: Africana Studies

Units: 1.0

(Not Offered 2017-2018)

**ENGL B364 Slum Fiction: From Dickens to The Wire**

David Simon’s acclaimed television show The Wire has repeatedly been related to the Victorian novel. This course links Victorian London and 20th-century Baltimore by studying: literary relations between Dickens and Poe; slum writing; the rise of the state institution; a genealogy of serial fiction from the nineteenth century novel to television drama.

Units: 1.0

(Not Offered 2017-2018)

**ENGL B367 Asian American Film Video and New Media**

The course explores the role of pleasure in the production, reception, and performance of Asian American identities in film, video, and the internet, taking as its focus the sexual representation of Asian Americans in works produced by Asian American artists from 1915 to present. In several units of the course, we will study graphic sexual representations, including pornographic images and sex acts some may find objectionable. Students should be prepared to engage analytically with all class material. To maintain an atmosphere of mutual respect and solidarity among the participants in the class, no auditors will be allowed.

Counts towards: Gender and Sexuality Studies; Film Studies
ENGL B368 Pleasure, Luxury, and Consumption
Course will consider pleasure and consumerism in English texts and culture of the 17th and 18th centuries. Readings will include classical and neoclassical philosophies of hedonism and Epicureanism, Defoe’s “Roxana”, Mandeville’s “Fable of the Bees”, Pope’s “Rape of the Lock”, John Gledan’s “Memoirs of a Woman of Pleasure” and early periodical essays, among others. Secondary readings will include critical studies on cultural history and material culture. Prerequisites: at least two 200-level English courses.
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B375 Sex on Screens
This course will provide a historical and theoretical overview of the ways moving image sex acts have been represented on screen, from early cinema’s silent film loops to today’s celebrity sex tapes. We will examine the ideological operations of sex in the cinema and aim to comprehend the multifarious ways viewers, filmmakers, critics, and scholars respond to dominant conceptions of sex-sexuality through alternative cinematic production and critical scholarship. Units include: stag movies, the Production Code and ratings system, European art cinema, sex ed, underground and the avant-garde, cult / sexploitation / blaxploitation, sexual revolution, hard core, women’s cinema, home video, queer cinema, HIV/AIDS, the digital revolution, feminist porn, and the Internet. Prerequisites: ENGL / COML B110: Identification in the Cinema; or ENGL / HART 205: Introduction to Film; or ENGL B299 History of Narrative Cinema, 1945 to the Present.
Counts towards: Gender and Sexuality Studies; Film Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B379 The African Griot(te)
English 379 is a capstone topics course in the study of two or more distinguished African writers who have made significant contributions to African literary production. The focus changes from one semester to the next so that students may re-enroll in the course for credit. The specific focus of each semester’s offering of the course is outlined separately.
Approach: Critical Interpretation (CI)
Counts towards: Africana Studies; Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B390 Medieval Race
Examines how late medieval writers understood racial, cultural, and ethnic differences, exploring how “race” can be understood as multiple systems of power that link together cultural and religious identities, the body, and performance. Focuses on medieval vocabularies and depictions of racial and cultural difference, community-formation, and “foreignness.”
Units: 1.0
Instructor(s): Beard, L-S.
(Spring 2018)

ENGL B391 Post-Apartheid Literature
South African texts from several language communities which anticipate a post-apartheid polity and texts by contemporary South African writers which explore the complexities of life in the post-apartheid polity and texts by contemporary South African writers which explore the complexities of life in “the new South Africa.” Several films emphasize the minefield of post-apartheid reconciliation and accountability.
Counts towards: Africana Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B398 Senior Seminar
Required preparation for ENGL 399 (Senior Essay). Through weekly seminar meetings and regular writing and research assignments, students will design a senior essay topic or topics of their choice, frame exciting and practical questions about it, and develop a writing plan for its execution. Students will leave the course with a departmentally approved senior essay prospectus, an annotated bibliography on their chosen area of inquiry, and 10 pages of writing towards their senior essay. Students must pass the course in order to enroll in ENGL 399.
Prerequisite: Student must be an English major at Bryn Mawr.
Units: 1.0
Instructor(s): Hemmeter, G., Schneider, B.
(Fall 2017)

ENGL B399 Senior Essay
Supervised independent writing project required of all English majors. Students must successfully complete ENGL 398 (Senior Conference) and have their Senior Essay prospectus approved by the department before they enroll in ENGL 399.
Prerequisite: Student must be an English major at Bryn Mawr.
ENGL B403 Supervised Work
Advanced students may pursue independent research projects. Permission of the instructor and major adviser is required.
Units: 1.0
(Fall 2017)

ARTW B999 Creative Writing
This course is for students who wish to experiment with three genres of creative writing: short fiction, poetry and drama, and techniques specific to each of them. Priority will be given to interested first- and second-year students; additional spaces will be made available to upper-year students with little or no experience in creative writing. Students will write or revise work every week; roughly four weeks each will be devoted to short fiction, poetry, and drama. There will be individual conferences with the instructor to discuss their progress and interests. Half of class time will be spent discussing student work and half will be spent discussing syllabus readings.
Prerequisite: Students interested in a Creative Writing course must register for ARTW B999 and turn in the creative writing questionnaire by the end of registration.
Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Matthews, A.
(Fall 2017)

ARTW B159 Introduction to Creative Writing
This course is for students who wish to experiment with three genres of creative writing: short fiction, poetry and drama, and techniques specific to each of them. Priority will be given to interested first- and second-year students; additional spaces will be made available to upper-year students with little or no experience in creative writing. Students will write or revise work every week; roughly four weeks each will be devoted to short fiction, poetry, and drama. There will be individual conferences with the instructor to discuss their progress and interests. Half of class time will be spent discussing student work and half will be spent discussing syllabus readings.
Prerequisite: Students interested in a Creative Writing course must register for ARTW B999 and turn in the creative writing questionnaire by the end of registration.
Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Feldman, L.
(Spring 2018)

ARTW B262 Playwriting I
An introduction to playwriting through a combination of reading assignments, writing exercises, discussions about craft and ultimately the creation of a complete one-act play. Students will work to discover and develop their own unique voices as they learn the technical aspects of the craft of playwriting. Short writing assignments will complement each reading assignment. The final assignment will be to write an original one-act play.
Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Feldman, L.
(Fall 2017)

ARTW B263 Writing Memoir I
The purpose of this course is to provide students with practical experience in writing about the events, places and people of their own lives in the form of memoir. Emphasis will be placed on open-ended investigation into what we think we know (about ourselves and others) and how we think we came to know it. In addition to writing memoir of their own, and workshop discussions, students will also read and discuss works by writers such as Montaigne, Hazlitt, Freud, H.D., J.R. Ackerley, Georges Perec, and more contemporary writing by writers such as Akeel Bilgrami, Elif Batuman, Emily Witt, Lawrence Jackson. Although little mention will be made of the master narratives of American memoir—Christian redemption, confession, captivity, and slavery—the class will consistently struggle to come to terms with their foundational legacy in American life and letters.
Approach: Critical Interpretation (CI)
Units: 1.0
(Fall 2017)

ARTW B264 News and Feature Writing
Students in this class will learn how to develop, report, write, edit and revise a variety of news stories, beginning with the basics of reporting and writing the news and advancing to longer-form stories, including personality profiles, news features and trend stories, and concluding with point-of-view journalism (columns, criticism, reported essays). The course will focus heavily on work published in The Philadelphia Inquirer and The New York Times. Several working journalists will participate as guest speakers to
explain their craft. Students will write stories that will be posted on the class blog, the English House Gazette.

Prerequisite: Students interested in a Creative Writing course must register for ARTW B999 and turn in the creative writing questionnaire by the end of registration.

Prerequisite: Students interested in a Creative Writing course must register for ARTW B999 and turn in the creative writing questionnaire by the end of registration.

Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Ferrick,T.
(Fall 2017)

ARTW B265 Creative Nonfiction

This course will explore the literary expressions of nonfiction writing by focusing on the skills, process and craft techniques necessary to the generation and revision of literary nonfiction. Using the information-gathering tools of a journalist, the analytical tools of an essayist and the technical tools of a fiction writer, students will produce pieces that will incorporate both factual information and first person experience. Readings will include a broad group of writers ranging from E.B. White to Anne Carson, George Orwell to David Foster Wallace, Joan Didion to James Baldwin, among many others.

Prerequisite: Students interested in a Creative Writing course must register for ARTW B999 and turn in the creative writing questionnaire by the end of registration.

Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Liontas,A.
(Fall 2017)

ARTW B266 Screenwriting

An introduction to screenwriting. Issues basic to the art of storytelling in film will be addressed and analyzed: character, dramatic structure, theme, setting, image, sound. The course focuses on the film adaptation; readings include novels, screenplays, and short stories. Films adapted from the readings will be screened. In the course of the semester, students will be expected to outline and complete the first act of an adapted screenplay of their own.

Approach: Critical Interpretation (CI)
Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

ARTW B269 Writing for Children

In this course, students have the opportunity to hone the craft of writing for children and young adults. Through reading, in-class discussion, peer review of student work, and private conferences with the instructor, we will examine the specific requirements of the picture book, the middle-grade novel, and the young adult novel. This analytical study of classic and contemporary literature will inspire and inform students’ creative work in all aspects of storytelling, including character development, plotting, world building, voice, tone, and the roles of illustration and page composition in story narration.

Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

ARTW B360 Writing Short Fiction II

An exploration of approaches to writing short fiction designed to strengthen skills of experienced student writers as practitioners and critics. Requires writing at least five pages each week, workshop student pieces, and reading texts ranging from realist stories to metafictional experiments and one-page stories to the short novella, to explore how writers can work within tight confines. Suggested Preparation: ARTW B260 or work demonstrating equivalent expertise in writing short fiction. Students without the ARTW B260, must submit a writing sample of 10-15 pages in length (prose fiction) to the Creative Writing Program during the preregistration period to be considered for this course.

Prerequisite: Students interested in a Creative Writing course must register for ARTW B999 and turn in the creative writing questionnaire by the end of registration.

Units: 1.0
Instructor(s): Torday,D.
(Fall 2017)

ARTW B361 Writing Poetry II

This course assumes that reading and writing are inextricably linked, and that the only way to write intelligent and interesting poetry is to read as much of it as possible. Writing assignments will be closely connected to syllabus reading, including an anthology prepared by the instructor, and may include working in forms such as ekphrastic poems (i.e. poems about works of visual art or sculpture), dramatic monologues, prose poems, translations, imitations and parodies. Suggested Preparation: ARTW B261 or work demonstrating equivalent familiarity with the basic forms of poetry in English. For students without ARTW B261, a writing sample of 5-7 poems must be submitted to the instructor to be considered for this course.

Prerequisite: Students interested in a Creative Writing course must register for ARTW B999 and turn in the creative writing questionnaire by the end of registration.

Units: 1.0
Instructor(s): Matthews,A.
(Spring 2018)

ARTW B362 Playwriting II

This course challenges students of playwriting to further develop their unique voices and improve their technical skills in writing for the stage. We will examine how great playwrights captivate a live audience through their mastery of character, story and structure. Through a combination of weekly reading assignments, playwriting exercises, theater explorations, artist-driven feedback, and discussions of craft, this class will facilitate each student’s completion of an original, full-length play. Prerequisite: ARTW 262; or suitable experience in directing, acting or playwriting; or submission of a work sample of 10 pages of dialogue. All students must complete the Creative Writing preregistration questionnaire during preregistration to be considered for the course.

Units: 1.0
(Not Offered 2017-2018)

ARTW B364 Longer Fictional Forms

An advanced workshop for students with a strong background in fiction writing who want to write longer works: the long short story, novella and novel. Students will write intensively, and complete a long story, novella or novella (or combination thereof) totaling up to 20,000 words. Students will examine the craft
of their work and of published prose. Suggested Preparation: ARTW B260 or proof of interest and ability. For students without ARTW B260, students must submit a writing sample of 10-15 pages in length (prose fiction) to the Creative Writing Program during the preregistration period to be considered for this course.

Prerequisite: Students interested in a Creative Writing course must register for ARTW B999 and turn in the creative writing questionnaire by the end of registration.

Units: 1.0
(Spring 2018)

COML B293 The Play of Interpretation
Designated theory course. A study of the methodologies and regimes of interpretation in the arts, humanistic sciences, and media and cultural studies, this course focuses on common problems of text, authorship, reader/spectator, and translation in their historical and formal contexts. Literary, oral, and visual texts from different cultural traditions and histories will be studied through interpretive approaches informed by modern critical theories. Readings in literature, philosophy, popular culture, and film will illustrate how theory enhances our understanding of the complexities of history, memory, identity, and the trials of modernity.

Approach: Critical Interpretation (CI)
Counts towards: International Studies
Units: 1.0
(Not Offered 2017-2018)

COML B398 Theories and Methods in Comparative Literature
This course, required of all senior comparative literature majors in preparation for writing the senior thesis in the spring semester, has a twofold purpose: to review interpretive approaches informed by critical theories that enhance our understanding of literary and cultural texts; and to help students prepare a preliminary outline of their senior theses. Throughout the semester, students research theoretical paradigms that bear on their own comparative thesis topics in order to situate those topics in an appropriate critical context. This is a required for majors and minors.

Units: 1.0
Instructor(s): Seyhan,A.
(Fall 2017)

EALC B255 Understanding Comics: Introduction to Reading the Graphic No
The graphic narrative form has proliferated at a breathtaking rate in the last several decades. Called “comics,” “graphic novels,” and many other terms in between, these word-image hybrids have been embraced by both popular and critical audiences. But what is a graphic novel? How do we conceive of these texts and, more importantly, how do we read, interpret and write about them? This course is focused on approaches to reading the graphic novel, with a focus on a subgenre called the “literary comic.” Our first approach is to consider different kinds of primary source texts and ask if and how they fulfill our understanding of the graphic narrative. This consideration will include various test cases, from wordless comics, to texts used as images, to the many varieties of word-image hybrids that are called comic books. Our second approach is to examine different scholarly approaches to analyzing graphic narratives, based in different disciplines such as memoir studies, trauma studies, visual and material culture, history, semiotics, and, especially, narratology.

Primary source readings include texts by Ware, Barry, Clowes, and Burns. Secondary readings include Hirsch, McCloud, Barthes, Iser, and Groensteen. Three short assignments due during the semester, and a final project due at the end of exam period (see description below). Students will also rotate responsibilities for starting discussions with small presentations aimed at discussing readings in depth. Students taking this course for their major in EALC or COML should meet with the instructor to discuss specific requirements.

Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Attentive
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Kwa,S.
(Spring 2018)

EDUC B244 Unsettling Literacy: Praxis
These two linked courses, co-designed by teachers in the Education Program and English Department, offer the Bi-Co alongside three placement sites—a correctional facility, a re-entry program, and a youth art and advocacy project—as comparative contexts for experiences and reflections on the meanings of “literacy”: What gives us access, to texts and selves? What are the outcomes of such educational processes? Do we imagine “learning our letters,” in Frederick Douglas’s words, as providing “the pathway from slavery to freedom,” and/or (as claimed by a contemporary criminologist) as “training good workers for a problematic system”? How might “literacy” take on different meanings in different contexts? Does it enable learners to fill roles in stratified, normalizing institutions, and/or give us increased leeway in living our lives—perhaps even opening up what educator Jean Anyon calls “radical possibilities”? Placements will involve a weekly off-campus commitment of 3-4 hours. For more info, see https://serendip.brynmawr.edu/ oneworld/unsettling-literacies/unsettling-literacies-two-linked-courses-bryn-mawr-college-spring-2017

Approach: Cross-Cultural Analysis (CC)
Major Writing Requirement: Writing Intensive
Counts towards: Praxis Program
Units: 1.0
(Not Offered 2017-2018)

ENGL B425 Praxis III: Independent Study
Praxis III courses are Independent Study courses and are developed by individual students, in collaboration with faculty and field supervisors. A Praxis courses is distinguished by genuine collaboration with fieldsite organizations and by a dynamic process of reflection that incorporates lessons learned in the field into the classroom setting and applies theoretical understanding gained through classroom study to work done in the broader community.

Counts towards: Praxis Program
Units: 1.0
(Not Offered 2017-2018)

FREN B213 Theory in Practice: Critical Discourses in the Humanities
By bringing together the study of major theoretical currents of the 20th century and the practice of analyzing literary works in the light of theory, this course aims at providing students with skills to use literary theory in their own scholarship. The selection of theoretical readings reflects the history of theory (psychoanalysis, structuralism, narratology), as well as the currents most relevant
to the contemporary academic field: Post-structuralism, Post-colonialism, Gender Studies, and Ecocriticism. They are paired with a diverse range of short stories (Poe, Kafka, Camus, Borges, Calvino, Morrison, Djebar, Ngozi Adichie) that we discuss along with our study of theoretical texts. The class will be conducted in English with an additional hour in French for students wishing to take it for French credit.

Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): King,H.
(Fall 2017)

HART B299 History of Narrative Cinema, 1945 to the present
This course surveys the history of narrative film from 1945 through contemporary cinema. We will analyze a chronological series of styles and national cinemas, including Classical Hollywood, Italian Neorealism, the French New Wave, and other post-war movements and genres. Viewings of canonical films will be supplemented by more recent examples of global cinema. While historical in approach, this course emphasizes the theory and criticism of the sound film, and we will consider various methodological approaches to the aesthetic, socio-political, and psychological dimensions of cinema. Readings will provide historical context, and will introduce students to key concepts in film studies such as realism, formalism, spectatorship, the auteur theory, and genre studies. Fulfills the history requirement or the introductory course requirement for the Film Studies minor.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Film Studies
Units: 1.0
Instructor(s): King,H.
(Fall 2017)

HART B306 Film Theory
An introduction to major developments in film theory and criticism. Topics covered include: the specificity of film form; cinematic realism; the cinematic “author”; the politics and ideology of cinema; the relation between cinema and language; spectatorship, identification, and subjectivity; archival and historical problems in film studies; the relation between film studies and other disciplines of aesthetic and social criticism. Each week of the syllabus pairs critical writing(s) on a central principle of film analysis with a cinematic example. Class will be divided between discussion of critical texts and attempts to apply them to a primary cinematic text. Prerequisite: A course in Film Studies (HART B110, HART B299, ENGL B205, or the equivalent from another college by permission of instructor).

Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

HART B334 Topics in Film Studies
This is a topics course. Course content varies. Current topic description: D. N. Rodowick argued that the digital arts “are the most radical instance yet of an old Cartesian dream: the best representations are the most immaterial ones because they seen to free the mind from the body and the world of substance.” In this seminar, we will explore digital images in relation to cinema, photography, and other media. We will examine the fate of materiality, the body, and duration in 21st c. media, and consider whether the digital marks a significant break from the analog.

Counts towards: Film Studies
Units: 1.0
Instructor(s): King,H.
(Spring 2018)

ITAL B213 Theory in Practice: Critical Discourses in the Humanities
An examination in English of leading theories of interpretation from Classical Tradition to Modern and Post-Modern Time. This is a topics course. Course content varies.

Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

RUSS B238 Topics: The History of Cinema 1895 to 1945
This is a topics course. Course content varies.

Approach: Inquiry into the Past (IP)
Major Writing Requirement: Writing Attentive
Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

RUSS B277 Nabokov in Translation
A study of Vladimir Nabokov’s writings in various genres, focusing on his fiction and autobiographical works. The continuity between Nabokov’s Russian and English works is considered in the context of the Russian and Western literary traditions. All readings and lectures in English.

Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Harte,T.
(Spring 2018)

SPAN B332 Novelas de las Américas
What do we gain by reading a Latin American or a US novel as “American” in the continental sense? What do we learn by comparing novels from “this” America to classics of the “other” Americas? Can we find through this Panamericanist perspective common aesthetics, interests, conflicts? In this course we will explore these questions by connecting and comparing major US novels with Latin American classics of the 20th and 21st century. We will read these works in clusters to illuminate aesthetic, political and cultural resonances and affinities. This course is taught in Spanish. Prerequisite: at least one SPAN 200-level course.

Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

ENVIRONMENTAL STUDIES

Students may complete a minor in Environmental Studies as an adjunct to any major at Bryn Mawr, Haverford, or Swarthmore pending approval of the student’s coursework plan by the home department and the home-campus Environmental Studies director.
Faculty

Co-Directors:
Don Barber, Associate Professor of Geology on the Harold Alderfer Chair in Environmental Studies
Victor Donnay, Professor of Mathematics on the William R. Kenan, Jr. Chair and Co-Director of Environmental Studies

Affiliated Faculty at Bryn Mawr:
Andrea Borghini, Visiting Associate Professor from College of the Holy Cross
Jody Cohen, Term Professor in the Bryn Mawr/Haverford Education Program
Selby Cull, Assistant Professor of Geology
Robert Dostal, Rufus M. Jones Professor and Chair of Philosophy
Jonas Goldsmith, Associate Professor of Chemistry
Karen Greif, Professor of Biology
Carol Hager, Professor of Political Science on the Clowes Professorship in Science and Public Policy
Yonglin Jiang, Co-Chair and Associate Professor, East Asian Culture and Languages
Pedro Marenco, Assistant Professor of Geology
Gary McDonogh, Helen Herrmann Chair and Professor of Growth and Structure of Cities
Tom Mozdzer, Assistant Professor of Biology
Kalala Ngalamulume, Associate Professor of Africana Studies and History, Co-Director of International Studies, and Co-Director of Health Studies (spring)
Sydne Record, Assistant Professor of Biology
Michael Rock, Samuel and Etta Wexler Professor of Economic History
David Ross, Associate Professor of Economics
Nathan Wright, Chair and Associate Professor of Sociology

The Johanna Alderfer Harris Environmental Studies Program at Bryn Mawr College enables students and faculty to come together to explore academic interests in the environment. The program sponsors speakers, special events, and field trips, and offers support for student work during the summer, in the form of the college’s competitive Green Grants. In addition, The Harris Environmental Studies Program is the Bryn Mawr campus home for the Tri-College Environmental Studies Minor. The program benefits from two endowed chairs in Environmental Studies, The Johanna Alderfer Harris and William H. Harris, M.D. Chair in Environmental Studies and the Harold Alderfer Chair in Environmental Studies, currently held by Geology Associate Professor Donald Barber.

The Tri-Co Environmental Studies Minor

Bryn Mawr, Haverford and Swarthmore Colleges offer Tri-College Environmental Studies Interdisciplinary Minor, involving departments and faculty from the natural sciences, mathematics, engineering, the social sciences, the humanities, and the arts on all three campuses. The Tri-College Environmental Studies Minor aims to bring students and faculty together to explore interactions among earth systems, human societies, and local and global environments.

The Tri-Co ENVS Minor aims to cultivate in students the capacity to identify and confront key environmental issues through a blend of multiple disciplines, encompassing historical, cultural, economic, political, scientific, and ethical modes of inquiry. Acknowledging the reciprocal dimensions of materiality and culture in the historical formation of “the” environment, this program is broadly framed by a series of interlocking dialogues: between the “natural” and the “built”; between the local and the global; and between the human and the nonhuman.

The minor consists of six courses, including an introductory course and capstone course, and the courses may be completed at any of the three campuses (or any combination thereof). To declare the minor, students should contact the Environmental Studies director at their home campus.

Minor Requirements

The Environmental Studies Interdisciplinary Minor consists of six courses, as follows:

• A required introductory course to be taken prior to the senior year. This may be ENVS 101 at Bryn Mawr or Haverford or the parallel course at Swarthmore College (ENVS 001). Any one of these courses will satisfy the requirement, and students may take no more than one such course for credit toward the minor.

• Four elective course credits from approved lists of core and cognate courses, including two credits in each of the following two categories (A and B). No more than one cognate course credit may be used for each category (see course list below for more information about core and cognate courses).

(A) Environmental Science, Engineering & Math: courses that build understanding and knowledge of scientific methods and theories, and that explore how these can be applied in identifying and addressing environmental questions. At least one of these courses in this category must have a laboratory component.

(B) Environmental Social Sciences, Humanities & Arts: courses that build understanding and knowledge of social and political structures as well as ethical considerations, and how these inform our individual and collective understandings of and responses to human and built environments.

• A senior seminar with culminating work that reflects tangible research design and inquiry, but which might materialize in any number of project forms. Bryn Mawr or Haverford College’s ENVS 397 (Environmental Studies Senior Seminar) and Swarthmore College’s ENVS 091 (Environmental Studies Capstone Seminar) satisfy the requirement.

Core Courses for the Environmental Studies Minor

• Every student should take an introductory course (101 or 001) before the senior year
• Every student should take a capstone course (397 or 091) during the senior year

Bryn Mawr
• ENVS 101 Introduction to Environmental Studies
• ENVS 397 Environmental Studies Senior Seminar
Approved Electives for the Environmental Studies Minor

- Two courses are required from each category (A and B)
- At least one course in Category A should have a lab.
- Only one course in each category may be a "cognate" course. Cognate courses, marked with an asterisk, are valuable for minor but are not as centrally focused on environmental studies methodologies and materials as other courses on the list.
- Pay close attention to "double-counting" rules for your major. You are encouraged to choose electives outside of your major.

the last 12,000 years, agriculture and urbanism, and we explore fundamental changes that have occurred in human society in this course examines the archaeology of the two most

ARCH B104 Archaeology of Agricultural and Urban Revolutions
This course examines the archaeology of the two most fundamental changes that have occurred in human society in the last 12,000 years, agriculture and urbanism, and we explore these in Egypt and the Near East as far as India. We also explore those societies that did not experience these changes. Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP) Counts towards: Geoaarchaeology; Middle Eastern & Islamic Studies Units: 1.0 (Not Offered 2017-2018)

BIOL B210 Biology and Public Policy
A lecture/discussion course on major issues and advances in biology and their implications for public policy decisions. Topics discussed include reproductive technologies, the Human Genome project, environmental health hazards, bioterrorism, and euthanasia and organ transplantation. Readings include scientific articles, public policy and ethical considerations, and lay publications. Lecture three hours a week. This class involves considerable writing. Prerequisite: One semester of BIOL 110-111, or permission of instructor. Counts towards: Environmental Studies; Health Studies Units: 1.0 Instructor(s): Greif,K. (Spring 2018)

BIOL B220 Ecology
A study of the interactions between organisms and their environments. The scientific underpinnings of current environmental issues, with regard to human impacts, are also discussed. Students will also become familiar with ecological principles and with the methods ecologists use. Students will apply these principles through the design and implementation of experiments both in the laboratory and the field. Lecture three hours a week, laboratory/field investigation three hours a week. There will be optional field trips throughout the semester. Prerequisite: One semester of BIOL B110 or B111 or permission of instructor. Approach: Scientific Investigation (SI) Major Writing Requirement: Writing Attentive Counts towards: Biochemistry and Molecular Biology; Environmental Studies Units: 1.0 Instructor(s): Mozdzer,T. (Fall 2017)

BIOL B225 Biology and Ecology of Plants
Plants are critical to numerous contemporary issues, such as ecological sustainability, economic stability, and human health. Students will examine the fundamentals of how plants are structured, how they function, how they interact with other organisms, and how they respond to environmental stimuli. In addition, students will be taught to identify important local species, and will explore the role of plants in human society and ecological systems. One semester of BIOL 110/111. Approach: Scientific Investigation (SI) Counts towards: Biochemistry and Molecular Biology; Environmental Studies Units: 1.0 (Not Offered 2017-2018)

This course examines the relationships between culture, society, disease and illness. It considers a broad range of health-related experiences, discourses, knowledge and practice among different cultures and among individuals and groups in different positions of power. Topics covered include sorcery, herbal remedies, healing rituals, folk illnesses, modern disease, scientific medical perceptions, clinical technique, epidemiology and political economy of medicine. Prerequisite: ANTH 102, H103 or permission of instructor. Approach: Cross-Cultural Analysis (CC) Counts towards: Environmental Studies; Health Studies Units: 1.0 (Not Offered 2017-2018)

ANTH B237 Environmental Health
This course introduces principles and methods in environmental anthropology and public health used to analyze global environmental health problems globally and develop health and disease control programs. Topics covered include risk; health and environment; food production and consumption; human health and agriculture; meat and poultry production; and culture, urbanization, and disease. Prerequisite: ANTH B102, H103 or permission of instructor. Approach: Cross-Cultural Analysis (CC) Counts towards: Environmental Studies; Health Studies Units: 1.0 (Not Offered 2017-2018)

ANTH B244 Global Perspectives on Early Farmers and Social Change
Throughout most of human history our ancestors practiced lifestyles focused upon the gathering and hunting of wild plants and animals. Today, however, a globalized agricultural economy supports a population of over seven billion individuals. This course utilizes information produced by archaeologists around the globe to examine this major historical transition while asking big questions like: What impact did the adoption of agriculture have on communities in the past, and how did farming spread to different world regions? We will also consider how the current farming system influences our own society. How does farming still affect our lives today, and how will the history of agricultural change shape our collective future? Counts toward Environmental Studies minor.

Approach: Inquiry into the Past (IP) Counts towards: Environmental Studies Units: 1.0 (Not Offered 2017-2018)

ENVS B403 Independent Study
Units: 1.0 (Fall 2017)

ANIM B102 Human Biology
A lecture/discussion course on major issues and advances in biology and their implications for public policy decisions. Topics discussed include reproductive technologies, the Human Genome project, environmental health hazards, bioterrorism, and euthanasia and organ transplantation. Readings include scientific articles, public policy and ethical considerations, and lay publications. Lecture three hours a week. This class involves considerable writing. Prerequisite: One semester of BIOL 110-111, or permission of instructor. Counts towards: Environmental Studies; Health Studies Units: 1.0 Instructor(s): Greif,K. (Spring 2018)

BIOL B210 Medical Anthropology
This course examines the relationships between culture, society, disease and illness. It considers a broad range of health-related experiences, discourses, knowledge and practice among different cultures and among individuals and groups in different positions of power. Topics covered include sorcery, herbal remedies, healing rituals, folk illnesses, modern disease, scientific medical perceptions, clinical technique, epidemiology and political economy of medicine. Prerequisite: ANTH 102, H103 or permission of instructor. Approach: Cross-Cultural Analysis (CC) Counts towards: Environmental Studies; Health Studies Units: 1.0 (Not Offered 2017-2018)
the R programming language and corresponding open source statistical software. Content will focus on data sets from across the sciences. Six hours of combined lecture/lab per week.

Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR); Scientific Investigation (SI)
Major Writing Requirement: Writing Attentive
Counts towards: Biochemistry and Molecular Biology; Environmental Studies; Neuroscience
Units: 1.0
(Not Offered 2017-2018)

BIOL B255 Microbiology
Invisible to the naked eye, microbes occupy every niche on the planet. This course will examine how microbes have become successful colonizers; review aspects of interactions between microbes, humans and the environment; and explore practical uses of microbes in industry, medicine and environmental management. The course will combine lecture, discussion of primary literature and student presentations. Three hours of lecture and three hours of laboratory per week. Prerequisites: One semester of BIOL 110 and CHEM B104.

Approach: Scientific Investigation (SI)
Major Writing Requirement: Writing Attentive
Counts towards: Biochemistry and Molecular Biology; Environmental Studies; Health Studies
Units: 1.0
(Not Offered 2017-2018)

BIOL B262 Urban Ecosystems
Cities can be considered ecosystems whose functions are highly influenced by human activity. This course will address many of the living and non-living components of urban ecosystems, as well as their unique processes. Using an approach focused on case studies, the course will explore the ecological and environmental problems that arise from urbanization, and also examine solutions that have been attempted. Prerequisite: BIOL B110 or B111 or ENVS B101.

Approach: Course does not meet an Approach
Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)

BIOL B323 Coastal and Marine Ecology
An interdisciplinary course exploring the ecological, biogeochemical, and physical aspects of coastal and marine ecosystems. We will compare intertidal habitats in both temperate and tropical environments, with a specific emphasis on global change impacts on coastal systems (e.g. sea level rise, warming, and species shifts). In 2015 the course will have a mandatory field trip to a tropical marine field station and an overnight field trip to a temperate field station in the mid-Atlantic. Prerequisite: BIOL B220 (Ecology)

Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)

BIOL B332 Global Change Biology
Global changes to our environment present omnipresent environmental challenges. We are only beginning to understand the complex interactions between organisms and the rapidly changing environment. Students will explore the effects of global change on ecosystems by analyzing the primary literature and the latest IPCC report. In 2017, there will be a mandatory one-day field trip to the Smithsonian Global Change Research Wetland. Prerequisites: BIOL B220, BIOL 225 or BIOL B262, or permission of instructor.

Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Mozdzer,T.
(Fall 2017)

CITY B201 Introduction to GIS for Social and Environmental Analysis
This course is designed to introduce the foundations of GIS with emphasis on applications for social and environmental analysis. It deals with basic principles of GIS and its use in spatial analysis and information management. Ultimately, students will design and carry out research projects on topics of their own choosing. Prerequisite: At least sophomore standing and Quantitative Readiness are required (i.e. the quantitative readiness assessment or Quan B001).

Approach: Quantitative Readiness Required (QR)
Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Raddatz,L.
(Spring 2018)

CITY B250 Topics: Growth & Spatial Organization of the City
This is a topics course. Course content varies.
Approach: Inquiry into the Past (IP)
Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)

CITY B278 American Environmental History
This course explores major themes of American environmental history, examining changes in the American landscape, the history of ideas about nature and the interaction between the two. Students will study definitions of nature, environment, and environmental history while investigating interactions between Americans and their physical worlds.

Approach: Inquiry into the Past (IP)
Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)

CITY B329 Advanced Topics in Urban Environments
This is a topics course. Course content varies.
Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)

CITY B345 Advanced Topics in Environment and Society
This is a topics course. Topics vary. Current topic description: How can cities help address today’s most pressing environmental problems? Are sustainable urban environments possible, and if so, what would they look like? This course explores these and other questions by examining theories, politics and practices of sustainability in urban contexts from a global perspective.

Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Raddatz,L.
(Fall 2017)
EALC B352 China's Environment
This seminar explores China's environmental issues from a historical perspective. It begins by considering a range of analytical approaches, and then explores three general periods in China's environmental changes, imperial times, Mao's socialist experiments during the first thirty years of the People's Republic, and the post-Mao reforms. Prerequisite: Sophomore standing.
Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)

EALC B353 The Environment on China's Frontiers
This seminar explores environmental issues on China's frontiers from a historical perspective. It focuses on the particular relationship between the environment and the frontier, examining how these two variables have interacted. The course will deal with the issues such as the relationship between the environment and human ethnic and cultural traditions, social movements, economic growth, political and legal institutions and practices, and changing perceptions. The frontier regions under discussion include Tibet, Xinjiang, Inner Mongolia, and the southwestern ethnic areas, which are all important in defining what China is and who the Chinese are.
Units: 1.0
(Not Offered 2017-2018)

EALC B355 Animals, Vegetables, Minerals in East Asian Literature
This semester, we will explore how artists question, explore, celebrate, and critique the relationships between humans and the environment. Through a topics-focused course, students will examine the ways that narratives about environment have shaped the way that humans have defined themselves. We will be reading novels and short stories and viewing films that contest conventional binaries of man and animal, civilization and nature, tradition and technology, and even truth and fiction. "Animals, Vegetables, Minerals" does not follow chronological or geographical frameworks, but chooses texts that engage the three categories enumerated as the major themes of our course. We will read and discuss animal theory, theories of place and landscape, and theories of modernization or mechanization; and there will be frequent (and intentional) overlap between these categories. We will also be watching films that extend our theoretical questions of these themes beyond national, linguistic, and generic borders. You are expected to view this course as a collaborative process in which you share responsibility for leading discussion. There are no prerequisites or language expectations, but students should have some basic knowledge of East Asian, especially Sinophone, history and culture, or be willing to do some additional reading (suggested by the instructor) to achieve an adequate contextual background for exploring these texts.
Major Writing Requirement: Writing Attentive
Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Kwa,S.
(Fall 2017)

EALC B362 Environment in Contemporary East Asia: China and Japan
This seminar explores environmental issues in contemporary East Asia from a historical perspective. It will explore the common and different environmental problems in Japan and China, and explain and interpret their causal factors and solving measures in cultural traditions, social movements, economic growth, political and legal institutions and practices, international cooperation and changing perceptions. Prerequisite: Sophomore standing or above.
Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)

ECON B225 Economic Development
Examination of the issues related to and the policies designed to promote economic development in the developing economies of Africa, Asia, Latin America, and the Middle East. Focus is on why some developing economies grow faster than others and why some growth paths are more equitable, poverty reducing, and environmentally sustainable than others. Includes consideration of the impact of international trade and investment policy, macroeconomic policies (exchange rate, monetary and fiscal policy) and sector policies (industry, agriculture, education, population, and environment) on development outcomes in a wide range of political and institutional contexts. Prerequisite: ECON B105.
Counts towards: Environmental Studies; International Studies
Units: 1.0
Instructor(s): Rock,M.
(Fall 2017)

ECON B234 Environmental Economics
Introduction to the use of economic analysis to explain the underlying behavioral causes of environmental and natural resource problems and to evaluate policy responses to them. Topics may include air and water pollution; the economic theory of externalities, public goods and the depletion of resources; cost-benefit analysis; valuing non-market benefits and costs; economic justice; and sustainable development. Prerequisites: ECON B105.
Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Ross,D.
(Spring 2018)

ECON B242 Economics of Local Environmental Programs
Considers the determinants of human impact on the environment at the neighborhood or community level and policy responses available to local government. How can economics help solve and learn from the problems facing rural and suburban communities? The instructor was a local township supervisor who will share the day-to-day challenges of coping with land use planning, waste disposal, dispute resolution, and the provision of basic services. Prerequisite: ECON B105.
Counts towards: Environmental Studies; Praxis Program
Units: 1.0
Instructor(s): Ross,D.
(Fall 2017)

ENGL B218 Ecological Imaginings
Re-thinking the evolving nature of representation, with a focus on language as a link between natural and cultural ecosystems. We will observe the world; read classical and cutting edge ecocritical theory, along with a wide range of exploratory, speculative, and imaginative essays and stories; and seek a variety of ways of expressing our own ecological interests.
ENVS B101 Introduction to Environmental Studies
This interdisciplinary introduction to Environmental Studies Minor examines the ideas, themes and methodologies of humanists, social scientists, and natural scientists in order to understand what they have to offer each other in the study of the environment, and how their inquiries can be strengthened when working in concert.

Approach: Course does not meet an Approach
Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Barber,D.
(Fall 2017)

ENVS B397 Senior Seminar in Environmental Studies
In this capstone course, senior Environmental Studies minors from across the disciplines will draw on the perspectives and skills gained from their majors and from their preparatory work in the minor to collaboratively engage high-level questions of environmental inquiry. Prerequisite: Open only to Environmental Studies minors who have completed all introductory work for the minor.

Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Hager,C., Barber,D.
(Fall 2017)

GEOL B101 How the Earth Works
An introduction to the study of planet Earth—the materials of which it is made, the forces that shape its surface and interior, the relationship of geological processes to people, and the application of geological knowledge to the search for useful materials. Laboratory and fieldwork focus on learning the tools for geological investigations and applying them to the local area and selected areas around the world. Three lectures and one afternoon of laboratory or fieldwork a week. One required one-day field trip on a weekend.

Approach: Quantitative Readiness Required (QR); Scientific Investigation (SI)
Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Marenco,K., Weil,A.
(Fall 2017)

GEOL B203 Biosphere Through Time
We will explore how the Earth-life system has evolved through time by studying the interactions between life, climate, and tectonic processes. During the lab component of the course, we will study important fossil groups to better understand their paleoecology and roles in the Earth-life system.

Approach: Scientific Investigation (SI)
Major Writing Requirement: Writing Intensive
Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Marenco,K., Marenco,P.
(Fall 2017)

GEOL B206 Energy Resources and Sustainability
An examination of issues concerning the supply of energy required by humanity. This includes an investigation of the geological framework that determines resource availability, aspects of energy production and resource development and the science of global climate change. Two 90-minute lectures a week. Suggested preparation: one year of college science.

Approach: Scientific Investigation (SI)
Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Barber,D.
(Fall 2017)

GEOL B209 Natural Hazards
A quantitative approach to understanding the earth processes that impact human societies. We consider the past, current, and future hazards presented by geologic processes, including earthquakes, volcanoes, landslides, floods, and hurricanes. The course includes discussion of the social, economic, and policy contexts within which natural geologic processes become hazards. Case studies are drawn from contemporary and ancient societies. Lecture three hours a week. Prerequisite: one semester of college science or permission of instructor.

Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR); Scientific Investigation (SI)
Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Marenco,K.
(Spring 2018)

GEOL B302 Low-Temperature Geochemistry
Stable isotope geochemistry is one of the most important subfields of the Earth sciences for understanding environmental and climatic change. In this course, we will explore stable isotopic fundamentals and applications including a number of important case studies from the recent and deep time dealing with important biotic events in the fossil record and major climate changes. Prerequisites: GEOL 101 or GEOL 102, and at least one semester of chemistry or physics, or professor approval.

Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Marenco,P.
(Fall 2017)

GEOL B304 Marine Geology
An introduction to oceanography, coastal processes, and the geomorphology of temperate and tropical shorelines. Includes an overview of the many parameters, including sea level change, that shape coastal environments. Meets twice
weekly for a combination of lecture, discussion and hands-on exercises, including a mandatory multi-day field trip to investigate developed and pristine sections of the Mid-Atlantic US coast. Prerequisite: One 200-level GEOL course OR one GEOL course AND one BIOL course (any level), OR advanced BIOL major standing (junior or senior).

Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)

PHIL B240 Environmental Ethics
This course surveys rights- and justice-based justifications for environmental ethics. It examines approaches such as stewardship, intrinsic value, land ethic, deep ecology, ecofeminism, Asian and aboriginal. It explores issues such as obligations to future generations, to nonhumans and to the biosphere.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Dostal,R.
(Spring 2018)

POLS B222 Environmental Issues: Movements and Policy Making in Comparative Perspective
An exploration of the ways in which different cultural, economic, and political settings have shaped issue emergence and policy making. We examine the politics of particular environmental issues in selected countries and regions, paying special attention to the impact of environmental movements. We also assess the prospects for international cooperation in addressing global environmental problems such as climate change.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)

POLS B310 Comparative Public Policy
A comparison of policy processes and outcomes across space and time. Focusing on particular issues such as health care, domestic security, water and land use, we identify institutional, historical, and cultural factors that shape policies. We also examine the growing importance of international-level policy making and the interplay between international and domestic pressures on policy makers. Prerequisite: One course in Political Science or public policy.

Counts towards: Environmental Studies; Health Studies
Units: 1.0
(Not Offered 2017-2018)

POLS B321 Technology and Politics
A multi-media analysis of the complex role of technology in political and social life. We focus on the relationship between technological change and democratic governance. We begin with historical and contemporary Luddism as well as pro-technology movements around the world. Substantive issue
Film Studies is an interdisciplinary program of inquiry bringing a range of analytical methods to bear upon films, film audiences, and the social and industrial contexts of film and media production, distribution and exhibition. The courses that comprise the minor in film studies reflect the diversity of approaches in the academic study of cinema. The minor is anchored by core courses in formal analysis, history and theory. Elective courses in particular film styles, directors, national cinemas, genres, areas of theory and criticism, video production, and issues in film and media culture add both breadth and depth to this program of study.

Film Studies is a Bryn Mawr College minor. Students must take a majority of courses on the Bryn Mawr campus; however, minors are encouraged to consider courses offered in the Tri-College consortium and at the University of Pennsylvania. Students should work with the director of the Film Studies Program to develop a minor work plan when declaring the minor.

Minor Requirements

In consultation with the program director, students design a program of study that includes a range of film genres, styles, national cinemas, eras and disciplinary and methodological approaches. Students are strongly encouraged to take at least one course addressing topics in global or non-western cinema. The minor consists of a total of six courses and must include the following:

- One introductory course in the formal analysis of film
- One course in film history or an area of film history
- One course in film theory or an area of film theory
- Three electives.
- At least one of the six courses must be at the 300 level.

Courses that fall into two or more of the above categories may fulfill the requirement of the student’s choosing, but may not fulfill more than one requirement simultaneously. Students should consult with their advisers to determine which courses, if any, may count simultaneously for multiple credentials. Final approval is at the discretion of the program director.

COURSES

ARTW B266 Screenwriting

An introduction to screenwriting. Issues basic to the art of storytelling in film will be addressed and analyzed: character, dramatic structure, theme, setting, image, sound. The course focuses on the film adaptation; readings include novels, screenplays, and short stories. Films adapted from the readings will be screened. In the course of the semester, students will be expected to outline and complete the first act of an adapted screenplay of their own.

Approach: Critical Interpretation (CI)
Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

CSTS B274 Greek Tragedy in Global Cinema

This course explores how contemporary film, a creative medium appealing to the entire demographic spectrum like Greek drama, looks back to the ancient origins. Examining both films that are directly based on Greek plays and films that make use of classical material without being explicitly classical
in plot or setting, we will discuss how Greek mythology is reconstructed and appropriated for modern audiences and how the classical past continues to be culturally significant. A variety of methodological approaches such as film and gender theory, psychoanalysis, and feminist theory will be applied in addition to more straightforward literary-historical interpretation.

Approach: Critical Interpretation (CI)
Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

EALC B212 Topics: Introduction to Chinese Literature
This is a topics course. Topics may vary.
Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

EALC B240 Topics in Chinese Film
This is a topics course. Course content varies.
Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies; Film Studies
Units: 1.0
Instructor(s): Kwa,S.
(Spring 2018)

EALC B281 Food in Translation: Theory and Practice
This semester we will explore the connections between what we eat and how we define ourselves in the context of global culture. We will proceed from the assumption that food is an object of culture, and that our contemplation of its transformations and translations in production, preparation, consumption, and distribution will inform our notions of personal and group identity. This course takes Chinese food as a case study, and examines the way that Chinese food moves from its host country to diasporic communities all over the world, using theories of translation as our theoretical and empirical foundation. From analyzing menu and ingredient translations to producing a short film based on interviews, we will consider the relationship between food and communication in a multilingual and multicultural world. Readings include theoretical texts on translation (Apter), recipe books and menus, Chinese and Chinese-American literature (Classic of Poetry, Mo Yan, Hong Kingston), Films include Ian Cheney’s “Searching for General Tso,” Wayne Wang’s “Soul of a Banquet” and “Eat a Bowl of Tea,” Ang Li’s “Eat Drink Man Woman,” and Wong Karwai’s “In the Mood for Love.”

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B205 Introduction to Film
This course is intended to provide students with the tools of critical film analysis. Through readings of images and sounds, sections of films and entire narratives, students will cultivate the habits of critical viewing and establish a foundation for focused work in film studies. The course introduces formal and technical units of cinematic meaning and categories of genre and history that add up to the experiences and meanings we call cinema.

Although much of the course material will focus on the Hollywood style of film, examples will be drawn from the history of cinema. Attendance at weekly screenings is mandatory.

Approach: Critical Interpretation (CI)
Counts towards: Film Studies
Units: 1.0
Instructor(s): Bryant,S.
(Fall 2017)

ENGL B227 Poverty and Precarious Lives on Screen
This semester we will explore the connections between what we eat and how we define ourselves in the context of global culture. We will proceed from the assumption that food is an object of culture, and that our contemplation of its transformations and translations in production, preparation, consumption, and distribution will inform our notions of personal and group identity. This course takes Chinese food as a case study, and examines the way that Chinese food moves from its host country to diasporic communities all over the world, using theories of translation as our theoretical and empirical foundation. From analyzing menu and ingredient translations to producing a short film based on interviews, we will consider the relationship between food and communication in a multilingual and multicultural world. Readings include theoretical texts on translation (Apter), recipe books and menus, Chinese and Chinese-American literature (Classic of Poetry, Mo Yan, Hong Kingston), Films include Ian Cheney’s “Searching for General Tso,” Wayne Wang’s “Soul of a Banquet” and “Eat a Bowl of Tea,” Ang Li’s “Eat Drink Man Woman,” and Wong Karwai’s “In the Mood for Love.”

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Film Studies
Units: 1.0
Instructor(s): Tratner,M.
(Spring 2018)

ENGL B229 Movies and Mass Politics
Movies and play texts vary from year to year. The course assumes significant prior experience of Shakespearean drama and/or Renaissance drama.

Counts towards: Film Studies
Units: 1.0
Instructor(s): Gordon,C.
(Spring 2018)

ENGL B324 Topics in Shakespeare:
Films and play texts vary from year to year. The course assumes significant prior experience of Shakespearean drama and/or Renaissance drama.

Counts towards: Film Studies
Units: 1.0
Instructor(s): Gordon,C.
(Spring 2018)

ENGL B336 Topics in Film
This course is intended to provide students with the tools of critical film analysis. Through readings of images and sounds, sections of films and entire narratives, students will cultivate the habits of critical viewing and establish a foundation for focused work in film studies. The course introduces formal and technical units of cinematic meaning and categories of genre and history that add up to the experiences and meanings we call cinema.

Although much of the course material will focus on the Hollywood style of film, examples will be drawn from the history of cinema. Attendance at weekly screenings is mandatory.

Approach: Critical Interpretation (CI)
Counts towards: Film Studies
Units: 1.0
Instructor(s): Bryant,S.
(Fall 2017)
ENGL B355 Performance Studies
Introduces students to the field of performance studies, a multidisciplinary species of cultural studies which theorizes human actions as performances that both construct and resist cultural norms of race, gender, and sexuality. The course will explore "performativity" in everyday life as well as in the performing arts, and will include multiple viewings of dance and theater both on- and off-campus. In addition, we will consider the performative aspects of film and video productions.
Counts towards: Gender and Sexuality Studies; Film Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B367 Asian American Film Video and New Media
The course explores the role of pleasure in the production, reception, and performance of Asian American identities in film, video, and the internet, taking as its focus the sexual representation of Asian Americans in works produced by Asian American artists from 1915 to present. In several units of the course, we will study graphic sexual representations, including pornographic images and sex acts some may find objectionable. Students should be prepared to engage analytically with all class material. To maintain an atmosphere of mutual respect and solidarity among the participants in the class, no auditors will be allowed.
Counts towards: Gender and Sexuality Studies; Film Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B375 Sex on Screens
This course will provide a historical and theoretical overview of the ways moving image sex acts have been represented on screen, from early cinema’s silent film loops to today’s celebrity sex tapes. We will examine the ideological operations of sex in the cinema and aim to comprehend the multifarious ways viewers, filmmakers, critics, and scholars respond to dominant conceptions of sex-sexuality through alternative cinematic production and critical scholarship. Units include: stag movies, the Production Code and ratings system, European art cinema, sex ed, underground and the avant-garde, cult / exploitation / blaxploitation, sexual revolution, hard core, women’s cinema, home video, queer cinema, HIV/AIDS, the digital revolution, feminist porn, and the Internet. Prerequisites: HART / COML B110: Identification in the Cinema; or ENGL / HART 205: Introduction to Film; or ENGL B299 History of Narrative Cinema, 1945 to the Present.
Counts towards: Gender and Sexuality Studies; Film Studies
Units: 1.0
(Not Offered 2017-2018)

GERM B320 Topics in German Literature and Culture
This is a topics course. Course content varies. Previous topics include: Romantic Literary Theory and Literary Modernity; Configurations of Femininity in German Literature; Nietzsche and Modern Cultural Criticism; Contemporary German Fiction; German Literary Culture in Exile (1933-1945). Taught in English. Students wanting German credit will meet for additional hour per week. Current topic description: This course focuses on the development of strong international and cross-cultural trends in German literature of modernity.
Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Major Writing Requirement: Writing Attentive
Units: 1.0
(Spring 2018)

GERM B321 Advanced Topics in German Cultural Studies
This is a topics course. Course content varies. Current topic description: This film course of transnational scope focuses specifically on cultural encounters between the West and the East in the 20th and 21st centuries. It uses visual material related to East Asia produced mainly by German filmmakers. Using film as the main medium, the course touches on issues that are at the center of contemporary cultural debates, such as orientalism, race, gender, class, and identity, as well as postcolonialism, nationalism, travel, exile, multiculturalism, and globalization.
Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: East Asian Languages and Cultures
Units: 1.0
Instructor(s): Shen,Q.
(Fall 2017)

GNST B255 Video Production
From its very inception in the nineteenth century, film has straddled between the magic of realism and the suspension of reality in fiction by cinematic means such as special lighting, singular perspectives, and temporal and spatial manipulations. In this course, we will explore the paradox of a medium that is expected to simultaneously index and document reality, and poetically suggest it in fiction. By blurring these two often polarized genres, this course will challenge conventional genres and test the potential creativity in playing with them. Screenings and readings of historical, influential works will illustrate the merging of documentaries and fiction films, which will be explored also in combination with hands-on production-based cinematic experiments. Students will work in groups to produce several small experimental scenarios that will borrow from both documentary and fiction methods, such as working with social actors, archival documentation, performance, dramatization, and stylization. In addition, each student will produce a final project that will be a culmination of the methods used in the smaller experiments. Students will also be required to write short regular responses to the texts and films shown.
Approach: Course does not meet an Approach
Counts towards: Film Studies
Units: 1.0
Instructor(s): Romberg,D.
(Fall 2017)

GNST B302 Topics in Video Production
This is a topics course. Course content varies.
Prerequisite: GNST B255 or ENGL/HART B205 or ICPR H243 or ICPR H343 or ICPR H278 or ANTH H207 or an equivalent video production course such as Documentary Production or an
equivalent critical course in Film or Media Studies.
Counts towards: Film Studies
Units: 1.0
Instructor(s): Romberg,D.
(Spring 2018)

HART B110 Critical Approaches to Visual Representation: Identification in the Cinema
An introduction to the analysis of film through particular attention to the role of the spectator. Why do moving images compel our fascination? How exactly do film spectators relate to the people, objects, and places that appear on the screen? Wherein lies the power of images to move, attract, repel, persuade, or transform its viewers? In this course, students will be introduced to film theory through the rich and complex topic of identification. We will explore how points of view are framed in cinema, and how those viewing positions differ from those of still photography, advertising, video games, and other forms of media. Students will be encouraged to consider the role the cinematic medium plays in influencing our experience of a film: how it is not simply a film's content, but the very form of representation that creates interactions between the spectator and the images on the screen. Film screenings include Psycho, Being John Malkovich, and others. Course is geared to freshman and those with no prior film instruction. Fulfills History of Art major 100-level course requirement, Film Studies minor Introductory course or Theory course requirement.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Major Writing Requirement: Writing Intensive
Counts towards: Film Studies
Units: 1.0
Instructor(s): King,H.
(Spring 2018)

HART B299 History of Narrative Cinema, 1945 to the present
This course surveys the history of narrative film from 1945 through contemporary cinema. We will analyze a chronological series of styles and national cinemas, including Classical Hollywood, Italian Neorealism, the French New Wave, and other post-war movements and genres. Viewings of canonical films will be supplemented by more recent examples of global cinema. While historical in approach, this course emphasizes the theory and criticism of the sound film, and we will consider various methodological approaches to the aesthetic, socio-political, and psychological dimensions of cinema. Readings will provide historical context, and will introduce students to key concepts in film studies such as realism, formalism, spectatorship, the auteur theory, and genre studies. Fulfills the history requirement or the introductory course requirement for the Film Studies minor.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Film Studies
Units: 1.0
Instructor(s): King,H.
(Fall 2017)

HART B306 Film Theory
An introduction to major developments in film theory and criticism. Topics covered include: the specificity of film form; cinematic realism; the cinematic "author"; the politics and ideology of cinema; the relation between cinema and language; spectatorship, identification, and subjectivity; archival and historical problems in film studies; the relation between film studies and other disciplines of aesthetic and social criticism. Each week of the syllabus pairs critical writing(s) on a central principle of film analysis with a cinematic example. Class will be divided between discussion of critical texts and attempts to apply them to a primary cinematic text. Prerequisite: A course in Film Studies (HART B110, HART B299, ENGL B205, or the equivalent from another college by permission of instructor).

Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

HART B334 Topics in Film Studies
This is a topics course. Course content varies. Current topic description: D. N. Rodowick argued that the digital arts "are the most radical instance yet of an old Cartesian dream: the best representations are the most immaterial ones because they seen to free the mind from the body and the world of substance." In this seminar, we will explore digital images in relation to cinema, photography, and other media. We will examine the fate of materiality, the body, and duration in 21st c. media, and consider whether the digital marks a significant break from the analog.

Counts towards: Film Studies
Units: 1.0
Instructor(s): King,H.
(Spring 2018)

HIST B284 Movies and America
Movies are one of the most important means by which Americans come to know – or think they know—their own history. This class examines the complex cultural relationship between film and American historical self fashioning.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies; Film Studies
Units: 1.0
(Not Offered 2017-2018)

ITAL B212 Italy Today: New Voices, New Writers, New Literature
This course, taught in English, will focus primarily on the works of the so-called "migrant writers" who, having adopted the Italian language, have become a significant part of the new voice of Italy. In addition to the aesthetic appreciation of these works, this course will also take into consideration the social, cultural, and political factors surrounding them. The course will focus on works by writers who are now integral to the Italian canon – among them: Cristina Ali-Farah, Igiaba Scego, Ghermandi Gabriella, Amara Lakhous. As part of the course, movies concerned with various aspects of Italian Migrant literature will be screened and analyzed. One additional hour for students who want Italian credit.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies; Film Studies
Units: 1.0
Instructor(s): Kubati,R.
(Spring 2018)

ITAL B214 The Myth of Venice (1800-2000)
In English. The Republic of Venice existed for over a millennium. This course begins in the year 1797 at the end of the Republic and the emerging of an extensive body of literature centered on Venice and its mythical facets. Readings will include the Romantic views of Venice (excerpts from Lord Byron, Fredrick Schiller, Wolfang von Goethe, Ugo Foscolo, Alessandro
Manzoni) and the 20th century reshaping of the literary myth (readings from Thomas Mann, Filippo Tommaso Marinetti, Gabriele D’Annunzio, Henry James, and others). A journey into this fascinating tradition will shed light on how the literary and visual representation of Venice, rather than focusing on a nostalgic evocation of the death of the Republic, became a territory of exploration for literary modernity. The course is offered in English; all texts are provided in translation. One additional hour for students who want Italian credit. Suggested Preparation: Counts toward Comp Lit. Counts toward Film Studies.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

ITAL B229 The Politics of Food in Italian Literature, Culture, and Cinema

In English. A profile of Italian literature/culture/cinema obtained through an analysis of gastronomic documents, films, literary texts, and magazines. We will also include a discussion of the Slow Food Revolution, a movement initiated in Italy in 1980 and now with a world-wide following, and its social, economic, ecological, aesthetic, and cultural impact to counteract fast food and to promote local food traditions. Course taught in English. One additional hour for students who want Italian credit.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

ITAL B255 Uomini d’onore in Sicilia: Italian Mafia in Literature and Cinema

This course aims to explore representations of Mafia figures in Italian literature and cinema, starting from the ‘classical’ example of Sicily. From Sicily, the “octopus” (povra), as the Mafia is called in Italy, has spread throughout Italy, and has pervaded almost every facet of Italian life, including cultural life. The course will introduce students to both Italian Studies from an interdisciplinary perspective and also to narrative, using fiction and non-fiction texts written by 19th, 20th, and 21st century writers. Novels, films, testimonies and TV series will offer different representations of the Mafia: its ethics, its relation with politics, religion and business, its ideas of friendship, family, masculinity and femininity. Internships in Italy will be available connected with this course. Course is taught in Italian. Prerequisite: ITAL B102 or permission of the instructor.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Film Studies
Units: 1.0
Instructor(s): Ricci, R.
(Fall 2017)

ITAL B306 Youth in 20th Century Italian Literature and Cinema

This interdisciplinary course focuses on literary texts and visual material dealing with youth and youth culture in post-fascist Italy. How is youth described in Italian culture after WWII? What does youth represent in the Italian imagination of 20th century Italy? Which language is used by the youth? While the focus in analyzing the challenges faced by youth is primarily on literature and film studies, throughout the semester the course will also touch upon sociological, cultural, and anthropological perspectives concerning the role of the family, peer relationships, prostitution, drugs, criminality and violence, diversity, gender identity, and sexuality. Students will be required to attend film screenings or view films on their own devices. Prerequisite: One literature course at the 200 level. or permission by the instructor.

Major Writing Requirement: Writing Intensive
Counts towards: Gender and Sexuality Studies; Film Studies
Units: 1.0
Instructor(s): Ricci, R.
(Spring 2018)

ITAL B307 Insiders and Outsiders: Otherness in Italian Literature

This course will introduce students to the most representative works in Italian literature of all genres —poetry, novels, scientific prose, theater, diaries, narrative, epistolary—throughout the centuries, with emphasis on marginalization, exile, political persecution, national identity, violence, and otherness. We will bring works of literature to the attention of students who are interested in the key role played by Italian culture in the development of a European civilization, including the international debate on modernity and post-modernity. Readings and lectures will move from 14th century writers (Dante, Boccaccio) to Humanistic Thought (Florentine political revolution) and the Renaissance (Machiavelli); from the Enlightenment (Foscolo, Leopardi, Manzoni) to modernity (Pirandello, Svevo) and post-modernism (Calvino). Prerequisite: One literature course at the 200 level. or permission by the instructor.

Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

ITAL B310 Detective Fiction

In English. Why is detective fiction so popular? What explains the continuing multiplication of detective texts despite the seemingly finite number of available plots? This course will explore the worldwide fascination with this genre beginning with European writers before turning to the more distant mystery stories from around the world. The international scope of the readings will highlight how authors in different countries have developed their own national detective typologies while simultaneously responding to international influence of the British-American model. Italian majors taking this course for Italian credit will be required to meet for an additional hour with the instructor and to do the readings and writing in Italian. Prerequisite: One literature course at the 200 level or permission by the instructor. One additional hour for students who want Italian credit.

Major Writing Requirement: Writing Intensive
Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

PSYC B375 Movies and Madness: Abnormal Psychology Through Films

This writing-intensive seminar (maximum enrollment = 16 students) deals with critical analysis of how various forms of psychopathology are depicted in films. The primary focus of the seminar will be evaluating the degree of correspondence between the cinematic presentation and current research knowledge about the disorder, taking into account the historical period in which the film was made. For example, we will discuss how accurately the symptoms of the disorder are presented and how representative the protagonist is of people who typically
manifest this disorder based on current research. We will also address the theory of etiology of the disorder depicted in the film, including discussion of the relevant intellectual history in the period when the film was made and the prevailing accounts of psychopathology in that period. Another focus will be how the film portrays the course of the disorder and how it depicts treatment for the disorder. This cinematic presentation will be evaluated with respect to current research on treatment for the disorder as well as the historical context of prevailing treatment for the disorder at the time the film was made. Prerequisite: PSYC B209.

Major Writing Requirement: Writing Intensive
Counts towards: Child and Family Studies; Film Studies; Health Studies
Units: 1.0
Instructor(s): Rescorla, L.
(Fall 2017)

RUSS B217 The Cinema of Andrei Tarkovsky
This course will probe the cinematic oeuvre of the great Soviet filmmaker Andrei Tarkovsky, who produced some of the most compelling, significant film work of the 20th century. Looking not only Tarkovsky’s films but also those films that influenced his work, we will explore the aesthetics, philosophy, and ideological pressure underlying Tarkovsky’s unique brand of cinema.
Approach: Critical Interpretation (CI)
Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

RUSS B238 Topics: The History of Cinema 1895 to 1945
This is a topics course. Course content varies.
Approach: Inquiry into the Past (IP)
Major Writing Requirement: Writing Attentive
Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

RUSS B258 Soviet and Eastern European Cinema of the 1960s
This course examines 1960s Soviet and Eastern European “New Wave” cinema, which won worldwide acclaim through its treatment of war, gender, and aesthetics. Films from Czechoslovakia, Hungary, Poland, Russia, and Yugoslavia will be viewed and analyzed, accompanied by readings on film history and theory. All films shown with subtitles; no knowledge of Russian or previous study of film required.
Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Major Writing Requirement: Writing Attentive
Counts towards: Film Studies
Units: 1.0
Instructor(s): Harte, T.
(Fall 2017)

SPAN B252 Compassion, Indignation, and Anxiety in Latin American Film
Stereotypically, Latin Americans are viewed as “emotional people”—often a euphemism to mean irrational, impulsive, wildly heroic, fickle. This course takes this expression at face value to ask: Are there particular emotions that identify Latin Americans? And, conversely, do these “people” become such because they share certain emotions? Can we find a correlation between emotions and political trajectories? To answer these questions, we will explore three types of films that seem to have, at different times, taken hold of the Latin American imagination and feelings: melodramas (1950s-1960s), documentaries (1970s-1990s), and “low-key” comedies (since 2000s.)
Approach: Cross-Cultural Analysis (CC)
Counts towards: Film Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Song, R.
(Not Offered 2017-2018)

SPAN B318 Adaptaciones literarias en el cine español
Film adaptations of literary works have been popular since the early years of cinema in Spain. This course examines the relationship between films and literature, focusing on the theory and practice of film adaptation. Attention will be paid to the political and cultural context in which these texts are being published and made into films. Students will be required to attend film screenings or view films on their own devices.
Prerequisite: A 200-level course in Spanish.
Counts towards: Gender and Sexuality Studies; Film Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Song, R.
(Fall 2017)

FINE ARTS

Students may complete a major in Fine Arts at Haverford College.

Faculty
Markus Baenziger (on leave 2017-2018), Professor
Anna Benjamin, Visiting Assistant Professor
Christina Freeman, Visiting Assistant Professor
Jonathan Goodrich, Visiting Assistant Professor and Senior Thesis Coordinator
Hee Sook Kim (on leave Fall 2017), Professor
Ying Li, Chair and Professor
Bill Pangburn, Visiting Assistant Professor
Naomi Safron-Hon, Visiting Assistant Professor
William Williams, Audrey A. and John L. Dusseau Professor in the Humanities and Curator of Photography

In the Fine Arts Department, the focus is on the individual. Studio classes are small, and students from beginners to majors receive individual instruction.

Every student is encouraged to develop the physical and critical skills necessary to create art. The philosophy of the department is that observational skills are the cornerstone of all visual art disciplines. Cognition and processing information are key skills for any discipline—in the humanities or the sciences—and for this reason art at Haverford is specifically geared towards enhancing visual perception. Such finely tuned skills can benefit anyone professionally and personally.

The fine arts courses offered by the department are structured to accomplish the following:
• For students not majoring in fine arts: to develop a visual perception of form and to present knowledge and understanding of it in works of art.
• For students intending to major or to minor in fine arts: beyond the foregoing, to promote thinking in visual terms and to foster the skills needed to give expression to these in a coherent body of art works.

About 20 percent of Haverford students take fine arts courses while enrolled in the College. The students who major in fine arts and wish to continue their education are usually accepted at the professional graduate art school of their choice. Our alumni are distinguished professionals, active in the visual creative arts and allied fields.

Major Requirements

Fine Arts majors are required to concentrate in one of the following: drawing, painting, photography, printmaking, and sculpture, as detailed here:

• Four 100-level foundation courses in each discipline.
• Two different 200-level courses outside the area of concentration in the major.
• Two 200-level courses and one 300-level course within the students chosen focal area within Fine Arts.
• Three art history/theory/criticism or visual studies courses (as approved by major adviser).
• Senior Departmental Studies 499.

For majors intending to do graduate work, we strongly recommend that they take an additional 300-level studio course within their area of concentration and an additional art history course at Bryn Mawr.

Minor Requirements

Minors must take four 100-level foundation courses in different disciplines.

Two 200-level courses and one 300-level course within the student’s chosen focal area within fine arts.

One art history/theory/criticism or visual culture course.

Study Abroad

Credits from Study Abroad or from Outside the Fine Arts Department

Majors can take one 200-level course outside of a major’s concentration and any art history/theory/ criticism or visual culture courses, subject to approval by the chair of the Fine Arts Department before the course is taken.

Minors can take one 200-level course outside of a minor’s area of study and one art history/theory/criticism or visual culture courses, subject to approval by the chair of the Fine Arts Department before the course is taken.

COURSES

ARTS H101 ARTS FOUNDATION-DRAWING (2-D)

A seven-week introductory course for students with little or no experience in drawing. Students will first learn how to see with a painter’s eye. Composition, perspective, proportion, light, form, picture plane and other fundamentals will be studied. We will work from live models, still life, landscape, imagination and masterwork. (Offered Fall 2017)

ARTS H103 ARTS FOUNDATION-PHOTOGRAPHY

This is a half-semester course to introduce the craft and artistry of photography to students with some or no skills in photography. Students learn how to develop negatives, print enlargements, and printing techniques such as burning, dodging, and exposure time. This class also requires a two-hour workshop. The day and time of the workshop will be determined during the first class. Offered in the first quarter. (Offered Fall 2017 and Spring 2018)

ARTS H104 ARTS FOUNDATION - SCULPTURE

This is a seven-week, half semester course designed to provide an introduction to three dimensional concepts and techniques. Skills associated with organizing and constructing three-dimensional form will be addressed through a series of projects within a contemporary context. The first projects will focus on basic three-dimensional concepts, while later projects will allow for greater individual self-expression and exploration. Various fabrication skills including construction, modeling, basic mold making, and casting will be demonstrated in class. All fabrication techniques will be covered in detail in class, and no prior experience is required to successfully complete this course. (Offered Fall 2017 and Spring 2018)

ARTS H106 ARTS FOUNDATION - DRAWING

This is a seven-week introductory level course designed to provide an overview of basic drawing techniques addressing line, form, perspective, and composition. Various drawing methods will be introduced in class, and students will gain experience in drawing by working from still life, models, and architecture. Preference to declared majors who need Foundations, and to students who have entered the lottery for the same Foundations course at least once without success. (Offered Spring 2018)

ARTS H107 ARTS FOUNDATION-PAINITNG

A seven-week introductory course for students with little or no experience in painting. Students will be first introduced to the handling of basic tools, materials and techniques. We will study color theory such as interaction of color, value & color, warms & cools, complementary colors, optical mixture, texture, and surface quality. We will work from live model, still life, landscape, imagination and masterwork. (Offered Fall 2017 and Spring 2018)

ARTS H108 ARTS FOUNDATION-PHOTOGRAPHY

This is a half-semester course to introduce the craft and artistry of photography to students with some or no skills in photography. Students learn how to develop negatives, print enlargements, and printing techniques such as burning, dodging, and exposure time. This class also requires a two-hour workshop. The day and time of the workshop will be determined during the first class. Offered in the second quarter. (Offered Fall 2017 and Spring 2018)

ARTS H120 FOUNDATION PRINTMAKING: SILKSCREEN

A seven-week course covering various techniques and approaches to silkscreen, including painterly monoprint, stencils, direct drawing and photo-silkscreen, emphasizing the expressive potential of the medium to create a personal visual statement. (Offered Spring 2018)

ARTS H121 FOUNDATION PRINTMAKING: RELIEF PRINTING

A seven-week course covering various techniques and approaches to the art of the woodcut and the linocut,
emphasizing the study of design principles and the expressive potential of the medium to create a personal visual statement. (Offered Fall 2017)

**ARTS H122 FOUNDATION PRINTMAKING: LITHOGRAPHY**

A seven-week course covering various techniques and approaches to Lithography, including paper plate preparation, drawing materials, ediltoning, black and white printing and color registration. Emphasizing the expressive potential of the medium to create a personal visual statement. (Offered Fall 2017)

**ARTS H124 FOUNDATION PRINTMAKING: MONOTYPE**

Basic printmaking techniques in Monotype medium. Painterly methods, direct drawing, stencils, and brayer techniques for beginners in printmaking will be taught. Color, form, shape, and composition in 2-D format will be explored. Individual and group critiques will be employed. (Offered Fall 2017)

**ARTS H217 THE HISTORY OF AFRICAN-AMERICAN ART FROM 1619 TO THE PRESENT**

A survey course documenting and interpreting the development and history of African-American Art from 1619 to present day. Representative works from the art and rare book collections will supplement course readings. (Offered Spring 2018)

**ARTS H218 CHINESE CALLIGRAPHY AS AN ART FORM**

This course combines studio practice and creating art projects with slide lectures, readings, and museum visits. Students will study the art of Chinese Calligraphy, and its connection with Western art. No Chinese language required. (Not offered 2017-18)

**ARTS H223 PRINTMAKING: MATERIALS AND TECHNIQUES: ETCHING**

Concepts and techniques of B/W & Color Intaglio. Line etching, aquatint, soft and hard ground, chin-collè techniques will be explored as well as visual concepts. Developing personal statements will be encouraged. Individual and group critiques will be employed. (Offered Fall 2017)

**ARTS H225 LITHOGRAPHY: MATERIALS AND TECHNIQUES**

An intermediate course covering B/W and Color Lithography in plates. Combined methods with other printmaking techniques such as Paper lithography and Monotype are explored during the course along with photographic approaches. Editioning of images is required along with experimental ones. Development of technical skills in traditional Lithography and personal visual study are necessary with successful creative solutions. A strong body of work following a specific theme is required. Individual discussions and group critiques are held periodically. Additional research on the history of printmaking is requested. (Not offered 2017-18)

**ARTS H229 TOPICS IN VISUAL STUDIES: ROLAND BARTHES AND THE IMAGE**

An exploration of the rhetoric of visual culture through an examination of 20th century French critic Roland Barthes’ many writings on photography, film, and what he calls the “civilized code of perfect illusions.” We will spend the semester reading his texts, charting the trajectory of a career that begins with the euphoria of an ever-expanding semiotic and ends with a meditation on the limits of this very project. (Offered Fall 2017)

**ARTS H231 DRAWING (2-D): ALL MEDIA**

Students are encouraged to experiment with various drawing media and to explore the relationships between media, techniques and expression. Each student will strive to develop a personal approach to drawing while addressing fundamental issues of pictorial space, structure, scale, and rhythm. Students will work from observation, conceptual ideas and imagination. Course includes drawing projects, individual and group crits, slide lectures, museum and gallery visits. (Offered Fall 2017)

**ARTS H233 PAINTING: MATERIALS AND TECHNIQUES**

Students are encouraged to experiment with various painting techniques and materials in order to develop a personal approach to self-expression. We will emphasize form, color, texture, and the relationship among them; influences of various techniques upon the expression of a work; the characteristics and limitations of different media. Students will work from observation, conceptual ideas, and imagination. Course includes drawing projects, individual and group crits, slide lectures, museum and gallery visits. Prerequisite(s): Fine Arts Foundations or instructor consent. (Offered Spring 2018)

**ARTS H243 SCULPTURE: MATERIALS AND TECHNIQUES**

This course is designed to give students an in-depth introduction to a comprehensive range of three-dimensional concepts and fabrication techniques. Emphasis will be on wood and metal working, and additional processes such as casting procedures for a range of synthetic materials and working with digital tools including a laser cutter and CNC equipment will be introduced in class. Course may be repeated for credit. (Offered Fall 2017)

**ARTS H251 PHOTOGRAPHY: MATERIALS AND TECHNIQUES**

Students are encouraged to develop an individual approach to photography. Emphasis is placed on the creation of color photographic prints which express plastic form, emotions and ideas about the physical world. Work is critiqued weekly to gain critical insights into editing of individual student work and the use of the appropriate black-and-white photographic materials in analog or digital formats necessary to give coherence to that work. Study of the photography collection, gallery and museum exhibitions, lectures and a critical analysis of photographic sequences in books and a research project supplement the weekly critiques. In addition students produce a handmade archival box to house their work, which is organized into a loose sequence and mounted to archival standards. Prerequisite(s): ARTS 103 or equivalent, or instructor consent. (Offered Fall 2017)

**ARTS H321 EXPERIMENTAL STUDIO: ETCHING**

An advanced course covers Color Etching using multiple plates. Viscosity printing, line etching, aquatint, soft-ground, surface roll, Chin-collé, plate preparation, registration, and editioning are covered. Students study techniques and concepts in Intaglio method as well as visual expressions through hands-on experiences. Development of technical skills of Intaglio and personal visual study are necessary and creative and experimental approaches beyond two-dimensional outcomes encouraged. A strong body of work following a specific theme is required. Individual discussions and group critiques are held periodically. Additional research on the history of printmaking is requested. (Offered Fall 2017)
ARTS H322 EXPERIMENTAL STUDIO: PRINTMAKING: LITHOGRAPHY

An advanced course exploring traditional and experimental lithographic printmaking techniques in multiple plates and stones. Two- and three-dimensional and design and drawing exploration in color also are addressed. During the semester, students use multiple-plate and stone lithography in colors. Registration, color separation, and edition are taught at an advanced level. Combining other mediums can be explored individually. Development of technical skills of the Lithographic process with personal visual study is necessary and creative and experimental approaches are highly encouraged. A strong body of work following a specific theme is required. Individual discussions and group critiques are held periodically. Additional research on the history of printmaking is requested. Prerequisite(s): One course in printmaking or instructor consent. (Not offered 2017-18)

ARTS H331 EXPERIMENTAL STUDIO: DRAWING (2-D)

Students will build on the work done in 200 level courses, to develop further their individual approach to drawing. Students are expected to create projects that demonstrate the unique character of drawing in making their own art. Completed projects will be exhibited at the end of semester. Class will include weekly crits, museum visits, visiting artists’ lecture and crits. Each student will present a 15-minute slide talk and discussion of either their own work or the work of artists who influenced them. (Offered Fall 2017)

ARTS H333 EXPERIMENTAL STUDIO: PAINTING

Students will build on the work done in 200 level courses to develop further their individual approach to painting. Students are expected to create projects that demonstrate the unique character of their chosen media in making their own art. Completed projects will be exhibited at the end of semester. Class will include weekly crits, museum visits, visiting artists’ lecture and crits. Each student will present a 15-minute slide talk and discussion of either their own work or the work of artists who influenced them. (Offered Fall 2017)

ARTS H343 EXPERIMENTAL STUDIO: SCULPTURE

In this studio course the student is encouraged to experiment with ideas and techniques with the purpose of developing a personal expression. It is expected that the student will already have a sound knowledge of the craft and aesthetics of sculpture and is at a stage where personal expression has become possible. May be repeated for credit. Prerequisite(s): ARTS 243A or B, or instructor consent. (Offered Spring 2018)

ARTS H351 EXPERIMENTAL STUDIO: PHOTOGRAPHY

Students produce an extended sequence of their work in either book or exhibition format using black and white or color photographic materials. The sequence and scale of the photographic prints are determined by the nature of the student’s work. Weekly classroom critiques, supplemented by an extensive investigation of classic photographic picture books and related critical texts guide students to the completion of their course work. This two semester course consists of the book project first semester and the exhibition project second semester. At the end of each semester the student may exhibit his/her project. (Offered Fall 2017)

ARTS H460 TEACHING ASSISTANT

(Offered Spring 2018)

ARTS H499 SENIOR DEPARTMENTAL STUDIES

The student reviews the depth and extent of experience gained, and in so doing creates a coherent body of work expressive of the student’s insights and skills. At the end of the senior year the student is expected to produce a show of his or her work. (Offered Fall 2017)

ARTT H251 FUNDAMENTALS OF ACTING

An introduction to the fundamental elements of acting (scene analysis, characterization, improvisation, vocal and gestural presentation, and ensemble work) through the study of scenes from significant 20th-century dramatic literature. (Offered Spring 2018)

FRENCH AND FRENCH STUDIES

Students may complete a major or minor in French and French Studies with two possible tracks: Language and Literature or Transdisciplinary Studies. Within the major, students may complete the requirements for the secondary education certification. Students may, with departmental approval, complete an M.A. in the combined A.B./M.A. program of 4.0, 4.5 or 5.0 years.

Faculty

Grace Armstrong, Eunice M. Schenck 1907 Professor of French and Director of Middle Eastern Languages
Rudy Le Mentheour, Associate Professor of French and Director of the Institut d’Etudes Francaises d’Avignon
Brigitte Mahuzier, Chair and Professor of French
Agnès Peysson-Zeiss, Lecturer of French and French Studies
Corine Raguenneau-Wells, Instructor
Marie Sanquer, Lecturer
Julien Suaudeau, Lecturer of French and French Studies

The Departments of French at Bryn Mawr and Haverford Colleges offer a variety of courses and two options for the major. The purpose of the major in French and French Studies is to develop sophisticated critical and analytical skills through the analysis of, among other things, French and Francophone literature, history, art, film, material culture, and/or institutions. Courses in the Language and Literature track serve students with primary interests in French and Francophone literature, film, critical theory and criticism. Additional courses in and outside the department serve the Transdisciplinary track. A thorough knowledge of written and spoken French is a common goal for both literary and transdisciplinary options.

100-level courses introduce students to the study of the French language, French and Francophone literatures and cultures, as well as exposing them to critical materials related to textual analysis conceived broadly. Courses at the 200-level treat French and Francophone literature and cultures across the historical spectrum. In addition, two 200-level courses are devoted to advanced language training and one to the study of theory. Advanced (300-level) courses offer detailed study either of individual authors, genres and movements or of particular periods, themes and problems in French and Francophone culture. In both major options, students are admitted to advanced
courses after satisfactory completion of two semesters of 200-level courses in French.

All students who wish to pursue their study of French, regardless of level, must take a departmental placement examination prior to arriving at Bryn Mawr. Those students who enter beginning French have two options: intensive study of the language in the intensive sequence (001-002 Intensive Elementary and 005 Intensive Intermediate; or non-intensive study of the language in the non-intensive sequence (001-002 Elementary; 003-004 Intermediate). Although it is possible to major in French using either of the two sequences, students who are considering doing so and have been placed at the 001 level are strongly encouraged to take the intensive sequence.

**Major Requirements**

Requirements in the major subject are:

- **French and Francophone Literature track**: FREN 005-102 or 005-105 or 101-102 or 101-105; the 200-level advanced language course, FREN 260; FREN 213 Theory in Practice: Critical Discourses in the Humanities (BMC) or “Quest-ce que la théorie” (HC); three 200-level literature courses, two 300-level literature courses, and the year-long Senior Experience, which consists of Senior Conference (FREN 398) in the fall semester and either a Senior Thesis or a third 300-level course culminating in the Senior Essay during the spring semester. In either case, the work of the spring semester is capped by an oral defense.

- **Transdisciplinary French and Francophone Studies**: FREN 005-102 or 005-105 or 101-102 or 101-105; the 200-level advanced language course, FREN 260; two 200-level courses, within the department: e.g., FREN 291 or 299; two 200-level courses, to be chosen by the student outside the French departments (at BMC/HC or JYA), which contribute coherently to her independent program of study; FREN 325 or 326 Etudes avancées de civilisation, Senior Conference (FREN 398), plus two 300-level courses outside the departments; a thesis of one semester in French or English. Students interested in this track are encouraged to present the rationale and the projected content of their transdisciplinary program for departmental approval during their sophomore year and to update their plan in junior year; they should have excellent records in French and the other subjects involved in their proposed program.

- **Both concentrations**: all French majors are expected to have acquired fluency in the French language, both written and oral. Unless specifically exempted by the department, they are required to take the 200-level advanced language course. Students may wish to continue from this course to hone their skills further in courses on debate, stylistics and translation offered at Bryn Mawr College or abroad. Students placed at the 200-level by departmental examinations are exempted from the 100-level requirements. Occasionally, students may be admitted to seminars in the graduate school.

The Major Writing Intensive requirement may be met by any one of the following courses: FREN 101, 102, 260, Senior Essay (in a 300-I. course).

**Honors and the Senior Experience**

For the French and Francophone Literature option: After taking Senior Conference in semester I of the senior year, students have the choice in semester II of writing a thesis in French (40-50 pp.) under the direction of a faculty member or taking a 300-level course in which they write a Senior Essay in French (15-25 pp.). The first choice offers self-selected students who already have developed a clearly defined subject in semester I the opportunity to pursue independent research and writing of the thesis with a faculty mentor. The second choice allows students, often double majors with another thesis or pre-medical students, the opportunity to produce a substantial, but shorter, piece of work within the structure of their 300-level course in semester II. Departmental honors are awarded for excellence in the Senior Experience after the oral defense of either the Senior Thesis or the Senior Essay.

For the Interdisciplinary Studies in French option: Students take French 325 or 326, if they have not already done so, and French 398 in Semester I of their senior year and, if they have not already done so, complete the two 300-level courses required outside the department. In semester II they write a thesis in French or English under the direction of a member of the French faculty and a mentor outside the department. Departmental honors are awarded for excellence in the Senior Experience after the oral defense of the Senior Thesis.

**Minor Requirements**

Requirements for a French minor are FREN 005-102 or 005-105, or 101-102 or 101-105; the 200-level advanced language course; and four 200-level or 300-level courses. At least one course must be 300-level.

**Teacher Certification**

The Department of French and French Studies offers a certification program in secondary teacher education. For more information, see the description of the Education Program.

**A.B./M.A. Program**

Particularly well-qualified students may undertake work toward the joint A.B./M.A. degree in French. Such a program may be completed in four, four and a half or five years and is undertaken with the approval of the department, the Special Cases Committee and the Dean of the Graduate School of Arts and Sciences.

**Study Abroad**

Students majoring in French may, by a joint recommendation of the deans of the Colleges and the Departments of French, be allowed to spend a semester of their junior year in France and/or a Francophone country under one of the junior-year plans approved by Bryn Mawr.

Students wishing to enroll in a summer program may apply for admission to the Institut d’Etudes Françaises d’Avignon, held under the auspices of Bryn Mawr. The Institut is designed for selected undergraduates with a serious interest in French and Francophone literatures and cultures; it will be particularly attractive for those who anticipate professional or graduate-school careers requiring knowledge of the language and civilization of France and French-speaking countries. The curriculum includes general and advanced courses in French language, literature, social sciences, history, art, and economics. The program is open to students of high academic achievement...
who have completed a course in French at the third-year level or the equivalent.

COURSES

FREN B005 Intensive Intermediate French
The emphasis on speaking and understanding French is continued; literary and cultural texts are read and increasingly longer papers are written in French. In addition to three class meetings a week, students develop their skills in group sessions with the professors and in oral practice hours with assistants. Students use internet resources regularly. This course prepares students to take 102 or 105 in semester II. Open only to graduates of Intensive Elementary French or to students placed by the department. Students who did not complete Intensive Elementary French must take either 102 or 105 to receive language credit. Two additional hours of instruction outside class time required. Additional meeting hours on Tuesday and Thursday will be scheduled according to students availability. Prerequisite: FREN B002IN (intensive) or Placement exam. Approach: Course does not meet an Approach
Approach: Course does not meet an Approach Units: 1.0
Instructor(s): Armstrong,P., Le Menthéour,R.
(Fall 2017)

FREN B101 Introduction à l’analyse littéraire et culturelle I
Presentation of essential problems in literary and cultural analysis by close reading of works selected from various periods and genres and by analysis of voice and image in French writing and film from female to male voices in Metropolitan France, Africa, Canada, and The Antilles. Participation in discussion and practice in written and oral expression are emphasized, as are grammar review and exercises. Prerequisites: FREN B004, placement, or permission of instructor.
Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Units: 1.0
Instructor(s): Armstrong,P., Le Menthéour,R.
(Fall 2017)

FREN B102 Introduction à l’analyse littéraire et culturelle II
Continued development of students’ expertise in literary and cultural analysis by emphasizing close reading as well as oral and written analyses of increasingly complex works chosen from various genres and periods of French and Francophone works in their written and visual modes. Readings include theater of the 17th or 18th centuries and build to increasingly complex novels, poetry and novels of the 19th and 20th centuries. Participation in guided discussion and practice in oral/written expression continue to be emphasized, as is grammar review. Prerequisite: FREN 005 or 101.
Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Units: 1.0
Instructor(s): Mahuzier,B.
(Spring 2018)

FREN B105 Directions de la France contemporaine
An examination of contemporary society in France and Francophone cultures as portrayed in recent documents and film. Emphasizing the tension in contemporary French-speaking societies between tradition and change, the course focuses on subjects such as family structures and the changing role of women, cultural and linguistic identity, an increasingly multiracial society, the individual and institutions (religious, political, educational), and “les loisirs”. In addition to the basic text and review of grammar, readings are chosen from newspapers, contemporary literary texts and magazines, complemented by video materials. Prerequisite: FREN 005 or 101.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Peysson-Zeiss,A., Sanquer,M.
(Spring 2018)

FREN B201 Le Chevalier, la dame et le prêtre: littérature et publics du Moyen Âge
Using literary texts, historical documents and letters as a mirror of the social classes that they address, this interdisciplinary course studies the principal preoccupations of secular and religious female and male authors in France and Norman England from the eleventh century through the fifteenth. Selected works from epic, lais, roman courtois, fabliaux, theater, letters, and contemporary biography are read in modern French translation. Prerequisite: FREN 102 or 105.
Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

FREN B204 Le Siècle des lumières
Representative texts of the Enlightenment with emphasis on the development of liberal thought as illustrated in the Encyclopédie and the works of Montesquieu, Voltaire, Diderot, and Rousseau. Prerequisites: FREN 102 or 105. Current topic description: How and why did Enlightenment thinkers inspire the main figures of the French Revolution? And how can we explain that the ideal of freedom led both to impressive reforms and to mass executions? We will read Enlightenment philosophers as well as political texts from the French Revolution. Authors include: Rousseau, Diderot, Beaumarchais, Sade, Olympe de Gouges, Robespierre, and Hugo. Prerequisite: FREN 102 or 105. Current topic description: How and why did Enlightenment thinkers inspire the main figures of the French Revolution? Authors include: Rousseau, Diderot, Beaumarchais, Sade, Olympe de Gouges, Robespierre, and Hugo.
Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Le Menthéour,R.
(Fall 2017)

FREN B205 Le Temps des prophètes
A study of post-Revolutionary texts in which the prophetic voice of the « genius » is often gendered feminine and/or other. This is a topics course, course content varies. Prerequisite: FREN 102 or 105.
Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)
FREN B206 Topics: Le Temps des virtuoses
This a topics course. Course content varies. Current topic description: What is so beautiful about the famous “Belle Epoque”? What is really going on in the backstage of its gaudy new buildings, its seedy cabarets? Reading Freud’s Civilization and Its Discontent, we will examine the “Beast” and/or the “Beauty” of that period of time (1871-1914) by reading a number of literary works by such writers as Zola, Colette, Gide and Proust. Prerequisite: FREN 102 or 105.

Reading Freud’s Civilization and Its Discontent, we will examine the “Beast” and/or the “Beauty” of that period of time (1871-1914) by reading a number of literary works by such writers as Zola, Colette, Gide and Proust.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Mahuzier,B.
(Spring 2018)

FREN B207 Introduction à la littérature du 20ème et 21ème siècle
A study of selected works illustrating the principal literary movements from 1900 to the present. Depending on the professor, this class will focus on various authors and literary movements of the 20th century such as Surrealism, Modernism, the Nouveau Roman, Oulipo, as well as works from the broader Francophone world. Prerequisites: FREN 102 or 105.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

FREN B213 Theory in Practice: Critical Discourses in the Humanities
By bringing together the study of major theoretical currents of the 20th century and the practice of analyzing literary works in the light of theory, this course aims at providing students with skills to use literary theory in their own scholarship. The selection of theoretical readings reflects the history of theory (psychoanalysis, structuralism, narratology), as well as the currents most relevant to the contemporary academic field: Post-structuralism, Post-colonialism, Gender Studies, and Ecocriticism. They are paired with a diverse range of short stories (Poe, Kafka, Camus, Borges, Calvino, Morrison, Djebar, Ngozi Adichie) that we discuss along with our study of theoretical texts. The class will be conducted in English with an additional hour in French for students wishing to take it for French credit.

Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Sanquer,M.
(Fall 2017)

FREN B254 Teaching (in) the Postcolony: Schooling in African Fiction
This seminar examines novels from Francophone and Anglophone Africa, critical essays, and two films, in order better to understand the forces that inform the African child’s experiences of education. This course is taught in English.

Approach: Cross-Cultural Analysis (CC)

Counts towards: Africana Studies
Units: 1.0
(Not Offered 2017-2018)

FREN B260 Atelier d’écriture
Intensive practice in speaking and writing. Conversation, discussion, advanced training in grammar and stylistics.

Depending on the professor, there may be a praxis component through language exchange.

Prerequisite: FREN B102 or B105 or French Placement (200 level or higher).

Approach: Cross-Cultural Analysis (CC)
Major Writing Requirement: Writing Intensive
Counts towards: Praxis Program
Units: 1.0
Instructor(s): Suaudeau,J.
(Spring 2018)

FREN B275 Improving Mankind: Enlightened Hygiene and Eugenics
At first sight, hygiene and eugenics have nothing in common: the former is usually conceived as a good management of our everyday conditions of life, whereas the latter is commonly reviled for having inspired discriminatory practices (in Nazi Germany, but also in the US, Sweden, and Switzerland). Our inquiry will explore how, in the context of the French Enlightenment, a subdiscipline of Medicine (namely Hygiene) was redefined, expanded its scope, and eventually became hegemonic both in the medical field and in civil society. We will also explore how and why a philanthropic ideal led to the quest for the improvement of the human species. We will compare the French situation with that of other countries (mainly UK and the USA). This course is taught in English. Students who wish to get credit in French will meet one extra hour.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Health Studies
Units: 1.0
(Not Offered 2017-2018)

FREN B302 Le printemps de la parole féminine: femmes écrivains des débuts
This study of selected women authors from Latin CE-Carolingian period through the Middle Ages, Renaissance and 17th century—among them, Perpetua, Hrotswit, Marie de France, the trobairitz, Christine de Pisan, Louise Labé, Marguerite de Navarre, and Madame de Lafayette—examines the way in which they appropriate and transform the male writing tradition and define themselves as self-conscious artists within or outside it. Particular attention will be paid to identifying recurring concerns and structures in their works, and to assessing their importance to women’s writing in general: among them, the poetics of silence, reproduction as a metaphor for artistic creation, and sociopolitical engagement. Prerequisite: two 200-level courses or permission of instructor.

Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

FREN B306 Libertinage et subversion
The libertine movement of the 18th century has long been condemned for moral reasons or considered of minor importance when compared to the Enlightenment. Yet, the right to happiness
Political theory by stating that men are not political animals. We pedagogy, and undermined the foundations of the Western novels. He also opposed theatre, established a new form of the ultimate best-seller of the 18th century, he harshly criticized Rousseau fought intellectual battles most of his life. The author of Enlightenment. Although he was denying any taste for polemics, this does not confine itself to literature, but also involves a dimension of social subversion. This course will allow you to understand Charles Baudelaire's enigmatic comment: "the Revolution was made by voluptuaries." Prerequisite: two 200-level courses or permission of instructor.

Units: 1.0
(Not Offered 2017-2018)

FREN B325 Topics: Études avancées

An in-depth study of a particular topic, event or historical figure in French civilization. This is a topics course. Course content varies. The seminar topic rotates among many subjects: La Révolution française: Histoire, littérature et culture; L’environnement naturel dans la culture française; Mal et valeurs éthiques; Le Cinéma et la politique, 1940-1968; Le Nationalisme en France et dans les pays francophones; Étude socio-culturelle des arts du manger en France du Moyen Age à nos jours; Crimes et criminalité; Écrire la Grande Guerre: 1914-10; Le “Rentrée Littéraire”; Proust Baudelaire.

Prerequisite: Two 200-level courses.
Units: 1.0
Instructor(s): Le Menthéour, R., Sanquer, M.

FREN B350 Voix médiévales et échos modernes

A study of selected 19th- and 20th-century works inspired by medieval subjects, such as the Grail and Arthurian legends and the Tristan and Yseut stories, and by medieval genres, such as the roman, saints’ lives, or the miracle play. Among the texts and films studied are works by Bonnefoy, Cocteau, Flaubert, Genevoix, Giono, and Gracq.

Units: 1.0
Instructor(s): Armstrong, P.
(Spring 2018)

FREN B356 Rousseau polémiste

This course will explore Rousseau’s work not as a closed system, but as a polemical reaction to major trends of the French Enlightenment. Although he was denying any taste for polemics, Rousseau fought intellectual battles most of his life. The author of the ultimate best-seller of the 18th century, he harshly criticized novels. He also opposed theatre, established a new form of pedagogy, and undermined the foundations of the Western political theory by stating that men are not political animals. We will thus consider Rousseau not only as a philosopher, but also as one of the most brilliant polemicists of his time.

Units: 1.0
(Not Offered 2017-2018)

FREN B398 Senior Conference

A weekly seminar examining major French and Francophone literary texts and the interpretive problems they raise. Theoretical texts will encourage students to think beyond traditional literary categories and disciplinary boundaries and to interrogate issues such as cultural memory, political and moral subversion, etc. This course prepares students for the second semester of their Senior Experience, during which those not writing a thesis are expected to choose a 300-level course and write a long research paper, the Senior Essay.

Prerequisite: BM undergraduate French major.
Units: 1.0
Instructor(s): Mahuzier, B.
(Fall 2017)

FREN B403 Supervised Work

Units: 1.0
(Fall 2017)

FREN B425 World Pulse Translation Praxis

This Praxis course is partnering with World Pulse, an action media network which supports grassroots women change leaders through media and empowerment training; this course will specifically work with the women leaders in the Eastern Democratic Republic of Congo who advocate for an end to violence against women.

Counts towards: Praxis Program
Units: 0.5
Instructor(s): Peysson-Zeiss, A.
(Fall 2017)

FREN B655 Rousseau polémiste

Jean-Jacques Rousseau n’a cessé de susciter des polémiques. Aucun écrivain n’a suscité autant de débats dans des domaines aussi variés, de l’esthétique théâtrale à la pédagogie, en passant par la théorie politique et l’écriture romanesque. Ses sectateurs ont vu en lui un grand peintre de la sensibilité humaine, un partisan sincère de la justice républicaine, un pédagogue révolutionnaire. À l’inverse, ses ennemis l’ont dépeint comme le promoteur d’un régime totalitaire.

Units: 1.0
Instructor(s): Le Menthéour, R.
(Fall 2017)

FREN B701 Supervised Work

Units: 1.0
(Not Offered 2017-2018)

FREN B801 Elementary French

The speaking and understanding of French are emphasized particularly during the first semester, and written competence is stressed as well in semester II. The work includes intensive oral practice sessions. The course meets five hours a week in non-intensive sections. This is a year-long course and students must register for both semesters.

Approach: Course does not meet an Approach
read; and short papers are written in French. Students regularly attend supplementary oral practice sessions. The course meets in non-intensive (three hours a week) sections that are supplemented by an extra hour per week with an assistant. This is a year-long course.

Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): Le Menthéour, R., Suaudeau, J.
(Spring 2018)

FREN B217 Drawing Disasters: Trauma and Healing
This course will address the question of trauma, resilience and survival through art, focusing on comics. We will address trauma from a geo-political, historical, sociological and literary perspectives looking at primary works from places as varied as: Europe (Croci), Lebanon (Abirached), Gaza (Sacco), Cambodia (Sera Ing), Iran (Satrapi) to name only a few. In the spring of 2018, those students participating in the cluster will be required to attend all presentations, lunches and labs as part of the cluster. They will attend the residencies taught by graphic artists. There will be oral presentations and papers. For their final project, students will curate an exhibit on comics.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Units: 1.0
Instructor(s): Peysson-Zeiss, A.
(Spring 2018)

ITAL B213 Theory in Practice: Critical Discourses in the Humanities
An examination in English of leading theories of interpretation from Classical Tradition to Modern and Post-Modern Time. This is a topics course. Course content varies.

Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

GENDER AND SEXUALITY STUDIES

Students may complete a minor or concentration in Gender and Sexuality Studies. Students may submit an application to major in Gender and Sexuality Studies through the independent major program.

Faculty

Steering Committee
Piper Coutinho-Sledge, Assistant Professor of Sociology
Gregory Davis, Associate Professor of Biology
Colby Gordon, Assistant Professor of English
H. Rosi Song, Professor of Spanish and Director of Gender and Sexuality Studies
Sharon Ullman, Professor of History
The Program in Gender and Sexuality is an interdisciplinary, Bi-College program that can be integrated with any major or pursued independently. Students graduate from the program with a high level of fluency and rigor in their understanding of the different ways issues of gender and sexuality shape our lives as individuals and as members of larger communities, both local and global.

Students choosing a concentration, minor or independent major in gender and sexuality plan their programs in consultation with the Gender and Sexuality coordinator on their home campus. Members of the Gender and Sexuality steering committee serve as their individual mentors. All students in the program take the core course, “Interdisciplinary Perspectives on Sex and Gender.” Other courses in the program allow them to explore a range of approaches to gender and sexual difference: critical feminist theory; women’s studies; transnational and third-world feminisms; the experiences of women of color; gender and science; the construction of masculinity; gay, lesbian, queer, transgender, and transsexual studies; the history and representation of gender and sexuality in a global context.

Concentration and Minor Requirements
Six courses distributed as follows are required for the concentration:

1. An introductory course (including equivalent offerings at Swarthmore College or the University of Pennsylvania).
2. The junior seminar: Interdisciplinary Perspectives on Sex and Gender (alternating fall semesters between Bryn Mawr and Haverford).
3. Four additional approved courses from at least two different departments, two of which are normally at the 300 level. Units of Independent Study (403) may be used to fulfill this requirement.
4. Of the six courses, no fewer than two and no more than three will also form part of the student’s major.

Requirements for the minor are identical to those for the concentration, with the stipulation that no courses in gender and sexuality will overlap with courses taken to fulfill requirements in the student’s major.

Neither a senior seminar nor a senior thesis is required for the concentration or minor; however, with the permission of the major department, a student may choose to count toward the concentration a senior thesis with significant content in gender and sexuality. Students wishing to construct an independent major in gender and sexuality should make a proposal to the Committee on Independent Majors.

COURSES

ANTH B102 Introduction to Cultural Anthropology
An introduction to the methods and theories of cultural anthropology in order to understand and explain cultural similarities and differences among contemporary societies.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Child and Family Studies; Gender and Sexuality Studies; International Studies
Units: 1.0
Instructor(s): Pashigian, M., Campoamor, L.
(Spring 2018)

ANTH B238 Chinese Culture and Society
This course encourages students to think critically about major developments in Chinese culture and society that have occurred during the twentieth and twenty-first centuries, with an emphasis on understanding both cultural change and continuity in China. Drawing on ethnographic material and case studies from rural and urban China over the traditional, revolutionary, and reform periods, this course examines a variety of topics including family and kinship; marriage, reproduction, and death; popular religion; women and gender; the Cultural Revolution; social and economic reforms and development; gift exchange and guanxi networks; changing perceptions of space and place; as well as globalization and modernity. Prerequisite: Sophomore standing or higher.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies; International Studies
Units: 1.0
(Not Offered 2017-2018)

ANTH B268 Cultural Perspectives on Marriage and Family
This course explores the family and marriage as basic social institutions in cultures around the world. We will consider various topics including: kinship systems in social organization; dating and courtship; parenting and childhood; cohabitation and changing family formations; family planning and reproductive technologies; and gender and the division of household labor. In addition to thinking about individuals in families, we will consider the relationship between society, the state, and marriage and family. Prerequisite: ANTH B102 or permission of instructor.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ANTH B279 Anthropology of Childhood and Youth
This course will challenge you to think about childhood and youth as a diverse global experience by exploring a set of fundamental questions. How do children’s daily lives differ from place to place, and how are race, class and gender linked to discourses and experiences of childhood? How do children stand in as symbols for broader political and cultural concerns? The course will explore these questions by considering the ways childhood is constructed and experienced in relation to controversial topics such as education, labor, migration, human rights, violence, consumerism, and media.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Child and Family Studies; Gender and Sexuality Studies
Units: 1.0
(Fall 2017)

ANTH B312 Anthropology of Reproduction
An examination of social and cultural constructions of reproduction, and how power and politics in everyday life shapes reproductive behavior and its meaning in Western and non-Western cultures. The influence of competing interests within households, communities, states, and institutions on reproduction is considered. Prerequisite: ANTH B102 (or ANTH H103) or permission of instructor.
Counts towards: Child and Family Studies; Gender and Sexuality Studies; Health Studies
Prerequisite: Sophomore standing or higher.

**the importance of political economy, nation, and globalization.**

The state will pervade the topics addressed in the course, as will continuities and historical precedent in past centuries. In view to continuities and historical precedent in past centuries. In ANTCh B354 Political Economy, Gender, Ethnicity and Transformation in Vietnam focusing largely on contemporary Vietnam, but with a middle income status. This course examines culture and society cultural practices as the country has moved from low income to central economy to a market/capitalist economy since the late 1980s. These changes have resulted in urbanization, a rise in the role of women in Paleolithic times? How does female form reflect evolutionary changes to our species? Paleoanthropologists reconstruct how humans evolved based on evidence from fossilized bones, ancient DNA, and archaeological artifacts. This complex narrative is often presented as androcentric, focusing on the importance of male-bodies, while de-emphasizing or even ignoring female-bodies. In this seminar, students will read and discuss historical and modern works on paleoanthropology and its critical intersection with feminist theory. The goal will be to find out what women were doing in our evolutionary past, and identify methodological and theoretical approaches to prevent gender-biased, androcentric narratives from occurring. Prerequisites: ANTh B102, ANTh H103 or permission of instructor.

Counts towards: Gender and Sexuality Studies; Health Studies
Units: 1.0
(Not Offered 2017-2018)

**ARCH B254 Cleopatra**

This course examines the life and rule of Cleopatra VII, the last queen of Ptolemaic Egypt, and the reception of her legacy in the Early Roman Empire and the western world from the Renaissance to modern times. The first part of the course explores extant literary evidence regarding the upbringing, education, and rule of Cleopatra within the contexts of Egyptian and Ptolemaic cultures, her relationships with Julius Caesar and Marc Antony, her conflict with Octavian, and her death by suicide in 30 BCE. The second part examines constructions of Cleopatra in Roman literature, her iconography in surviving art, and her contributions to and influence on both Ptolemaic and Roman art. A detailed account is also provided of the afterlife of Cleopatra in the literature, visual arts, scholarship, and film of both Europe and the United States, extending from the papal courts of Renaissance Italy and Shakespearian drama, to Thomas Jefferson's art collection at Monticello and Joseph Mankiewicz's 1963 epic film, Cleopatra.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

**ARTD B250 Performing the Political Body**

This course focuses on how dance is a useful medium for both embodying and analyzing ideologies and practices of power, particularly with reference to gender, class, and ethnicity. Students will also investigate bodies as an active agent of social change and political action. Students will read excerpts from seminal and contemporary theory of performing bodiedness, ethnicity, and gender, as well as from theorists, performers, and other practitioners more specifically engaged with dance and performance. In addition to literary, dance historical, anthropological and political texts, the course includes multimedia lectures, and introductory group improvisation and performance exercises, however, no prior training or experience in dance or performance is necessary. In lieu of books, students will be assigned to see a dance performance (typical costs: $12-30) but may take advantage of free Tri-Co performances.
Preparation: A previous dance lecture/seminar course or a course in a relevant discipline such as anthropology, sociology, or history is recommended but not required.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)

Major Writing Requirement: Writing Attentive

Counts towards: Gender and Sexuality Studies

Units: 1.0

(Not Offered 2017-2018)

**BIOL B214 The History of Genetics and Embryology**

This course provides a general history of genetics and embryology in Germany, Britain and the United States from the late 19th to the mid-20th century. The course will include a focus on the role that women scientists and technicians played in the development of these sub-disciplines. We will look at the lives of well known and lesser-known individuals, asking how factors such as their educational experiences and mentor relationships influenced the roles these women played in the scientific enterprise. We will also examine specific scientific contributions in historical context, requiring a review of core concepts in genetics and developmental biology.

Approach: Inquiry into the Past (IP); Scientific Investigation (SI)

Counts towards: Gender and Sexuality Studies

Units: 1.0

Instructor(s): Davis,G.

(Spring 2018)

**CSTS B215 Feminism in Classics**

This course will illustrate the ways in which feminism has had an impact on classics, as well as the ways in which feminists think with classical texts. It will have four thematic divisions: feminism and the classical canon; feminism, women, and rethinking classical history; feminist readings of classical texts; and feminists and the classics - e.g. Cixous' Medusa and Butler's Antigone.

Approach: Critical Interpretation (CI)

Counts towards: Gender and Sexuality Studies

Units: 1.0

Instructor(s): Conybeare,C.

(Fall 2017)

**CSTS B230 Food and Drink in the Ancient World**

This course explores practices of eating and drinking in the ancient Mediterranean world both from a socio-cultural and environmental perspective. Since we are not only what we eat, but also where, when, why, with whom, and how we eat, we will examine the wider implications of patterns of food production, preparation, consumption, availability, and taboos, considering issues like gender, health, financial situation, geographical variability, and political status. Anthropological, archaeological, literary, and art historical approaches will be used to analyze the evidence and shed light on the role of food and drink in ancient culture and society. In addition, we will discuss how this affects our contemporary customs and practices and how our identity is still shaped by what we eat.

Approach: Cross-Cultural Analysis (CC)

Counts towards: Gender and Sexuality Studies

Units: 1.0

(Not Offered 2017-2018)

**EALC B240 Topics in Chinese Film**

This is a topics course. Course content varies.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)

Counts towards: Gender and Sexuality Studies; Film Studies

Units: 1.0

Instructor(s): Kwa,S.

(Spring 2018)

**EALC B255 Understanding Comics: Introduction to Reading the Graphic No**

The graphic narrative form has proliferated at a breathtaking rate in the last several decades. Called "comics," "graphic novels," and many other terms in between, these word-image hybrids have been embraced by both popular and critical audiences. But what is a graphic novel? How do we conceive of these texts and, more importantly, how do we read, interpret and write about them? This course is focused on approaches to reading the graphic novel, with a focus on a subgenre called the "literary comic." Our first approach is to consider different kinds of primary source texts and ask if and how they fulfill our understanding of the graphic narrative. This consideration will include various test cases, from wordless comics, to texts used as images, to the many varieties of word-image hybrids that are called comic books. Our second approach is to examine different scholarly approaches to analyzing graphic narratives, base d in different disciplines such as memoir studies, trauma studies, visual and material culture, history, semiotics, and, especially, narratology. Primary source readings include texts by Ware, Barry, Clowes, and Burns. Secondary readings include Hirsch, McCloud, Barthes, Iser, and Groensteen. Three short assignments due during the semester, and a final project due at the end of exam period (see description below). Students will also rotate responsibilities for starting discussions with small presentations aimed at discussing readings in depth. Students taking this course for their major in EALC or COML should meet with the instructor to discuss specific requirements.

Approach: Critical Interpretation (CI)

Major Writing Requirement: Writing Attentive

Counts towards: Gender and Sexuality Studies

Units: 1.0

Instructor(s): Kwa,S.

(Fall 2017)

**EALC B264 Human Rights in China**

This course will examine China’s human rights issues from a historical perspective. The topics include diverse perspectives on human rights, historical background, civil rights, religious practice, justice system, education, as well as the problems concerning some social groups such as migrant laborers, women, ethnic minorities and peasants.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)

Counts towards: Gender and Sexuality Studies

Units: 1.0

Instructor(s): Jiang,Y.

(Fall 2017)

**ECON B324 The Economics of Discrimination and Inequality**

Explores the causes and consequences of discrimination and inequality in economic markets. Topics include economic theories of discrimination and inequality, evidence of contemporary race- and gender-based inequality, detecting discrimination, identifying sources of racial and gender inequality, and identifying sources of overall economic inequality. Additionally, the instructor and students will jointly select
supplementary topics of specific interest to the class. Possible topics include: discrimination in historical markets, disparity in legal treatments, issues of family structure, and education gaps. Writing Intensive. Prerequisites: At least one 200-level applied microeconomics elective; ECON 253 or 304; ECON 200.

Major Writing Requirement: Writing Intensive
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Nutting,A.
(Fall 2017)

EDUC B290 Learning in Institutional Spaces
This course considers how institutions such as schools and prisons operate as sites of both constraint and learning. Beginning with an examination of educational and penitential institutions, we inquire into how these structures inhibit, propel, and shape learning, and how human beings take up, take on and alter their surroundings. We consider explicit curriculae alongside implicit, hidden curriculae; how do people inside these spaces collude with, subvert, and challenge official agendas as they create their own agendas for learning? We investigate the role of "voice"—speaking out, expressing, engaging in dialogue—in teaching and learning. In what ways can "voice" instigate understanding and change, and how might this be problematic? Students will engage in Praxis placements in schools or prisons.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Gender and Sexuality Studies; Praxis Program
Units: 1.0
Instructor(s): Cohen,J.
(Fall 2017)

ENGL B203 Imagined Worlds: Utopia and Dystopia in Literature
When Thomas More coined the term "Utopia" in 1516, it meant both "good place" and "no place"—an ideal society, and an unreachable one. Since then, the term (as well as its opposite, dystopia) has been applied to representations of imagined worlds that hold a mirror up to our own. In this class, we’ll read texts from the early modern period (Utopia, The Blazing World) through the present day (The Handmaid’s Tale, The Hunger Games) that use invented societies to critique the "real world." We will pay particular attention to how descriptions of imagined places explore very real tensions around class, gender and racial identities. Do these texts offer a path to better worlds, or do such fantasies always remain out of reach?

Approach: Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B210 Renaissance Literature: Performances of Gender
Readings chosen to highlight the construction and performance of gender identity during the period from 1550 to 1650 and the ways in which the gender anxieties of 16th- and 17th-century men and women differ from, yet speak to, our own. Texts will include plays, poems, prose fiction, diaries, and polemical writing of the period.

Approach: Inquiry into the Past (IP)
Major Writing Requirement: Writing Intensive
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B212 Renaissance Erotic Poetry
In this class we will examine our ability to put sexual experience into language. As we look at the various ways in which sexuality can be expressed linguistically, we will ask whether (and if so, why) it is "necessary" to "put sex into" language and explore what various scientific, social-scientific and literary discourses of desire look and sound like. What are the capacities and limitations of each? What other languages might be used? Can we imagine a curriculum to do this work? Can we teach such a curriculum? Praxis I course.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Gordon,C.
(Spring 2018)

ENGL B215 Early Modern Crime Narratives: Vice, Villains, and Law
This course taps into our continuing collective obsession with criminality, unpacking the complicated web of feelings attached to crime and punishment through early modern literary treatments of villains, scoundrels, predators, pimps, witches, king-killers, poisoners, mobs, and adulterers. By reading literary accounts of vice alongside contemporary and historical theories of criminal justice, we will chart the deep history of criminology and track competing ideas about punishment and the criminal mind. This course pays particular attention to the ways that people in this historical moment mapped criminality onto dynamics of gender, race, sexuality, disability, religion, and mental illness according to cultural conventions very different from our own. Authors may include Shakespeare, Marlowe, Massinger, Middleton, Dekker, Webster, and Behn.

Approach: Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B217 Narratives of Latinidad
This course explores how Latina/o writers fashion bicultural and transnational identities and narrate the intertwined histories of the U.S. and Latin America. We will focus on topics of shared concern among Latino groups such as struggles for social justice, the damaging effects of machismo and racial hierarchies, the politics of Spanglish, and the affective experience of migration. By analyzing a range of cultural production, including novels, poetry, testimonial narratives, films, activist art, and essays, we will unpack the complexity of Latinidad in the Americas.

Approach: Critical Interpretation (CI)
Counts towards: Africana Studies; Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B218 Ecological Imaginings
Re-thinking the evolving nature of representation, with a focus on language as a link between natural and cultural ecosystems. We will observe the world; read classical and cutting edge ecological, ecoliterary, ecofeminist, and ecocritical theory, along with a wide range of exploratory, speculative, and imaginative essays and stories; and seek a variety of ways of expressing our own ecological interests.
ENGL B228 Silence: The Rhetorics of Class, Gender, Culture, Religion

This course will consider silence as a rhetorical art and political act, an imaginative space and expressive power that can serve many functions, including that of opening new possibilities among us. We will share our own experiences of silence, re-thinking them through the lenses of how it is explained in philosophy, enacted in classrooms and performed by various genders, cultures, and religions.

Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Intensive
Counts towards: Gender and Sexuality Studies; Praxis Program
Units: 1.0
(Not Offered 2017-2018)

ENGL B232 Pirates in the Popular Imagination

This course will explore popular representations of pirates from the seventeenth century to the present, in memoirs, first-hand and fictional accounts (including children’s literature), and films. The context will be global, with an emphasis on the transatlantic world. Topics will include slavery, gender/sexuality, captivity, class/status, race, and imperialism/colonialism.

Approach: Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B254 Female Subjects: American Literature 1750-1900

This course explores the subject, subjection, and subjectivity of women and female sexualities in U.S. literatures between the signing of the Constitution and the ratification of the 19th Amendment. While the representation of women in fiction grew and the number of female authors soared, the culture found itself at pains to define the appropriate moments for female speech and silence, action and passivity. We will engage a variety of pre-suffrage literatures that place women at the nexus of national narratives of slavery and freedom, foreignness and domesticity, wealth and power, masculinity and citizenship, and sex and race “purity.”

Approach: Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B262 Survey in African American Literature

English 262 is a topics course that allows for multiple themes to be taught. Each topic will have its own description and students may enroll for credit in the course as long as the topics vary.
Current topic description: Nineteenth-Century African American Narrative. A study of the interplay of history, politics, art, and fiction, this course traces a chronological, new historicist path between the forging of a literary identity in a new nation and Pauline Hopkins’ Contending Forces (1900).

Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Intensive
Counts towards: Africana Studies; Gender and Sexuality Studies
Units: 1.0
Instructor(s): Beard, L-S.
(Spring 2018)

ENGL B263 Toni Morrison and the Art of Narrative Conjure

A comprehensive study of Morrison’s narrative experiments in fiction, this course traces her entire oeuvre from “Recitatif” to God Help the Child. We read the works in publication order with three main foci: Morrison-as-epistemologist questioning what it is that constitutes knowing and being known, Morrison-as-revisionist-teacher-of-reading-strategies, and Morrison in intertextual dialogue with several oral and literary traditions. In addition to critical essays, students complete a “Pilate Project” – a creative response to the works under study.

Approach: Critical Interpretation (CI)
Counts towards: Africana Studies; Gender and Sexuality Studies
Units: 1.0
Instructor(s): Beard, L-S.
(Fall 2017)

ENGL B270 American Girl: Childhood in U.S. Literatures, 1690-1935

This course will focus on the “American Girl” as a particularly contested model for the nascent American. Through examination of religious tracts, slave and captivity narratives, literatures for children and adult literatures about childhood, we will analyze U. S. investments in girlhood as a site for national self-fashioning.

Approach: Critical Interpretation (CI)
Counts towards: Child and Family Studies; Gender and Sexuality Studies
Units: 1.0
Instructor(s): Schneider, B.
(Spring 2018)

ENGL B284 Women Poets: Giving Eurydice a Voice

This course covers English and American woman poets of the 19th and 20th centuries whose gender was important for their self-understanding as poets, their choice of subject matter, and the audience they sought to gain for their work. Featured poets include Elizabeth Bishop, Gwendolyn Brooks, Elizabeth Barrett Browning, Lucille Clifton, H.D., Emily Dickinson, Marianne Moore, Sylvia Plath, Adrienne Rich, Christina Rossetti, Anne Sexton, and Gertrude Stein.

Approach: Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B293 Critical Feminist Studies: An Introduction

Combines the study of specific literary texts with larger questions about feminist forms of theorizing. Three book length texts will be supplemented by on-line readings. Students will review current scholarship, identify their own stake in the conversation and define a critical question they want to pursue at length.

Approach: Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B297 Terror, Pleasure, and the Gothic Imagination

Introduces students to the 18th-century origins of Gothic literature and its development across genres, media and
time. Exploring the formal contours and cultural contexts of the enduring imaginative mode in literature, film, art, and architecture, the course will also investigate the Gothic’s connection to the radical and conservative cultural agendas.

Approach: Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies
Units: 1.0  
(Not Offered 2017-2018)

ENGL B301 Women on Top: Gender and Power in Renaissance Drama
From virtuous queens to scheming adulteresses and cross-dressed “Roaring Girls,” powerful female characters are at the center of a number of Renaissance plays. This class will explore how playwrights such as Shakespeare, Webster and Dekker represent both fantasies and anxieties about tough women who take charge of their destinies. We will read these plays first in the context of the historical position of women in early modern England, and then turn to gender theory (e.g. Butler, Sedgwick, Rubin) to examine constructions of gender identity and female agency.

Counts towards: Gender and Sexuality Studies
Units: 1.0  
(Not Offered 2017-2018)

ENGL B310 Confessional Poetry
Poetry written since 1950 that deploys an autobiographical subject to engage with the psychological and political dynamics of family life and with states of psychic extremity and mental illness. Poets will include Lowell, Ginsberg, Sexton, and Plath. The impact of this movement on late twentieth century American poetry will also receive attention. A prior course in poetry is desirable but not required.

Counts towards: Gender and Sexuality Studies
Units: 1.0  
(Not Offered 2017-2018)

ENGL B320 Black Feminist Literature
This course explores contemporary black feminist literature and culture on a transnational stage. We will consider the works of prominent, emerging, and underexplored black feminist writers from various African diaspora locations, including South Africa, West Africa, Europe, North America, and the Caribbean. How do these writers engage with key currents in global black feminist politics, including understandings of gender, sexuality, class, nationality and colonialism? How do they complicate these discussions in their work? We will ground our exploration in close study of black feminist poetics—the specific formal and creative choices that black feminist poets, fiction writers, visual artists, hip hop artists, webersobs and others use to examine gender and sexuality in their art. Paying particular attention to the work of queer and LGBTQI+ (Lesbian, Gay, Bisexual, Trans* and Intersex) artists, we will consider the various meanings of terms such as “black,” “feminist,” and “queer” in various parts of the African Diaspora. Our work will emphasize close analysis of black feminist writers’ works, as well as collaborative exercises and invited in-class discussions with several contemporary black diasporic feminist artists themselves. Requirements include two short papers, regular response papers, and a final project.

Counts towards: Africana Studies; Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Sullivan, M.  
(Fall 2017)

ENGL B333 Lesbian Immortal
Lesbian literature has repeatedly figured itself in alliance with tropes of immortality and eternity. Using recent queer theory on temporality, and 19th and 20th century primary texts, we will explore topics such as: fame and notoriety; feminism and mythology; epistemes, erotics and sexual seasonality; the death drive and the uncanny; fin de siecle manias for mummies and seances.

Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B345 Topics in Narrative Theory
This is a topics course. Course content varies.

Counts towards: Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B354 Virginia Woolf
Virginia Woolf has been interpreted as a feminist, a modernist, a crazy person, a resident of Bloomsbury, a victim of child abuse, a snob, a socialist, and a creation of literary and popular history. We will try out all these approaches and examine the features of our contemporary world that influence the way Woolf, her work, and her era are perceived. We will also attempt to theorize about why we favor certain interpretations over others.

Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B355 Performance Studies
Introduces students to the field of performance studies, a multidisciplinary species of cultural studies which theorizes human actions as performances that both construct and resist cultural norms of race, gender, and sexuality. The course will explore “performativity” in everyday life as well as in the performing arts, and will include multiple viewings of dance and theater both on- and off-campus. In addition, we will consider the performative aspects of film and video productions.

Counts towards: Gender and Sexuality Studies; Film Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B367 Asian American Film Video and New Media
The course explores the role of pleasure in the production, reception, and performance of Asian American identities in film, video, and the internet, taking as its focus the sexual representation of Asian Americans in works produced by Asian American artists from 1915 to present. In several units of the course, we will study graphic sexual representations, including pornographic images and sex acts some may find objectionable. Students should be prepared to engage analytically with all class material. To maintain an atmosphere of mutual respect and solidarity among the participants in the class, no auditors will be allowed.

Counts towards: Gender and Sexuality Studies; Film Studies
Units: 1.0
(Not Offered 2017-2018)
ENGL B368 Pleasure, Luxury, and Consumption

Course will consider pleasure and consumerism in English texts and culture of the 17th and 18th centuries. Readings will include classical and neoclassical philosophies of hedonism and Epicureanism, Defoe’s “Roxana”, Mandeville’s “Fable of the Bees”, Pope’s “Rape of the Lock”, John Cleland’s “Memoirs of a Woman of Pleasure” and early periodical essays, among others. Secondary readings will include critical studies on cultural history and material culture. Prerequisites: at least two 200-level English courses.

Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B375 Sex on Screens

This course will provide a historical and theoretical overview of the ways moving image sex acts have been represented on screen, from early cinema’s silent film loops to today’s celebrity sex tapes. We will examine the ideological operations of sex in the cinema and aim to comprehend the multifarious ways viewers, filmmakers, critics, and scholars respond to dominant conceptions of sex-sexuality through alternative cinematic production and critical scholarship. Units include: stag movies, the Production Code and ratings system, European art cinema, sex ed, underground and the avant-garde, cult / sexploitation / blaxploitation, sexual revolution, hard core, women’s cinema, home video, queer cinema, HIV/AIDS, the digital revolution, feminist porn, and the Internet. Prerequisites: HART / COML B110: Identification in the Cinema; or ENGL / HART 205: Introduction to Film; or ENGL B299 History of Narrative Cinema, 1945 to the Present.

Counts towards: Gender and Sexuality Studies; Film Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B379 The African Griot(te)

English 379 is a capstone topics course in the study of two or more distinguished African writers who have made significant contributions to African literary production. The focus changes from one semester to the next so that students may re-enroll in the course for credit. The specific focus of each semester’s offering of the course is outlined separately.

Approach: Critical Interpretation (CI)
Counts towards: Africana Studies; Gender and Sexuality Studies
Units: 1.0
Instructor(s): Beard,L-S.
(Fall 2017, Spring 2018)

Fall 2017: Women Writing Southern Africa. This is a study of two centuries of Southern African literatures written by and about Xhosa, Zulu, Khoikhoi, Shona, Matabele, Setswana, English, Afrikaner, Indian, and Coloured women from Jewish, Christian, Muslim, and traditional communities. Our goal is the exploration of literature’s role in constructing space, place, and politics in South Africa, Botswana, Zimbabwe, Zambia, Lesotho, Swaziland, and the old Rhodesia. We begin with the ventriloquized story of Sarah Baartman, the so-called Hottentot Venus, who was displayed semi-nude in Great Britain between 1810 and 1815. We will journey to and beyond Zoe Wicomb’s multidirectional You Can’t Get Lost in Cape Town.

Spring 2018: Nobel Laureates Speak. This is an intensive study of two African Nobel laureates: Wole Soyinka, J.

M. Coetzee, Nadine Gordimer, Naguib Mahfouz, Nelson Mandela, or Doris Lessing.

FREN B201 Le Chevalier, la dame et le prêtre: littérature et publics du Moyen Age

Using literary texts, historical documents and letters as a mirror of the social classes that they address, this interdisciplinary course studies the principal preoccupations of secular and religious female and male authors in France and Norman England from the eleventh century through the fifteenth. Selected works from epic, lais, roman courtois, fabliaux, theater, letters, and contemporary biography are read in modern French translation. Prerequisite: FREN 102 or 105.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

FREN B302 Le printemps de la parole féminine: femmes écrivains des débuts

This study of selected women authors from Latin CE-Carolingian period through the Middle Ages, Renaissance and 17th century—among them, Perpetua, Hrotswitha, Marie de France, the trobairitz, Christine de Pisan, Louise Labé, Marguerite de Navarre, and Madame de Lafayette—examines the way in which they appropriate and transform the male writing tradition and define themselves as self-conscious artists within or outside it. Particular attention will be paid to identifying recurring concerns and structures in their works, and to assessing their importance to women’s writing in general: among them, the poetics of silence, reproduction as a metaphor for artistic creation, and sociopolitical engagement. Prerequisite: two 200-level courses or permission of instructor.

Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

GERM B245 Interdisciplinary Approaches to German Literature and Culture

This is a topics course. Taught in English. Course content varies. Previous topics include, Women’s Narratives on Modern Migrancy, Exile, and Diasporas; Nation and Identity in Post-War Austria. Current topic: Crime and Courtroom Drama. This is a film-based course about political trials at critical junctures of German history. Current topic description: This is a film-based course about political trials at critical junctures of German history.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Shen,Q.
(Spring 2018)

GNST B290 Interdisciplinary Perspectives on Gender and Sexuality

This course offers a rigorous grounding for students interested in questions of gender and sexuality. Bringing together intellectual resources from multiple disciplines, it also explores what it means to think across and between disciplinary boundaries. Team-taught by Bryn Mawr and Haverford professors from different disciplines, this course is offered yearly on alternate campuses.

Spring 2018: Nobel Laureates Speak. This is an intensive study of two African Nobel laureates: Wole Soyinka, J.

M. Coetzee, Nadine Gordimer, Naguib Mahfouz, Nelson Mandela, or Doris Lessing.
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Balay,A.
(Fall 2017)

**GREG B201 Plato and Thucydides**

This course is designed to introduce the student to two of the greatest prose authors of ancient Greece, the philosopher, Plato, and the historian, Thucydides. These two writers set the terms in the disciplines of philosophy and history for millennia, and philosophers and historians today continue to grapple with their ideas and influence. The brilliant and controversial statesman Alcibiades provides a link between the two texts in this course (Plato’s Symposium and Thucydides’ History of the Peloponnesian War), and we examine the ways in which both authors handle the figure of Alcibiades as a point of entry into the comparison of the varying styles and modes of thought of these two great writers. Suggested Prerequisites: At least 2 years of college Greek or the equivalent.

Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Attentive
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Edmonds,R.
(Fall 2017)

**HART B107 Critical Approaches to Visual Representation: Self and Other in the Arts of France**

A study of artists’ self-representations in the context of the philosophy and psychology of their time, with particular attention to issues of political patronage, gender and class, power and desire.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Major Writing Requirement: Writing Intensive
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

**HART B108 Critical Approaches to Visual Representation: Women, Feminism, and History of Art**

An investigation of the history of art since the Renaissance organized around the practice of women artists, the representation of women in art, and the visual economy of the gaze.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Major Writing Requirement: Writing Intensive
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Saltzman,L.
(Spring 2018)

**HART B340 Topics in Baroque Art**

This is a topics course. Course content varies.
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

**HIST B102 Introduction to African Civilizations**

The course is designed to introduce students to the history of African and African Diaspora societies, cultures, and political economies. We will discuss the origins, state formation, external contacts, and the structural transformations and continuities of African societies and cultures in the context of the slave trade, colonial rule, capitalist exploitation, urbanization, and westernization, as well as contemporary struggles over authority, autonomy, identity and access to resources. Case studies will be drawn from across the continent.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Africana Studies; Gender and Sexuality Studies; International Studies
Units: 1.0
Instructor(s): Ngalamulume,K.
(Fall 2017)

**HIST B156 The Long 1960s**

The 1960s has had a powerful effect on recent US History. But what was it exactly? How long did it last? And what do we really mean when we say “The Sixties?” This term has become so potent and loaded for so many people from all sides of the political spectrum that it’s almost impossible to separate fact from fiction; myth from memory. We are all the inheritors of this intense period in American history but our inheritance is neither simple nor entirely clear. Our task this semester is to try to pull apart the meaning as well as the legend and attempt to figure out what “The Sixties” is (and what it isn’t) and try to assess its long term impact on American society. This course satisfies the History Major’s 100 level requirement.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

**HIST B209 Introduction to the History of Medicine**

This course provides an introduction to the history of medicine, from Hippocrates to the Black Plague to contemporary struggles to combat HIV/AIDS. It examines topics including epidemic disease, the processes of medical knowledge production, the hospital and the rise of clinical medicine, and issues of hygiene and public health. We will focus on the intersecting social, political, and cultural histories of medicine, addressing themes of race, gender, and constructions of biological difference; the history of the body; professionalization; and medical ethics. Disrupting straightforward narratives of medical progress, this course will focus on the contingencies involved in medical knowledge production and situate elements of historical medical practice, for example humoral theory or polypharmacy, within their appropriate historical context.

Approach: Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies; Health Studies
Units: 1.0
(Not Offered 2017-2018)

**HIST B233 Health and Disability in the U.S.**

This course examines how scientific, medical, and cultural discourses have shaped the construction of health and disability in U.S. history. Paying attention to the ways in which health and disability are constructed in relationship to other social categories such as race, class, gender, sexuality, and nationality, we will examine the processes through which certain bodies are defined as healthy, useful and productive while others are marked as diseased, defective, and socially undesirable. Topics will include eugenics, public health, immigration policies, birth control and sterilization, the women’s health movement, AIDS activism, disability rights, mental health, obesity, biological citizenship, and health consumerism.

Approach: Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies; Health Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B237 Topic: Modern African History
This is a topics course. Course content varies
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Africana Studies; Gender and Sexuality Studies
Units: 1.0
Instructor(s): Ngalamulume,K.

Fall 2017: Urban History.
Spring 2018: African Economic Development. This course examines the political economy of African development in historical perspectives. We will address the following questions: Why is the African continent, which is rich in natural resources, so poor? What are the causes of poverty in Africa? The course will analyze the environmental, economic, political, and historical factors that have affected the development of Africa. We will discuss the impact of slavery, colonial exploitation, foreign interventions, foreign aid, trade, and democratic transitions on African development. We will also explore the theories of development and underdevelopment.

HIST B238 From Bordellos to Cybersex History of Sexuality in Modern Europe
This course is a detailed examination of the changing nature and definition of sexuality in Europe from the late nineteenth century to the present. Throughout the semester we critically examine how understandings of sexuality changed—from how it was discussed and how authorities tried to control it to how the practice of sexuality evolved. Focusing on both discourses and lived experiences, the class will explore sexuality in the context of the following themes: prostitution and sex trafficking, the rise of medicine with a particular attention to sexology, psychiatry and psychoanalysis; the birth of the homo/hetero/bisexual divide; the rise of the "New Woman"; abortion and contraception; the "sexual revolution" of the 60s; pornography and consumerism; LGBTQ activism; concluding with considering sexuality in the age of cyber as well as genetic technology. In examining these issues we will question the role and influence of different political systems and war on sexuality. By paying special attention to the rise of modern nation-states, forces of nationalism, and the impacts of imperialism we will interrogate the nature of regulation and experiences of sexuality in different locations in Europe from the late nineteenth century to the present.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B245 Focus: Topics in Modern US History
This is a topics course in 20th century America social history. Topics vary by half semester
Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies; Museum Studies; Praxis Program
Units: 0.5
(Not Offered 2017-2018)

HIST B249 History of Global Health
This course examines the interrelated histories of public health, international health, and global health from the late 18th to the 21st centuries as part of a broader history of epidemics, empire, and globalization. We will pay particular attention this semester to the use of architectural and spatial strategies for managing crises of contagion, disaster, and epidemic. The architectural spaces to be examined will include urban-based hospitals, public health infrastructure, and quarantine buildings as well as mobile architectural technologies such as incubators, wartime pop-up surgical tents, and floating hospitals in both Western and non-Western environments. The course will trace the role of health and medicine in mediating the relationships between metropolis and colony, state and citizen, research practice and human subject.

Approach: Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies; Health Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B252 American Popular Culture and Politics: 1900-present
From dance halls and silent film to comic books and music videos, popular culture has been central to struggles over the meaning of national belonging, “freedom,” and democracy. Rather than drawing a distinction between pop culture as a matter of private consumption and the more “serious” and public arena of politics, this course will consider the role of popular culture in shaping the nation’s political history, and in providing a lens to critically evaluate and rethink that history today. Exploring a wide range of popular cultural forms including amusement parks, vaudeville, fashion, music, film, photography, newspapers, and television, we will examine how popular culture has not only reflected but actively shaped the American political landscape from the early twentieth century to the present.

Approach: Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B274 Focus: Topics in Modern US History
This is a topics course in 20th century America social history. Topics vary by half semester
Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies; Museum Studies; Praxis Program
Units: 0.5
(Not Offered 2017-2018)

HIST B284 Movies and America
Movies are one of the most important means by which Americans come to know – or think they know—their own history. This class examines the complex cultural relationship between film and American historical self fashioning.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies; Film Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B292 Women in Britain since 1750
Focusing on contemporary and historical narratives, this course explores the ongoing production, circulation and refraction of
discourses on gender and nation as well as race, empire and modernity since the mid-18th century. Texts will incorporate visual material as well as literary evidence and culture and consider the crystallization of the discipline of history itself.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B332 Higher Education for Women: Bryn Mawr and Beyond
This course will explore the history of women's higher learning in the United States from its origins in the antebellum female seminary movement through debates about coeducation and the meaning of single-sex education in the second half of the twentieth century. Drawing on the rich history of Bryn Mawr College as our primary case study, we will focus on the expansion of social and professional opportunities for women, the workings of gender differences within American educational institutions, and the experiences of diverse alumnae/i, faculty, and staff. Over the course of the semester, we will gain experience in archives and special collections research, oral history, and digital methods, and contribute to the building of contemporary collections documenting Bryn Mawr campus life. Prerequisite: Junior or Senior Status.
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B337 Topics in African History
This is a topics course. Topics vary.
Counts towards: Africana Studies; Gender and Sexuality Studies; International Studies
Units: 1.0
Instructor(s): Ngalamulume,K.

ITAL B235 Scrittrici e registe italiane: Heroines In and Out of the Canon
Emphasis will be put on Italian women writers and film directors, who are often left out of syllabi adhering to traditional canons. Particular attention will be paid to: a) women writers who have found their voices (through writing) as means of psychological survival in a patriarchal world; b) women engaged in the women's movement of the 70's and who continue to look at, and rewrite, women's stories of empowerment and solidarity; c) “divaism”, fame, via beauty and sex with a particular emphasis on the '60s (i.e. Gina Lollobrigida, Sofia Loren, Claudia Cardinale). Counts toward Gender and Sexuality Studies; Counts toward Film Studies.
Approach: Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Kubati,R.
(Spring 2018)

ITAL B212 Italy Today: New Voices, New Writers, New Literature
This course, taught in English, will focus primarily on the works of the so-called "migrant writers" who, having adopted the Italian language, have become a significant part of the new voice of Italy. In addition to the aesthetic appreciation of these works, this course will also take into consideration the social, cultural, and political factors surrounding them. The course will focus on works by writers who are now integral to Italian canon – among them: Cristina Ali-Farah, Igiaba Scego, Ghermandi Gabriella, Arama Lakhous. As part of the course, movies concerned with various aspects of Italian Migrant literature will be screened and analyzed. One additional hour for students who want Italian credit.
Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies; Film Studies
Units: 1.0
Instructor(s): Kubati,R.
(Spring 2018)
students to fundamental ethical theories and present ways in which these theories connect to particular medical issues. We will also discuss what are often considered the four fundamental principles of medical ethics (autonomy, beneficence, non-maleficence, and justice) in connection to specific topics related to medical practice (such as reproductive rights, euthanasia, and allocation of health resources).

Approach: Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies; Health Studies Units: 1.0
(Not Offered 2017-2018)

**PHIL B221 Ethics**

An introduction to ethics by way of an examination of moral theories and a discussion of important ancient, modern, and contemporary texts which established theories such as virtue ethics, deontology, utilitarianism, relativism, emotivism, care ethics. This course considers questions concerning freedom, responsibility, and obligation. How should we live our lives and interact with others? How should we think about ethics in a global context? Is ethics independent of culture? A variety of practical issues such as reproductive rights, euthanasia, animal rights and the environment will be considered.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Major Writing Requirement: Writing Attentive
Counts towards: Gender and Sexuality Studies; International Studies
Units: 1.0
Instructor(s): Bell, M.
(Spring 2018)

**PHIL B225 Global Ethical Issues**

The need for a critical analysis of what justice is and requires has become urgent in a context of increasing globalization, the emergence of new forms of conflict and war, high rates of poverty within and across borders and the prospect of environmental devastation. This course examines prevailing theories and issues of justice as well as approaches and challenges by non-western, post-colonial, feminist, race, class, and disability theorists.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies; International Studies
Units: 1.0
Instructor(s): Bell, M.
(Spring 2018)

**PHIL B252 Feminist Theory**

Beliefs that gender discrimination has been eliminated and women have achieved equality have become commonplace. We challenge these assumptions examining the concepts of patriarchy, sexism, and oppression. Exploring concepts central to feminist theory, we attend to the history of feminist theory and contemporary accounts of women’s place and status in different societies, varied experiences, and the impact of the phenomenon of globalization. We then explore the relevance of gender to philosophical questions about identity and agency with respect to moral, social and political theory. Prerequisite: one course in philosophy or permission of instructor.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies

**PHIL B344 Development Ethics**

This course explores the meaning of and moral issues raised by development. In what direction and by what means should a society “develop”? What role, if any, does the globalization of markets and capitalism play in processes of development and in systems of discrimination on the basis of factors such as race and gender? Answers to these sorts of questions will be explored through an examination of some of the most prominent theorists and recent literature. Prerequisites: a philosophy, political theory or economics course or permission of the instructor.

Major Writing Requirement: Writing Intensive
Counts towards: Gender and Sexuality Studies; International Studies
Units: 1.0
(Not Offered 2017-2018)

**POLS B290 Power and Resistance**

What more is there to politics than power? What is the force of the “political” for specifying power as a practice or institutional form? What distinguishes power from authority, violence, coercion, and domination? How is power embedded in and generated by cultural practices, institutional arrangements, and processes of normalization? This course seeks to address questions of power and politics in the context of domination, oppression, and the arts of resistance. Our general topics will include authority, the moralization of politics, the dimensions of power, the politics of violence (and the violence of politics), language, sovereignty, emancipation, revolution, domination, normalization, governmentality, genealogy, and democratic power. Writing projects will seek to integrate analytical and reflective analyses as we pursue these questions in common. Writing Intensive.

Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Intensive
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Schlosser, J.
(Spring 2018)

**POLS B375 Gender, Work and Family**

As the number of women participating in the paid workforce who are also mothers exceeds 50 percent, it becomes increasingly important to study the issues raised by these dual roles. This seminar will examine the experiences of working and nonworking mothers in the United States, the roles of fathers, the impact of working mothers on children, and the policy implications of women, work, and family.

Counts towards: Child and Family Studies; Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

**SOCL B102 Society, Culture, and the Individual**

Analysis of the basic sociological methods, perspectives, and concepts used in the study of society, with emphasis on social structure, education, culture, the self, and power. Theoretical perspectives that focus on sources of stability, conflict, and change are emphasized throughout.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Gender and Sexuality Studies; International
SOCL B130 Sociology of Harry Potter
J.K. Rowling’s Harry Potter series is a worldwide phenomenon that has sold hundreds of millions of books and been translated into dozens of languages. Over the last decade, academic studies of Harry Potter have taken root in English and Theology departments, but very few sociologists have taken a scholarly look at the rich society Rowling has created. This course will introduce students to the fundamental concepts of sociology using the lens of the Harry Potter series. We will explore questions of hierarchy, inequality, terrorism, consumption, race, class, and gender, and we will discuss the ways in which stratification in the wizarding world compares and contrasts to similar issues in the Muggle world. Class discussions and exercises will assume that students have read all seven Harry Potter books.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Fall 2017, Spring 2018)

SOCL B201 The Study of Gender in Society
The definition of male and female social roles and sociological approaches to the study of gender in the United States, with attention to gender in the economy and work place, the division of labor in families and households, and analysis of class and ethnic differences in gender roles. Of particular interest in this course is the comparative exploration of the experiences of women of color in the United States.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Child and Family Studies; Gender and Sexuality Studies
Units: 1.0
Instructor(s): Sledge,P.
(Fall 2017)

SOCL B205 Social Inequality
Introduction to the major sociological theories of gender, racial-ethnic, and class inequality with emphasis on the relationships among these forms of stratification in the contemporary United States, including the role of the upper class(es), inequality between and within families, in the work place, and in the educational system.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Fall 2017)

SOCL B217 The Family in Social Context
A consideration of the family as a social institution in the United States, looking at how societal and cultural characteristics and dynamics influence families; how the family reinforces or changes the society in which it is located; and how the family operates as a social organization. Included is an analysis of family roles and social interaction within the family. Major problems related to contemporary families are addressed, such as domestic violence and divorce. Cross-cultural and subcultural variations in the family are considered.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Child and Family Studies; Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

SOCL B225 Women in Society
A study of the contemporary experiences of women of color in the Global South. The household, workplace, community, and the nation-state, and the positions of women in the private and public spheres are compared cross-culturally. Topics include feminism, identity and self-esteem; globalization and transnational social movements and tensions and transitions encountered as nations embark upon development.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Africana Studies; Child and Family Studies; Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Montes,V.
(Spring 2018)

SOCL B235 Mexican-American Communities
For its unique history, the number of migrants, and the two countries’ proximity, Mexican migration to the United States represents an exceptional case in world migration. There is no other example of migration with more than 100 years of history. The copious presence of migrants concentrated in a host country, such as we have in the case of the 11.7 million Mexican migrants residing in the United States, along with another 15 million Mexican descendants, is unparalleled. The 1,933-mile-long border shared by the two countries makes it one of the longest boundary lines in the world and, unfortunately, also one of the most dangerous frontiers in the world today. We will examine the different economic, political, social and cultural forces that have shaped this centenarian migration influx and undertake a macro-, meso-, and micro-levels of analysis. At the macro-level of political economy, we will investigate the economic interdependency that has developed between Mexico and the U.S. over different economic development periods of these countries, particularly, the role the Mexican labor force has played to boosting and sustaining both the Mexican and the American economies. At the meso-level, we will examine different institutions both in Mexico and the U.S. that have determined the ways in which millions of Mexican migrant to this country. Last, but certainly not least, we will explore the impacts that both the macro- and meso-processes have had on the micro-level by considering the imperatives, aspirations, and dreams that have prompted millions of people to leave their homes and communities behind in search of better opportunities. This major life decision of migration brings with it a series of social transformations in family and community networks, this will look into the cultural impacts in both the sending and receiving migrant communities. In sum, we will come to understand how these three levels of analysis work together.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies; Praxis Program
Units: 1.0
Instructor(s): Montes,V.
(Fall 2017)

SOCL B257 Marginals and Outsiders: The Sociology of Deviance
An examination of non-normative and criminal behavior viewed from the standpoint of different theoretical perspectives on
deviance (e.g., social strain, anomie, functionalism, social disorganization, symbolic interaction, and Marxism) with particular emphasis on social construction and labeling perspectives; and the role of subcultures, social movements and social conflicts in changing the normative boundaries of society. Topics include robbery, homicide, Black inner city violence, sexual deviance, prostitution, white collar crime, drug addiction and mental disorders.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

SOCL B262 Public Opinion
This course explores public opinion: what it is, how it is measured, how it is shaped, and how it changes over time. Specific attention is given to the role of elites, the mass media, and religion in shaping public opinion. Examples include racial/ethnic civil rights, abortion, gay/lesbian/transgendered sexuality, and inequalities.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Wright,N.
(Fall 2017)

SOCL B326 Feminist Perspectives on Hlth
Increasingly, an individual's sense of self and worth as a citizen turn on their health identity. In this course we will draw on theories of gender, sexuality, medicalization, and biocitizenship to unravel the ways in which gender structures and medical institutions are mutually constitutive and to explore how this relationship, in turn, impacts individual identity. The course will take a global approach to feminist engagement with health issues with an emphasis on human rights and bodily autonomy.

Counts towards: Gender and Sexuality Studies; Health Studies
Units: 1.0
Instructor(s): Sledge,P.
(Spring 2018)

SOCL B342 Bodies in Social Life
Can social life exist without bodies? How can attention to the body influence our understanding of social processes of subjectivity, interaction, and practice? While the body has long been an “absent presence” in sociology, multiple approaches to theorizing and researching the body have emerged in recent decades. A sociological approach to the body and embodiment provides an opportunity to bridge the gap between everyday experience and analyses of broad social structures which can seem disconnected from daily life. In this course, we will examine the processes by which individual bodies are shaped by and, in turn, shape social life. Key questions to be explored include: how are bodies regulated by social forces; how do individuals perform the body and how does interactional context influence this performance; what is the meaning of the body in social life; and is there a “right” body? Suggested preparation: At least one course in the social sciences.

Counts towards: Gender and Sexuality Studies; Health Studies
Units: 1.0
Instructor(s): Sledge,P.
(Fall 2017)

SOCL B350 Movements for Social Justice in the US
Throughout human history, powerless groups of people have organized social movements to improve their lives and their societies. Powerful groups and institutions have resisted these efforts in order to maintain their own privilege. Some periods of history have been more likely than others to spawn protest movements. What factors seem most likely to lead to social movements? What determines their success/failure? We will examine 20th-century social movements in the United States to answer these questions. Includes a film series. Prerequisite: At least one prior social science course or permission of the instructor.

Counts towards: Gender and Sexuality Studies; Peace, Justice and Human Rights
Units: 1.0
Instructor(s): Karen,D.
(Fall 2017)

SPAN B223 Género y modernidad en la narrativa del siglo XIX
A reading of 19th-century Spanish narrative by both men and women writers, to assess how they come together in configuring new ideas of female identity and its social domains, as the country is facing new challenges in its quest for modernity. Prerequisites: SPAN B110 and/or B120 (previously SPAN B200/B202); or another SPAN 200-level course.

Approach: Inquiry into the Past (IP)
Major Writing Requirement: Writing Intensive
Counts towards: Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

SPAN B265 Escritoras españolas: entre tradición, renovación y migración
Fiction by women writers from Spain in the 20th and 21st century. Breaking the traditional female stereotypes during and after Franco’s dictatorship, the authors explore through their creative writing changing sociopolitical and cultural issues including regional identities and immigration. Topics of discussion include gender marginality, feminist studies and the portrayal of women in contemporary society. Prerequisite: SPAN B110 and/or B120 (previously SPAN B200/B202); or another SPAN 200-level course.

Approach: Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Song,R.
(Spring 2018)

SPAN B309 La mujer en la literatura española del Siglo de Oro
A study of the depiction of women in the fiction, drama, and poetry of 16th- and 17th-century Spain. Topics include the construction of gender; the idealization and codification of women’s bodies; the politics of feminine enclosure (convent, home, brothel, palace); and the performance of honor. The first half of the course will deal with representations of women by male authors (Calderón, Cervantes, Lope, Quevedo) and the second will be dedicated to women writers such as Teresa de Ávila, Ana Caro, Juana Inés de la Cruz, and María de Zayas. Prerequisite: at least one SPAN 200-level course.
Counts towards: Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

SPAN B318 Adaptaciones literarias en el cine español
Film adaptations of literary works have been popular since the early years of cinema in Spain. This course examines the relationship between films and literature, focusing on the theory and practice of film adaptation. Attention will be paid to the political and cultural context in which these texts are being published and made into films. Students will be required to attend film screenings or view films on their own devices. Prerequisite: A 200-level course in Spanish.
Counts towards: Gender and Sexuality Studies; Film Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Song, R.
(Fall 2017)

SPAN B322 Queens, Nuns, and Other Deviants in the Early Modern Iberian World
The course examines literary, historical, and legal texts from the early modern Iberian world (Spain, Mexico, Peru) through the lens of gender studies. The course is divided around three topics: royal bodies (women in power), cloistered bodies (women in the convent), and delinquent bodies (figures who defy legal and gender normativity). Course is taught in English and is open to all juniors or seniors who have taken at least one 200-level course in a literature department. Students seeking Spanish credit must have taken BMC Spanish 110 and/or 120 and at least one other Spanish course at a 200-level, or received permission from instructor.
Counts towards: Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

GENERAL STUDIES

General studies courses focus on areas that are not usually covered in the Bryn Mawr curriculum and provide a supplement to the areas more regularly covered. These courses cut across disciplines and emphasize relationships among them. Many general studies courses are open, without prerequisite, to all students. With the permission of the major department, they may be taken for major credit.

COURSES

GNST B048 Metacognition and the Transition to College
The First Year Experience Seminar aims to support students in making the transition to higher education by engaging them in the Bryn Mawr community, getting to know themselves and the college. The seminar will be a small, inquiry-based course that will promote and encourage intellectual confidence by developing student success tactics including critical thinking, written and oral communication, research skills, self-reflection, and self-regulation while addressing larger questions of justice, identity, and community. This course is offered as an alternative to the traditional Wellness Seminar requirement; students will earn 2 PE credits (the equivalent for Wellness) and 0.5 academic credits.
Units: 0.5
(Not Offered 2017-2018)

GNST B103 Introduction to Swahili Language and Culture I
The primary goal of this course is to develop an elementary level ability to speak, read, and write Swahili. The emphasis is on communicative competence in Swahili based on the National Standards for Foreign Language Learning. In the process of acquiring the language, students will also be introduced to East Africa and its cultures. No prior knowledge of Swahili or East Africa is required. Note: GNST B103/B105 do not fulfill the Bryn Mawr College language requirement.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Africana Studies
Units: 1.0
Instructor(s): Mshomba, E.
(Fall 2017)

GNST B105 Introduction to Swahili Language and Culture II
The primary goal of this course is to continue working on an elementary level ability to speak, read, and write Swahili. The emphasis is on communicative competence in Swahili based on the National Standards for Foreign Language Learning. Students will also continue learning about East Africa and its cultures. Prerequisite: GNST B103 (Introduction to Swahili Language and Culture I) or permission of the instructor is required. Note: GNST B103/B105 does not fulfill the Bryn Mawr College language requirement.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Africana Studies
Units: 1.0
Instructor(s): Mshomba, E.
(Spring 2018)

GNST B260 Silent Spaces: a History of Contemplation in the West
This course will trace contemplative traditions developed and preserved in the Western monastic tradition from the desert through the present. Topics include elected silence and the ways in which it has shaped communities in the Western contemplative tradition, and the difference between enclosed contemplatives and contemplatives loose in the world.
Units: 1.0
(Not Offered 2017-2018)

GNST B290 Interdisciplinary Perspectives on Gender and Sexuality
This course offers a rigorous grounding for students interested in questions of gender and sexuality. Bringing together intellectual resources from multiple disciplines, it also explores what it means to think across and between disciplinary boundaries. Team-taught by Bryn Mawr and Haverford professors from different disciplines, this course is offered yearly on alternate campuses.
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Balay, A.
(Fall 2017)
Two elective courses, to be chosen in consultation with the associated faculty for more information and course planning advice.

In addition to declaring one of the above majors, and should consult with associated faculty for more information and course planning advice.

Requirements for the concentration:

- Two 100-level units from Anthropology, Classical and Near Eastern Archaeology to explore the connections among these fields with respect to how our human ancestors interacted with past environments, and how traces of human behavior are preserved in the physical environment. Students must complete paperwork to declare the concentration, in addition to declaring one of the above majors, and should consult with associated faculty for more information and course planning advice.

Faculty

Don Barber, Associate Professor of Geology on the Harold Alderfer Chair in Environmental Studies

Peter Magee, Chair and Professor of Classical and Near Eastern Archaeology (on leave semester II)

Arlo Weil, Chair and Professor of Geology

The geoarchaeology concentration allows students majoring in anthropology, archaeology or geology to explore the connections among these fields with respect to how our human ancestors interacted with past environments, and how traces of human behavior are preserved in the physical environment. Students must complete paperwork to declare the concentration, in addition to declaring one of the above majors, and should consult with associated faculty for more information and course planning advice.

Requirements for the concentration:

- Two 100-level units from Anthropology, Classical and Near Eastern Archaeology (including ARCH 135, a half-credit course) or Geology, of which one must be from outside the student’s major
- ARCH B270: Geoarchaeology
- CITY B201 or CITY B328: GIS Course
- Two elective courses, to be chosen in consultation with the major advisor, from among current offerings in Anthropology, Classical and Near Eastern Archaeology and Geology. One of these two courses must be from outside the student’s major. Suggested courses include but are not limited to ARCH 135 (HALF-CREDIT: Archaeological Fieldwork and Methods), ANTH 203 (Human Ecology), ANTH 220 (Methods and Theory), ARCH 330 (History of Archaeology and Theory), ANTH 225 (Paleolithic Archaeology), ANTH 240 (Traditional Technologies), ARCH 308 (Ceramic Analysis), ARCH 332 (Field Techniques), GEOL 202 (Mineralogy), GEOL 205 (Sedimentology), GEOL 310 (Geophysics), and GEOL 312 (Quaternary Climates).

COURSES

ANTH B220 Methods and Theory in Archaeology

An examination of techniques and theories archaeologists use to transform archaeological data into statements about patterns of prehistoric cultural behavior, adaptation and culture change. Theory development, hypothesis formulation, gathering of archaeological data and their interpretation and evaluation are discussed and illustrated by examples. Theoretical debates current in anthropological archaeology are reviewed and the place of archaeology in the general field of anthropology is discussed. Prerequisite: ANTH 101 or permission of instructor.

Approach: Inquiry into the Past (IP)
Counts towards: Geoarchaeology
Units: 1.0
(Not Offered 2017-2018)

ANTH B278 Paleoanthropology Methods

Paleoanthropology is the study of how human ancestors evolved. Part biological anthropology and part archaeology, this sub-discipline uses a variety of methods to test hypotheses about the human past. This class provides an overview of some of the most useful and commonly employed methods. We will also practice using many of these techniques first-hand. Methods will come from geology (e.g., how to date a fossil site), chemistry (e.g., how to reconstruct an ancient environment), demography (e.g., how to identify gene flow between populations in the past), genetics (e.g., what ancient DNA from fossils tells us about evolution), and more. The techniques that we will explore include modeling the past using primatology, ethnology, and archaeology; assessing evidence of ancient disease through paleopathology, reconstructing diets and developmental stages of fossils based on microscopic tooth anatomy, and using virtual reconstructions to compare hominin morphologies.
Prerequisites: ANTH B101 or instructor permission.

Approach: Scientific Investigation (SI)
Counts towards: Geoarchaeology
Units: 1.0
Instructor(s): VanSickle,C.
(Spring 2018)

ARCH B104 Archaeology of Agricultural and Urban Revolutions

This course examines the archaeology of the two most fundamental changes that have occurred in human society in the last 12,000 years, agriculture and urbanism, and we explore these in Egypt and the Near East as far as India. We also explore those societies that did not experience these changes.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Geoarchaeology; Middle Eastern & Islamic Studies
Units: 1.0
(Not Offered 2017-2018)

ARCH B135 Focus: Archaeological Fieldwork and Methods

The fundamentals of the practice of archaeology through readings and case studies and participatory demonstrations. Case studies will be drawn from the archives of the Nemea Valley Archaeological Project and material in the College’s collections. Each week there will be a 1-hour laboratory that will
introduce students to a variety of fieldwork methods and forms of analysis. This is a half semester Focus course.

Approach: Inquiry into the Past (IP)
Counts towards: Geoarchaeology
Units: 0.5
Instructor(s): Lindenlauf,A.
(Fall 2017)

**ARCH B308 Ceramic Analysis**

Pottery is a fundamental means of establishing the relative chronology of archaeological sites and of understanding past human behavior. Included are theories, methods and techniques of pottery description, analysis and interpretation. Topics include typology, seriation, ceramic characterization, production, function, exchange and the use of computers in pottery analysis. Laboratory work on pottery in the department collections. Prerequisite: permission of instructor.

Counts towards: Geoarchaeology
Units: 1.0
(Not Offered 2017-2018)

**GEOL B202 Mineralogy and Crystal Chemistry**

The crystal chemistry of representative minerals as well as the relationship between the physical properties of minerals and their structures and chemical compositions. Emphasis is placed on mineral identification and interpretation. The occurrence and petrography of typical mineral associations and rocks is also covered. Lecture three hours, laboratory at least three hours a week. One required field trip on a weekend. Prerequisite: introductory course in Geology or Chemistry (both recommended, one required).

Approach: Quantitative Readiness Required (QR); Scientific Investigation (SI)
Counts towards: Geoarchaeology
Units: 1.0
(Not Offered 2017-2018)

**GEOL B205 Sedimentary Materials and Environments**

An introduction to sediment transport, depositional processes, and stratigraphic analysis, with emphasis on interpretation of sedimentary sequences and the reconstruction of past environments. Three lectures and one lab a week, plus one-day field trip. Prerequisite: GEOL 101, 102, or 103 or permission of instructor. Recommended: GEOL B202 and B203.

Approach: Course does not meet an Approach
Counts towards: Geoarchaeology
Units: 1.0
Instructor(s): Barber,D.
(Spring 2018)

**GEOL B310 Introduction to Geophysics**

An overview covering how geophysical observations of the Earth’s magnetic field, gravity field, heat flow, radioactivity, and seismic waves provide a means to study plate tectonics and the earth’s interior. Three class hours a week with weekly problem sets. Prerequisite: one year of college physics or with permission of professor.

Counts towards: Geoarchaeology
Units: 1.0
(Not Offered 2017-2018)

**GEOLOGY**

Students may complete a major or minor in Geology. Within the major, students may complete concentrations in geoarchaeology or geochemistry.

**Faculty**

Selby Cull-Hearth, Associate Professor of Geology (on leave semester II)

Don Barber, Associate Professor of Geology on the Harold Alderfer Chair in Environmental Studies

Pedro Marenco, Associate Professor of Geology

Katherine Marenco, Lecturer in Geology

Arlo Weil, Chair and Professor of Geology

The department seeks to give students a well-rounded earth science education that balances fundamental knowledge of geology with broadly applicable problem-solving and communication skills. The integrated science of geology combines biology, chemistry and physics as they apply to the workings of Earth and other planets. Well-trained geoscientists are increasingly in demand to address the environmental challenges and natural resource limitations of the modern world. A central tenet for understanding and predicting Earth processes and environmental change is the ability to decipher past Earth history from geologic records. Thus the major in Geology includes study of the physics and chemistry of Earth materials and processes; the history of the Earth and its organisms; and the range of techniques used to investigate the past and present workings of the Earth system. Field and lab experiences are essential parts of geology training, and at Bryn Mawr field trips and lab work are part of all introductory courses, most other classes, and most independent research projects.

**Major Requirements**

Thirteen courses are required for the major: GEOL 101 and 102 or 103; 202, 203, 204, and 205; at least two semesters of quantitative or computational coursework, e.g., MATH 101 and 102 or 103 or alternates approved by the adviser; a two semester sequence of CHEM (103-104) or PHYS (101-102 or 121-122); GEOL 399; and either two advanced geology courses or one advanced geology course and an additional upper-level course in biology, chemistry, mathematics, physics, or computer science.

The writing requirement for the major in Geology is fulfilled in GEOL 203. This course includes a semester-long research project culminating in a scientific manuscript based on material collected in the field by enrolled students.

Additional courses in the allied sciences are strongly recommended and are required by most graduate schools. A student who wishes to follow a career in geology should plan to attend a summer field course, usually following the completion of the 200-level courses.

All geology majors participate in a senior capstone experience (GEOL 399), which is structured into a two-semester seminar that meets weekly for 1.5 hours for a total of 1.0 credit (0.5 credits per semester). The focus of the capstone seminar is to reinforce students’ ability to address geoscience questions and to communicate their findings in writing and orally. The team-taught senior seminar integrates the student’s major curriculum with weekly speakers or peer-led discussions on cutting edge
research, and the impact and relevance of geology to modern society.

**Thesis**

At the discretion of the department faculty, rising seniors may undertake an independent thesis project (GEOL 403) in addition to mandatory full participation in the senior capstone seminar (GEOL 399). Student thesis projects must be supervised by a faculty advisor. The senior thesis is modeled after a Master’s thesis project, but is scaled down for the different time frame (one year versus two years) and educational level of a senior undergraduate student. The thesis project plan is initially developed and agreed upon through consultation between the supervising faculty member(s) and the student. Most of the research is conducted independently by the student. The advisor serves as a source of ideas concerning scientific literature, methodologies and project support. The advisor may visit and inspect the research sites, laboratory or model, and offer advice on how the research should be conducted or modified.

If approved to undertake a senior thesis, a student will enroll in GEOL 403 each of her final two semesters for a total of 1.0 credit (0.5 credits per semester). The thesis option adds the equivalent of one course to the standard Geology major requirements. The first semester will focus on thesis topic formulation, background research and initiation of appropriate data acquisition. At the end of the first semester, the student must submit a formal written project proposal to department faculty members. This research proposal must demonstrate the student’s ability to successfully complete her thesis during the following semester. Following review of submitted proposals, students or faculty members may choose or recommend, respectively, not to complete the independent thesis, in which case the student would not enroll for the second semester of GEOL 403.

**Honors**

Honors are awarded to students who have outstanding academic records in geology and allied fields, and whose research is judged by the faculty of the department to be of the highest quality.

**Minor Requirements**

A minor in geology consists of two 100-level geology courses, and any four of the 200- or 300-level courses offered by the department. Two 0.5 credit courses may be combined to count toward one of the 100-level courses. Alternatively, an additional 200- or 300-level course may be substituted for one of the 100-level courses to meet the minor requirements.

**Concentration in Geoarchaeology**

The geoarchaeology concentration allows students majoring in anthropology, archaeology, or geology to explore the connections among these fields with respect to how our human ancestors interacted with past environments, and how traces of human behavior are preserved in the physical environment. In geology, the geoarchaeology concentration consists of 13 courses: GEOL 101 or 102 or 103; 202, 203, 204, 205, 270, and 399; two seminars of chemistry; two seminars of math, statistics or computational methods; either ARCH 101 or ANTH 101; and one 200- or 300-level elective from among current offerings in Anthropology or Classical and Near Eastern Archaeology. Paperwork for the concentration should be filed at the same time as the major work plan. For course planning advice, consult with Don Barber (Geology) or Peter Magee (Archaeology).

**Concentration in Geochemistry**

The geochemistry concentration encourages students majoring either in geology or in chemistry to design a course of study that emphasizes Earth chemistry. Paperwork for the concentration should be filed at the same time as the major work plan. For a Geology Major with a concentration in Geochemistry, the following are required in addition to Geology Major requirements: CHEM 103 (General Chemistry) and CHEM 104 (General Chemistry II), CHEM 211 (Organic Chemistry) or CHEM 231 (Inorganic Chemistry), GEOL 302 (Low Temperature Geochemistry) or GEOL 305 (Igneous and Metamorphic Petrology) or GEOL 350 (requires major advisor approval), one additional 300-level geochemistry-themed GEOL course or one additional advanced CHEM course. For a Chemistry Major with a concentration in Geochemistry, the following are required in addition to Chemistry major requirements (see Chemistry major advisor): GEOL 101 (How the Earth Works), GEOL 202 (Mineralogy/Crystal Chemistry), two additional 300-level geochemistry-themed GEOL courses including GEOL 302 (Low Temperature Geochemistry) or GEOL 305 (Igneous and Metamorphic Petrology) or GEOL 350 (requires Geochemistry major advisor approval). For course planning advice, contact Pedro Marenco, Lynne Elkins (Geology) or Sharon Burgmayer (Chemistry).

**COURSES**

**GEOL B101 How the Earth Works**

An introduction to the study of planet Earth—the materials of which it is made, the forces that shape its surface and interior, the relationship of geological processes to people, and the application of geological knowledge to the search for useful materials. Laboratory and fieldwork focus on learning the tools for geological investigations and applying them to the local area and selected areas around the world. Three lectures and one afternoon of laboratory or fieldwork a week. One required one-day field trip on a weekend.

Approach: Quantitative Readiness Required (QR); Scientific Investigation (SI)  
Counts towards: Environmental Studies  
Units: 1.0  
Instructor(s): Marenco, K., Weil, A.  
(Fall 2017)

**GEOL B102 Earth: Life of a Planet**

The history of the Earth from its beginning, including its climate and tectonic history and the evolution of the living forms that have populated it. Three lectures, one afternoon of laboratory a week. A required two-day (Sat-Sun) field trip is taken in April.

Approach: Scientific Investigation (SI)  
Units: 1.0  
(Not Offered 2017-2018)

**GEOL B103 Earth Systems and the Environment**

This integrated approach to studying the Earth focuses on interactions among geology, oceanography, and biology. Also discussed are the consequences of human energy consumption, industrial development, and land use. Two lectures and one afternoon of laboratory or fieldwork per week. A required field trip is taken in April.

Approach: Scientific Investigation (SI)  
Counts towards: Environmental Studies
GEOL B110 Focus: Exploring Topics in the Earth Sciences
This is a half-semester focus course.
Approach: Scientific Investigation (SI)
Units: 0.5
(Not Offered 2017-2018)

GEOL B125 Focus: Geology in Film
This is a half-semester Focus course. Geologic processes make for great film storylines, but filmmakers take great liberty with how they depict scientific “facts” and scientists. We will explore how and why filmmakers choose to deviate from science reality. We will study and view one film per week and discuss its issues from a geologist’s perspective.
Approach: Course does not meet an Approach
Counts towards: Film Studies
Units: 0.5
(Not Offered 2017-2018)

GEOL B202 Mineralogy and Crystal Chemistry
The crystal chemistry of representative minerals as well as the relationship between the physical properties of minerals and their structures and chemical compositions. Emphasis is placed on mineral identification and interpretation. The occurrence and petrography of typical mineral associations and rocks is also covered. Lecture three hours, laboratory at least three hours a week. One required field trip on a weekend. Prerequisite: introductory course in Geology or Chemistry (both recommended, one required).
Approach: Quantitative Readiness Required (QR); Scientific Investigation (SI)
Counts towards: Geochronology
Units: 1.0
(Not Offered 2017-2018)

GEOL B203 Biosphere Through Time
We will explore how the Earth-life system has evolved through time by studying the interactions between life, climate, and tectonic processes. During the lab component of the course, we will study important fossil groups to better understand their paleoecology and roles in the Earth-life system.
Approach: Scientific Investigation (SI)
Major Writing Requirement: Writing Intensive
Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Marenco, K., Marenco, P.
(Fall 2017)

GEOL B204 Structural Geology
An introduction to the study of rock deformation in the Earth’s lithosphere viewed from all scales - from the microscopic (atomic scale) to the macroscopic (continental scale). This class focuses on building a foundation of knowledge and understanding that will allow students to broaden their appreciation and understanding of the complexity of the Earth system and the links between geologic structures at all scales and plate tectonics. Three lectures and three hours of laboratory a week, plus a required three-day, weekend field trip. Prerequisite: GEOL 101 and MATH 101.
Approach: Quantitative Readiness Required (QR)

GEOL B205 Sedimentary Materials and Environments
An introduction to sediment transport, depositional processes, and stratigraphic analysis, with emphasis on interpretation of sedimentary sequences and the reconstruction of past environments. Three lectures and one lab a week, plus a one-day field trip. Prerequisite: GEOL 101, 102, or 103 or permission of instructor. Recommended: GEOL B202 and B203.
Approach: Course does not meet an Approach
Counts towards: Geoarchaeology
Units: 1.0
Instructor(s): Barber, D.
(Spring 2018)

GEOL B206 Energy Resources and Sustainability
An examination of issues concerning the supply of energy required by humanity. This includes an investigation of the geological framework that determines resource availability, aspects of energy production and resource development and the science of global climate change. Two 90-minute lectures a week. Suggested preparation: one year of college science.
Approach: Scientific Investigation (SI)
Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Barber, D.
(Fall 2017)

GEOL B208 Geology Super Lab
Students will learn the fundamentals of geological laboratory analysis via measurements on geological materials chosen by the students. We will utilize the analytical equipment and techniques available in the Geology Department including (but not limited to) X-ray diffractometry, thin-section petrography, carbon isotope mass spectrometry, and inductively-coupled plasma mass spectrometry. Emphasis will be placed on data processing and quantitative analysis of large datasets. Prerequisites: GEOL 101, GEOL 202, one other 200 level course, junior/senior status.
Approach: Scientific Investigation (SI)
Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Marenco, P.
(Spring 2018)

GEOL B209 Natural Hazards
A quantitative approach to understanding the earth processes that impact human societies. We consider the past, current, and future hazards presented by geologic processes, including earthquakes, volcanoes, landslides, floods, and hurricanes. The course includes discussion of the social, economic, and policy contexts within which natural geologic processes become hazards. Case studies are drawn from contemporary and ancient societies. Lecture three hours a week. Prerequisite: one semester of college science or permission of instructor.
Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR); Scientific Investigation (SI)
Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Marenco, K.
(Spring 2018)
GEOL B260 Origin Stories: From the Big Bang to Mother Earth
This is a co-taught intermediate science course, instructed by a Geology and Physics professor, that will focus on the core scientific principals related to Cosmology, Physics and Geology that help address fundamental questions regarding the origin of the Universe, the origin of time, the origin of stars and our own solar system, and the origin of Earth, its atmosphere, hydrosphere and biosphere. The course will be a mix of fundamental scientific principles used to scaffold a deeper understanding of how scientists have come to understand and question stories of origin. Group discussions will be informed by close reading of scientific texts, and occasional problem sets.

Approach: Scientific Investigation (SI)
Units: 1.0
(Not Offered 2017-2018)

GEOL B299 Geology Field Short Course
Geology majors choosing to participate in the annual Fall- or Spring-Break Geology Department Field Trip must enroll in GEOL B299. Enrollment in this class does not guarantee a spot on the field trip. Several pre-trip class meetings help maximize student engagement on the trip by providing a forum for discussing the assigned readings. During the week-long field trip, students are exposed to geologic field methods while visiting sites that exemplify different geology from that at sites near campus. Geologic methods introduced include proper field note-taking, mapping and measuring geologic structures, and interpreting geologic history. Culminating work introduces students to geologic illustration and report writing. A passing grade requires full participation and engagement by the student before, during and after the field trip. At least one post-trip meeting is held on campus to synthesize the material covered, and to go over students’ final reports. Prerequisite: GEOL B101, B102 or B103; and GEOL B202, B203, B204 or B205.

Approach: Scientific Investigation (SI)
Units: 0.5
Instructor(s): Weil,A.
(Fall 2017)

GEOL B302 Low-Temperature Geochemistry
Stable isotope geochemistry is one of the most important subfields of the Earth sciences for understanding environmental and climatic change. In this course, we will explore stable isotopic fundamentals and applications including a number of important case studies from the recent and deep time dealing with important biotic events in the fossil record and major climate changes. Prerequisites: GEOL 101 or GEOL 102, and at least one semester of chemistry or physics, or professor approval.

Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Marenco,P.
(Fall 2017)

GEOL B304 Tectonics
Plate tectonics and continental orogeny are reviewed in light of the geologic record in selected mountain ranges and certain geophysical data. Three hours of lecture and a problem session a week. Prerequisite: GEOL 204 or permission of instructor.

Units: 1.0
(Not Offered 2017-2018)

GEOL B305 Igneous and Metamorphic Petrology
The study of igneous and metamorphic rocks, including their origins and modes of occurrence. The focus is on understanding how these rocks form, and on applying a combination of field methods, laboratory techniques, and theoretical understanding to interpret the origins of igneous and metamorphic rocks. The class will build on the study of mineralogy by examining assemblages of coexisting minerals, and what those assemblages reveal about the pressure, temperature, and chemical conditions under which a rock must have formed. For a culminating term project we will conduct an intensive study of local metamorphic rocks. Three lecture hours weekly and one weekly lab. One weekend field trip. Prerequisites: GEOL 202.

Units: 1.0
(Not Offered 2017-2018)

GEOL B310 Introduction to Geophysics
An overview covering how geophysical observations of the Earth’s magnetic field, gravity field, heat flow, radioactivity, and seismic waves provide a means to study plate tectonics and the earth’s interior. Three class hours a week with weekly problem sets. Prerequisite: one year of college physics or with permission of professor.

Counts towards: Geoarchaeology
Units: 1.0
(Not Offered 2017-2018)

GEOL B314 Marine Geology
An introduction to oceanography, coastal processes, and the geomorphology of temperate and tropical shorelines. Includes an overview of the many parameters, including sea level change, that shape coastal environments. Meets twice weekly for a combination of lecture, discussion and hands-on exercises, including a mandatory multi-day field trip to investigate developed and pristine sections of the Mid-Atlantic US coast. Prerequisite: One 200-level GEOL course OR one GEOL course AND one BIOL course (any level), OR advanced BIOL major standing (junior or senior).

Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)

GEOL B350 Advanced Topics in Geology
This is a topics course. Course content varies. Recent topics include Carbonate Petrology, Appalachian Geology, Advanced Evolution, The Snowball Controversy, and Climate Change. Current topic description: This class explores the Appalachians, including investigation of the: margin of eastern Laurentia prior to orogeny, orogenic activity within the continental plates involved in Pangea amalgamation; evidence and ramifications for opening and closing of the major Paleozoic oceans; and implications of these tectonic events on Earth surface systems. This course involves paleontological, geochemical, and stratigraphic approaches of inquiry, and is discussion based with a focus on primary literature.

Prerequisite: Junior and senior Geology majors.
Approach: Scientific Investigation (SI)
Units: 1.0
Instructor(s): Weil,A.
(Spring 2018)
GEOL B398 Senior Seminar
At the discretion of the department faculty, rising seniors may undertake an independent thesis project in addition to mandatory full participation in the senior capstone seminar. This student thesis is conducted under the supervision of a faculty advisor(s). The undertaking of a thesis is modeled after a Master’s thesis project, but is scaled down for the shorter time frame (one versus two years) and educational level of a senior undergraduate student. The thesis project plan is initially developed, and agreed upon by conference between the supervising faculty member(s) and the student. Most of the research is conducted independently by the student. The advisor serves as a source of ideas concerning scientific literature, methodologies, and financial support. The advisor may visit and inspect the research sites, laboratory or model, and offer advice on how the research should be conducted or modified.

Units: 0.5, 1.0
(Not Offered 2017-2018)

GEOL B399 Senior Capstone Seminar
A capstone seminar course required for all Geology majors. All Geology seniors will be required to participate in this two-semester seminar that meets weekly for 1.5 hours for a total of 1.0 credit (0.5 credits per semester). Enrollment required in two half-credit courses, one in the fall and one in the spring semester of the senior year. The focus of the seminar will be to integrate the student’s major curriculum into open peer-led discussions on cutting edge research in the many diverse fields of Geology, to discuss the impact and relevance of Geology to modern society, and to work on oral and written communication skills.

Prerequisite: BM undergraduate Geology major.
Units: 0.5
(Fall 2017, Spring 2018)

GEOL B403 Supervised Research
Optional laboratory or field research on a wide variety of topics, open to junior or senior majors. Interested students must consult with department faculty members as early as possible, preferably before the start of the semester, in order to choose a faculty supervisor. The student and faculty supervisor meet early in the semester to plan the research and discuss gradable outcomes (e.g., final research paper). Requires permission of the instructor and the major advisor.

Units: 0.5, 1.0
(Fall 2017, Spring 2018)

GEOL B425 Praxis III
Independent or group projects with a significant emphasis on community outreach and service. Projects usually focus on addressing environmental issues through collaborative work with off-campus practitioners. Prerequisites: advanced standing in the environmental studies concentration or permission of the instructor.

Counts towards: Praxis Program
Units: 1.0
(Not Offered 2017-2018)

BIOL B236 Evolution
A lecture/discussion course on the development of evolutionary biology. This course will cover the history of evolutionary theory, population genetics, molecular and developmental evolution, paleontology, and phylogenetic analysis. Lecture three hours a week.

Approach: Scientific Investigation (SI)
Counts towards: Biochemistry and Molecular Biology
Units: 1.0
Instructor(s): Davis, G.
(Spring 2018)

BIOL B250 Computational Methods in the Sciences
A study of how and why modern computation methods are used in scientific inquiry. Students will learn basic principles of visualizing and analyzing scientific data through hands-on programming exercises. The majority of the course will use the R programming language and corresponding open source statistical software. Content will focus on data sets from across the sciences. Six hours of combined lecture/lab per week.

Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR); Scientific Investigation (SI)
Major Writing Requirement: Writing Attentive
Counts towards: Biochemistry and Molecular Biology; Environmental Studies; Neuroscience
Units: 1.0
(Not Offered 2017-2018)

ENVS B397 Senior Seminar in Environmental Studies
In this capstone course, senior Environmental Studies minors from across the disciplines will draw on the perspectives and skills gained from their majors and from their preparatory work in the minor to collaboratively engage high-level questions of environmental inquiry. Prerequisite: Open only to Environmental Studies minors who have completed all introductory work for the minor.

Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Barber, D.
(Spring 2018)

GEOL B109 Quantitative Problems in the Earth Science
An introduction to quantitative methods used for solving problems in Earth science. We will examine a wide variety of geologic questions: seismicity and earthquakes, volcanic activity, landslide triggers, flooding patterns, and more. We will then practice a range of quantitative techniques to approach those questions, both from a broad, global perspective and by examining current, relevant case studies. Prerequisite: Quantitative Readiness Required.

Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR); Scientific Investigation (SI)
Units: 1.0
(Not Offered 2017-2018)

PHYS B350 Computational Methods in the Physical Sciences
This course provides an introduction to a variety of computational tools and programming techniques that physical science graduates might encounter in graduate work or employment in STEM-related fields. Tools explored will include both command-line and GUI programming environments, both scripting and scientific programming languages, basic programming concepts such as loops and function calls, and key scientific programming applications such as integration, finding of roots and minima/maxima, least-square fitting, solution of differential equations, boundary-value problems, finite-element analysis, Fourier
GERMAN AND GERMAN STUDIES

Students may complete a major or minor in German and German Studies.

Faculty

Azade Seyhan, Fairbank Professor in the Humanities and Chair and Professor of German and Comparative Literature

Qinna Shen, Assistant Professor of German

The Bryn Mawr Department of German is the Bryn Mawr section of the Bi-College German Department and offers a fully coordinated program of courses with the Haverford College Department of German. By drawing upon the expertise of the German faculty at both colleges, the Department has established a broadly conceived German Studies program, incorporating a variety of courses and major options. The purpose of the major in German and German Studies is to lay the foundation for a critical understanding of German culture in its contemporary global context and its larger political, social, and intellectual history. To this end we encourage a thorough and comparative study of the German language and culture through its linguistic and literary history, systems of thought, institutions, political configurations, and arts and sciences.

The German program aims, by means of various methodological approaches to the study of another language, to foster critical thinking, expository writing skills, understanding of the diversity of culture(s), and the ability to respond creatively to the challenges posed by cultural difference in an increasingly global world. Course offerings are intended to serve both students with particular interests in German literature and literary theory and criticism, and those interested in a German Studies concentration that covers German and German-speaking cultures from multiple perspectives, including those of history, history of ideas, history of art and architecture, history of religion, institutions, linguistics, mass media, philosophy, politics, and urban anthropology.

A thorough knowledge of German is a goal for both major concentrations. The objective of our language instruction is to teach students communicative skills that enable them to function effectively in authentic conditions of language use and to speak and write in idiomatic German. A major component of all German courses is the examination of issues that underlie the cosmopolitanism as well as the specificity and complexity of contemporary German culture. German majors can and are encouraged to take courses in interdisciplinary areas, such as comparative literature, film, gender and sexuality studies, growth and structure of cities, history, history of art, music, philosophy, and political science, where they read works of criticism in these areas in the original German. Courses relating to any aspect of German culture, history, and politics given in other departments can count toward requirements for the major or minor.

College Foreign Language Requirement

The College’s foreign language requirement may be satisfied by the completion of two courses in German with an average grade of at least 2.0.

Major Requirements

The Department of German offers a two-track system for the completion of a major in German or in German Studies. Both major tracks consist of 10 units. After the completion of the German 101 (or its equivalent) the German language and literature concentration normally follows the sequence 102; 201 and/or 202; 209 or 212, or 223; plus additional courses to complete the 10 units, two of them at the 300 level; and finally one semester of Senior Conference or either an additional 300 level seminar in German or German 403 (Supervised Work) for double majors. A German Studies major normally includes 223 or 245; one 200- and one 300-level course in German literature; three courses (at least one at the 300 level) in subjects central to aspects of German culture, history, or politics; and one semester of GERM 321 (Advanced Topics in German Cultural Studies). Within each concentration, courses need to be selected so as to achieve a reasonable breadth, but also a degree of disciplinary coherence. Within departmental offerings, GERM 201 and 202 (Advanced Training) strongly emphasize the development of conversational, writing, and interpretive skills. German majors are encouraged, when possible, to take work in at least one foreign language other than German.

The Department of German and German Studies offers Writing Attentive and Writing Intensive courses. Majors are required to take two Writing Attentive courses to help them develop critical writing skills and the ability to analyze literary texts in their historical and cultural contexts.

Senior Thesis Project

All of our majors are required to write a senior thesis in German, or—if they are double majors—to produce a thesis in a related discipline that has significant overlap with their work in German. They typically take a 300-level seminar in fall and write a research term paper which often becomes the foundation for their senior project.

Learning Goals

In writing the senior thesis, the student should demonstrate a) the capacity to conceive a theoretically informed and well designed research project b) the language skills to research and evaluate primary and secondary materials and to effectively synthesize these, and c) the analytical and methodological skills to produce an innovative and critically astute thesis.

Assessment of Senior Thesis

The quality of the thesis is evaluated on the basis of the following criteria:

• Originality of topic
• Mastery of analysis
• Familiarity with primary and secondary literature
• Creative application of relevant theoretical discourses
• Clarity of writing

Honors

Any student whose grade point average in the major at the end of the senior year is 3.8 or higher qualifies for departmental
honors. Students who have completed a thesis and whose major grade point average at the end of the senior year is 3.6 or higher, but not 3.8, are eligible to be discussed as candidates for departmental honors. A student in this range of eligibility must be sponsored by at least one faculty member with whom she has done coursework, and at least one other faculty member must read some of the student’s advanced work and agree on the excellence of the work in order for departmental honors to be awarded. If there is a sharp difference of opinion, additional readers will serve as needed.

Minor Requirements
A minor in German and German Studies consists of six units of work. To earn a minor, students are normally required to take GERM 201 or 202 or their equivalents, and four additional units covering a reasonable range of study topics, of which at least one unit is at the 300 level. Additional upper-level courses in the broader area of German Studies may be counted toward the six units with the approval of the department.

Study Abroad
Students majoring in German are encouraged to spend some time in German-speaking countries in the course of their undergraduate studies. Various possibilities are available: summer work programs, DAAD (German Academic Exchange) scholarships for summer courses at German universities, and selected JYA (Junior Year Abroad) Programs.

COURSES

GERM B101 Intermediate German
Thorough review of grammar, exercises in composition and conversation. Enforcement of correct grammatical patterns and idiomatic use of language. Study of selected literary and cultural texts and films from German-speaking countries. Prerequisite: Completion of GERM 002 or its equivalent as decided by the department and/or placement test.

Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): Seyhan,A.
(Fall 2017)

GERM B102 Intermediate German
This course is the continuation of GERM 101 (Intermediate German). We will concentrate on all four language skills—speaking, reading, writing, and listening comprehension. We will build on the knowledge that students gained in the elementary-level courses and then honed in GERM 101. This course will also provide students with an introduction to selected aspects of German culture. Prerequisite: GERM 101 or its equivalent as decided by the department

Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): Shen,Q.
(Spring 2018)

GERM B201 Advanced Training: Language, Text, Context
Emphasis on the development of conversational, writing and interpretive skills through an introductory study of German political, cultural and intellectual life and history, including public debate, institutional practices, mass media, cross-cultural currents, folklore, fashion and advertising. Taught in German. Course content may vary.

Prerequisite: GERM B102 or its equivalent.
Major Writing Requirement: Writing Intensive
Units: 1.0
Instructor(s): Shen,Q.
(Fall 2017)

GERM B202 Introduction to German Studies
In this course, we will concentrate on all four language skills—speaking, reading, writing and listening comprehension. However, special emphasis will be placed on reading and writing skills. In addition, students will be introduced to different literary and non-literary texts and practice writing in different genres. Through newspaper articles, film reviews, short stories, poetry, and selected film screenings, this course also offers an introduction to some of the most compelling debates about multiculturalism in Germany and exemplary representations of cultural diversity in contemporary German life. Course taught in German.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Major Writing Requirement: Writing Intensive
Units: 1.0
(Not Offered 2017-2018)

GERM B212 Marx, Nietzsche, Freud, and the Rhetoric of Modernity
This course examines selected writings by Marx, Nietzsche, and Freud as pre-texts for a critique of cultural reason and underlines their contribution to questions of language, representation, history, ethics, and art. These three visionaries of modernity have translated the abstract metaphysics of “the history of the subject” into a concrete analysis of human experience. Their work has been a major influence on the Frankfurt School of critical theory and has also led to a revolutionary shift in the understanding and writing of history and literature now associated with the work of modern French philosophers Jacques Derrida, Michel Foucault, Julia Kristeva, and Jacques Lacan. Our readings will, therefore, also include short selections from these philosophers in order to analyze the contested history of modernity and its intellectual and moral consequences. Special attention will be paid to the relation between rhetoric and philosophy and the narrative forms of “the philosophical discourse(s) of modernity” (e.g., sermon and myth in Marx; aphorism and oratory in Nietzsche, myth, fairy tale, case history in Freud). Course is taught in English. One additional hour will be added for those students wanting German credit. Cross-listed with Philosophy 204.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Major Writing Requirement: Writing Attentive
Units: 1.0
(Not Offered 2017-2018)

GERM B223 Topics in German Cultural Studies
This is a topics course. Course content varies. Recent topics include Remembered Violence, Global Masculinities, and Crime and Detection in German.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)
GERM B231 Cultural Profiles in Modern Exile
This course investigates the anthropological, philosophical, psychological, cultural, and literary aspects of modern exile. It studies exile as experience and metaphor in the context of modernity, and examines the structure of the relationship between imagined/remembered homelands and transnational identities, and the dialectics of language loss and bi- and multilingualism. Particular attention is given to the psychocultural dimensions of linguistic exclusion and loss. Readings of works by Julia Alvarez, Albert Camus, Ana Castillo, Sigmund Freud, Eva Hoffman, Maxine Hong Kingston, Milan Kundera, Friedrich Nietzsche, Salman Rushdie, W. G. Sebald, Kurban Said, and others.
Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Major Writing Requirement: Writing Attentive
Counts towards: Latin American, Iberian and Latina/o Studies; International Studies
Units: 1.0
(Not Offered 2017-2018)

GERM B245 Interdisciplinary Approaches to German Literature and Culture
This is a topics course. Taught in English. Course content varies. Previous topics include: Women's Narratives on Modern Migrancy, Exile, and Diasporas; Nation and Identity in Post-War Austria. Current topic: Crime and Courtroom Drama. This is a film-based course about political trials at critical junctures of German history. Current topic description: This is a film-based course about political trials at critical junctures of German history.
Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Shen,Q.
(Spring 2018)

GERM B230 Topics in German Literature and Culture
This is a topics course. Course content varies. Previous topics include: Romantic Literary Theory and Literary Modernity; Configurations of Femininity in German Literature; Nietzsche and Modern Cultural Criticism; Contemporary German Fiction; German Literary Culture in Exile (1933-1945). Taught in English. Students wanting German credit will meet for an additional hour per week. Current topic description: This course focuses on the development of strong international and cross-cultural trends in German literature of modernity.
Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Major Writing Requirement: Writing Attentive
Units: 1.0
(Spring 2018)

GERM B321 Advanced Topics in German Cultural Studies
This is a topics course. Course content varies. Current topic description: This film course of transnational scope focuses specifically on cultural encounters between the West and the East in the 20th and 21st centuries. It uses visual material related to East Asia produced mainly by German filmmakers. Using film as the main medium, the course touches on issues that are at the center of contemporary cultural debates, such as orientalism, race, gender, class, and identity, as well as postcolonialism, nationalism, travel, exile, multiculturalism, and globalization.
Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: East Asian Languages and Cultures
Units: 1.0
Instructor(s): Shen,Q.
(Fall 2017)

GERM B399 Senior Seminar
Senior Seminar. Students are required to write a long research paper with an annotated bibliography.
Units: 1.0
Instructor(s): Shen,Q.
(Spring 2018)

GERM B403 Supervised Work
Units: 1.0
(Fall 2017)

GERM B421 German for Reading Knowledge
This course will provide graduate and undergraduate students with the skills to read and translate challenging academic texts from German into English. We will quickly cover the essentials of German grammar and focus on vocabulary and constructions that one can encounter in scholarly writing from a variety of disciplines. Does not fulfill the Language Requirement.
Units: 1.0
(Not Offered 2017-2018)

COML B225 Censorship: Historical Contexts, Local Practices and Global Resonance
The course is in English. It examines the ban on books and art in a global context through a study of the historical and sociopolitical conditions of censorship practices. The course raises such questions as how censorship is used to fortify political power, how it is practiced locally and globally, who censors, what are the categories of censorship, how censorship succeeds and fails, and how writers and artists write and create against and within censorship. The last question leads to an analysis of rhetorical strategies that writers and artists employ to translate the expression of repression, trauma, and torture into idioms of resistance. German majors/minors can get German Studies credit. Prerequisite: EMLY B001 or a 100-level intensive writing course.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Latin American, Iberian and Latina/o Studies; Middle Eastern & Islamic Studies
Units: 1.0
(Not Offered 2017-2018)

FREN B213 Theory in Practice:Critical Discourses in the Humanities
By bringing together the study of major theoretical currents of the 20th century and the practice of analyzing literary works in the light of theory, this course aims at providing students with skills to use literary theory in their own scholarship. The selection of theoretical readings reflects the history of theory (psychoanalysis, structuralism, narratology), as well as the currents most relevant to the contemporary academic field: Post-structuralism, Post-colonialism, Gender Studies, and Ecocriticism. They are paired with a diverse range of short stories (Poe, Kafka, Camus, Borges, Calvino, Morrison, Djebar, Ngozi Adichie) that we discuss along with our study of theoretical texts. The class will
be conducted in English with an additional hour in French for students wishing to take it for French credit.

Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Sanquer, M.
(Fall 2017)

**GERM B001 Elementary German**
Meets five hours a week with the individual class instructor, an additional one hour with a TA. Strong emphasis on communicative competence both in spoken and written German in a larger cultural context.

Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): Shen, Q.
(Fall 2017)

**GERM B002 Elementary German**
Meets five hours a week with the individual class instructor, and one additional hour with a TA. Strong emphasis on communicative competence both in spoken and written German in a larger cultural context. Prerequisite: GERM 001 or its equivalent or permission of instructor

Approach: Course does not meet an Approach
Units: 1.0
(Spring 2018)

**ITAL B213 Theory in Practice: Critical Discourses in the Humanities**
An examination in English of leading theories of interpretation from Classical Tradition to Modern and Post-Modern Time. This is a topics course. Course content varies.

Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

**GREEK, LATIN, AND CLASSICAL STUDIES**

Students may complete a major in Greek, Latin, Classical Languages, or Classical Culture and Society. Students may complete a minor in Greek, Latin, or Classical Culture and Society. Students may complete an M.A. in Greek or Latin in the combined A.B./M.A. program.

**Faculty**

Annette Baertschi, Associate Professor of Greek, Latin, and Classical Studies and Director of the Graduate Group

Catherine Conybeare, Chair and Professor of Greek, Latin and Classical Studies

Radcliffe Edmonds, Paul Shorey Professor of Greek and Professor of Greek, Latin, and Classical Studies

Robin Mitchell-Boyask, Visiting Professor

Charlie Kuper, Instructor

Russell Scott, Doreen C. Spitzer Professor of Latin and Classical Studies

Asya Sigelman, Associate Professor of Greek, Latin and

Classical Studies (on leave semesters I & II)

In collaboration with the Department of Classics at Haverford College, the department offers four major programs of study: Greek, Latin, Classical Languages, and Classical Culture and Society. In addition to the sequence of courses specified for each major, all majors are expected to have read through the Classics Reading List before they participate in the Senior Seminar, or a required full-year course. In the first term, students refine their ability to read, discuss, and critique classical texts through engagement with scholarship from various fields of Classics while in the second term, they conduct independent research, culminating in a substantial thesis paper and a presentation to the department. Senior essays of exceptionally high quality may be awarded departmental honors at commencement.

In addition to completing the course requirements for each type of major (Greek, Latin, Classical Languages, or Classical Culture & Society), every student must fulfill the requisite training in writing within the discipline by taking as part of her major plan two courses that are designated as Writing Attentive or a single course designated as Writing Intensive. The student may count a Writing Attentive or Intensive course that is taught outside the department if it is included in the major plan.

Students, according to their concentrations, are encouraged to consider a term of study during junior year in programs such as the College Year in Athens or the Intercollegiate Center for Classical Studies in Rome.

Courses in Greek (GREK) and Latin (LATN) involve the study of the ancient language and reading texts in that language. Courses for which a knowledge of Greek or Latin is not required are listed under Classical Studies (CSTS).

**GREEK**

The sequence of courses in the ancient Greek language is designed to acquaint the students with the various aspects of Greek culture through a mastery of the language and a comprehension of Greek history, mythology, religion and the other basic forms of expression through which the culture developed. The works of poets, philosophers, and historians are studied both in their historical context and in relation to subsequent Western thought.

**College Foreign Language Requirement**

The College’s foreign language requirement may be satisfied by completing two semesters of Greek with an average grade of at least 2.0 or with a grade of 2.0 or better in the second semester.

**Major Requirements**

Requirements in the major are two courses in Greek at the introductory level, two courses at the 100 level, two courses at the 200 level, one course at the 300 level (or above) and the Senior Seminar and the thesis.

Also required are three courses to be distributed as follows: one in Greek history, one in Greek archaeology, and one in Greek philosophy.

In addition to completing the course requirements for the Greek major, every student must fulfill the requisite training in writing within the discipline by taking as part of her major plan two courses that are designated as Writing Attentive or a single course designated as Writing Intensive. The student may count a Writing Attentive or Intensive course that is taught outside the department if it is included in the major plan.
By the end of the senior year, majors will be required to have completed a sight translation examination from Greek to English.

Prospective majors in Greek are advised to take Greek in their first year. For students entering with Greek there is the possibility of completing the requirements for both A.B. and M.A. degrees in four years. Those interested in pursuing advanced degrees are advised also to have a firm grounding in Latin.

**Minor Requirements**

Requirements for a minor in Greek are two courses at the introductory level, two courses at the 100 level, two courses at the 200 level.

**COURSES**

**GREK B010 Traditional and New Testament Greek**

This is the first half of a year-long introductory course to ancient Greek. It is designed to familiarize students with the basic elements of classical Greek grammar and syntax as well as to provide them with experience in reading short sentences and passages in both Greek prose and poetry.

Approach: Course does not meet an Approach

Units: 1.0

Instructor(s): Edmonds, R.

(Fall 2017)

**GREK B011 Traditional and New Testament Greek**

This is the second half of a year-long introductory course to ancient Greek. It is designed to familiarize students with the basic elements of classical Greek grammar and syntax. Once the grammar has been fully introduced, students will develop facility by reading parts of the New Testament and a dialogue of Plato.

Prerequisite: GREK B010.

Approach: Course does not meet an Approach

Units: 1.0

Instructor(s): Edmonds, R.

(Spring 2018)

**GREK B101 Herodotus**

Greek 101 introduces the student to one of the greatest prose authors of ancient Greece, the historian, Herodotus. The “Father of History,” as Herodotus is sometimes called, wrote one of the earliest lengthy prose texts extant in Greek literature, in the Ionian dialect of Greek. The “Father of Lies,” as he is also sometimes known, wove into his history a number of fabulous and entertaining anecdotes and tales. His ‘historie’ or inquiry into the events surrounding the invasions by the Persian empire against the Greek city-states set the precedent for all subsequent historical writings. This course meets three times a week with a required fourth hour to be arranged. Prerequisite: GREK B010 and B011 or equivalent.

Approach: Critical Interpretation (CI)

Units: 1.0

(Not Offered 2017-2018)

**GREK B104 Homer**

Greek 104 is designed to introduce the student to the epic poetry attributed to Homer, the greatest poet of ancient Greece, through selections from the Odyssey. Since Homer’s poetic form is so important to the shape and texture of the Odyssey, we will examine the mechanics of Homer’s poetry, both the intricacies of dactylic hexameter and the patterns of oral formulaic composition. We will also spend time discussing the characters and ideas that animate this text, since the value of Homer lies not merely in his incomparable mastery of his poetic form, but in the values and patterns of behavior in his story, patterns which remained remarkably influential in the Greek world for centuries.

Prerequisite: One year of college level Greek or equivalent.

Approach: Critical Interpretation (CI)

Major Writing Requirement: Writing Attentive

Units: 1.0

(Spring 2018)

**GREK B201 Plato and Thucydides**

This course is designed to introduce the student to two of the greatest prose authors of ancient Greece, the philosopher, Plato, and the historian, Thucydides. These two writers set the terms in the disciplines of philosophy and history for millennia, and philosophers and historians today continue to grapple with their ideas and influence. The brilliant and controversial statesman Alcibiades provides a link between the two texts in this course (Plato’s Symposium and Thucydides’ History of the Peloponnesian War), and we examine the ways in which both authors handle the figure of Alcibiades as a point of entry into the comparison of the varying styles and modes of thought of these two great writers. Suggested Prerequisites: At least 2 years of college Greek or the equivalent.

Approach: Critical Interpretation (CI)

Major Writing Requirement: Writing Attentive

Counts towards: Gender and Sexuality Studies

Units: 1.0

Instructor(s): Edmonds, R.

(Fall 2017)

**GREK B202 The Form of Tragedy**

This course will introduce the student to two of the three great Athenian tragedians—Sophocles and Euripides. Their dramas, composed two-and-a-half millenia ago, continue to be performed regularly on modern stages around the world and exert a profound influence on current day theatre. We will read Sophocles’ Oedipus Tyrannos and Euripides’ Bacchae in full, focusing on language, poetics, meter, and performance studies.

Approach: Critical Interpretation (CI)

Major Writing Requirement: Writing Attentive

Units: 1.0

(Not Offered 2017-2018)

**GREK B403 Supervised Work**

Units: 1.0

(Fall 2017)

**GREK B630 Euripides**

In this seminar we will look closely at several plays of Euripides, paying special attention to the tragedian’s language and meter. We will also read widely in 20th and 21st century scholarship on Euripides.

Units: 1.0

(Not Offered 2017-2018)

**GREK B653 Athens in the Hellenistic Period**

Surveys of Athenian history tend to conclude if not at the Battle of Chaeronea at any rate at the death of Alexander. Yet Athens did not disappear with the imposition of the Macedonian garrison in 322. Democracy resurfaced periodically over the course of the next century (in 318, 307, 288, and 229), and, more to the point, even under periods of oligarchic rule and Macedonian control,
Athenian institutions remained intact, and Athenians continued to make significant contributions to the greater Greek world. Indeed, the century that followed Alexander’s death saw the flowering of Athenian historiography (e.g. Demochares, Dylus, Philochorus, Timaeus, and Phylarchus) and new comedy (e.g. Menander and Poseidippus), as well as the advent of important philosophical schools (Epicureanism and Stoicism). This course will focus on Athens between the Battle of Chaeronea (338 BCE) and its liberation from Macedonian rule ca. 229 BCE. By way of a variety of contemporary sources, we shall have the opportunity to familiarize ourselves both with the historical narrative and with the intellectual climate of the polis in the early Hellenistic period.

Units: 1.0
(Not Offered 2017-2018)

ARCH B260 Daily Life in Ancient Greece and Rome

The often-praised achievements of the classical cultures arose from the realities of day-to-day life. This course surveys the rich body of material and textual evidence pertaining to how ancient Greeks and Romans -- famous and obscure alike -- lived and died. Topics include housing, food, clothing, work, leisure, and family and social life.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

ARCH B504 Archaeology of Greek Religion

This course approaches the topic of ancient Greek religion by focusing on surviving archaeological, architectural, epigraphical, artistic and literary evidence that dates from the Archaic and Classical periods. By examining a wealth of diverse evidence that ranges, for example, from temple architecture, and feasting and banqueting equipment to inscriptions, statues, vase paintings, and descriptive texts, the course enables the participants to analyze the value and complexity of the archaeology of Greek religion and to recognize its significance for the reconstruction of daily life in ancient Greece. Special emphasis is placed on subjects such as the duties of priests and priestesses, the violence of animal sacrifice, the function of cult statues and votive offerings and also the important position of festivals and hero and mystery cults in ancient Greek religious thought and experience.

Units: 1.0
(Not Offered 2017-2018)

CSTS B208 The Roman Empire

Imperial history from the principate of Augustus to the House of Constantine with focus on the evolution of Roman culture and society as presented in the surviving ancient evidence, both literary and archaeological.

Approach: Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Scott,R.
(Spring 2018)

CSTS B225 In Vino Veritas: Wine in the Literature and Cult of Ancient Greece & Rome

This course will explore ancient Greeks’ and Romans’ perception of wine-drinking as a sacral experience, often of critical cultural, social, and even cosmic importance. We will study the cult of Dionysus and the role of wine in Greek and Latin poetry, drama, and philosophy. We will then trace the development of these religious and cultural trends in subsequent Western history, to the medieval tradition of the carnival and to twentieth-century literature.

Approach: Cross-Cultural Analysis (CC)
Units: 1.0
(Not Offered 2017-2018)

CSTS B228 Utopia: Good Place or No Place?

What is the ideal human society? What is the role and status of man and woman therein? Is such a society purely hypothetical or should we strive to make it viable in our modern world? This course will address these questions by exploring the historic development of the concept of utopia.

Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

CSTS B230 Food and Drink in the Ancient World

This course explores practices of eating and drinking in the ancient Mediterranean world both from a socio-cultural and environmental perspective. Since we are not only what we eat, but also where, when, why, with whom, and how we eat, we will examine the wider implications of patterns of food production, preparation, consumption, availability, and taboos, considering issues like gender, health, financial situation, geographical variability, and political status. Anthropological, archaeological, literary, and art historical approaches will be used to analyze the evidence and shed light on the role of food and drink in ancient culture and society. In addition, we will discuss how this affects our contemporary customs and practices and how our identity is still shaped by what we eat.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

CSTS B274 Greek Tragedy in Global Cinema

This course explores how contemporary film, a creative medium appealing to the entire demographic spectrum like Greek drama, looks back to the ancient origins. Examining both films that are directly based on Greek plays and films that make use of classical material without being explicitly classical in plot or setting, we will discuss how Greek mythology is reconstructed and appropriated for modern audiences and how the classical past continues to be culturally significant. A variety of methodological approaches such as film and gender theory, psychoanalysis, and feminist theory will be applied in addition to more straightforward literary-historical interpretation.

Approach: Critical Interpretation (CI)
Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

CSTS B320 Martyrs, Mothers, Memoirs: Medieval Autobiographies

The writing of autobiography flourished in the middle ages, but there have been very few studies of the genre for the period. This course presents a range of autobiographies from the Latin West and encourages students to think about them theoretically and historically: what does it mean to write the self? what is at stake in the presentation of these stories? what notions are privileged? and how do we situate autobiographies in the wider literary landscape?
CSTS B398 Senior Seminar
This is a bi-college seminar devoted to readings in and discussion of selected topics in the various sub-fields of Classics (e.g., literature, religion, philosophy, law, social history) and of how to apply contemporary critical approaches to the primary sources. Students will also begin developing a topic for their senior thesis, composing a prospectus and giving a preliminary presentation of their findings.
Units: 1.0
Instructor(s): Conybeare,C.
(Fall 2017)

CSTS B399 Senior Seminar
This is the continuation of CSTS B398. Working with individual advisors from the bi-college classics departments, students will continue to develop the topic sketched out in the fall semester. By the end of the course, they will have completed at least one draft and a full, polished version of the senior thesis, of which they will give a final oral presentation.
Units: 1.0
(Not Offered 2017-2018)

GREK B601 Homer
We will focus on a careful reading of significant portions of the Homeric epics and on the history of Homeric scholarship. Students will develop an appreciation both for the beauty of Homer’s poetics and for the scholarly arguments surrounding interpretation of these texts.
Units: 1.0
(Not Offered 2017-2018)

GREK B602 Approaches to Homeric Epic
A close study of the Homeric Iliad, and a survey of some major scholarly “camps” surrounding its interpretation. In addition to reading much of the epic in Greek, students should also expect to engage the methodologies that have been used to approach this peculiar, monumental poem. Oralist, narratological, neo-analytic, linguistic, historical and Marxist readings will be applied and dissected. Two oral reports and a research paper will be expected.
Units: 1.0
Instructor(s): Mitchell-Boyask,R.
(Fall 2017)

GREK B609 Pindar & Greek Lyric
We will begin with a careful reading of Pindar’s shorter odes, then proceed to his most famous long odes (Olympian 1, Pythian 3, Pythian 1) and then consider interpretative strategies (past, present, and future) as we survey the rest of the odes. One additional hour of reading TBA.
Units: 1.0
(Not Offered 2017-2018)

GREK B620 5th century Greek Historians
This course will present a detailed reading of three or more books of Herodotus, with close study of his language, structure, and understanding of historical causation. We shall also work to situate Herodotus as an early prose writer in the tradition of the earlier geographical and ethnographical writings and will to that end read the fragments of Hecataeus as well as other early historians.
Units: 1.0
(Not Offered 2017-2018)

GREK B623 Sophocles
In this seminar we will conduct an in-depth reading of several of Sophocles’ plays with special emphasis on the language and metrics of Greek tragedy. We will also focus on the history of Sophoclean scholarship. Secondary readings and in-class discussions will cover topics such as the role of the chorus; lyric vs. narrative in drama; the Sophoclean hero; the role of time and oracles; the role of the divine; comparison of Sophocles’ favorite themes and techniques with those of Aeschylus and Euripides. All students will complete a term paper on a research topic of their choice by the end of the semester.
Units: 1.0
(Not Offered 2017-2018)

GREK B639 Greek Orators:Classical Athens
The Attic orators provide a rich array of evidence for the social structures of men and women in ancient Athens, giving insights into aspects of personal life that literary texts rarely touch upon. In this seminar, we will explore the ideas of gender and citizenship as they are expressed in a number of the orations from 4th century Athens. We will examine the ways in which rhetoric is used in the speeches, with close attention to the kind of social and personal dynamics that were central to the forensic arena of this time period. A close reading of the texts themselves in the original Greek will help provide insight into the language of the courts, while the readings from modern scholarship will allow us to probe more deeply into some of the issues raised by the texts.
Units: 1.0
(Not Offered 2017-2018)

GREK B644 Plato
In this seminar, we will explore the central ideas of a Platonic dialogue as they are unfolded by the varying voices of the interlocutors. In the ‘Phaedo’, Plato presents a poignant picture of the last hours of Socrates. Plato’s dialogues all prompt questions about how to read and understand the complex interchanges between the interlocutors, but no dialogue presents these issues as prominently or paradoxically as the Phaedrus. In their rhetorical speeches on love, Phaedrus speaks for Lysias, while Socrates speaks for Phaedrus or for the nymphs or for Stesichorus. And for whom does Plato speak, or rather, write? And what does he mean when he writes for Socrates the speech that no one serious would ever put anything serious in writing? In this seminar, we will explore the ideas of speech and writing, dialogue and rhetoric, philosophy and eros in the Phaedrus. In addition to a close reading of the text itself, we will sample from the scholarly debates over the understanding and interpretation of the Phaedrus that have gone on over the past two and a half millenia of reading Plato’s Phaedrus.
Units: 1.0
Instructor(s): Edmonds,R.
(Spring 2018)

LATN B350 Topics in Latin Literature
This is a topics course. Course content varies.
Prerequisites: At least two 200-level Latin courses or permission
of instructor.
Units: 1.0
Instructor(s): Mulligan,B.
(Spring 2018)

LATIN
The major in Latin is designed to acquaint the student with Roman literature, history and culture in all its aspects. Works in Latin language, ranging from its beginnings to the Renaissance, are examined both in their historical context and as influences on post-classical cultures and societies up to the present day. A number of courses in Latin at the 200-level are offered in rotation at Bryn Mawr and Haverford. They are based on authors and topics in Roman imperial literature ranging from the Augustan Age to Late Antiquity and the Middle Ages and are designed to illustrate the richness of this literary patrimony.

College Foreign Language Requirement
The College’s foreign language requirement may be satisfied by completing two semesters of Latin with an average grade of at least 2.0 or with a grade of 2.0 or better in the second semester.

Major Requirements
Requirements for the major are two courses in Latin at the 100 level, two literature courses at the 200 level, two literature courses at the 300 level, HIST 207 or 208, Senior Seminar and thesis, and two courses to be selected from the following: Classical and Near Eastern Archaeology at the 100 level or above; Greek at the 100 level or above; French, Italian or Spanish at the 200 level or above. Courses taken at the Intercollegiate Center for Classical Studies in Rome are accepted as part of the major.

In addition to completing the course requirements for the Latin major, every student must fulfill the requisite training in writing within the discipline by taking as part of her major plan two courses that are designated as Writing Attentive or an Intensive course designated as Writing Intensive. The student may count a Writing Attentive or Intensive course that is taught outside the department if it is included in the major plan.

By the end of the senior year, majors will be required to have completed successfully a sight translation examination from Latin to English.

Students who place into 200-level courses in their first year may be eligible to participate in the A.B./M.A. program. Those interested should consult the department as soon as possible.

Minor Requirements
Requirements for the minor are normally six courses in Latin, including one at the 300-level. For non-majors, two literature courses at the 200-level must be taken as a prerequisite for admission to a 300-level course.

COURSES
LATN B001 Elementary Latin
Latin 001 is the first part of a year-long course that introduces the student to the language and literature of ancient Rome. The first semester focuses upon the grammar of Latin, developing the student’s knowledge of the forms of the language and the basic constructions used. Exercises in translation and composition aid in the student’s learning of the language, while readings in prose and poetry from the ancient authors provide the student with a deeper appreciation of the culture which used this language.
Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): Baertschi,A.
(Fall 2017)

LATN B002 Elementary Latin
Latin 002 is the second part of a year-long course that introduces the student to the language and literature of ancient Rome. The second semester completes the course of study of the grammar of Latin, improving the student’s knowledge of the forms of the language and forms of expression. Exercises in translation and composition aid in the student’s learning of the language, while readings in prose and poetry from the ancient authors provide the student with a deeper appreciation of the culture which used this language. Prerequisite: LATN B001.
Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): Conybeare,C.
(Spring 2018)

LATN B110 Intermediate Latin
Intensive review of grammar, reading in classical prose and poetry. For students who have had the equivalent of several years of high school Latin or are not adequately prepared to take LATN 101. This course meets three times a week with a required fourth hour to be arranged. Prerequisite: One year of college level Latin or equivalent.
Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): Scott,R.
(Fall 2017)

LATN B112 Latin Literature
In the second semester of the intermediate Latin sequence, readings in prose and poetry are frequently drawn from a period, such as the age of Augustus, that illustrate in different ways the leading political and cultural concerns of the time. The Latin readings and discussion are supplemented by readings in the secondary literature. This course meets three times a week with a required fourth hour to be arranged. Prerequisite: LATN 101 or 110 or placement by the department.
Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Attentive
Units: 1.0
Instructor(s): Baertschi,A.
(Spring 2018)

LATN B201 Topics: Advanced Latin Literature
This is a topics course, course content varies. In this course typically a variety of Latin prose and poetry of the high and later Roman empire (first to fourth centuries CE) is read. Single or multiple authors may be featured in a given semester. Suggested Preparation: two years of college Latin or equivalent.
Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Attentive
Units: 1.0
(Not Offered 2017-2018)
LATN B202 Topics: Advanced Latin Literature
In this course typically a variety of Latin prose and poetry of the high and later Roman empire (first to fourth centuries CE) is read. Single or multiple authors may be featured in a given semester. This is a topics course, course content varies. Prerequisite: At least one 200-level Latin course or equivalent. Current topic description: Readings will be drawn from the following authors: Lucan, De Bello Civili Book 7, Seneca’s Letters to Lucilius, and Cornelius Tacitus, the Agricola and the Histories (Selections).
Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Attentive
Units: 1.0
Instructor(s): Scott, R.
(Spring 2018)

LATN B312 Roman Satire
Satire is the most slippery and subversive of genres. It is richly entertaining to read, but if we engage with it seriously it is often abrasive, shocking, shattering. Reading Roman satire requires an energetic exercise in cultural translation: we are confronted with the alienness of the Roman world, as well as its perverse literary vigour. This course will span four turbulent centuries of Roman imperialism in its reading of Roman satire. We will range from the sharp minutiae of social observation in Horace’s Sermones to the calculated public abuse of a eunuch consul in Claudian’s In Eutropium; from the swirling filthy riches of Persius and Juvenal to the nastily eloquent Christian condemnation of riches (and much else) in St Jerome. Students are warned: the language is difficult, the content often excoriating, even if exquisitely expressed. Reading this material challenges any comfortable separation between “literature” and "life".
Units: 1.0
(Not Offered 2017-2018)

LATN B350 Topics in Latin Literature
This is a topics course. Course content varies.
Prerequisites: At least two 200-level Latin courses or permission of instructor.
Units: 1.0
Instructor(s): Mulligan, B.
(Spring 2018)

LATN B403 Supervised Work
Units: 1.0
(Fall 2017)

LATN B613 Cicero
The public and private legal speeches and relevant letters of Cicero as advocate and politician.
Units: 1.0
(Not Offered 2017-2018)

ARCH B260 Daily Life in Ancient Greece and Rome
The often-praised achievements of the classical cultures arose from the realities of day-to-day life. This course surveys the rich body of material and textual evidence pertaining to how ancient Greeks and Romans -- famous and obscure alike -- lived and died. Topics include housing, food, clothing, work, leisure, and family and social life.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)

CSTS B156 Roman Law in Action
An introduction to Roman public and private law from the early republic to the high empire. The development of legal institutions, including the public courts, the role of the jurists and the importance of case law, is stressed.
Approach: Cross-Cultural Analysis (CC)
Units: 1.0
(Not Offered 2017-2018)

CSTS B207 Early Rome and the Roman Republic
This course surveys the history of Rome from its origins to the end of the Republic, with special emphasis on the rise of Rome in Italy and the evolution of the Roman state. The course also examines the Hellenistic world in which the rise of Rome takes place. The methods of historical investigation using the ancient sources, both literary and archaeological, are emphasized.
Approach: Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

CSTS B225 In Vino Veritas: Wine in the Literature and Cult of Ancient Greece & Rome
This course will explore ancient Greeks’ and Romans’ perception of wine-drinking as a sacral experience, often of critical cultural, social, and even cosmic importance. We will study the cult of Dionysus and the role of wine in Greek and Latin poetry, drama, and philosophy. We will then trace the development of these religious and cultural trends in subsequent Western history, to the medieval tradition of the carnival and to twentieth-century literature.
Approach: Cross-Cultural Analysis (CC)
Units: 1.0
(Not Offered 2017-2018)

CSTS B228 Utopia: Good Place or No Place?
What is the ideal human society? What is the role and status of man and woman therein? Is such a society purely hypothetical or should we strive to make it viable in our modern world? This course will address these questions by exploring the historic development of the concept of utopia.
Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

CSTS B230 Food and Drink in the Ancient World
This course explores practices of eating and drinking in the ancient Mediterranean world both from a socio-cultural and environmental perspective. Since we are not only what we eat, but also where, when, why, with whom, and how we eat, we will examine the wider implications of patterns of food production, preparation, consumption, availability, and taboos, considering issues like gender, health, financial situation, geographical variability, and political status. Anthropological, archaeological, literary, and art historical approaches will be used to analyze the evidence and shed light on the role of food and drink in ancient culture and society. In addition, we will discuss how this affects our contemporary customs and practices and how our identity is still shaped by what we eat.
Approach: Cross-Cultural Analysis (CC)
Approach: Critical Interpretation (CI)

This course explores how contemporary film, a creative medium appealing to the entire demographic spectrum like Greek drama, looks back to the ancient origins. Examining both films that are directly based on Greek plays and films that make use of classical material without being explicitly classical in plot or setting, we will discuss how Greek mythology is reconstructed and appropriated for modern audiences and how the classical past continues to be culturally significant. A variety of methodological approaches such as film and gender theory, psychoanalysis, and feminist theory will be applied in addition to more straightforward literary-historical interpretation.

Approach: Critical Interpretation (CI)
Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

CSTS B274 Greek Tragedy in Global Cinema

This course explores how contemporary film, a creative medium appealing to the entire demographic spectrum like Greek drama, looks back to the ancient origins. Examining both films that are directly based on Greek plays and films that make use of classical material without being explicitly classical in plot or setting, we will discuss how Greek mythology is reconstructed and appropriated for modern audiences and how the classical past continues to be culturally significant. A variety of methodological approaches such as film and gender theory, psychoanalysis, and feminist theory will be applied in addition to more straightforward literary-historical interpretation.

Approach: Critical Interpretation (CI)
Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

CSTS B320 Martyrs, Mothers, Memoirs: Medieval Autobiographies

The writing of autobiography flourished in the middle ages, but there have been very few studies of the genre for the period. This course presents a range of autobiographies from the Latin West and encourages students to think about them theoretically and historically: what does it mean to write the self? what is at stake in the presentation of these stories? what notions are privileged? and how do we situate autobiographies in the wider literary landscape?

Units: 1.0
(Not Offered 2017-2018)

CSTS B398 Senior Seminar

This is a bi-college seminar devoted to readings in and discussion of selected topics in the various sub-fields of Classics (e.g. literature, religion, philosophy, law, social history) and of how to apply contemporary critical approaches to the primary sources. Students will also begin developing a topic for their senior thesis, composing a prospectus and giving a preliminary presentation of their findings.

Units: 1.0
Instructor(s): Conybeare,C.
(Fall 2017)

CSTS B399 Senior Seminar

This is the continuation of CSTS B398. Working with individual advisors from the bi-college classics departments, students will continue to develop the topic sketched out in the fall semester. By the end of the course, they will have completed at least one draft and a full, polished version of the senior thesis, of which they will give a final oral presentation.

Units: 1.0
(Not Offered 2017-2018)

LATN B612 Tacitus

Units: 1.0
(Not Offered 2017-2018)

LATN B615 Roman Biography

The course surveys the development of Roman Biography from the late Republic to the High Empire. Authors read include Cornelius Nepos, Cornelius Tacitus, Plutarch, Suetonius Tranquillus and anonymous authors representative of both pagan and Christian resistance literature.

Units: 1.0
(Not Offered 2017-2018)

LATN B619 Roman Satire

This course will span four turbulent centuries of Roman imperilism in its reading or Roman satire. We will range from the sharp minutiae of social observation in Horace’s Sermones to the calculated public abuse of a eunuch consul in Claudian’s In Eutropium; from the swirling filthy riches of Persius and Juvenal to the nastily eloquent Christian condemnation of riches (and much else) in St Jerome.

Units: 1.0
(Not Offered 2017-2018)

LATN B625 Augustine and the Classical Tradition

This course reads the work of Augustine of Hippo at three intense moments of his engagement with the classical tradition: in the late 380s, after his conversion; in his Confessions; and in the aftermath of the fall of Rome in 410. We shall combine close attention to Augustine’s Latin with a study of major secondary works and a variety of critical approaches to Augustine and his thought.

Units: 1.0
Instructor(s): Conybeare, C.
(Fall 2017)

LATN B648 Latin Epigram

In this seminar we will explore the themes and aesthetics of the Latin epigram, a genre (or is it?) best known for its brevity and wit. After orienting ourselves in the epigrams of the Neoterics (Catullus, Cinna, Calvis, Caesar), our focus will turn to the poetry of Martial, whose accounts of Rome, its inhabitants, and their foibles exerted a profound influence on subsequent epigrammatists. We will consider Martial’s poetry both thematically (poems on the city; women; scoundrels; patrons; long poems) and as constituents of organized, multi-faceted libri. To deepen our appreciation of Martial’s poetic project, we will take occasional forays into para-epigrammatic genres and works (Priaepa, Catalepton), as well as the scattered epigrams of authors both familiar (Ovid, Lucan, Seneca, Petronius) and obscure. We will also consider the evolution the epigram from its inscriptive and epitaphic origins in Greek and Latin, and its development as a literary form by Hellenistic authors. In the final two weeks of the course, we will turn our attention to the reception of Martial by late antique (Austonius, Claudian, Luxorius) and Neo-Latin poets (e.g. Pontano’s Baiae, Panormita’s Hermaphroditus, Marullo’s reception of Catullus, Thomas More, John Owen). Readings in the original will be supplemented with relevant scholarship throughout. Students will enhance their core work on Latin epigram by reading— independently or in small-groups—a complementary genre or author in the original related to their interests (e.g. Greek epigram, Horace’s Satires, Latin elegy, carmina epigraphica, Juvenal, Flavian epic, Pliny’s Epistles, Christian epigram).

Units: 1.0
Instructor(s): Mulligan, B.
(Spring 2018)
LATN B650 Topics in Latin Literature
Advanced reading and interpretation of Latin literature: content varies. Current topic description: The 2nd of the 3 wars that Rome fought with Carthage in the course of 3rd and 2nd c. BCE, known as the war with Hannibal was unanimously regarded as the most testing of the three because of the remarkable abilities of the Carthaginian commander. The Augustan historian Livy has given us a balanced yet epic account of the war, its principal protagonists in multiple theaters of action with shifting outcomes that is likewise regarded as an exemplary historical accomplishment.
Units: 1.0
Instructor(s): Scott, R.
(Fall 2017)

LATN B658 Late Latin Poetry
This course will survey the florescence of Latin poetry in the fourth and fifth centuries CE. At the heart of the course will be a study of some of Prudentius' works, for example the Hamartigenia and the Cathemerinon; works by Claudian, Ausonius, Avitus, Dracontius, and Paulinus of Nola may also be included. We shall analyze both the literary and (where applicable) the theological properties of these great works.
Units: 1.0
(Not Offered 2017-2018)

LATN B660 Horace, Odes and Epodes
Horace, Rome's most versatile author, produced some of antiquity's most important and intriguing poems on themes ranging from erotics to poetics, from political instability to philosophy, from morality to myth. This course will focus on the poems published in his Epodes and the four books of Odes, paying special attention to Horace's engagement with his poetic predecessors and the Greek and Latin literary tradition in general, his relationship with Maecenas and Augustus, and his brilliant use of meter and Latin poetic diction. We will also consider some of his other works such as the Ars Poetica and the Epistles in order to appreciate more fully his poetic practices and his appropriation of the Greek heritage into Roman cultural contexts.
Units: 1.0
(Not Offered 2017-2018)

LATN B671 Fasti
Ovid's Fasti is a work that the poet was not able to complete before being sent into exile by Augustus. Nevertheless, as it survives, it is an extraordinarily rich work that blends the antiquarian religious research characteristic of the Augustan age with the subtle poetic craft for which the author is famous.
Units: 1.0
(Not Offered 2017-2018)

LATN B673 Roman Civil War
Civil war seemed to be Rome's inescapable destiny from the foundation of the city through the early empire. This course will assess its historical significance as well as its representation and commemoration in Roman literature. We will focus particularly on Lucan's Bellum civile recounting the strife between Caesar and Pompey, but also read other texts in both poetry and prose to trace the development of civil conflict at Rome and its lasting influence on Roman identity and cultural memory.
Units: 1.0
(Not Offered 2017-2018)

CLASSICAL LANGUAGES

The major in Classical Languages is designed for the student who wishes to divide her time between the two languages and literatures.

Major Requirements
The requirements for the major, in addition to the Senior Seminar and the thesis, are eight courses in Greek and Latin including at least two at the 200-level in one language and two at the 300-level or above in the other, as well as two courses in ancient history and/or classical archaeology. In addition to completing the course requirements for the major in Classical Languages, every student must fulfill the requisite training in writing within the discipline by taking as part of her major plan two courses that are designated as Writing Attentive or a single course designated as Writing Intensive. The student may count a Writing Attentive or Intensive course that is taught outside the department if it is included in the major plan. There are two final examinations, a sight translation from Greek to English and another from Latin to English.

COURSES

CSTS B274 Greek Tragedy in Global Cinema
This course explores how contemporary film, a creative medium appealing to the entire demographic spectrum like Greek drama, looks back to the ancient origins. Examining both films that are directly based on Greek plays and films that make use of classical material without being explicitly classical in plot or setting, we will discuss how Greek mythology is reconstructed and appropriated for modern audiences and how the classical past continues to be culturally significant. A variety of methodological approaches such as film and gender theory, psychoanalysis, and feminist theory will be applied in addition to more straightforward literary-historical interpretation.
Approach: Critical Interpretation (CI)
Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

CSTS B398 Senior Seminar
This is a bi-college seminar devoted to readings in and discussion of selected topics in the various sub-fields of Classics (e.g. literature, religion, philosophy, law, social history) and of how to apply contemporary critical approaches to the primary sources. Students will also begin developing a topic for their senior thesis, composing a prospectus and giving a preliminary presentation of their findings.
Units: 1.0
Instructor(s): Conybeare, C.
(Fall 2017)

CSTS B399 Senior Seminar
This is the continuation of CSTS B398. Working with individual advisors from the bi-college classics departments, students will continue to develop the topic sketched out in the fall semester. By the end of the course, they will have completed at least one draft and a full, polished version of the senior thesis, of which they will give a final oral presentation.
In the second semester of the intermediate Latin sequence, readings in prose and poetry are frequently drawn from a period, such as the age of Augustus, that illustrate in different ways the leading political and cultural concerns of the time. The Latin readings and discussion are supplemented by readings in the secondary literature. This course meets three times a week with a required fourth hour to be arranged. Prerequisite: LATN 101 or B011 or equivalent.

Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

LATN B202 Topics: Advanced Latin Literature
In this course typically a variety of Latin prose and poetry of the high and later Roman empire (first to fourth centuries CE) is read. Single or multiple authors may be featured in a given semester. This is a topics course, course content varies. Prerequisite: At least one 200-level Latin course or equivalent.

Current topic description: Readings will be drawn from the following authors: Lucan, De Bello Civil Book 7, Seneca’s Letters to Lucullius, and Cornelius Tacitus, the Agricola and the Histories (Selections).
Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Attentive

Instructor(s): Scott,R.
(Spring 2018)

LATN B350 Topics in Latin Literature
This is a topics course. Course content varies.
Prerequisites: At least two 200-level Latin courses or permission of instructor.
Units: 1.0
Instructor(s): Mulligan,B.
(Spring 2018)

CLASSICAL CULTURE AND SOCIETY
The major provides a broad yet individually structured background for students whose interest in the ancient classical world is general and who wish to pursue more specialized work in one or more particular areas.

Major Requirements
The requirements for the major, in addition to the Senior Seminar and thesis, are nine courses distributed as follows:

• Two courses in either Latin or Greek beyond the elementary level
• One course in Greek and/or Roman history
• Three courses, at least two of which are at the 200 level or higher, in one of the following concentrations:
  archaeology and art history,
  philosophy and religion,
  literature and the classical tradition,
  history and society
• Three electives, at least one of which is at the 200-level or higher, and one of which is must be among the courses counted toward the history/society concentration (except in the case of students in that concentration)
• In addition to completing the course requirements for the major in Classical Culture & Society, every student must fulfill the requisite training in writing within the discipline by taking as part of her major plan two courses that are designated as Writing Attentive or a single course designated as Writing Intensive. The student may count a Writing Attentive or Intensive course that is taught outside the department if it is included in the major plan.

Minor Requirements
The requirements for the minor are six courses drawn from the range of courses counted toward the major. Of these, two must be in Greek or Latin beyond the elementary level and at least one must be in classical culture and society at the 200-level.
COURSES

CSTS B156 Roman Law in Action
An introduction to Roman public and private law from the early republic to the high empire. The development of legal institutions, including the public courts, the role of the jurists and the importance of case law, is stressed.
Approach: Cross-Cultural Analysis (CC)
Units: 1.0
(Not Offered 2017-2018)

CSTS B175 Feminism in Classics
This course will illustrate the ways in which feminism has had an impact on classics, as well as the ways in which feminists think with classical texts. It will have four thematic divisions: feminism and the classical canon; feminism, women, and rethinking classical history; feminist readings of classical texts; and feminists and the classics - e.g. Cixous' Medusa and Butler's Antigone.
Approach: Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Conybeare,C.
(Fall 2017)

CSTS B205 Greek History
This course traces the rise of the city-state (polis) in the Greek-speaking world beginning in the seventh-century BC down to its full blossoming in classical Athens and Sparta. Students should gain an understanding of the formation and development of Greek identity, from the Panhellenic trends in archaic epic and religion through its crystallization during the heroic defense against two Persian invasions and its subsequent disintegration during the Peloponnesian war. The class will also explore the ways in which the evolution of political, philosophical, religious, and artistic institutions reflect the changing socio-political circumstances of Greece. The latter part of the course will focus on Athens in particular: its rise to imperial power under Pericles, its tragic decline from the Peloponnesian War and its important role as a center for the teaching of rhetoric and philosophy. Since the study of history involves the analysis, evaluation, and synthesis of the sources available for the culture studied, students will concentrate upon the primary sources available for Greek history, exploring the strengths and weakness of these sources and the ways in which their evidence can be used to create an understanding of ancient Greece. Students should learn how to analyze and evaluate the evidence from primary texts and to synthesize the information from multiple sources in a critical way.
Approach: Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

CSTS B207 Early Rome and the Roman Republic
This course surveys the history of Rome from its origins to the end of the Republic, with special emphasis on the rise of Rome in Italy and the evolution of the Roman state. The course also examines the Hellenistic world in which the rise of Rome takes place. The methods of historical investigation using the ancient sources, both literary and archaeological, are emphasized.
Approach: Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

CSTS B208 The Roman Empire
Imperial history from the principate of Augustus to the House of Constantine with focus on the evolution of Roman culture and society as presented in the surviving ancient evidence, both literary and archaeological.
Approach: Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Scott,R.
(Spring 2018)

CSTS B213 Persia and The Greeks
This Course explores interactions between Greeks and Persians in the Mediterranean and Near East from the Archaic Period to the Hellenistic Age. Through a variety of sources (from Greek histories, tragedies, and ethnography, to Persian royal inscriptions and administrative documents and the Hebrew Bible), we shall work to illuminate the interface between these two distinct yet complementary cultures. Our aim will be to gain familiarity not only with a general narrative of Greco-Persian history, from the foundation of the Achaemenid Empire in the middle of the sixth century BCE to the Macedonian conquest of Persia some 250 years later, but also with the materials (archaeological, numismatic, epigraphical, artistic, and literary) from which we build such a narrative. At the same time, we shall work to understand how contact between Persia and the Greeks in antiquity has influenced discourse about the opposition between East and West in the modern world.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

CSTS B214 Remembering the Saints: Reading Pilgrimage & Tourism
This course is divided into two parts. In the first half of the semester, it will trace the rise and function of the holy women and men of late antiquity (300-600 CE), with an emphasis on the literary portrayal of their lives, a genre called hagiography (sacred biography). Methods for reading and interpreting this large body of literature will play a key role in this part of the course. In the second half of the semester, the focus will shift from saint to devotee. Saints were like magnets that set the people of late antiquity into motion. By reading pilgrim travelogues and catalogues of miraculous healings, studying the archeological and artistic evidence for pilgrimage, we will explore the profound social and cultural impact the cult of the saints had on the peoples of this period. In addition to gaining a familiarity with the history of early Christian saints and the cults that arose around them, students will also investigate the many issues at stake in the study of late antique Christianity. This includes but is not limited to: the conflict between history and literature in hagiography, gender and sanctity in late antiquity, self-harm as religious practice in early Christianity, and the intersection of medicine, magic, and miracle.
Approach: Inquiry into the Past (IP)
Major Writing Requirement: Writing Attentive
Units: 1.0
(Not Offered 2017-2018)

CSTS B225 In Vino Veritas: Wine in the Literature and Cult of Ancient Greece & Rome
This course will explore ancient Greeks’ and Romans’ perception of wine-drinking as a sacral experience, often of critical cultural, social, and even cosmic importance. We will study the cult of...
Dionysus and the role of wine in Greek and Latin poetry, drama, and philosophy. We will then trace the development of these religious and cultural trends in subsequent Western history, to the medieval tradition of the carnival and to twentieth-century literature.

Approach: Cross-Cultural Analysis (CC)
Units: 1.0
(Not Offered 2017-2018)

CSTS B228 Utopia: Good Place or No Place?
What is the ideal human society? What is the role and status of man and woman therein? Is such a society purely hypothetical or should we strive to make it viable in our modern world? This course will address these questions by exploring the historic development of the concept of utopia.

Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

CSTS B230 Food and Drink in the Ancient World
This course explores practices of eating and drinking in the ancient Mediterranean world both from a socio-cultural and environmental perspective. Since we are not only what we eat, but also where, when, why, with whom, and how we eat, we will examine the wider implications of patterns of food production, preparation, consumption, availability, and taboos, considering issues like gender, health, financial situation, geographical variability, and political status. Anthropological, archaeological, literary, and art historical approaches will be used to analyze the evidence and shed light on the role of food and drink in ancient culture and society. In addition, we will discuss how this affects our contemporary customs and practices and how our identity is still shaped by what we eat.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

CSTS B237 Underworlds in Virgil & After
What is a 'literary tradition', and what sense may we make of one? In this course we focus on an influential episode in the Western literary tradition: the hero's journey into the underworld in Virgil's epic poem, the Aeneid. Keeping in mind a master metaphor by which 'underworld' stands for 'afterlife', we consider that perilous 'journey below' on its own, in context of the complete poem, and in contexts provided by other authors' visions of 'what lies beneath', including Homer (Odyssey), Ovid (Metamorphoses), Dante (Inferno), Milton (Paradise Lost), Shakespeare (The Tempest), Jules Verne (Journey to the Center of the Earth), Joseph Conrad (Heart of Darkness), J. R. R. Tolkien (The Hobbit), and the nameless author of the Epic of Gilgamesh.

Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

CSTS B242 Magic in the Greco-Roman World
Bindings and curses, love charms and healing potions, amulets and talismans - from the simple spells designed to meet the needs of the poor and desperate to the complex theurgies of the philosophers, the people of the Greco-Roman World made use of magic to try to influence the world around them. In this course students will gain an understanding of the magicians of the ancient world and the techniques and devices they used to serve their clientele, as well as the cultural contexts in which these ideas of magic arose. We shall consider ancient tablets and spell books as well as literary descriptions of magic in the light of theories relating to the religious, political, and social contexts in which magic was used.

Approach: Cross-Cultural Analysis (CC)
Units: 1.0
(Not Offered 2017-2018)

CSTS B274 Greek Tragedy in Global Cinema
This course explores how contemporary film, a creative medium appealing to the entire demographic spectrum like Greek drama, looks back to the ancient origins. Examining both films that are directly based on Greek plays and films that make use of classical material without being explicitly classical in plot or setting, we will discuss how Greek mythology is reconstructed and appropriated for modern audiences and how the classical past continues to be culturally significant. A variety of methodological approaches such as film and gender theory, psychoanalysis, and feminist theory will be applied in addition to more straightforward literary-historical interpretation.

Approach: Critical Interpretation (CI)
Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

CSTS B310 Forming the Classics: From Papyrus to Print
This course will trace the constitution of Classics as a discipline in both its intellectual and its material aspects, and will examine how the works of classical antiquity were read, interpreted, and preserved from the late Roman empire to the early modern period. Topics will include the material production and dissemination of texts, the conceptual organization of codices (e.g. punctuation, rubrication, indexing), and audiences and readers (including annotation, marginalia, and commentary). Students will also learn practical techniques for approaching these texts, such as palaeography and the expansion of abbreviations. The course will culminate in student research projects using manuscripts and early printed books from Bryn Mawr’s exceptional collections. Prerequisite: a 200 level course in Greek, Latin, or Classical Studies.
Units: 1.0
(Not Offered 2017-2018)

CSTS B320 Martyrs, Mothers, Memoirs: Medieval Autobiographies
The writing of autobiography flourished in the middle ages, but there have been very few studies of the genre for the period. This course presents a range of autobiographies from the Latin West and encourages students to think about them theoretically and historically: what does it mean to write the self? what is at stake in the presentation of these stories? what notions are privileged? and how do we situate autobiographies in the wider literary landscape?
Units: 1.0
(Not Offered 2017-2018)

CSTS B324 Roman Architecture
The course gives special attention to the architecture and topography of ancient Rome from the origins of the city to the later Roman Empire. At the same time, general issues in architecture and planning with particular reference to Italy and
the provinces from republic to empire are also addressed. These include public and domestic spaces, structures, settings and uses, urban infrastructure, the relationship of towns and territories, “suburban” and working villas, and frontier settlements. Prerequisite: ARCH 102.

Units: 1.0
Instructor(s): Scott,R.
(Fall 2017)

CSTS B375 Interpreting Mythology
The myths of the Greeks have provoked outrage and fascination, interpretation and retelling, censorship and elaboration, beginning with the Greeks themselves. We will see how some of these stories have been read and understood, recounted and revised, in various cultures and eras, from ancient tellings to modern movies. We will also explore some of the interpretive theories by which these tales have been understood, from ancient allegory to modern structural and semiotic theories. The student should gain a more profound understanding of the meaning of these myths to the Greeks themselves, of the cultural context in which they were formulated. At the same time, this course should provide the student with some familiarity with the range of interpretations and strategies of understanding that people of various cultures and times have applied to the Greek myths during the more than two millennia in which they have been preserved. Preference to upperclassmen, previous coursework in myth required.

Units: 1.0
Instructor(s): Edmonds,R.
(Fall 2017)

CSTS B398 Senior Seminar
This is a bi-college seminar devoted to readings in and discussion of selected topics in the various sub-fields of Classics (e.g. literature, religion, philosophy, law, social history) and of how to apply contemporary critical approaches to the primary sources. Students will also begin developing a topic for their senior thesis, composing a prospectus and giving a preliminary presentation of their findings.

Units: 1.0
Instructor(s): Conybeare,C.
(Fall 2017)

CSTS B399 Senior Seminar
This is the continuation of CSTS B398. Working with individual advisors from the bi-college classics departments, students will continue to develop the topic sketched out in the fall semester. By the end of the course, they will have completed at least one draft and a full, polished version of the senior thesis, of which they will give a final oral presentation.

Units: 1.0
(Not Offered 2017-2018)

CSTS B403 Supervised Work
Units: 1.0
(Fall 2017)

ARCH B101 Introduction to Egyptian and Near Eastern Archaeology
A historical survey of the archaeology and art of the ancient Near East and Egypt.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Africana Studies
Units: 1.0
(Not Offered 2017-2018)

ARCH B102 Introduction to Classical Archaeology
A historical survey of the archaeology and art of Greece, Etruria, and Rome.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Museum Studies
Units: 1.0
Instructor(s): Lindenlauf,A.
(Spring 2018)

ARCH B110 The World Through Classical Eyes
A survey of the ways in which the ancient Greeks and Romans perceived and constructed their physical and social world. The evidence of ancient texts and monuments will form the basis for exploring such subjects as cosmology, geography, travel and commerce, ancient ethnography and anthropology, the idea of natural and artificial wonders, and the self-definition of the classical cultures in the context of the oikoumene, the “inhabited world.”

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Donohue,A.
(Fall 2017)

ARCH B204 Animals in the Ancient Greek World
This course focuses on perceptions of animals in ancient Greece from the Geometric to the Classical periods. It examines representations of animals in painting, sculpture, and the minor arts, the treatment of animals as attested in the archaeological record, and how these types of evidence relate to the featuring of animals in contemporary poetry, tragedy, comedy, and medical and philosophical writings. By analyzing this rich body of evidence, the course develops a context in which participants gain insight into the ways ancient Greeks perceived, represented, and treated animals. Juxtaposing the importance of animals in modern society, as attested, for example, by their roles as pets, agents of healing, diplomatic gifts, and even as subjects of specialized studies such as animal law and animal geographies, the course also serves to expand awareness of attitudes towards animals in our own society as well as that of ancient Greece.

Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

ARCH B215 Classical Art
A survey of the visual arts of ancient Greece and Rome from the Bronze Age through Late Imperial times (circa 3000 B.C.E. to 300 C.E.). Major categories of artistic production are examined in historical and social context, including interactions with neighboring areas and cultures; methodological and interpretive issues are highlighted.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

ARCH B254 Cleopatra
This course examines the life and rule of Cleopatra VII, the last queen of Ptolemaic Egypt, and the reception of her legacy in the Early Roman Empire and the western world from the
Renaissance to modern times. The first part of the course explores extant literary evidence regarding the upbringing, education, and rule of Cleopatra within the contexts of Egyptian and Ptolemaic cultures, her relationships with Julius Caesar and Marc Antony, her conflict with Octavian, and her death by suicide in 30 BCE. The second part examines constructions of Cleopatra in Roman literature, her iconography in surviving art, and her contributions to and influence on both Ptolemaic and Roman art. A detailed account is also provided of the afterlife of Cleopatra in the literature, visual arts, scholarship, and film of both Europe and the United States, extending from the papal courts of Renaissance Italy and Shakespearean drama, to Thomas Jefferson’s art collection at Monticello and Joseph Mankiewicz’s 1963 epic film, Cleopatra.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ARCH B260 Daily Life in Ancient Greece and Rome
The often-praised achievements of the classical cultures arose from the realities of day-to-day life. This course surveys the rich body of material and textual evidence pertaining to how ancient Greeks and Romans -- famous and obscure alike -- lived and died. Topics include housing, food, clothing, work, leisure, and family and social life.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

ARCH B304 Archaeology of Greek Religion
This course approaches the topic of ancient Greek religion by focusing on surviving archaeological, architectural, epigraphical, artistic and literary evidence that dates from the Archaic and Classical periods. By examining a wealth of diverse evidence that ranges, for example, from temple architecture, and feasting and banqueting equipment to inscriptions, statues, vase paintings, and descriptive texts, the course enables the participants to analyze the value and complexity of the archaeology of Greek religion and to recognize its significance for the reconstruction of daily life in ancient Greece. Special emphasis is placed on subjects such as the duties of priests and priestesses, the violence of animal sacrifice, the function of cult statues and votive offerings and also the important position of festivals and hero and mystery cults in ancient Greek religious thought and experience.

Units: 1.0
(Not Offered 2017-2018)

ARCH B308 Ceramic Analysis
Pottery is a fundamental means of establishing the relative chronology of archaeological sites and of understanding past human behavior. Included are theories, methods and techniques of pottery description, analysis and interpretation. Topics include typology, seriation, ceramic characterization, production, function, exchange and the use of computers in pottery analysis. Laboratory work on pottery in the department collections.

Prerequisite: permission of instructor.

Counts towards: Geoarchaeology
Units: 1.0
(Not Offered 2017-2018)

ARCH B359 Topics in Classical Art and Archaeology
This is a topics course. Topics vary. A research-oriented course taught in seminar format, treating issues of current interest in Greek and Roman art and archaeology. Prerequisites: 200-level coursework in some aspect of classical or related cultures, archeology, art history, or Cities. Current topic description: TA research-oriented course taught in seminar format, treating issues of current interest in Greek and Roman art and archaeology. Prerequisites: 200-level coursework in some aspect of classical or related cultures, archeology, art history, or Cities.

(Spring 2018)

ARCH B516 Trade and Transport in the Ancient World
Issues of trade, commerce and production of export goods are addressed with regard to the Bronze Age and Iron Age cultures of Mesopotamia, Arabia, Iran and south Asia. Crucial to these systems is the development of means of transport via maritime routes and on land. Archaeological evidence for traded goods and shipwrecks is used to map the emergence of sea-faring across the Indian Ocean and Gulf while bio-archaeological data is employed to examine the transformative role that Bactrian and Dromedary camels played in ancient trade and transport.

CSTS B635 The Alexandrian Tradition in Roman Poetry
The goal of this seminar is to introduce students to the Greek poetry of the last three centuries BCE, most notably that of Callimachus and Theocritus, and its reception and
transformation in Rome in the late Republic and early imperial era. We will be reading a wide range of sources, both in Greek and Latin, including – next to the aforementioned - authors such as Moschus, Parthenius, Catullus, Vergil, and Statius. In addition, we will discuss past and present scholarship devoted to individual texts and the relationship between the Hellenistic poets and their Roman successors in general. Specifically, we will examine the complex Roman engagement with Greek literary and intellectual culture, the construction of poetic affiliations and literary genealogies, the adoption of particular poetic modes and practices, and the re-appropriation of Greek bucolic in Latin pastoral.

Instructor(s): Baertschi, A.
(Spring 2018)

CSTS B645 Ancient Magic

Magic – the word evokes the mysterious and the marvelous, the forbidden and the hidden, the ancient and the arcane. But what did magic mean to the people who coined the term, the people of ancient Greece and Rome? Drawing on the expanding body of evidence for ancient magical practices, as well as recent theoretical approaches to the history of religions, this seminar explores the varieties of phenomena labeled magic in the ancient Greco-Roman world. Bindings and curses, love charms and healing potions, amulets and talismans - from the simple spells designed to meet the needs of the poor and desperate to the complex theurgies of the philosophers, the people of the Greco-Roman world did not only imagine what magic could do, they also made use of magic to try to influence the world around them. The seminar examines the primary texts in Greek, the tablets and spell books, as well as literary descriptions of magic, in the light of theories relating to the religious, political, and social contexts in which magic was used.

Grek B653 Athens in the Hellenistic Period

Surveys of Athenian history tend to conclude if not at the Battle of Chaeronea at any rate at the death of Alexander. Yet Athens did not disappear with the imposition of the Macedonian garrison in 322. Democracy resurfaced periodically over the course of the next century (in 318, 307, 288, and 229), and, more to the point, even under periods of oligarchic rule and Macedonian control, Athenian institutions remained intact, and Athenians continued to make significant contributions to the greater Greek world. Indeed, the century that followed Alexander’s death saw the flowering of Athenian historiography (e.g. Demochares, Dipyllus, Philochorus, Timaeus, and Phylarchus) and new comedy (e.g. Menander and Poseidippus), as well as the advent of important philosophical schools (Epicureanism and Stoicism). This course will focus on Athens between the Battle of Chaeronea (338 BCE) and its liberation from Macedonian rule ca. 229 BCE. By way of a variety of contemporary sources, we shall have the opportunity to familiarize ourselves both with the historical narrative and with the intellectual climate of the polis in the early Hellenistic period.

Units: 1.0
(Not Offered 2017-2018)

Gsem B623 Figures of Resistance: Classical and Modern

The GSem will explore classical figures of resistance such as Prometheus, Antigone, Electra, and Medea and Lysistrata and their reception in modern art and cinema. The focus will be on films and other works of art that re-appropriate and transform the ancient characters and their stories. We will discuss in particular how modern filmmakers re-contextualize the classical figures to shed light on contemporary historical, political, and social issues. Films will include Tony Harrison, Prometheus (Great Britain, 1998), Liliana Cavani, The Year of the Cannibals (Italy, 1970), Amy Greenfield, Antigone/Rites of Passion (USA, 1991), Ingmar Bergman, Persona (Sweden, 1966), Miklós Jancsó, Electra, My Love (Hungary, 1974), Arthur Ripstein, Asi Es La Vida (Mexico, 2000), and Spike Lee, Chi-raq (USA, 2015). Readings will be drawn from texts on reception studies, film and gender theory, psychoanalysis, and political theory.

Units: 1.0

(Fall 2017)

Hist B123 The Early Medieval World

The first of a two-course sequence introducing medieval European history. The chronological span of this course is from the early 4th century and the Christianization of the Roman Empire to the early 10th century and the disintegration of the Carolingian Empire. This course number was previously HIST B223.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Middle Eastern & Islamic Studies
Units: 1.0
Instructor(s): Truitt, E.
(Fall 2017)

Hist B124 High Middle Ages

This course will cover the second half of the European Middle Ages, often called the High and Late Middle Ages, from roughly 1000-1400. The course has a general chronological framework, and is based on important themes of medieval history. These include feudalism and the feudal economy; the social transformation of the millennium; monastic reform; the rise of
the papacy; trade, exchange, and exploration; urbanism and the growth of towns. The course number was previously HIST B224.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

HIST B231 Medicine, Magic & Miracles in the Middle Ages
A lecture and discussion course on the therapeutic systems (humoral theory, faith healing, natural magic), the medical marketplace, and the social context for understanding health and disease in the medieval period. Topics covered include Greek, Arabic, and Latin medical textual traditions, the rise of hospitals and public health, and the Black Death.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Health Studies
Units: 1.0
Instructor(s): Truitt,E.
(Fall 2017)

HIST B364 Magical Mechanisms
A reading and research seminar focused on different examples of artificial life in medieval cultures. Primary sources will be from a variety of genres, and secondary sources will include significant theoretical works in art history, critical theory and science studies. Prerequisite: at least one course in medieval history, or the permission of the instructor.

Units: 1.0
Instructor(s): Truitt,E.
(Spring 2018)

HIST B368 Topics in Medieval History
This is a topics course. Topics vary. Current topic description: A reading and research-based seminar on the intellectual and cultural history of medieval magic, including natural and demonic magic, astral science, alchemy, and other forms of “the occult sciences.” Primary sources will be from a variety of genres, including visual culture, and secondary sources will include significant works in philosophy, religious studies, and medieval historiography. Prerequisite: at least one course in medieval history, or the permission of the instructor.

Units: 1.0
Instructor(s): Truitt,E.
(Spring 2018)

LATN B110 Intermediate Latin
Intensive review of grammar, reading in classical prose and poetry. For students who have had the equivalent of several years of high school Latin or are not adequately prepared to take LATN 101. This course meets three times a week with a required fourth hour to be arranged. Prerequisite: One year of college level Latin or equivalent.

Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): Scott,R.
(Fall 2017)

LATN B112 Latin Literature
In the second semester of the intermediate Latin sequence, readings in prose and poetry are frequently drawn from a period, such as the age of Augustus, that illustrate in different ways the leading political and cultural concerns of the time. The Latin readings and discussion are supplemented by readings in the secondary literature. This course meets three times a week with a required fourth hour to be arranged. Prerequisite: LATN 101 or 110 or placement by the department.

Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Attentive
Units: 1.0
Instructor(s): Baertschi,A.
(Spring 2018)

LATN B202 Topics: Advanced Latin Literature
In this course typically a variety of Latin prose and poetry of the high and later Roman empire (first to fourth centuries CE) is read. Single or multiple authors may be featured in a given semester. This is a topics course, course content varies. Prerequisite: At least one 200-level Latin course or equivalent.

Current topic description: Readings will be drawn from the following authors: Lucan, De Bello Civili Book 7, Seneca’s Letters to Lucilius, and Cornelius Tacitus, the Agricola and the Histories (Selections).

Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Attentive
Units: 1.0
Instructor(s): Scott,R.
(Spring 2018)

LATN B312 Roman Satire
Satire is the most slippery and subversive of genres. It is richly entertaining to read, but if we engage with it seriously it is often abrasive, shocking, shattering. Reading Roman satire requires an energetic exercise in cultural translation: we are confronted with the alienness of the Roman world, as well as its perverse literary vigour. This course will span four turbulent centuries of Roman imperialism in its reading of Roman satire. We will range from the sharp minutaie of social observation in Horace’s Sermones to the calculated public abuse of a eunuch consul in Claudian’s In Eutropium; from the swirling filthy riches of Persius and Juvenal to the nastily eloquent Christian condemnation of riches (and much else) in St Jerome. Students are warned: the language is difficult, the content often excoriating, even if exquisitely expressed. Reading this material challenges any comfortable separation between “literature” and “life”.

Units: 1.0
(Not Offered 2017-2018)

LATN B350 Topics in Latin Literature
This is a topics course. Course content varies.
Prerequisites: At least two 200-level Latin courses or permission of instructor.
Units: 1.0
Instructor(s): Mulligan,B.
(Spring 2018)

LATN B613 Cicero
The public and private legal speeches and relevant letters of Cicero as advocate and politician.
Units: 1.0
(Not Offered 2017-2018)
Students may complete a major or minor in Growth and Structure of Cities. Complementing the major, students may complete a minor in Environmental Studies, or a concentration in Latin American, Latino, and Iberian Peoples and Cultures. Students also may enter the 3-2 Program in City and Regional Planning, offered in cooperation with the University of Pennsylvania.

Faculty

Jeffrey Cohen, Term Professor in Growth and Structure of Cities
Min-Kyung Lee, Assistant Professor of Growth and Structure of Cities
Gary McDonogh, Chair and Professor of Growth and Structure of Cities and on the Helen Herrmann Chair
Samuel Olshin, Senior Visiting Studio Critic
Liv Raddatz, Lecturer
Daniela Voith, Senior Lecturer in the Growth and Structure of Cities Program

The interdisciplinary Growth and Structure of Cities major challenges students to understand the dynamic relationships connecting urban spatial organization and the built environment with politics, economics, cultures and societies worldwide. Core introductory classes present analytic approaches that explore changing forms of the city over time and analyze the variety of ways through which women and men have re-created global urban life across history and across cultures. With these foundations, students pursue their interests through classes in architecture, urban social and economic relations, urban history, studies of planning and the environmental conditions of urban life. Opportunities for internships, volunteering, and study abroad also enrich the major. Advanced seminars further ground the course of study by focusing on specific cities and topics.

Major Requirements

A minimum of 15 courses (11 courses in Cities and four allied courses in other related fields) is required to complete the major. Two introductory courses (185, 190) balance sociocultural and formal approaches to urban form and the built environment, and introduce cross-cultural and historical comparison of urban development. The introductory sequence should be completed with a broader architectural survey course (253, 254, 255) and a second social science course that entails extended analysis and writing (229). These courses should be completed as early as possible in the first and second years; at least two of them must be taken by the end of the first semester of the sophomore year.

Writing across multiple disciplines is central to the major, drawing on sources as varied as architectural and visual studies, ethnographic fieldwork, archival and textual study, theoretical reflection and policy engagement. Students write and receive commentary on their arguments and expression from their introductory classes through their required capstone thesis. While most courses in the major have important writing components, at the moment City 229 acts as our primary writing-intensive course, asking students to draw upon the breadth of their interests to focus on researching, writing and rewriting within a comparative framework. We will be expanding our pedagogy in this area over time in conjunction with college initiatives and student feedback. At the same time, students are encouraged to use other classes within the major to develop a range of skills in methods, theory, and presentations, oral and written.

In addition to these introductory courses, each student selects six elective courses within the Cities Department, including cross-listed courses. One of these should be a methods class. At least two must be at the 300 level. In the senior year, a capstone course is required of all majors. Most students join together in a research seminar, CITY 398, in the Fall of that year. Occasionally, however, after consultation with the major advisers, the student may elect another 300-level course or a program for independent research. This is often the case with double majors who write a thesis in another field. Internships are also an important component of the program either in the summer or for credit with faculty supervision.

Finally, each student must also identify four courses outside Cities that represent additional expertise to complement her work in the major. These may include courses such as physics and calculus for architects, additional courses in economics, political science, sociology, or anthropology for students more focused on the social sciences and planning, or courses that build on language, design, or regional interests. Any minor, concentration, or second major also fulfills this requirement. Cities courses that are cross-listed with other departments or originate in them can be counted only once in the course selection, although they may be either allied or elective courses.

Both the Cities Department electives and the four or more allied courses must be chosen in close consultation with the major advisers in order to create a strongly coherent sequence and focus. This is especially true for students interested in architectural design, who will need to arrange studio courses (226, 228) as well as accompanying courses in math, science and architectural history; they should contact the department chair or Daniela Voith in their first year. Likewise, students interested in pursuing a minor in Environmental Studies or in area studies should consult with faculty early in their career.

Students should also note that many courses in the department as well as cross-listed courses are not given every year. They should also note that courses may carry prerequisites in cities, art history, economics, history, sociology, or the natural sciences.

Programs for study abroad or off campus are encouraged, within the limits of the Bryn Mawr and Haverford rules and practices. In general, a one-semester program is strongly preferred. The Cities Department regularly works with off-campus and study-abroad programs that are strong in architectural history, planning, and design, as well as those that allow students to pursue social and cultural interests. Students who would like to spend part or all of their junior year away must consult with the major advisers and appropriate deans early in their sophomore year.

Cities majors who have created major plans that have allowed them to coordinate their interests in cities with architecture, planning, ethnography, history, law, environmental studies, mass media, social justice, medicine, public health, the fine arts, and other fields. No matter the focus, though, each Cities major must develop a solid foundation in both the history of architecture and urban form and the analysis of urban culture, experience, and policy. Careful methodological choices, clear analytical writing, and critical visual analysis constitute primary emphases of the major. Strong interaction with faculty and other students are an important and productive part of the Cities Department, which helps us all take advantage of the major’s flexibility in an organized and rigorous way.
Minor Requirements
Students who wish to minor in the Cities Department must take at least two out of the four required courses and four cities electives, including two at the 300 level. Senior Seminar is not mandatory for fulfilling the cities minor.

3-2 Program in City and Regional Planning
Over the past three decades, many Cities majors have entered the 3-2 Program in City and Regional Planning, offered in conjunction with the University of Pennsylvania. Students interested in this program should meet with faculty early in their sophomore year.

COURSES

CITY B185 Urban Culture and Society
Examine techniques and questions of the social sciences as tools for studying historical and contemporary cities. Topics include political-economic organization, conflict and social differentiation, and cultural production and representation. Philadelphia features prominently in discussion, reading, and exploration as do global metropolitan comparisons through papers involving fieldwork, critical reading, and planning/problem solving using qualitative and quantitative methods.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
Instructor(s): McDonogh,G., Raddatz,L.
(Fall 2017)

CITY B190 The Form of the City: Urban Form from Antiquity to the Present
This course studies the city as a three-dimensional artifact. A variety of factors—geography, economic and population structure, politics, planning, and aesthetics—are considered as determinants of urban form.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Lee,M.
(Spring 2018)

CITY B201 Introduction to GIS for Social and Environmental Analysis
This course is designed to introduce the foundations of GIS with emphasis on applications for social and environmental analysis. It deals with basic principles of GIS and its use in spatial analysis and information management. Ultimately, students will design and carry out research projects on topics of their own choosing. Prerequisite: At least sophomore standing and Quantitative Readiness are required (i.e., the quantitative readiness assessment or Quan B001).

Approach: Quantitative Readiness Required (QR)
Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Raddatz,L.
(Spring 2018)

CITY B207 Topics in Urban Studies
This is a topics course. Course content varies.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Units: 1.0

Instructor(s): Cohen,J.
(Spring 2018)

CITY B217 Research Methods in the Social Sciences
This is a topics course. Course content varies.

Approach: Quantitative Methods (QM)
Units: 1.0
(Not Offered 2017-2018)

CITY B226 Introduction to Architectural Design
This studio design course introduces the principles of architectural design. Suggested Preparation: drawing, some history of architecture, and permission of instructor.

Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Voith,D., Olshin,S.
(Fall 2017)

CITY B227 Topics in Modern Planning
This is a topics course. Course content varies.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

CITY B228 Problems in Architectural Design
A continuation of CITY 226 at a more advanced level. Prerequisites: CITY B226 or permission of instructor.

Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): Voith,D., Olshin,S.
(Spring 2018)

CITY B229 Topics in Comparative Urbanism
This is a topics course. Course content varies. Current topic description: City, Nature and Culture - Creativity, sprawl, alienation, mobility, nature and artifice — what do developments beyond the metropolis tell us about urban life? Probing suburban places, experiences, imagery and reforms around Paris, Hong Kong, Buenos Aires and Philadelphia, this required major writing seminar examines suburbs for both problems from the past and ideas for the future.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Major Writing Requirement: Writing Intensive
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): McDonogh,G.
(Spring 2018)

CITY B250 Topics: Growth & Spatial Organization of the City
This is a topics course. Course content varies.

Approach: Inquiry into the Past (IP)
Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)

CITY B254 History of Modern Architecture
A survey of the development of modern architecture since the 18th century.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
as epistemological tracks.

of the twentieth century, and about history, theory, and criticism
we will see what it may tell us about the globalization and politics
architecture as a site and subject for critical inquiry. In particular,
also journals, books, and film. We will also investigate
cultural life through a variety of media: buildings of course,
closely within their historical context. We will examine spheres
concepts and designs by studying drawings and buildings
contradictions of “the modern” were made visible (and visual)
through architecture. In this course, we will engage architectural
concepts and designs by studying drawings and buildings
closely within their historical context. We will examine spheres
of reception for architecture and its theoretical, discursive, and
cultural life through a variety of media: buildings of course,
but also journals, books, and film. We will also investigate
architecture as a site and subject for critical inquiry. In particular,
we will see what it may tell us about the globalization and politics
of the twentieth century, and about history, theory, and criticism
as epistemological tracks.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

CITY B278 American Environmental History
This course explores major themes of American environmental history, examining changes in the American landscape, the
history of ideas about nature and the interaction between the
two. Students will study definitions of nature, environment, and
environmental history while investigating interactions between
Americans and their physical worlds.

Approach: Inquiry into the Past (IP)
Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)

CITY B298 Topics: Advanced Research Methods
This is a topics course. Course content varies.

Approach: Course does not meet an Approach
Units: 0.5
(Not Offered 2017-2018)

CITY B306 Advanced Fieldwork Techniques: Places in Time
A workshop for research into the histories of places, intended
to bring students into contact with some of the raw materials
of architectural and urban history. A focus will be placed
on historical images and texts, and on creating engaging
informational experiences that are transparent to their evidentiary
basis.

Units: 1.0
(Not Offered 2017-2018)

CITY B318 Topics in Urban Social and Cultural Theory
This is a topics course. Course content varies.

Units: 1.0
(Not Offered 2017-2018)

CITY B325 Topics in Social History
This a topics course that explores various themes in American social history. Course content varies.

Units: 1.0
(Not Offered 2017-2018)

CITY B329 Advanced Topics in Urban Environments
This is a topics course. Course content varies.
Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)

CITY B335 Topics in City and Media
This is a topics course. Course content varies.

Units: 1.0
(Not Offered 2017-2018)

CITY B345 Advanced Topics in Environment and Society
This is a topics course. Topics vary. Current topic description: How can cities help address today’s most pressing environmental problems? Are sustainable urban environments possible, and if so, what would they look like? This course explores these and other questions by examining theories, politics and practices of sustainability in urban contexts from a global perspective.

Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Raddatz,L.
(Fall 2017)

CITY B345 Advanced Topics in Urban Environments
This is a topics course. Course content varies. Current topic description: This course explores intersections of migration, labor and cities in today’s globalized economy. We will examine how broad trends have shaped labor markets in different urban contexts and shed light on the central role of migrant workers within them. Gaining a deeper understanding of migrant workers’ experiences, struggles and contributions is a key objective of the course.

Units: 1.0
Instructor(s): Raddatz,L.
(Spring 2018)

CITY B355 Topics in Urban Culture and Society
This is a topics course. Course content varies. Current topic description: This course explores intersections of migration, labor and cities in today’s globalized economy. We will examine how broad trends have shaped labor markets in different urban contexts and shed light on the central role of migrant workers within them. Gaining a deeper understanding of migrant workers’ experiences, struggles and contributions is a key objective of the course.

Units: 1.0
Instructor(s): Raddatz,L.
(Spring 2018)

CITY B365 Topics: Techniques of the City
This is a topics course. Course content varies. Current topic description: Fragmentation, Enclaves, and the Future of Global Cities - Ghettos. Gated Communities. Chinatowns. Cities have been and continue to be fragmented in multiple ways in space, meaning and experience, based on political economics, social formations and culture. From the Jewish ghetto of Venice to contemporary Chinatowns, the divided Philadelphia of W.E.B. DuBois to the gilded ghettos of contemporary gated communities, we will explore divided cities as historical process and future challenge.

Prerequisite: One introductory level social science course.
Units: 1.0
Instructor(s): McDonogh,G.
(Spring 2018)

CITY B377 Topics in Modern Architecture
This is a topics course on modern architecture. Topics vary. Current topic description: This class offers the students the
opportunity to engage architecture, architectural and urban history in a seminar format. For advanced majors but also open to others in history or history of art by permission of the instructor.

Units: 1.0
Instructor(s): Lee,M.
(Fall 2017)

**CITY B378 Formative Landscapes: The Architecture and Planning of American Collegiate Campuses**

The campus and buildings familiar to us here at the College reflect a long and rich design conversation regarding communicative form, architectural innovation, and orchestrated planning. This course will explore that conversation through varied examples, key models, and shaping conceptions over time.

Units: 1.0
Instructor(s): Cohen,J.
(Spring 2018)

**CITY B398 Senior Seminar**

An intensive research seminar designed to guide students in writing a senior thesis.

Units: 1.0
Instructor(s): McDonogh,G., Cohen,J., Raddatz,L.
(Fall 2017)

**CITY B403 Independent Study**

Advanced Fieldwork: Places in Time - This class offers the students the opportunity to do advanced directed fieldwork/archival study in architecture, architectural history, preservation and urban history under supervision of the professor with occasional collective meetings. For advanced majors but also open to others in history or history of art by permission

Units: 1.0
(Fall 2017)

**CITY B415 Teaching Assistant**

An exploration of course planning, pedagogy and creative thinking as students work to help others understand pathways they have already explored in introductory and writing classes. This opportunity is available only to advanced students of highest standing by professorial invitation.

Units: 1.0
(Not Offered 2017-2018)

**CITY B425 Praxis III: Independent Study**

Praxis III courses are Independent Study courses and are developed by individual students, in collaboration with faculty and field supervisors. A Praxis course is distinguished by genuine collaboration with fieldsite organizations and by a dynamic process of reflection that incorporates lessons learned in the field into the classroom setting and applies theoretical understanding gained through classroom study to work done in the broader community.

Counts towards: Praxis Program
Units: 1.0
(Not Offered 2017-2018)

**CITY B450 Urban Internships/Praxis**

Individual opportunities to engage in praxis in the greater Philadelphia area; internships must be arranged prior to registration for the semester in which the internship is taken. Prerequisite: permission of instructor.

Units: 1.0
(Fall 2017, Spring 2018)

**ANTH B210 Medical Anthropology**

This course examines the relationships between culture, society, disease and illness. It considers a broad range of health-related experiences, discourses, knowledge and practice among different cultures and among individuals and groups in different positions of power. Topics covered include sorcery, herbal remedies, healing rituals, folk illnesses, modern disease, scientific medical perceptions, clinical technique, epidemiology and political economy of medicine. Prerequisite: ANTH 102, H103 or permission of instructor.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Environmental Studies; Health Studies
Units: 1.0
(Not Offered 2017-2018)

**ARCH B104 Archaeology of Agricultural and Urban Revolutions**

This course examines the archaeology of the two most fundamental changes that have occurred in human society in the last 12,000 years, agriculture and urbanism, and we explore these in Egypt and the Near East as far as India. We also explore those societies that did not experience these changes.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Geoarchaeology; Middle Eastern & Islamic Studies
Units: 1.0
(Not Offered 2017-2018)

**ARCH B110 The World Through Classical Eyes**

A survey of the ways in which the ancient Greeks and Romans perceived and constructed their physical and social world. The evidence of ancient texts and monuments will form the basis for exploring such subjects as cosmology, geography, travel and commerce, ancient ethnography and anthropology, the idea of natural and artificial wonders, and the self-definition of the classical cultures in the context of the oikoumene, the “inhabited world.”

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Donohue,A.
(Fall 2017)

**ARCH B203 Ancient Greek Cities and Sanctuaries**

A study of the development of the Greek city-states and sanctuaries. Archaeological evidence is surveyed in its historic context. The political formation of the city-state and the role of religion is presented, and the political, economic, and religious institutions of the city-states are explored in their urban settings. The city-state is considered as a particular political economy of the Mediterranean and in comparison to the utility of the concept of city-state in other cultures.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)
ARCH B215 Classical Art
A survey of the visual arts of ancient Greece and Rome from the Bronze Age through Late Imperial times (circa 3000 B.C.E. to 300 C.E.). Major categories of artistic production are examined in historical and social context, including interactions with neighboring areas and cultures; methodological and interpretive issues are highlighted.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

ARCH B244 Great Empires of the Ancient Near East
A survey of the history, material culture, political and religious ideologies of, and interactions among, the five great empires of the ancient Near East of the second and first millennia B.C.E.: New Kingdom Egypt, the Hittite Empire in Anatolia, the Assyrian and Babylonian Empires in Mesopotamia, and the Persian Empire in Iran.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Middle Eastern & Islamic Studies
Units: 1.0
(Not Offered 2017-2018)

ARCH B252 Pompeii
Introduces students to a nearly intact archaeological site whose destruction by the eruption of Mt. Vesuvius in 79 C.E. was recorded by contemporaries. The discovery of Pompeii in the mid-1700s had an enormous impact on 18th- and 19th-century views of the Roman past as well as styles and preferences of the modern era. Informs students in classical antiquity, urban life, city structure, residential architecture, home decoration and furnishing, wall painting, minor arts and craft and mercantile activities within a Roman city.
Units: 1.0
(Not Offered 2017-2018)

ARCH B260 Daily Life in Ancient Greece and Rome
The often-praised achievements of the classical cultures arose from the realities of day-to-day life. This course surveys the rich body of material and textual evidence pertaining to how ancient Greeks and Romans -- famous and obscure alike -- lived and died. Topics include housing, food, clothing, work, leisure, and family and social life.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

ARCH B265 Topics in Ancient Athens
This is a topics course. Course content varies.
Major Writing Requirement: Writing Attentive
Units: 1.0
(Not Offered 2017-2018)

ARCH B316 Trade and Transport in the Ancient World
Issues of trade, commerce and production of export goods are addressed with regard to the Bronze Age and Iron Age cultures of Mesopotamia, Arabia, Iran and south Asia. Crucial to these systems is the development of means of transport via maritime routes and on land. Archaeological evidence for traded goods and shipwrecks is used to map the emergence of sea-faring across the Indian Ocean and Gulf while bio-archaeological data is employed to examine the transformative role that Bactrian and Dromedary camels played in ancient trade and transport.
Units: 1.0
Instructor(s): Magee, P.
(Fall 2017)

ARCH B359 Topics in Classical Art and Archaeology
This is a topics course. Topics vary. A research-oriented course taught in seminar format, treating issues of current interest in Greek and Roman art and archaeology. Prerequisites: 200-level coursework in some aspect of classical or related cultures, archeology, art history, or Cities. Current topic description: TA research-oriented course taught in seminar format, treating issues of current interest in Greek and Roman art and archaeology. Prerequisites: 200-level coursework in some aspect of classical or related cultures, archeology, art history, or Cities.
Units: 1.0
Instructor(s): Donohue, A.
(Spring 2018)

ARCH B505 Topics in Ancient Athens
This is a topics course. Topics vary.
Units: 1.0
(Not Offered 2017-2018)

ARCH B516 Trade and Transport in the Ancient World
Issues of trade, commerce and production of export goods are addressed with regard to the Bronze Age and Iron Age cultures of Mesopotamia, Arabia, Iran and south Asia. Crucial to these systems is the development of means of transport via maritime routes and on land. Archaeological evidence for traded goods and shipwrecks is used to map the emergence of sea-faring across the Indian Ocean and Gulf while bio-archaeological data is employed to examine the transformative role that Bactrian and Dromedary camels played in ancient trade and transport.
Units: 1.0
(Not Offered 2017-2018)

ARTD B310 Performing the City: Theorizing Bodies in Space
Building on the premise that space is a concern in performance, choreography, architecture and urban planning, this course will interrogate relationships between (performing) bodies and (city) spaces. Using perspectives from dance and performance studies, urban studies and cultural geography, it will introduce space, spatiality and the city as material and theoretical concepts and investigate how moving and performing bodies and city spaces intersect in political, social and cultural contexts. Lectures, discussion of assigned readings, attendance at a live performance, and 2-3 field trips are included. Prerequisites:
One dance lecture/seminar course or one course in relevant discipline e.g. cities, anthropology, sociology, or permission of the instructor.
Major Writing Requirement: Writing Attentive
Units: 1.0
(Not Offered 2017-2018)

BIOL B262 Urban Ecosystems
Cities can be considered ecosystems whose functions are highly influenced by human activity. This course will address many of the living and non-living components of urban ecosystems, as well as their unique processes. Using an approach focused...
on case studies, the course will explore the ecological and environmental problems that arise from urbanization, and also examine solutions that have been attempted. Prerequisite: BIOL B110 or B111 or ENVS B101.

Approach: Course does not meet an Approach
Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)

CSTS B324 Roman Architecture

The course gives special attention to the architecture and topography of ancient Rome from the origins of the city to the later Roman Empire. At the same time, general issues in architecture and planning with particular reference to Italy and the provinces from republic to empire are also addressed. These include public and domestic spaces, structures, settings and uses, urban infrastructure, the relationship of towns and territories, “suburban” and working villas, and frontier settlements. Prerequisite: ARCH 102.

Units: 1.0
Instructor(s): Scott, R.
(Fall 2017)

ECON B208 Labor Economics

Analysis of labor markets. Focuses on the economic forces and public policies that determine wage rates and unemployment. Specific topics include: human capital, family decision making, discrimination, immigration, technological change, compensating differentials, and signaling. Prerequisite: ECON B105.

Units: 1.0
(Not Offered 2017-2018)

ECON B213 Taming the Modern Corporation

Introduction to the economics of industrial organization and regulation, focusing on policy options for ensuring that corporations enhance economic welfare and the quality of life. Topics include firm behavior in imperfectly competitive markets; theoretical bases of antitrust laws; regulation of product and occupational safety, environmental pollution, and truth in advertising. Prerequisite: ECON B105.

Units: 1.0
Instructor(s): Sfekas, A.
(Fall 2017)

ECON B214 Public Finance

Analysis of government's role in resource allocation, emphasizing effects of tax and expenditure programs on income distribution and economic efficiency. Topics include sources of inefficiency in markets and possible government responses; federal budget composition; social insurance and antipoverty programs; U.S. tax structure and incidence. Prerequisites: ECON B105.

Counts towards: Health Studies
Units: 1.0
(Not Offered 2017-2018)

ECON B215 Urban Economics

Micro- and macroeconomic theory applied to urban economic behavior. Topics include housing and land use; transportation; urban labor markets; urbanization; and demand for and financing of urban services. Prerequisite: ECON B105.

Units: 1.0
(Not Offered 2017-2018)

ECON B225 Economic Development

Examination of the issues related to and the policies designed to promote economic development in the developing economies of Africa, Asia, Latin America, and the Middle East. Focus is on why some developing economies grow faster than others and why some growth paths are more equitable, poverty reducing, and environmentally sustainable than others. Includes consideration of the impact of international trade and investment policy, macroeconomic policies (exchange rate, monetary and fiscal policy) and sector policies (industry, agriculture, education, population, and environment) on development outcomes in a wide range of political and institutional contexts. Prerequisite: ECON B105.

Counts towards: Environmental Studies; International Studies
Units: 1.0
Instructor(s): Rock, M.
(Fall 2017)

ECON B234 Environmental Economics

Introduction to the use of economic analysis to explain the underlying behavioral causes of environmental and natural resource problems and to evaluate policy responses to them. Topics may include air and water pollution; the economic theory of externalities, public goods and the depletion of resources; cost-benefit analysis; valuing non-market benefits and costs; economic justice; and sustainable development. Prerequisites: ECON B105.

Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Ross, D.
(Spring 2018)

ECON B236 The Economics of Globalization

An introduction to international economics through theory, policy issues, and problems. The course surveys international trade and finance, as well as topics in international economics. It investigates why and what a nation trades, the consequences of such trade, the role of trade policy, the behavior and effects of exchange rates, and the macroeconomic implications of trade and capital flows. Topics may include the economics of free trade areas, world financial crises, outsourcing, immigration, and foreign investment. Prerequisites: ECON B105. The course is not open to students who have taken ECON B316 or B348.

Counts towards: International Studies
Units: 1.0
Instructor(s): Ceglowski, J.
(Spring 2018)

ECON B242 Economics of Local Environmental Programs

Considers the determinants of human impact on the environment at the neighborhood or community level and policy responses available to local government. How can economics help solve and learn from the problems facing rural and suburban communities? The instructor was a local township supervisor who will share the day-to-day challenges of coping with land use planning, waste disposal, dispute resolution, and the provision of basic services. Prerequisite: ECON B105.

Counts towards: Environmental Studies; Praxis Program
Units: 1.0
Instructor(s): Ross, D.
(Fall 2017)
ECON B243 Economic Inequality and Government Policy Choices
This course will examine the U.S. economy and the effects of government policy choices. The class will focus on the potential trade-offs between economic efficiency and greater economic equality. Some of the issues that will be explored include tax, education, and health care policies. Different perspectives on issues will be examined. Prerequisite: ECON B105.
Units: 1.0
(Not Offered 2017-2018)

ECON B253 Introduction to Econometrics
An introduction to econometric terminology and reasoning. Topics include descriptive statistics, probability, and statistical inference. Particular emphasis is placed on regression analysis and on the use of data to address economic issues. The required computational techniques are developed as part of the course. Class cannot be taken if you have taken H203 or H204. Prerequisites: ECON B100 and a 200-level elective.
Approach: Quantitative Methods (QM)
Units: 1.0
Instructor(s): Ross,D.
(Spring 2018)

ECON B314 The Economics of Social Policy
Introduces students to the economic rationale behind government programs and the evaluation of government programs. Topics include health insurance, social security, unemployment and disability insurance, and education. Additionally, the instructor and students will jointly select topics of special interest to the class. Emphasis will be placed on the use of statistics to evaluate social policy. Prerequisites: ECON B200; ECON 253 or 304.
Major Writing Requirement: Writing Intensive
Units: 1.0
Instructor(s): Sfekas,A.
(Spring 2018)

ECON B324 The Economics of Discrimination and Inequality
Explores the causes and consequences of discrimination and inequality in economic markets. Topics include economic theories of discrimination and inequality, evidence of contemporary race- and gender-based inequality, detecting discrimination, identifying sources of racial and gender inequality, and identifying sources of overall economic inequality. Additionally, the instructor and students will jointly select supplementary topics of specific interest to the class. Possible topics include: discrimination in historical markets, disparity in legal treatments, issues of family structure, and education gaps. Writing Intensive. Prerequisites: At least one 200-level applied microeconomics elective; ECON 253 or 304; ECON 200.
Major Writing Requirement: Writing Intensive
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Nutting,A.
(Fall 2017)

ECON B335 East Asian Development
Identifies the core economic and political elements of an East Asian newly industrializing economies (NIEs) development model. Assesses the performance of this development model in Northeast (China, South Korea and Taiwan) and Southeast Asia (Indonesia, Malaysia, Singapore, Thailand and Vietnam) in a comparative perspective. Considers the debate over the impact of interventionist and selective development policies associated with this model on the development successes and failures of the East Asian NIEs. Evaluates the impact of democratization in several of these polities on both the core development model identified as well as on development performance. Prerequisite:ECON 225; ECON 200 or 202; and ECON 253 or 304; or permission of instructor.
Major Writing Requirement: Writing Intensive
Units: 1.0
(Not Offered 2017-2018)

EDUC B266 Schools in American Cities
This course examines issues, challenges, and possibilities of urban education in contemporary America. We use as critical lenses issues of race, class, and culture; urban learners, teachers, and school systems; and restructuring and reform. While we look at urban education nationally over several decades, we use Philadelphia as a focal “case” that students investigate through documents and school placements. This is a Praxis II course (weekly fieldwork in a school required)
Approach: Cross-Cultural Analysis (CC)
Counts towards: Africana Studies; Child and Family Studies; Praxis Program
Units: 1.0
(Spring 2018)

GEOL B209 Natural Hazards
A quantitative approach to understanding the earth processes that impact human societies. We consider the past, current, and future hazards presented by geologic processes, including earthquakes, volcanoes, landslides, floods, and hurricanes. The course includes discussion of the social, economic, and policy contexts within which natural geologic processes become hazards. Case studies are drawn from contemporary and ancient societies. Lecture three hours a week. Prerequisite: one semester of college science or permission of instructor.
Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR); Scientific Investigation (SI)
Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Marenco,K.
(Spring 2018)

GERM B245 Interdisciplinary Approaches to German Literature and Culture
This is a topics course. Taught in English. Course content varies. Previous topics include, Women's Narratives on Modern Migrancy, Exile, and Diasporas; Nation and Identity in Post-War Austria. Current topic: Crime and Courtroom Drama. This is a film-based course about political trials at critical junctures of German history. Current topic description: This is a film-based course about political trials at critical junctures of German history.
Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Shen,Q.
(Spring 2018)
GNST B245 Introduction to Latin American, Iberian and Latina/o Studies
A broad, interdisciplinary survey of themes uniting and dividing societies from the Iberian Peninsula to the Americas. The class introduces the methods and interests of all departments in the concentration, posing problems of cultural continuity and change, globalization and struggles within dynamic histories, political economies, and creative expressions. Course is taught in English.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Latin American, Iberian and Latina/o Studies; International Studies
Units: 1.0
Instructor(s): Gaspar,M.
(Spring 2018)

HART B212 Medieval Art & Architecture
This course takes a broad geographic and chronological scope, allowing for full exposure to the rich variety of objects and monuments that fall under the rubric of “medieval” art and architecture. We focus on the Latin and Byzantine Christian traditions, but also consider works of art and architecture from the Islamic and Jewish spheres. Topics to be discussed include: the role of religion in artistic development and expression; secular traditions of medieval art and culture; facture and materiality in the art of the middle ages; the use of objects and monuments to convey political power and social prestige; gender dynamics in medieval visual culture; and the contribution of medieval art and architecture to later artistic traditions.
Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

HART B253 Survey of Western Architecture
The major traditions in Western architecture are illustrated through detailed analysis of selected examples from classical antiquity to the present. The evolution of architectural design and building technology, and the larger intellectual, aesthetic, and social context in which this evolution occurred, are considered.
Approach: Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

HART B311 Topics in Medieval Art
This is a topics course. Course content varies.
Units: 1.0
(Not Offered 2017-2018)

HART B323 Topics in Renaissance and Baroque Art
This is a topics course. Course content varies. Current topic description: This seminar is concerned with the history and idea of fresco painting in Italy, both as a matter of technique and as instances of explicitly political art. The materials for research can come also from other moments and places, from the WPA program in the United States, from Mexico to the Catholic and Unionist walls in Northern Ireland and beyond.
Units: 1.0
Instructor(s): Cast,D.
(Spring 2018)

HART B339 The Art of Italian Unification
Following Italian unification (1815-1871), the statesman, novelist, and painter Massimo d’Azeglio remarked, “Italy has been made; now it remains to make Italians.” This course examines the art and architectural movements of the roughly 100 years between the uprisings of 1848 and the beginning of the Second World War, a critical period for defining Italianità. Subjects include the paintings of the Macchiaioli, reactionaries to the 1848 uprisings and the Italian Independence Wars, the politics of nineteenth-century architectural restoration in Italy, the re-urbanization of Italy’s new capital Rome, Fascist architecture and urbanism, and the architecture of Italy’s African colonies.
Major Writing Requirement: Writing Intensive
Units: 1.0
(Not Offered 2017-2018)

HART B355 Topics in the History of London
Selected topics of social, literary, and architectural concern in the history of London, emphasizing London since the 18th century.
Units: 1.0
(Not Offered 2017-2018)

HIST B237 Topic: Modern African History
This is a topics course. Course content varies.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Africana Studies; Gender and Sexuality Studies
Units: 1.0
Instructor(s): Ngalamulume,K.

Fall 2017: Urban History.
Spring 2018: African Economic Development. This course examines the political economy of African development in historical perspectives. We will address the following questions: Why is the African continent, which is rich in natural resources, so poor? What are the causes of poverty in Africa? The course will analyze the environmental, economic, political, and historical factors that have affected the development of Africa. We will discuss the impact of slavery, colonial exploitation, foreign interventions, foreign aid, trade, and democratic transitions on African development. We will also explore the theories of development and underdevelopment.

HIST B249 History of Global Health
This course examines the interrelated histories of public health, international health, and global health from the late 18th to the 21st centuries as part of a broader history of epidemics, empire, and global mobility. We will pay particular attention this semester to the use of architectural and spatial strategies for managing crises of contagion, disaster, and epidemic. The architectural spaces to be examined will include urban-based hospitals, public health infrastructure, and quarantine buildings as well as mobile architectural technologies such as incubators, wartime pop-up surgical tents, and floating hospitals in both Western and non-Western environments. The course will trace the role of health and medicine in mediating the relationships between metropolis and colony, state and citizen, research practice and human subject.
Approach: Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies; Health Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B257 British Empire I: Capitalism and Slavery
Focusing on the Atlantic slave trade and the slave plantation mode of production, this course explores English colonization,
and the emergence and the decline of British Empire in the Americas and Caribbean from the 17th through the late 20th centuries. It tracks some of the intersecting and overlapping routes—and roots—connecting histories and politics within and between these "new" world locations. It also tracks the further and proliferating links between developments in these regions and the histories and politics of regions in the "old" world, from the north Atlantic to the South China sea.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Kale, M.
(Fall 2017)

HIST B325 Topics in Social History
This a topics course that explores various themes in American social history. Course content varies. Current topic description: This course explores how the American Civil War, fought over the issue of maintaining race based slavery, has become enshrined with a host of contested meanings about race and citizenship to generations of Americans ever since the Confederacy surrendered at Appomattox. During this semester we will explore some of those contests and address the Civil War’s intense power in the American psyche.
Units: 1.0
Instructor(s): Ullman, S.
(Spring 2018)

HIST B368 Topics in Medieval History
This is a topics course. Topics vary. Current topic description: A reading and research-based seminar on the intellectual and cultural history of medieval magic, including natural and demonic magic, astral science, alchemy, and other forms of "the occult sciences." Primary sources will be from a variety of genres, including visual culture, and secondary sources will include significant works in philosophy, religious studies, and medieval historiography. Prerequisite: at least one course in medieval history, or the permission of the instructor.
Units: 1.0
Instructor(s): Truitt, E.
(Spring 2018)

ITAL B219 Multiculturalism in Medieval Italy
This course examines cross-cultural interactions in medieval Italy played out through the patronage, production, and reception of works of art and architecture. Sites of patronage and production include the cities of Venice, Palermo, and Pisa. Media examined include buildings, mosaics, ivories, and textiles.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

ITAL B319 Multiculturalism and Diversity in Medieval Italy
This interdisciplinary course will reflect upon history, religion, literature, politics, and built environment of Italy from ca. 1000 to 1400. Italy was famous for its diverse cultural landscape of urban towers and fortified castles, its Mediterranean trade, and its ethnically and religiously differentiated voices. The course examines cross-cultural interactions played out through the patronage, production, and reception of works of art, literature, and architecture. Sites of patronage and production include the cities of Venice, Palermo, and Pisa. It counts towards Art History and City.
Units: 1.0
Instructor(s): Kubati, R.
(Fall 2017)

ITAL B340 The Art of Italian Unification
Following Italian unification (1815-1871), the statesman, novelist, and painter Massimo d’Azeglio remarked, “Italy has been made; now it remains to make Italians.” This course examines the art and architectural movements of the roughly 100 years between the uprisings of 1848 and the beginning of the Second World War, a critical period for defining Italianità. Subjects include the paintings of the Macchiaioli, reactionaries to the 1848 uprisings and the Italian Independence Wars, the politics of nineteenth-century architectural restoration in Italy, the re-urbanization of Italy’s new capital Rome, Fascist architecture and urbanism, and the architecture of Italy’s African colonies.
Major Writing Requirement: Writing Intensive
Units: 1.0
(Not Offered 2017-2018)

POLS B222 Environmental Issues: Movements and Policy Making in Comparative Perspective
An exploration of the ways in which different cultural, economic, and political settings have shaped issue emergence and policy making. We examine the politics of particular environmental issues in selected countries and regions, paying special attention to the impact of environmental movements. We also assess the prospects for international cooperation in addressing global environmental problems such as climate change.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)

POLS B256 Global Politics of Climate Change
This course will introduce students to important political issues raised by climate change locally, nationally, and internationally, paying particular attention to the global implications of actions at the national and subnational levels. It will focus not only on specific problems, but also on solutions; students will learn about some of the technological and policy innovations that are being developed worldwide in response to the challenges of climate change.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Hager, C.
(Fall 2017)

POLS B321 Technology and Politics
A multi-media analysis of the complex role of technology in political and social life. We focus on the relationship between technological change and democratic governance. We begin with historical and contemporary Luddism as well as pro-technology movements around the world. Substantive issue areas include security and surveillance, electoral politics, economic development and women’s empowerment, warfare, social media, net neutrality, GMO foods and industrial agriculture, climate change and energy politics.
Major Writing Requirement: Writing Intensive
Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)
SOCL B205 Social Inequality
Introduction to the major sociological theories of gender, racial-ethnic, and class inequality with emphasis on the relationships among these forms of stratification in the contemporary United States, including the role of the upper class(es), inequality between and within families, in the work place, and in the educational system.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Fall 2017)

SOCL B229 Black America in Sociological Perspective
This course presents sociological perspectives on various issues affecting black America as a historically unique minority group in the United States: the legacy of slavery and the Jim Crow era; the formation of urban black ghettos; the civil rights reforms; the problems of poverty and unemployment; the problems of crime and other social problems; the problems of criminal justice; the continuing significance of race; the varied covert modern forms of racial discrimination; and the role of race in American politics.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Africana Studies; Child and Family Studies
Units: 1.0
(Not Offered 2017-2018)

SOWK B554 Social Determinants of Health and Health Equity
The purpose of this course is to provide students with knowledge and an understanding of how structural factors (racism, sexism, homophobia, classism, discrimination, the built environment, poverty, working conditions, and the unequal distribution of power, income, goods, and services) contribute to racial/ethnic and gender disparities in health and well-being.
Counts towards: Praxis Program
Units: 1.0
(Not Offered 2017-2018)

HEALTH STUDIES

Students may complete a minor in Health Studies.

Faculty
Bryn Mawr
Kalala Ngalamulume, Associate Professor of Africana Studies and History, Co-Director of International Studies, and Co-Director of Health Studies (spring)
Susan A. White, Professor of Chemistry and Co-Director of Health Studies (fall) (on leave semester II)

Haverford
Anne Montgomery, Visiting Assistant Professor of Health Studies
Anna West, Assistant Professor of Health Studies; Director of Health Studies

The Health Studies Minor at Bryn Mawr and Haverford Colleges brings together courses and faculty members in the natural sciences, social sciences and humanities to guide students through the biomedical, cultural, ethical, and political questions that relate to health issues on local, regional and global scales.

Our Colleges value the intersection of public health and social justice, and this new course of study will allow students to approach these vital issues with greater knowledge and understanding.

Given its multidisciplinary structure, the health studies minor will give scientific context to students in the social sciences and humanities who are interested in health policy, public health, law, medical ethics, social services, or health education. The minor also complements the curriculum for traditional science majors by providing important social and behavioral dimensions for those students planning to go into medicine, nursing, physical therapy, psychology and other clinical fields.

This is a Bi-College minor, and courses will be taught by Bryn Mawr College and Haverford College across many disciplines. When approved by the faculty steering committee, selected courses for the minor may also be taken at Swarthmore College, University of Pennsylvania and while studying abroad.

Minor Requirements
The minor consists of a total of six courses and must include the following:

- A multidisciplinary introductory course taught by two faculty members from different academic divisions that must be taken before enrolling in the Health Studies Capstone Seminar. Introduction to Health Studies (HLTH H115B).
- Three core courses from a list approved by the faculty steering committee. Two of these courses must be elected from a Department outside of the student’s major and at least two of the courses should be at the non-introductory level. Students must take one course in each of three areas:
  - **M track**: Mechanisms of disease and the maintenance of the health body (M)
  - **R track**: Cultural and Literary Representations of Health and Illness (R)
  - **S track**: Responses of familial, social, civic and governmental Structures to issues of health and disease (S)
- One additional course, outside the student’s major. Students may choose either a core course (C) or one selected from a list of approved affiliate courses (A), which deal with health issues, but not necessarily as their primary focus.
- Health Studies Capstone Seminar. A capstone course organized around a theme, such as vaccines, AIDS, drug abuse, disability, etc. Students will analyze current literature addressing the theme from their own disciplinary perspectives and will develop research proposals and collaborative projects.

Sample Core Courses
Please Visit Haverford’s Health Studies Web Page for Updates

**Track M**
- ANTH B208: Human Biology
- ANTH B317: Disease and Human Evolution
- BIOL B210: Biology and Public Policy
- BIOL B303: Human Physiology
- CHEM B315: Medicinal Chemistry
HLTH B115 Introduction to Health Studies

The multidisciplinary foundation for the health studies minor. Students will be introduced to theories and methods from the life sciences, social sciences, and humanities and will learn to apply them to problems of health and illness. Topics include epidemiological, public health, and biomedical perspectives on health and disease; social, behavioral, and environmental determinants of health; globalization of health issues; cultural representations of illness; health inequalities, social justice, and the ethics of health as a human right.

Approach: Course does not meet an Approach
Counts towards: Africana Studies; Health Studies
Units: 1.0
Instructor(s): White,S., Montgomery,A.
(Fall 2017)

ANTH B208 Human Biology

This course will be a survey of modern human biological variation. We will examine the patterns of morphological and genetic variation in modern human populations and discuss the evolutionary explanations for the observed patterns. A major
component of the class will be the discussion of the social implications of these patterns of biological variation, particularly in the construction and application of the concept of race. Prerequisite: ANTH 101 or permission of instructor.

Counts towards: Health Studies  
Units: 1.0  
(Not Offered 2017-2018)

**ANTH B210 Medical Anthropology**

This course examines the relationships between culture, society, disease and illness. It considers a broad range of health-related experiences, discourses, knowledge and practice among different cultures and among individuals and groups in different positions of power. Topics covered include sorcery, herbal remedies, healing rituals, folk illnesses, modern disease, scientific medical perceptions, clinical technique, epidemiology and political economy of medicine. Prerequisite: ANTH 102, H103 or permission of instructor.

Approach: Cross-Cultural Analysis (CC)  
Counts towards: Environmental Studies; Health Studies  
Units: 1.0  
(Not Offered 2017-2018)

**ANTH B237 Environmental Health**

This course introduces principles and methods in environmental anthropology and public health used to analyze global environmental health problems globally and develop health and disease control programs. Topics covered include risk; health and environment; food production and consumption; human health and agriculture; meat and poultry production; and culture, urbanization, and disease. Prerequisite: ANTH B102, H103 or permission of instructor.

Approach: Cross-Cultural Analysis (CC)  
Counts towards: Environmental Studies; Health Studies  
Units: 1.0  
(Not Offered 2017-2018)

**ANTH B312 Anthropology of Reproduction**

An examination of social and cultural constructions of reproduction, and how power and politics in everyday life shapes reproductive behavior and its meaning in Western and non-Western cultures. The influence of competing interests within households, communities, states, and institutions on reproduction is considered. Prerequisite: ANTH B102 (or ANTH H103) or permission of instructor.

Counts towards: Child and Family Studies; Gender and Sexuality Studies; Health Studies  
Units: 1.0  
(Not Offered 2017-2018)

**ANTH B317 Disease and Human Evolution**

Pathogens and humans have been having an “evolutionary arms race” since the beginning of our species. In this course, we will look at methods for tracing diseases in our distant past through skeletal and genetic analyses as well as tracing the paths and impacts of epidemics that occurred during the historic past. We will also address how concepts of Darwinian medicine impact our understanding of how people might be treated most effectively. There will be a midterm, a final, and an essay and short presentation on a topic developed by the student relating to the class. Prerequisite: ANTH B101 or permission of the instructor.

Counts towards: Health Studies, Biology  
Counts towards: Health Studies  
Units: 1.0  
Instructor(s): Seselj,M.  
(Spring 2018)

**ANTH B322 Anthropology of the Body**

This course examines a diversity of meanings and interpretations of the body in anthropology. It explores anthropological theories and methods of studying the body and social difference via a series of topics including the construction of the body in medicine, identity, race, gender, sexuality and as explored through cross-cultural comparison. Prerequisite: ANTH B102, ANTH H103 or permission of instructor.

Counts towards: Gender and Sexuality Studies; Health Studies  
Units: 1.0  
(Not Offered 2017-2018)

**ANTH B331 Advanced Topics in Medical Anthropology**

The purpose of the course is to provide a survey of theoretical frameworks used in medical anthropology, coupled with topical subjects and ethnographic examples. The course will highlight a number of sub-specializations in the field of Medical Anthropology including genomics, science and technology studies, ethnomedicine, cross-cultural psychiatry/psychology, cross-cultural bioethics, ecological approaches to studying health and behavior, and more. Prerequisite: ANTH B102, ANTH H103, or permission of instructor.

Counts towards: Health Studies  
Units: 1.0  
(Not Offered 2017-2018)

**BIOL B201 Genetics**

This course focuses on the principles of genetics, including classical genetics, population genetics and molecular genetics. Topics to be covered include the genetic and molecular nature of mutations and phenotypes, genetic mapping and gene identification, chromosome abnormalities, developmental genetics, genome editing and epigenetics. Examples of genetics analyses are drawn from a variety of organisms including Drosophila, C. elegans, mice and humans. Lecture three hours a week. Prerequisite: BIOL B110 and CHEM B104.

Approach: Quantitative Readiness Required (QR); Scientific Investigation (SI)  
Counts towards: Biochemistry and Molecular Biology; Health Studies  
Units: 1.0  
Instructor(s): Davis,T.  
(Fall 2017)

**BIOL B210 Biology and Public Policy**

A lecture/discussion course on major issues and advances in biology and their implications for public policy decisions. Topics discussed include reproductive technologies, the Human Genome project, environmental health hazards, bioterrorism, and euthanasia and organ transplantation. Readings include scientific articles, public policy and ethical considerations, and lay publications. Lecture three hours a week. This class involves considerable writing. Prerequisite: One semester of BIOL 110-111, or permission of instructor.

Counts towards: Environmental Studies; Health Studies  
Units: 1.0  
Instructor(s): Greif,K.  
(Spring 2018)
BIOL B215 Experimental Design and Statistics
An introductory course in designing experiments and analyzing biological data. This course is structured to develop students’ understanding of when to apply different quantitative methods, and how to implement those methods using the R statistics environment. Topics include summary statistics, distributions, randomization, replication, parametric and nonparametric tests, and introductory topics in multivariate and Bayesian statistics. The course is geared around weekly problem sets and interactive learning. Suggested Preparation: BIOL B110 or B111 is highly recommended.
Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR); Scientific Investigation (SI)
Major Writing Requirement: Writing Attentive
Counts towards: Biochemistry and Molecular Biology; Health Studies
Units: 1.0
Instructor(s): Shapiro, J.
(Fall 2017)

BIOL B216 Genomics
An introduction to the study of genomes and genomic data. This course will examine the types of biological questions that can be answered using large biological data sets and complete genome sequences as well as the techniques and technologies that make such studies possible. Topics include genome organization and evolution, comparative genomics, and analysis of transcriptomes and proteomes. Prerequisite: One semester of BIOL 110-111. BIOL 201 highly recommended.
Approach: Quantitative Methods (QM); Scientific Investigation (SI)
Counts towards: Biochemistry and Molecular Biology; Health Studies
Units: 1.0
Instructor(s): Shapiro, J.
(Fall 2017)

BIOL B255 Microbiology
Invisible to the naked eye, microbes occupy every niche on the planet. This course will examine how microbes have become successful colonizers; review aspects of interactions between microbes, humans and the environment; and explore practical uses of microbes in industry, medicine and environmental management. The course will combine lecture, discussion of primary literature and student presentations. Three hours of lecture and three hours of laboratory per week. Prerequisites: One semester of BIOL 110 and CHEM B104.
Approach: Scientific Investigation (SI)
Major Writing Requirement: Writing Attentive
Counts towards: Biochemistry and Molecular Biology; Environmental Studies; Health Studies
Units: 1.0
Instructor(s): Kung, Y.
(Not Offered 2017-2018)

BIOL B271 Developmental Biology
An introduction to embryology and the concepts of developmental biology. Concepts are illustrated by analyzing the experimental observations that support them. Topics include gametogenesis and fertilization, morphogenesis, cell fate specification and differentiation, pattern formation, regulation of gene expression, neural development, and developmental plasticity. The laboratory focuses on observations and experiments on living embryos. Lecture three hours, laboratory three scheduled hours a week; most weeks require additional hours outside of the regularly scheduled lab. Prerequisite: one semester of BIOL 110-111 or permission of instructor.
Approach: Scientific Investigation (SI)
Major Writing Requirement: Writing Attentive
Counts towards: Biochemistry and Molecular Biology; Health Studies
Units: 1.0
Instructor(s): Davis, G.
(Fall 2017)

BIOL B303 Human Physiology
A comprehensive study of the physical and chemical processes in tissues, organs and organ systems that form the basis of animal and human function. Homeostasis, control systems and the structural basis of function are emphasized. Laboratories are designed to introduce basic physiological techniques and the practice of scientific inquiry. Lecture three hours, laboratory three hours a week. Prerequisites: One semester of BIOL 110-111, CHEM 103, 104 and one 200-level biology course.
Major Writing Requirement: Writing Attentive
Counts towards: Health Studies
Units: 1.0
(Not Offered 2017-2018)

BIOL B380 Topics in Cellular and Organismal Physiology
Physiology is the study of the normal functioning of a living organism and its components, including all its physical and chemical processes. The integration of function across many levels of organization will be emphasized. Prerequisite: One semester of BIOL 110-111, CHEM 103, 104 and one 200-level biology course.
Major Writing Requirement: Writing Attentive
Counts towards: Health Studies
Units: 1.0
(Not Offered 2017-2018)

CHEM B242 Biological Chemistry
The structure, chemistry and function of amino acids, proteins, lipids, polysaccharides and nucleic acids; enzyme kinetics; metabolic relationships of carbohydrates, lipids and amino acids, and the control of various pathways. Lecture three hours a week. Prerequisite: CHEM B212 or CHEM H222.
Approach: Course does not meet an Approach
Counts towards: Biochemistry and Molecular Biology; Health Studies
Units: 1.0
Instructor(s): Kung, Y.
(Fall 2017)

ECON B214 Public Finance
Analysis of government’s role in resource allocation, emphasizing effects of tax and expenditure programs on income distribution and economic efficiency. Topics include sources of inefficiency in markets and possible government responses; federal budget composition; social insurance and antipoverty programs; U.S. tax structure and incidence. Prerequisites: ECON B105.
Counts towards: Health Studies
Units: 1.0
(Not Offered 2017-2018)
FREN B275 Improving Mankind: Enlightened Hygiene and Eugenics
At first sight, hygiene and eugenics have nothing in common: the former is usually conceived as a good management of our everyday conditions of life, whereas the latter is commonly reviled for having inspired discriminatory practices (in Nazi Germany, but also in the US, Sweden, and Switzerland). Our inquiry will explore how, in the context of the French Enlightenment, a subdiscipline of Medicine (namely Hygiene) was redefined, expanded its scope, and eventually became hegemonic both in the medical field and in civil society. We will also explore how and why a philanthropic ideal led to the quest for the improvement of the human species. We will compare the French situation with that of other countries (mainly UK and the USA). This course is taught in English. Students who wish to get credit in French will meet one extra hour.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Health Studies
Units: 1.0
(Fall 2017)

GNST B201 Nutrition, Smoking, and Cardiovascular Health
The class explores the relationships between health, national associations, and the federal government is they relate to the creation and implementation of laws and policies as well as the perception of what is healthy. The class focuses on health in the U.S. The course will include a look at tobacco use through U.S. history as a case study for how the federal government acts and reacts to protect the public. Then, in turn, to evaluate how the public reacts to pressures from the government and other national associations. From there, students will be asked to examine current trends in nutrition and cardiovascular health in order to draw parallels between the previous function of government in the protection of the populace and the current efforts in these two areas.

Approach: Course does not meet an Approach
Counts towards: Health Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B231 Medicine, Magic & Miracles in the Middle Ages
A lecture and discussion course on the therapeutic systems (humoral theory, faith healing, natural magic), the medical marketplace, and the social context for understanding health and disease in the medieval period. Topics covered include Greek, Arabic, and Latin medical textual traditions, the rise of hospitals and public health, and the Black Death.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Health Studies
Units: 1.0
Instructor(s): Truitt,E.
(Fall 2017)

HIST B233 Health and Disability in the U.S.
This course examines how scientific, medical, and cultural discourses have shaped the construction of health and disability in U.S. history. Paying attention to the ways in which health and disability are constructed in relationship to other social categories such as race, class, gender, sexuality, and nationality, we will examine the processes through which certain bodies are defined as healthy, useful and productive while others are marked as diseased, defective, and socially undesirable. Topics will include eugenics, public health, immigration policies, birth control and sterilization, the women’s health movement, AIDS activism, disability rights, mental health, obesity, biological citizenship, and health consumerism.

Approach: Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies; Health Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B249 History of Global Health
This course examines the interrelated histories of public health, international health, and global health from the late 18th to the 21st centuries as part of a broader history of epidemics, empire, and global mobility. We will pay particular attention this semester to the use of architectural and spatial strategies for managing crises of contagion, disaster, and epidemic. The architectural spaces to be examined will include urban-based hospitals, public health infrastructure, and quarantine buildings as well as mobile architectural technologies such as incubators, wartime pop-up surgical tents, and floating hospitals in both Western and non-Western environments. The course will trace the role of health and medicine in mediating the relationships between metropolis and colony, state and citizen, research practice and human subject.

Approach: Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies; Health Studies
Units: 1.0
(Not Offered 2017-2018)

PHIL B205 Medical Ethics
The field of medicine provides a rich terrain for the study and application of philosophical ethics. This course will introduce students to fundamental ethical theories and present ways in which these theories connect to particular medical issues. We will also discuss what are often considered the four fundamental principles of medical ethics (autonomy, beneficence, non-maleficence, and justice) in connection to specific topics related to medical practice (such as reproductive rights, euthanasia, and allocation of health resources).

Approach: Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies; Health Studies
Units: 1.0
(Not Offered 2017-2018)
POLS B310 Comparative Public Policy
A comparison of policy processes and outcomes across space and time. Focusing on particular issues such as health care, domestic security, water and land use, we identify institutional, historical, and cultural factors that shape policies. We also examine the growing importance of international-level policy making and the interplay between international and domestic pressures on policy makers. Prerequisite: One course in Political Science or public policy.
Counts towards: Environmental Studies; Health Studies
Units: 1.0
(Not Offered 2017-2018)

PSYC B209 Abnormal Psychology
This course examines the experience, origins and consequences of psychological difficulties and problems. Among the questions we will explore are: What do we mean by abnormal behavior or psychopathology? What are the strengths and limitations of the ways in which psychopathology is assessed and classified? What are the major forms of psychopathology? How do psychologists study and treat psychopathology? How is psychopathology experienced by individuals? What causes psychological difficulties and what are their consequences? How do we integrate social, biological and psychological perspectives on the causes of psychopathology? Do psychological treatments (therapies) work? How do we study the effectiveness of psychological treatments? Prerequisite: Introductory Psychology (PSYC B105 or H100).
Approach: Course does not meet an Approach
Counts towards: Child and Family Studies; Health Studies
Units: 1.0
(Not Offered 2017-2018)

PSYC B231 Health Psychology
This course will provide an overview of the field of health psychology using lecture, exams, videos, assignments, and an article critique. We will examine the current definition of health psychology, as well as the theories and research behind many areas in health psychology (both historical and contemporary). The course will focus on specific health and social psychological theories, empirical research, and applying the theory and research to real world situations. Prerequisite: Introductory Psychology (PSYC B105) or Foundations of Psychology (PSYC H100)
Approach: Course does not meet an Approach
Counts towards: Health Studies; Museum Studies
Units: 1.0
(Not Offered 2017-2018)

PSYC B260 The Psychology of Mindfulness
This course focuses on psychological theory and research on mindfulness and meditative practices. Readings and discussion will introduce students to modern conceptualizations and implementation of mindfulness practices that have arisen in the West. Students will be encouraged to engage in mindfulness activities as part of their involvement in this course.
Approach: Course does not meet an Approach
Counts towards: Health Studies
Units: 1.0
(Not Offered 2017-2018)

PSYC B303 Portraits of Maladjustment in Classic Children’s Novels
This writing-intensive seminar (maximum enrollment = 16 students).5 unit course deals with critical analysis of how various forms of psychological maladjustment and health are depicted in selected classic novels for children. Many such novels were written in the Victorian period. Long before developmental psychopathology was a scientific discipline, its main questions were insightfully probed by 19th and early 20th century novelists in books such as “The Secret Garden.” In this course, each book will be analyzed for the literary devices used to portray healthy adjustment and maladjustment, the implicit theories of psychological causation captured in the narratives, and the ways the novelist depicts life experiences that bring about mental health and personal growth. Each book will be discussed in its historical/literary contexts, and compared with current views drawn from psychological research. The course integrates literary analysis of classic children’s novels with important concepts derived from the field of developmental psychopathology.
Major Writing Requirement: Writing Intensive
Counts towards: Child and Family Studies; Health Studies
Units: 0.5
(Not Offered 2017-2018)

PSYC B327 Adolescent Development
Is adolescence a biologically distinct stage of life, or a social “holding ground” invented by modern culture for young people unready or unwilling to assume the responsibilities of adulthood? Are adolescents destined to make risky decisions because of their underdeveloped brains? At what age should they be held accountable as adults in a court of law? This course will explore these and other questions about the biological, social, and legal forces that define the boundaries and shape the experience of adolescents growing up in the modern world. Students will learn about: (1) historical changes in understanding and treatment of adolescents; (2) puberty-related biological changes marking the beginning of adolescence; (3) brain, behavioral, cognitive, and social development during adolescence; and (4) contemporary debates regarding age of adult maturity, and their implications for law and policy. Prerequisite: PSYC B206 (Developmental Psychology) or permission or instructor. PSYC B205 is recommended. Current topic description: Mindfulness
Counts towards: Health Studies
Units: 1.0
Instructor(s): Albert,D.
(Fall 2017)

PSYC B331 Health Behavior and Context
This seminar will be devoted to a discussion of theory and research in health psychology. We will investigate both historical and contemporary perspectives on the psychology of wellness and illness. We will begin with a consideration of how psychosocial forces influence health cognitions, behaviors, and physiological processes. The second half of the course will focus on contextual factors, interventions, and emerging topics in research. We will debate the question of whether/how psychological forces influence health outcomes. Prerequisite: PSYC B105 and PSYC B231 or PSYC B208, or by permission of the instructor.
Counts towards: Health Studies
Units: 1.0
(Not Offered 2017-2018)
PSYC B351 Developmental Psychopathology

This course will examine emotional and behavioral disorders of children and adolescents, including autism, attention deficit disorder, conduct disorder, phobias, obsessive-compulsive disorder, depression, anorexia, and schizophrenia. Major topics covered will include: contrasting models of psychopathology; empirical and categorical approaches to assessment and diagnosis; outcome of childhood disorders; risk, resilience, and prevention; and therapeutic approaches and their efficacy. Prerequisite: PSYC 206 or 209.

Counts towards: Child and Family Studies; Health Studies; Neuroscience
Units: 1.0
(Not Offered 2017-2018)

PSYC B375 Movies and Madness: Abnormal Psychology Through Films

This writing-intensive seminar (maximum enrollment = 16 students) deals with critical analysis of how various forms of psychopathology are depicted in films. The primary focus of the seminar will be evaluating the degree of correspondence between the cinematic presentation and current research knowledge about the disorder, taking into account the historical period in which the film was made. For example, we will discuss how accurately the symptoms of the disorder are presented and how representative the protagonist is of people who typically manifest this disorder based on current research. We will also address the theory of etiology of the disorder depicted in the film, including discussion of the relevant intellectual history in the period when the film was made and the prevailing accounts of psychopathology in that period. Another focus will be how the film portrays the course of the disorder and how it depicts treatment for the disorder. This cinematic presentation will be evaluated with respect to current research on treatment for the disorder as well as the historical context of prevailing treatment for the disorder at the time the film was made. Prerequisite: PSYC B209.

Major Writing Requirement: Writing Intensive
Counts towards: Child and Family Studies; Film Studies; Health Studies
Units: 1.0
Instructor(s): Rescorla, L.
(Fall 2017)

PSYC B395 Psychopharmacology

A study of the role of drugs in understanding basic brain-behavior relations. Topics include the pharmacological basis of motivation and emotion; psychological models of psychopathology; the use of drugs in the treatment of psychiatric disorders such as anxiety, depression, and psychosis; and the psychology and pharmacology of drug addiction. Prerequisite: PSYC B218 or BIOL B202 or PSYC H217 or permission of instructor.

Counts towards: Health Studies; Neuroscience
Units: 1.0
Instructor(s): Thomas, E.
(Spring 2018)

SOCL B317 Comparative Social Policy: Cuba, China, US, Scandinavia

This course will examine different countries’ policy choices to address different societal challenges. Four societal types - socialist (Cuba), post-socialist (China), capitalist (US), and social-democratic (Scandinavia) - will be studied to help us understand how these different kinds of societies conceive of social problems and propose and implement attempted solutions. We will examine particular problems/solutions in four domains: health/sports; education; environment; technological development. As we explore these domains, we will attend to methodological issues involved in making historical and institutional comparisons

Counts towards: Education; Health Studies
Units: 1.0
(Not Offered 2017-2018)

SOCL B326 Feminist Perspectives on Hlth

Increasingly, an individual’s sense of self and worth as a citizen turn on their health identity. In this course we will draw on theories of gender, sexuality, medicalization, and biocitizenship to unravel the ways in which gender structures and medical institutions are mutually constitutive and to explore how this relationship, in turn, impacts individual identity. The course will take a global approach to feminist engagement with health issues with an emphasis on human rights and bodily autonomy.

Counts towards: Gender and Sexuality Studies; Health Studies
Units: 1.0
Instructor(s): Sledge, P.
(Spring 2018)

SOCL B342 Bodies in Social Life

Can social life exist without bodies? How can attention to the body influence our understanding of social processes of subjectivity, interaction, and practice? While the body has long been an “absent presence” in sociology, multiple approaches to theorizing and researching the body have emerged in recent decades. A sociological approach to the body and embodiment provides an opportunity to bridge the gap between everyday experience and analyses of broad social structures which can seem disconnected from daily life. In this course, we will examine the processes by which individual bodies are shaped by and, in turn, shape social life. Key questions to be explored include: how are bodies regulated by social forces; how do individuals perform the body and how does interactional context influence this performance; what is the meaning of the body in social life; and is there a “right” body? Suggested preparation: At least one course in the social sciences.

Counts towards: Gender and Sexuality Studies; Health Studies
Units: 1.0
Instructor(s): Sledge, P.
(Fall 2017)

SOWK B556 Caring for an Aging America: An Integrated Care Approach

The course broadly explores the biological, psychological, and social aspects of aging into middle and late adulthood for individual, families, communities, and society at large. This is accomplished through exploration of a.) the psychological and social developmental challenges of adulthood, b.) the core biological changes that accompany this stage of life, c.) research methodology for inquiry into aging, d.) the demands and impact on care givers and families, e.) psychopathology common in older adults, f.) social welfare policies and programs designed to ameliorate stress and promote well-being among older adults, and g.) the political, social, and academic discourse around the concept of aging successfully in the 21st century. Throughout the course, the experience of aging, and the ways in which this experience differs by race, ethnicity, gender, class, culture, and sexual orientation are considered. This course builds on theory,
knowledge, and skills of social work with older adults introduced in Foundation Practice and Human Behavior in the Social Environment I and III. This course is relevant to the clinical, management, and policy concentrations, in that it focuses on the concepts, theories, and policies central to effective assessment and intervention with older adults.

Counts towards: Health Studies
Units: 1.0
(Not Offered 2017-2018)

HEBREW AND JUDAIC STUDIES

Modern Hebrew language instruction is available at Bryn Mawr through the elementary level. Students may take Intermediate Modern Hebrew at the University of Pennsylvania. At Swarthmore College biblical Hebrew is offered in a two-semester sequence through the first-year level, and additional reading in Classical Jewish texts is available in directed reading, one-half-credit courses. At Haverford, Judaic Studies courses are offered by the Department of Religion. Bryn Mawr also offers several courses which complement Haverford’s offerings in Judaic Studies. All of these courses are listed in the Tri-Co Course Guide under the heading “Hebrew and Judaic Studies.”

Faculty
Grace Armstrong, Eunice M. Schenck 1907 Professor of French and Director of Middle Eastern Languages
Nechama Sataty, Visiting Assistant Professor

College Foreign Language Requirement
The College’s foreign language requirement may be satisfied by completing Hebrew 001 and 002 with a minimum grade of at least 2.0.

COURSES

HEBR B001 Elementary Hebrew
This year-long course is designed to teach beginners the skills of reading, writing, and conversing in Modern Hebrew. It will provide students with knowledge of the Hebrew writing system – its alphabet (Square letters for reading, cursive for writing) and vocalization – as well as core aspects of grammar and syntax. Diverse means will be utilized: Textbook, supplementary printed material, class conversations, presentations by students of dialogues or skits that they prepare in advance, and written compositions. This course, followed by Semesters 3 and 4 taken elsewhere, lays a foundation for reading of Modern Hebrew literary works.

Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): Sataty,N.
(Spring 2018)

HEBR B403 Supervised Work
Units: 1.0
(Fall 2017)

ITAL B211 Primo Levi, the Holocaust, and Its Aftermath
A consideration, through analysis and appreciation of his major works, of how the horrific experience of the Holocaust awakened in Primo Levi a growing awareness of his Jewish heritage and led him to become one of the dominant voices of that tragic historical event, as well as one of the most original new literary figures of post-World War II Italy. Always in relation to Levi and his works, attention will also be given to Italian women writers whose works are also connected with the Holocaust. Course is taught in English. An extra hour will be scheduled for those students taking the course for Italian or Romance Languages credit.

Approach: Cross-Cultural Analysis (CC)
Units: 1.0
(Not Offered 2017-2018)

POLS B283 Introduction to the Politics of the Modern Middle East and North Africa
This course is a multidisciplinary approach to understanding the politics of the region, using works of history, political science, political economy, film, and fiction as well as primary sources.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Middle Eastern & Islamic Studies
Units: 1.0
Instructor(s): Fenner,S.
(Spring 2018)

HISTORY

Students may complete a major or minor in History.

Faculty
Assef Ashraf, Post-Doctoral Fellow
Ignacio Gallup-Díaz, Associate Professor of History
Madhavi Kale, Chair and Professor of History
Anita Kurimay, Assistant Professor of History
Kalala Ngalamulume, Associate Professor of Africana Studies and History, Co-Director of International Studies, and Co-Director of Health Studies (spring)
Elly Truitt, Associate Professor of History
Sharon Ullman, Professor of History

A primary aim of the Department of History is to deepen students’ sense of time as a factor in cultural diversity and change. Our program of study offers students the opportunity to experience
the past through attention to long-range questions, comparative history, and complex causation. Students learn about particular periods, cultures, and historical moments alongside mastering the ability to consider multiple viewpoints, aggregate data, articulate research questions, marshal evidence, and construct arguments, and have opportunities to engage with digital humanities and public history.

The department's 100-level courses, centered upon specific topics within the instructor's field of expertise, introduce students to a wide array of subjects and themes, and are open to all students, regardless of any prior instruction in History. In the 200-level courses, the department offers students the opportunity to pursue interests in specific cultures, regions, policies, or societies, and enables them to experience a broad array of approaches to history through attention to primary sources, introduction to historiography, and mastery of chronology.

The department's 300-level courses build on students' knowledge gained in 200-level classes, and provide opportunities to explore topics at greater depth in a seminar setting. 300-level courses offer students opportunities to undertake significant intellectual projects based on research in primary and secondary sources.

Major Requirements

Eleven courses are required for the History major, and two—Introduction to Historical Methods (HIST 299), and Approaches to Historical Praxis (HIST 398)—must be taken at Bryn Mawr. In HIST 299, students will be introduced to different historical frameworks and historiographic debates that animate the field. (Majors taking History 299 will fulfill the College's Writing Intensive requirement.) It is intended to prepare advanced sophomores and juniors to do advanced work at the 300-level and in some advanced 200-level courses. In HIST 398, which must be taken in Fall of senior year, the students complete a series of focused assignments designed to give them an opportunity to practice different ways of "doing history." Students will work with professors as well as other resources at the College (archivists, librarians, digital technologists, Praxis Program, etc.) to articulate a historical question, research it, and produce a final project. This final project may be a term paper, but might also take the form of a digital project, an exhibit, a short film, a Praxis internship in a museum or archive, or something else. Upon successful completion of History 398, students may, if they wish, continue their project into a second semester. This is not required, but if students wish to do so, the department will authorize and provide support for an independent study in order to facilitate that ongoing work.

The remaining nine history courses may range across fields or concentrate within them, depending on how a major's interests develop. Of these, at least two must be seminars at the 300 level offered by the Departments of History at Bryn Mawr, Haverford or Swarthmore Colleges or the University of Pennsylvania. (It is strongly recommended that at least one of these advanced courses be taken with Bryn Mawr history faculty). At least one course, at any level, must concentrate on the period before 1800.

Only two 100-level courses may be counted toward the major. Credit toward the major is not given for either the Advanced Placement examination or the International Baccalaureate.

Honors

Majors with a cumulative GPA of at least 3.0 (general) and 3.6 (history) at the end of their senior year qualify for departmental honors.

Minor Requirements

The requirement for the minor is six courses, at least four of which must be taken in the Bryn Mawr Department of History, and include one course at any level that deals with the period before 1800, at least one 300-level course within the department, and two additional history courses within the department. No more than two course at the 100-level may count toward the minor.

COURSES

HIST B101 The Historical Imagination

Explores some of the ways people have thought about, represented, and used the past across time and space. Introduces students to modern historical practices and debates through examination and discussion of texts and archives that range from scholarly monographs and documents to monuments, oral traditions, and other media.

Approach: Critical Interpretation (CI)

Units: 1.0

Instructor(s): Kale, M.

(Fall 2017)

HIST B102 Introduction to African Civilizations

The course is designed to introduce students to the history of African and African Diaspora societies, cultures, and political economies. We will discuss the origins, state formation, external contacts, and the structural transformations and continuities of African societies and cultures in the context of the slave trade, colonial rule, capitalist exploitation, urbanization, and westernization, as well as contemporary struggles over authority, autonomy, identity and access to resources. Case studies will be drawn from across the continent.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)

Counts towards: Africana Studies; Gender and Sexuality Studies; International Studies

Units: 1.0

Instructor(s): Ngamulume, K.

(Fall 2017)

HIST B123 The Early Medieval World

The first of a two-course sequence introducing medieval European history. The chronological span of this course is from the early 4th century and the Christianization of the Roman Empire to the early 10th century and the disintegration of the Carolingian Empire. This course number was previously HIST B223.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)

Counts towards: Middle Eastern & Islamic Studies

Units: 1.0

Instructor(s): Truitt, E.

(Fall 2017)

HIST B124 High Middle Ages

This course will cover the second half of the European Middle Ages, often called the High and Late Middle Ages, from roughly 1000-1400. The course has a general chronological framework, and is based on important themes of medieval history. These include feudalism and the feudal economy; the social transformation of the millennium; monastic reform; the rise of the papacy; trade, exchange, and exploration; urbanism and the growth of towns. The course number was previously HIST B224.
HIST B125 Amerindians, Europeans, and Slaves: Early Modern Colonialism

The course explores the ways in which peoples, goods, and ideas from Africa, Europe, and the Americas were brought together within colonial systems to form an interconnected Atlantic World. The course charts the manner in which an integrated system emerged in the Americas in early modern period, rather than to treat Atlantic History as nothing more than an expanded version of North America, Caribbean, or Latin American history. The lived experiences of indigenous peoples, slaves, and free people of color are central topics and themes of the course.

Approach: Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

HIST B127 Indigenous Leaders 1492-1750

Studies the experiences of indigenous men and women who exercised local authority in the systems established by European colonizers. In return for places in the colonial administrations, these leaders performed a range of tasks. At the same time they served as imperial officials, they exercised “traditional” forms of authority within their communities, often free of European presence. These figures provide a lens through which early modern colonialism is studied.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Latin American, Iberian and Latina/o Studies; Peace, Justice and Human Rights
Units: 1.0
Instructor(s): Gallup-Díaz, I.
(Spring 2018)

HIST B128 Crusade, Conversion and Conquest

A thematic focus course exploring the nature of Christian religious expansion and conflict in the medieval period. Based around primary sources with some background readings, topics include: early medieval Christianity and conversion; the Crusades and development of the doctrines of “just war” and “holy war”; the rise of military order such as the Templars and the Teutonic Kings; and later medieval attempts to convert and colonize Eastern Europe.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Middle Eastern & Islamic Studies
Units: 1.0
Instructor(s): Truitt, E.
(Spring 2018)

HIST B129 The Religious Conquest of the Americas

The course examines the complex aspects of the European missionization of indigenous people, and explores how two traditions of religious thought/practice came into conflict. Rather than a transposition of Christianity from Europe to the Americas, something new was created in the contested colonial space.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B156 The Long 1960s

The 1960s has had a powerful effect on recent US History. But what was it exactly? How long did it last? And what do we really mean when we say “The Sixties”? This term has become so potent and loaded for so many people from all sides of the political spectrum that it’s almost impossible to separate fact from fiction, myth from memory. We are all the inheritors of this intense period in American history but our inheritance is neither simple nor entirely clear. Our task this semester is to try to pull apart the meaning as well as the legend and attempt to figure out what “The Sixties” is (and what it isn’t) and try to assess its long term impact on American society. This course satisfies the History Major’s 100 level requirement.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B200 The Atlantic World 1492-1800

The aim of this course is to provide an understanding of the way in which peoples, goods, and ideas from Africa, Europe, and the Americas came together to form an interconnected Atlantic World system. The course is designed to chart the manner in which an integrated system was created in the Americas in the early modern period, rather than to treat the history of the Atlantic World as nothing more than an expanded version of North American, Caribbean, or Latin American history.

Approach: Inquiry into the Past (IP)
Counts towards: Africana Studies; Latin American, Iberian and Latina/o Studies; International Studies; Peace, Justice and Human Rights
Units: 1.0
(Not Offered 2017-2018)

HIST B209 Introduction to the History of Medicine

This course provides an introduction to the history of medicine, from Hippocrates to the Black Plague to contemporary struggles to combat HIV/AIDS. It examines topics including epidemic disease, the processes of medical knowledge production, the hospital and the rise of clinical medicine, and issues of hygiene and public health. We will focus on the intersecting social, political, and cultural histories of medicine, addressing themes of race, gender, and constructions of biological difference; the history of the body; professionalization; and medical ethics. Disrupting straightforward narratives of medical progress, this course will focus on the contingencies involved in medical knowledge production and situate elements of historical medical practice, for example humoral theory or polypharmacy, within their appropriate historical context.

Approach: Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies; Health Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B210 From Empire to Nation-State in the Middle East

The aim of this course is to provide an introduction to the history of the Middle East from the late 18th century until the present. Islam and the classical Ottoman period will be discussed to provide the requisite background for the modern period. From the late Ottoman period onward, we will consider the impact of a series of events - from the incorporation of the Empire into a global economic system, to the rise of ethnic and national politics, the Ottoman reform movement, colonial expansion, the
dissolution of the Empire, the emergence of the modern system of states, the Cold War, and the collapse of Soviet power. We will conclude with a discussion of the Arab Spring. Emphasis will be placed on links, continuity, and transitions during this two-hundred year period.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Middle Eastern & Islamic Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B212 Pirates, Travelers, and Natural Historians: 1492-1750
In the early modern period, conquistadors, missionaries, travelers, pirates, and natural historians wrote interesting texts in which they tried to integrate the New World into their existing frameworks of knowledge. This intellectual endeavor was an adjacent to the physical conquest of American space, and provides a framework though which we will explore the processes of imperial competition, state formation, and indigenous and African resistance to colonialism.

Approach: Inquiry into the Past (IP)
Counts towards: Africana Studies; Environmental Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Gallup-Diaz,I.
(Fall 2017)

HIST B215 Europe and the Other 1492-1800
This course will introduce students to processes through which Europeans created systems and categories of difference into which they placed Indigenous, African, and Asian peoples between the years 1492 and 1815. Topics of study include Indigenous leaders, slave and free communities, and cultural mediators on colonial frontiers.

Approach: Inquiry into the Past (IP)
Counts towards: Africana Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Gallup-Diaz,I.
(Fall 2017)

HIST B218 Memories, Memorials, and Representations of World War I
The first World War was a cataclysmic event that took millions of lives, shifted national boundaries, established new nations, and negatively-impacted others. After its conclusion, the events of the War became personally and nationally memorialized across Europe -- a process that continues to this day. The course explores the various social, cultural, and historical factors that influence how (and when) the events and impacts of the war are remembered in modern Europe.

Approach: Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

HIST B226 Topics in 20th Century European History
This is a topics course. Course content varies.

Approach: Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Kurimay,A.
(Fall 2017)

Spring 2018: Holocaust: History and Politics of Commemoration. This course is an examination of both the persecution and mass murder carried out by the Nazi German regime between 1933 and 1945 and how subsequent generations have tried to make sense of what has come to be known as the Holocaust. What role did ideologies, such as antisemitism, nationalism, and racism play in shaping policies of exclusion in Germany and elsewhere in Europe? How were policies of exclusion transformed into a systematic program of murder? The mass murder of European Jews will be the central focus of this course. We will, however, also discuss programs of discrimination and murder carried out against other groups (e.g. Roma, the disabled, homosexuals and Poles) and attempt to place these phenomena within the context of Nazi German policy. The later part of the class will consider how subsequent generations commemorated and portrayed the memory of the Holocaust in both official and popular forms.

HIST B231 Medicine, Magic & Miracles in the Middle Ages
A lecture and discussion course on the therapeutic systems (humoral theory, faith healing, natural magic), the medical marketplace, and the social context for understanding health and disease in the medieval period. Topics covered include Greek, Arabic, and Latin medical textual traditions, the rise of hospitals and public health, and the Black Death.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Health Studies
Units: 1.0
Instructor(s): Truitt,E.
(Fall 2017)

HIST B233 Health and Disability in the U.S.
This course examines how scientific, medical, and cultural discourses have shaped the construction of health and disability in U.S. history. Paying attention to the ways in which health and disability are constructed in relationship to other social categories such as race, class, gender, sexuality, and nationality, we will examine the processes through which certain bodies are defined as healthy, useful and productive while others are marked as diseased, defective, and socially undesirable. Topics will include eugenics, public health, immigration policies, birth control and sterilization, the women’s health movement, AIDS activism, disability rights, mental health, obesity, biological citizenship, and health consumerism.

Approach: Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies; Health Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B234 An Introduction to Middle Eastern History
This course serves as an introduction to the history of the modern Middle East. We will also explore the narratives and debates that have shaped the field of Middle East history. Topics include orientalism, colonialism, political reform, social, cultural, and intellectual movements, nationalism, and the Cold War. Readings will be drawn from the fields of history, anthropology, politics, and literature.

Approach: Inquiry into the Past (IP)
Counts towards: Middle Eastern & Islamic Studies
Units: 1.0
Instructor(s): Ashraf,A.
(Fall 2017)
HIST B236 African History since 1800

The course analyzes the history of Africa in the last two hundred years in the context of global political economy. We will examine the major themes in modern African history, including the 19th-century state formation, expansion, or restructuration; partition and resistance; colonial rule; economic, social, political, religious, and cultural developments; nationalism; post-independence politics, economics, and society, as well as conflicts and the burden of disease. The course will also introduce students to the sources and methods of African history.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Africana Studies; International Studies
Units: 1.0
Instructor(s): Ngalamulume,K.
(Spring 2018)

HIST B237 Topic: Modern African History

This is a topics course. Course content varies

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Africana Studies; Gender and Sexuality Studies
Units: 1.0
Instructor(s): Ngalamulume,K.

Fall 2017: Urban History.

Spring 2018: African Economic Development. This course examines the political economy of African development in historical perspectives. We will address the following questions: Why is the African continent, which is rich in natural resources, so poor? What are the causes of poverty in Africa? The course will analyze the environmental, economic, political, and historical factors that have affected the development of Africa. We will discuss the impact of slavery, colonial exploitation, foreign interventions, foreign aid, trade, and democratic transitions on African development. We will also explore the theories of development and underdevelopment.

HIST B238 From Bordellos to Cybersex History of Sexuality in Modern Europe

This course is a detailed examination of the changing nature and definition of sexuality in Europe from the late nineteenth century to the present. Throughout the semester we critically examine how understandings of sexuality changed—from how it was discussed and how authorities tried to control it to how the practice of sexuality evolved. Focusing on both discourses and lived experiences, the class will explore sexuality in the context of the following themes: prostitution and sex trafficking, the rise of medicine with a particular attention to sexology, psychiatry and psychoanalysis; the birth of the homo/hetero/bisexual divide; the rise of the “New Woman”; abortion and contraception; the “sexual revolution” of the 60s; pornography and consumerism; LGBTQ activism; concluding with considering sexuality in the age of cyber as well as genetic technology. In examining these issues we will question the role and influence of different political systems and war on sexuality. By paying special attention to the rise of modern nation-states, forces of nationalism, and the impacts of imperialism we will interrogate the nature of regulation and experiences of sexuality in different locations in Europe from the late nineteenth century to the present.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B241 America 1890-1945

This course focuses on the first half of the twentieth century in the United States. An intense period of violent struggle over race, immigration, labor, income inequality, gender, and the very survival of American democracy in the face of global fascism, the early years of the twentieth century set the stage for the American society of today. One cannot fully understand what has happened to the U.S. right now without spending time in the first 40 years of the twentieth century.

Approach: Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Ullman,S.
(Fall 2017)

HIST B242 American Politics and Society: 1945 to the Present

How did we get here? This course looks at the stunning transformation of America after WWII. From a country devastated by economic crisis and wedded to isolationism prior to the war, America turned itself into an international powerhouse. Massive grass roots resistance forced the United States to abandon its system of racial apartheid, to open opportunities to women, and to reinvent its very definition as it incorporated immigrants from around the world. Simultaneously, American music and film broke free from their staid moorings and permanently altered international culture. Finally, through the “War on Terror”, starting after 9/11, America initiated an aggressive new foreign policy that has shattered traditional rules of warfare and reoriented global politics. We will explore the political, social, and cultural factors that have driven modern American history. Inquiry into the Past (IP)

Approach: Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Ullman,S.
(Spring 2018)

HIST B243 Topics: Atlantic Cultures

This is a topics course. Course content varies.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Africana Studies
Units: 1.0
Instructor(s): Gallup-Díaz,I.

Spring 2018: Maroon Societies

HIST B245 Focus: Topics in Modern US History

This is a topics course in 20th century America social history. Topics vary by half semester

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies; Museum Studies; Praxis Program
Units: 1.0
Instructor(s): Vider,S.
(Fall 2017)

HIST B249 History of Global Health

This course examines the interrelated histories of public health, international health, and global health from the late 18th to the 21st centuries as part of a broader history of epidemics, empire, and global mobility. We will pay particular attention this semester to the use of architectural and spatial strategies for managing crises of contagion, disaster, and epidemic. The architectural
spaces to be examined will include urban-based hospitals, public health infrastructure, and quarantine buildings as well as mobile architectural technologies such as incubators, wartime pop-up surgical tents, and floating hospitals in both Western and non-Western environments. The course will trace the role of health and medicine in mediating the relationships between metropolis and colony, state and citizen, research practice and human subject.

Approach: Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies; Health Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B252 American Popular Culture and Politics: 1900-present

From dance halls and silent film to comic books and music videos, popular culture has been central to struggles over the meaning of national belonging, “freedom,” and democracy. Rather than drawing a distinction between pop culture as a matter of private consumption and the more “serious” and public arena of politics, this course will consider the role of popular culture in shaping the nation’s political history, and in providing a lens to critically evaluate and rethink that history today. Exploring a wide range of popular cultural forms including amusement parks, vaudeville, fashion, music, film, photography, newspapers, and television, we will examine how popular culture has not only reflected but actively shaped the American political landscape from the early twentieth century to the present.

Approach: Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B257 British Empire I: Capitalism and Slavery

Focusing on the Atlantic slave trade and the slave plantation mode of production, this course explores English colonization, and the emergence and the decline of British Empire in the Americas and Caribbean from the 17th through the late 20th centuries. It tracks some of the intersecting and overlapping routes—and roots—connecting histories and politics within and between these “new” world locations. It also tracks the further and proliferating links between developments in these regions and the histories and politics of regions in the “old” world, from the north Atlantic to the South China sea.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Kale, M.
(Fall 2017)

HIST B258 British Empire: Imagining Indias

This course considers ideas about and experiences of “modern” India, i.e., India during the colonial and post-Independence periods (roughly 1757-present). While “India” and “Indian history” along with “British empire” and “British history” will be the ostensible objects of our consideration and discussions, the course proposes that their imagination and meanings are continually mediated by a wide variety of institutions, agents, and analytical categories (nation, religion, class, race, gender, to name a few examples). The course uses primary sources, scholarly analyses, and cultural productions to explore the political economies of knowledge, representation, and power in the production of modernity.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: International Studies
Units: 1.0
Instructor(s): Kale, M.
(Spring 2018)

HIST B264 Passages from India: 1800-Present

This course explores the histories and effects of migration from the Indian subcontinent to far-flung destinations across the globe. It starts with the circular migrations of traders, merchants, and pilgrims in the medieval period from the Indian subcontinent to points east (in southeast Asia) and west (eastern Africa). However, the focus of the course is on modern migrations from the subcontinent, from the indentured labor migrations of the British colonial period (to Africa, the Caribbean, and the South Pacific) to the post-Independence emigrations from the new nations of the subcontinent to Britain, Australia, New Zealand, Canada, and the United States.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

HIST B265 Colonial Encounters in the Americas

The course explores the confrontations, conquests and accommodations that formed the “ground-level” experience of day-to-day colonialism throughout the Americas. The course is comparative in scope, examining events and structures in North, South and Central America, with particular attention paid to indigenous peoples and the nature of indigenous leadership in the colonial world of the 18th century.

Approach: Inquiry into the Past (IP)
Counts towards: Africana Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B274 Focus: Topics in Modern US History

This is a topics course in 20th century America social history. Topics vary by half semester

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies; Museum Studies; Praxis Program
Units: 0.5
(Not Offered 2017-2018)

HIST B284 Movies and America

Movies are one of the most important means by which Americans come to know – or think they know—their own history. This class examines the complex cultural relationship between film and American historical self-fashioning.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies; Film Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B289 History of Modern France

From the revolutionary storming of the Bastille in 1789 to the famous 1968 student protests at the Sorbonne in Paris, popular uprisings have played a central role in the formation of modern France. This course explores themes of revolution, violence, nationalism, and imperialism as it traces the turbulent political history of France through five republics, two Empires, one Commune, and a vast network of overseas colonies. It also explores social and cultural transformations that had a profound impact on French society, including art and music, the rise of mass politics, the Universal Exhibitions, changing gender norms,
popular culture, and modernity. Examining the history of France beyond the French “hexagon,” this course situates France as a colonial nation-state, enmeshed in an increasingly globalized world.

Approach: Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

HIST B292 Women in Britain since 1750
Focusing on contemporary and historical narratives, this course explores the ongoing production, circulation and refraction of discourses on gender and nation as well as race, empire and modernity since the mid-18th century. Texts will incorporate visual material as well as literary evidence and culture and consider the crystallization of the discipline of history itself.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B299 Exploring History
This course is designed to introduce history majors to the debates governing the production of historical knowledge which dominates the discipline. Although undergraduates often read history monographs as finished and “complete” projects, in fact each of these works is always deeply contested - both in terms of method and product. The goal of this course is to not only reinforce habits of critical textual reading but to provide students the tools to critically “read” the entire project of writing history. Required for History Majors and Minors.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Major Writing Requirement: Writing Intensive
Units: 1.0
Instructor(s): Kale,M.
(Spring 2018)

HIST B303 Topics in American History
This is a topics course. Course content varies. Recent topics have included medicine, advertising, and history of sexuality. Current topic description: Flirtations with Autocracy in American History. With the word fascism being bandied about these days, this course will take a look at various movements urging autocracy that have periodically swept through the American landscape. This course will not be a comprehensive survey but instead, through the use of history, novels, and films, sample the figures and movements that have drawn America towards absolutist tyranny at key moments in its past.

Units: 1.0
Instructor(s): Ullman,S.
(Fall 2017)

HIST B307 Topics in European Cultural History
This is a topics course. Course content varies.
Units: 1.0
(Not Offered 2017-2018)

HIST B319 Topics in Modern European History
This is a topics course. Course content varies.
Units: 1.0
Instructor(s): Kurimay,A.

Fall 2017: The History of the Far Right Movements in Europe.

Spring 2018: Growing Up in Communism. This course explores European communism as a lived experience from the 1930s until the disintegration of the Soviet Union in 1991. It examines various aspects of life in the socialist Eastern Block ranging from education, youth culture, Communist Party life, law and policing to leisure, consumerism, disability, sex and romance. Beyond looking at how life was lived during communism the course will also ask how life under communism has been remembered, represented, and understood since the end of the Cold War.

HIST B325 Topics in Social History
This a topics course that explores various themes in American social history. Course content varies. Current topic description: This course explores how the American Civil War, fought over the issue of maintaining race based slavery, has become enshrined with a host of contested meanings about race and citizenship to generations of Americans ever since the Confederacy surrendered at Appomattox. During this semester we will explore some of those contests and address the Civil War’s intense power in the American psyche.

Units: 1.0
Instructor(s): Ullman,S.
(Spring 2018)

HIST B327 Topics in Early American History
This is a topics course. Course content varies.

Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B332 Higher Education for Women: Bryn Mawr and Beyond
This course will explore the history of women’s higher learning in the United States from its origins in the antebellum female seminary movement through debates about coeducation and the meaning of single-sex education in the second half of the twentieth century. Drawing on the rich history of Bryn Mawr College as our primary case study, we will focus on the expansion of social and professional opportunities for women, the workings of gender difference within American educational institutions, and the experiences of diverse alumnae/i, faculty, and staff. Over the course of the semester, we will gain experience in archives and special collections research, oral history, and digital methods, and contribute to the building of contemporary collections documenting Bryn Mawr campus life. Prerequisite: Junior or Senior Status.

Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

Spring 2018: Public History and Praxis

HIST B351 Intoxicated Identities: Alcohol Consumption in Mod Mideast
This class aims to show not only that people in the Middle East drink, is that irrefutable, but that the reasons why they did so provide an interesting prism through which to view the history of the region. It will show that the alcohol consumption habits of residents of the Middle East between the years 600 and the present can serve as an excellent entry point for the discussion of many important historiographical issues including constructions of masculinity and femininity, identity formation, youth culture, leisure, and class formation.
Counts towards: Middle Eastern & Islamic Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B357 Topics in British Empire
This is a topics course. Topics vary.
Units: 1.0
(Not Offered 2017-2018)

HIST B364 Magical Mechanisms
A reading and research seminar focused on different examples of artificial life in medieval cultures. Primary sources will be from a variety of genres, and secondary sources will include significant theoretical works in art history, critical theory and science studies. Prerequisite: at least one course in medieval history, or the permission of the instructor.

HIST B339 The Making of the African Diaspora 1450-1800
This course explores the emergence, development, and challenges to the ideologies of whiteness and blackness, that have been in place from the colonial period to the present. Through the reading of primary and secondary sources, we will explore various ways through which enslaved people imagined freedom, personal rights, community membership, and some of the paths they created in order to improve their experiences and change the social order. In an attempt to have a comparative approach, we will look at particular events and circumstances that took place in few provinces in the Americas, with an emphasis on Latin America and the Caribbean. The course will also look at the methodological challenges of studying and writing history of people who in principle, were not allowed to produce written texts. Throughout, we will identify and underscore the contribution that people of African descent have made to the ideas of rights, freedom, equality, and democracy.

Counts towards: Africana Studies; Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B368 Topics in Medieval History
A reading and research-based seminar on the intellectual and cultural history of medieval magic, including natural and demonic magic, astral science, alchemy, and other forms of “the occult sciences.” Primary sources will be from a variety of genres, including visual culture, and secondary sources will include significant works in philosophy, religious studies, and medieval historiography. Prerequisite: at least one course in medieval history, or the permission of the instructor.

Units: 1.0
Instructor(s): Truitt, E.
(Spring 2018)

HIST B369 Topics in Medieval History
This course will explore piracy in the Americas in the period 1550-1750. We will investigate the historical reality of pirates and what they did, and the manner in which pirates have entered the popular imagination through fiction and films. Pirates have been depicted as lovable rogues, anti-establishment rebels, and enlightened multiculturalists who were skilled in dealing with the indigenous and African peoples of the Americas. The course will examine the facts and the fictions surrounding these important historical actors.

Major Writing Requirement: Writing Intensive
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Gallup-Diaz, I.
(Spring 2018)

HIST B373 Topics: History of the Middle East
This is a topics course. Course content varies. Current topic description: Gender and Sexuality in the Middle East: An exploration of how the histories of gender and sexuality of the Middle East have been written. The course will highlight continuities and changes in norms, practices, and identities from the early modern to the modern periods. Topics include law, crime, sociability, visual culture, colonialism, nationalism, and medicine.

Units: 1.0
Instructor(s): Ashraf, A.
(Spring 2018)

HIST B371 Topics in Atlantic History: The Early Modern Pirate in Fact and Fiction
This course will explore piracy in the Americas in the period 1550-1750. We will investigate the historical reality of pirates and what they did, and the manner in which pirates have entered the popular imagination through fiction and films. Pirates have been depicted as lovable rogues, anti-establishment rebels, and enlightened multiculturalists who were skilled in dealing with the indigenous and African peoples of the Americas. The course will examine the facts and the fictions surrounding these important historical actors.

Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Gallup-Diaz, I.
(Spring 2018)

HIST B398 Approaches to Historical Praxis
This course is designed to provide students the opportunity to consider different ways of “doing history.” In conversation with the professor and using the resources of the College (archivists, librarians, digital specialists, Praxis Program) students will articulate a historical question, research it, and produce a final project. This project may be a final research paper, but might also take the more public form of a digital project, an exhibit, a short film, or an internship in a local museum, oral history center, or archive.
Prerequisite: Senior history major.
Units: 1.0
Instructor(s): Kurimay, A.
(Fall 2017)
HIST B403 Supervised Work
Optional independent study, which requires permission of the instructor and the major adviser.
Units: 1.0
(Fall 2017)

HIST B425 Praxis III: Independent Study
Praxis III courses are Independent Study courses and are developed by individual students, in collaboration with faculty and field supervisors. A Praxis course is distinguished by genuine collaboration with fieldsite organizations and by a dynamic process of reflection that incorporates lessons learned in the field into the classroom setting and applies theoretical understanding gained through classroom study to work done in the broader community.
Counts towards: Praxis Program
Units: 1.0
(Not Offered 2017-2018)

ARCH B244 Great Empires of the Ancient Near East
A survey of the history, material culture, political and religious ideologies of, and interactions among, the five great empires of the ancient Near East of the second and first millennia B.C.E.: New Kingdom Egypt, the Hittite Empire in Anatolia, the Assyrian and Babylonian Empires in Mesopotamia, and the Persian Empire in Iran.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Middle Eastern & Islamic Studies
Units: 1.0
(Not Offered 2017-2018)

BIOL B214 The History of Genetics and Embryology
This course provides a general history of genetics and embryology in Germany, Britain and the United States from the late 19th to the mid-20th century. The course will include a focus on the role that women scientists and technicians played in the development of these sub-disciplines. We will look at the lives of well known and lesser-known individuals, asking how factors such as their educational experiences and mentor relationships influenced the roles these women played in the scientific enterprise. We will also examine specific scientific contributions in historical context, requiring a review of core concepts in genetics and developmental biology.
Approach: Inquiry into the Past (IP); Scientific Investigation (SI)
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Davis,G.
(Spring 2018)

CITY B250 Topics: Growth & Spatial Organization of the City
This is a topics course. Course content varies.
Approach: Inquiry into the Past (IP)
Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)

CITY B254 History of Modern Architecture
A survey of the development of modern architecture since the 18th century.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Lee,M.
(Fall 2017)

CITY B278 American Environmental History
This course explores major themes of American environmental history, examining changes in the American landscape, the history of ideas about nature and the interaction between the two. Students will study definitions of nature, environment, and environmental history while investigating interactions between Americans and their physical worlds.
Approach: Inquiry into the Past (IP)
Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)

CITY B329 Advanced Topics in Urban Environments
This is a topics course. Course content varies.
Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)

CSTS B205 Greek History
This course traces the rise of the city-state (polis) in the Greek-speaking world beginning in the seventh-century BC down to its full blossoming in classical Athens and Sparta. Students should gain an understanding of the formation and development of Greek identity, from the Panhellenic trends in archaic epic and religion through its crystallization during the heroic defense against two Persian invasions and its subsequent disintegration during the Peloponnesian War. The class will also explore the ways in which the evolution of political, philosophical, religious, and artistic institutions reflect the changing socio-political circumstances of Greece. The latter part of the course will focus on Athens in particular: its rise to imperial power under Pericles, its tragic decline from the Peloponnesian War and its important role as a center for the teaching of rhetoric and philosophy. Since the study of history involves the analysis, evaluation, and synthesis of the sources available for the culture studied, students will concentrate upon the primary sources available for Greek history, exploring the strengths and weakness of these sources and the ways in which their evidence can be used to create an understanding of ancient Greece. Students should learn how to analyze and evaluate the evidence from primary texts and to synthesize the information from multiple sources in a critical way.
Approach: Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

CSTS B207 Early Rome and the Roman Republic
This course surveys the history of Rome from its origins to the end of the Republic, with special emphasis on the rise of Rome in Italy and the evolution of the Roman state. The course also examines the Hellenistic world in which the rise of Rome takes place. The methods of historical investigation using the ancient sources, both literary and archaeological, are emphasized.
Approach: Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)
CSTS B208 The Roman Empire
Imperial history from the principate of Augustus to the House of Constantine with focus on the evolution of Roman culture and society as presented in the surviving ancient evidence, both literary and archaeological.

Approach: Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Scott, R.
(Spring 2018)

CSTS B213 Persia and The Greeks
This Course explores interactions between Greeks and Persians in the Mediterranean and Near East from the Archaic Period to the Hellenistic Age. Through a variety of sources (from Greek histories, tragedies, and ethnography, to Persian royal inscriptions and administrative documents and the Hebrew Bible), we shall work to illuminate the interface between these two distinct yet complementary cultures. Our aim will be to gain familiarity not only with a general narrative of Greco-Persian history, from the foundation of the Achaemenid Empire in the middle of the sixth century BCE to the Macedonian conquest of Persia some 250 years later, but also with the materials (archaeological, numismatic, epigraphical, artistic, and literary) from which we build such a narrative. At the same time, we shall work to understand how contact between Persia and the Greeks in antiquity has influenced discourse about the opposition between East and West in the modern world. 

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

CSTS B230 Food and Drink in the Ancient World
This course explores practices of eating and drinking in the ancient Mediterranean world both from a socio-cultural and environmental perspective. Since we are not only what we eat, but also where, when, why, with whom, and how we eat, we will examine the wider implications of patterns of food production, preparation, consumption, availability, and taboos, considering issues like gender, health, financial situation, geographical variability, and political status. Anthropological, archaeological, literary, and art historical approaches will be used to analyze the evidence and shed light on the role of food and drink in ancient culture and society. In addition, we will discuss how this affects our contemporary customs and practices and how our identity is still shaped by what we eat. 

Approach: Cross-Cultural Analysis (CC)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

EALC B235 Topics in Chinese History and Culture
This is a topics course. Course content varies.

Units: 1.0
(Not Offered 2017-2018)

EALC B347 Medievalisms
This course assesses how the "Middle Ages" has been and continues to be constructed as a period of history, an object of inquiry, and a category of analysis. It considers how the past is formulated and called upon to conduct the ideological and cultural work of the present, and it reads historical documents and literary texts in dialogue with one another. Suggested Preparation: At least one 200-level course in any area of medieval studies (although more than one course is preferred), or by permission of the instructors. Additionally, this course is not open to students who took ENGL/HIST 246 in 2013.

Units: 1.0
(Not Offered 2017-2018)

ENGL B347 Medievalisms
This course assesses how the “Middle Ages” has been and continues to be constructed as a period of history, an object of inquiry, and a category of analysis. It considers how the past is formulated and called upon to conduct the ideological and cultural work of the present, and it reads historical documents and literary texts in dialogue with one another. Suggested Preparation: At least one 200-level course in any area of medieval studies (although more than one course is preferred), or by permission of the instructors. Additionally, this course is not open to students who took ENGL/HIST 246 in 2013.

Units: 1.0
(Not Offered 2017-2018)

ENGL B359 Dead Presidents
Framed by the extravagant funerals of Presidents Washington and Lincoln, this course explores the cultural importance of the figure of the President and the Presidential body, and of the 19th-century preoccupations with death and mourning, in the U.S.
Instructor(s): Fenner, S.
(Spring 2018)

**POLS B378 Origins of American Constitutionalism**

This course will explore some aspects of early American constitutional thought, particularly in the periods immediately preceding and following the American Revolution. The premise of the course is that many of the questions that arose during that period—concerning, for example, the nature of law, the idea of sovereignty, and the character of legitimate political authority—remain important questions for political, legal, and constitutional thought today, and that studying the debates of the revolutionary period can help sharpen our understanding of these issues.

Prerequisites: sophomore standing and previous course work in American history, American government, political theory, or legal studies.

Units: 1.0
(Not Offered 2017-2018)

**SPAN B323 Memoria y Guerra Civil**

A look into the Spanish Civil War and its wide-ranging international significance as both the military and ideological testing ground for World War II. This course examines the endurance of myths related to this conflict and the cultural memory it has produced along with the current negotiations of the past that is taking place in democratic Spain. Prerequisite: at least one SPAN 200-level course.

Counts towards: Latin American, Iberian and Latina/o Studies

Units: 1.0
(Not Offered 2017-2018)

**HISTORY OF ART**

Students may complete a major or minor in History of Art.

**Faculty**

David Cast, Professor of History of Art

Matthew C. Feliz, Lecturer

Christiane Hertel, Professor Emeritus of History of Art and Katharine McBride Professor

Sylvia Houghteling, Assistant Professor of History of Art

Homay King, Professor of History of Art and the Eugenia Chase Guild Chair in the Humanities

Steven Levine, Professor of History of Art and the Leslie Clark Professor in the Humanities (on leave semesters I and II)

Lisa Saltzman, Chair and Professor of History of Art and the Andrew W. Mellon Foundation Chair in the Humanities

Jie Shi, Assistant Professor of History of Art

Alicia Walker, Associate Professor of History of Art on the Marie Neuberger Fund for the Study of Arts and Director of the Middle Eastern Studies Program

The curriculum in History of Art immerses students in the study of visual culture. Structured by a set of evolving disciplinary concerns, students learn to interpret the visual through methodologies dedicated to the historical, the material, the critical, and the theoretical. Majors are encouraged to
supplement courses taken in the department with history of art courses offered at Haverford, Swarthmore, and the University of Pennsylvania. Majors are also encouraged to study abroad for a semester of their junior year.

Major Requirements

The major requires ten units, approved by the major adviser. A usual sequence of courses would include at least one 100-level “critical approaches” seminar, which also fulfills the departmental writing intensive requirement, four 200-level lecture courses, three 300-level seminars, and senior conference I and II in the fall and spring semesters of the senior year. In the course of their departmental studies, students are strongly encouraged to take courses across media and areas, and in at least three of the following fields of study: Ancient and Medieval, Renaissance and Baroque, Modern and Contemporary, Film, and Global/Non-Western.

With the approval of the major adviser, courses in fine arts or with significant curricular investment in visual studies may be counted toward the fulfillment of the distribution requirements, such as courses in ancient art offered by the Classical and Near Eastern Archaeology department or in architecture by the Growth and Structure of Cities department. Similarly, courses in art history taken abroad or at another institution in the United States may be counted. Generally, no more than two such courses may be counted toward the major requirements.

A senior thesis, based on independent research and using scholarly methods of historical and/or critical interpretation must be submitted at the end of the spring semester. Generally 25-40 pages in length, the senior thesis represents the culmination of the departmental experience.

Honors

Seniors whose work is outstanding (with a 3.7 GPA in the major) will be invited to submit an honors thesis. Two or three faculty members discuss the completed thesis with the honors candidate in a one-half hour oral examination.

Minor Requirements

A minor in history of art requires six units: one or two 100-level courses and four or five others selected in consultation with the major adviser.

COURSES

HART B102 Critical Approaches to Visual Representation: Naturalism and the Supernatural in South Asian Art

This course examines the coexistence of aniconic, figural and supernatural representations of gods, plants, humans and animals in the Hindu, Buddhist, Jain and Islamic artistic traditions of India. It will trace both the development of naturalistic representations, as well as departures and embellishments on naturalism in the painting, sculpture, architecture, metalwork and textiles of South Asia. In this course, we will study the central tenets of South Asian religious traditions and will read and listen to the epic narratives, Sufi poetry and classical Indian music that influenced so much of South Asia’s visual culture. With this foundation, the course will consider the spiritual, social, political and creative motivations that led artists to choose naturalistic or supernatural forms of representation, reaffirming that the anti- and super-naturalistic elements of South Asian art rarely resulted from a lack of skill but from the conscious choice of the artist. In writing assignments, students will be challenged to find words to describe the myriad representational strategies that South Asian artists have used over time to depict their own world, but also to render other realms. This writing intensive (WI) course will therefore emphasize the importance of using of precise and creative language in art historical visual analysis.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Major Writing Requirement: Writing Intensive
Units: 1.0
Instructor(s): Houghteling, S.
(Spring 2018)

HART B104 Critical Approaches to Visual Representation: The Classical Tradition

An investigation of the historical and philosophical ideas of the classical, with particular attention to the Italian Renaissance and the continuance of its formulations throughout the Westernized world.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Major Writing Requirement: Writing Intensive
Units: 1.0
Instructor(s): Cast, D.
(Fall 2017)

HART B107 Critical Approaches to Visual Representation: Self and Other in the Arts of France

A study of artists’ self-representations in the context of the philosophy and psychology of their time, with particular attention to issues of political patronage, gender and class, power and desire.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Major Writing Requirement: Writing Intensive
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

HART B108 Critical Approaches to Visual Representation: Women, Feminism, and History of Art

An investigation of the history of art since the Renaissance organized around the practice of women artists, the representation of women in art, and the visual economy of the gaze.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Major Writing Requirement: Writing Intensive
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Saltzman, L.
(Spring 2018)

HART B110 Critical Approaches to Visual Representation: Identification in the Cinema

An introduction to the analysis of film through particular attention to the role of the spectator. Why do moving images compel our fascination? How exactly do film spectators relate to the people, objects, and places that appear on the screen? Wherein lies the power of images to move, attract, repel, persuade, or transform its viewers? In this course, students will be introduced to film theory through the rich and complex topic of identification. We will explore how points of view are framed in cinema, and how those viewing positions differ from those of still photography, advertising, video games, and other forms of media. Students will be encouraged to consider the role the cinematic medium plays in influencing our experience of a film: how it is not simply a film’s content, but the very form of representation that creates interactions between the spectator and the images on the
screen. Film screenings include Psycho, Being John Malkovich, and others. Course is geared to freshman and those with no prior film instruction. Fulfills History of Art major 100-level course requirement, Film Studies minor Introductory course or Theory course requirement.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Major Writing Requirement: Writing Intensive
Counts towards: Film Studies
Units: 1.0
Instructor(s): King,H.
(Spring 2018)

HART B211 Topics in Medieval Art History
This is a topics course. Course content varies.
Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

HART B212 Medieval Art & Architecture
This course takes a broad geographic and chronological scope, allowing for full exposure to the rich variety of objects and monuments that fall under the rubric of "medieval" art and architecture. We focus on the Latin and Byzantine Christian traditions, but also consider works of art and architecture from the Islamic and Jewish spheres. Topics to be discussed include: the role of religion in artistic development and expression; secular traditions of medieval art and culture; facture and materiality in the art of the middle ages; the use of objects and monuments to convey political power and social prestige; gender dynamics in medieval visual culture; and the contribution of medieval art and architecture to later artistic traditions.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

HART B217 Introduction to Medieval Islamic Art and Architecture
This course traces the development of Islamic art and architecture beginning with the emergence of Islam in the early seventh century and ending with the Mongol invasion and the fall of the Abbasid Empire in the mid-thirteenth century. Special attention is paid to issues of particular importance to medieval Islamic art, including aniconism (the rejection of figurative imagery in artistic production), the role of script as an expressive art form, and the relationship of early Islamic art to the artistic traditions of other late antique and medieval cultures. Prerequisites: At least one course in History of Art at the 100 or 200 level, or a course in Middle Eastern Studies at the 100 or 200 level is recommended but not required.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Middle Eastern & Islamic Studies
Units: 1.0
Instructor(s): Walker,A.
(Spring 2018)

HART B226 Perspectives on African Art
This course is an exploration of a selected range of art that represent the role and place of art in Africa and demonstrate the changes in artwork over time. The course begins with an examination of what defines the art of Africa, and proceeds to seek an understanding of its philosophical underpinnings and aesthetics. It then conducts a cultural as well as an historical exploration of selected art traditions on the continent. The course will emphasize the diversity of African aesthetics as well as highlight the similarities and differences between African people within and across various artistic practices in secular and non-secular settings.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Africana Studies; Museum Studies; Praxis Program
Units: 1.0
Instructor(s): Labi,K.
(Fall 2017)

HART B230 Renaissance Art
A survey of painting in Florence and Rome in the 15th and 16th centuries (Giotto, Masaccio, Botticelli, Leonardo, Michelangelo, Raphael), with particular attention to contemporary intellectual, social, and religious developments.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Cast,D.
(Spring 2018)

HART B240 The Global Baroque
Global Baroque* examines the Baroque style both within and beyond Europe, moving from Italy, France, Spain and Flanders to seventeenth-century India, Iran, Japan and China, the New World, the Ottoman Empire and the Kingdom of Kongo. We will study the role of Baroque art in early modern politics, religious missions and global trade; the emergence of princely collections of works and cartography; the flourishing of new and wondrous art materials; and the changing role of the artist and artisan in this period. We will consider the Baroque as an invitation for emotional engagement, as a style of power that was complicit in the violence of European colonialism, and as a tool of cultural reclamation used by artists across the world. As a class, we will work to construct an art history of "The Global Baroque" that also attends to the complex specificities of time and place.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Houghteling,S.
(Fall 2017)

HART B250 Nineteenth-Century Art in France
Close attention is selectively given to the work of Cézanne, Courbet, David, Degas, Delacroix, Géricault, Ingres, Manet, and Monet. Extensive readings in art criticism are required.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

HART B253 Survey of Western Architecture
The major traditions in Western architecture are illustrated through detailed analysis of selected examples from classical antiquity to the present. The evolution of architectural design and building technology, and the larger intellectual, aesthetic, and social context in which this evolution occurred, are considered.

Approach: Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

HART B260 Modern Art
This course will trace the history of modern art, from its origins to its ends.
Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Feliz,M.
(Fall 2017)

HART B279 Exhibiting Africa: Art, Artifact and New Articulations

At the turn of the 20th century, the Victorian natural history museum played an important role in constructing and disseminating images of Africa to the Western public. The history of museum representations of Africa and Africans reveals that exhibitions—both museum exhibitions and “living” World’s Fair exhibitions—has long been deeply embedded in politics, including the persistent “othering” of African people as savages or primitives. While paying attention to stereotypical exhibition tropes about Africa, we will also consider how art museums are creating new constructions of Africa and how contemporary curators and conceptual artists are creating complex, challenging new ways of understanding African identities.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Africana Studies; Museum Studies
Units: 1.0
(Not Offered 2017-2018)

HART B272 Since 1960: Contemporary Art and Theory

Lectures and readings will examine major movements in contemporary art, including Pop Art, Minimalism, Conceptualism, Performance, Postmodernism, and Installation Art. We will examine the dialogue between visual works and critical texts by Roland Barthes, Claire Bishop, Frederic Jameson, Adrian Piper, and Kobena Mercer, among others.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Units: 1.0
(Fall 2017)

HART B272 Since 1960: Contemporary Art and Theory

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Feliz,M.
(Not Offered 2017-2018)

HART B274 History of Chinese Art

This course is a survey of the arts of China from Neolithic to the contemporary period, focusing on bronze vessels of the Shang and Zhou dynasties, the Chinese appropriation of Buddhist art, and the evolution of landscape and figure painting traditions.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Shi,J.
(Fall 2017)

HART B277 Topics: History of Photography

This is a topics course. Course content varies.

Approach: Cross-Cultural Analysis (CC)
Units: 1.0
(Not Offered 2017-2018)

HART B279 Exhibiting Africa: Art, Artifact and New Articulations

Using the museums of Philadelphia as field sites, this course provides an introduction to the theoretical and practical aspects of museum studies and the important synergies between theory and practice. Students will learn: the history of museums as institutions of recreation, education and leisure; how the museum itself became a symbol of power, prestige and sometimes alienation; debates around the ethics and politics of collecting objects of art, culture and nature; and the qualities that make an exhibition effective (or not). By visiting exhibitions and meeting with a range of museum professionals in art, anthropology and science museums, this course offers a critical perspective on the inner workings of the museum as well as insights into the “new museology.”

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Museum Studies
Units: 1.0
Instructor(s): Feliz,M.
(Fall 2017)

HART B299 History of Narrative Cinema, 1945 to the present

This course surveys the history of narrative film from 1945 through contemporary cinema. We will analyze a chronological series of styles and national cinemas, including Classical Hollywood, Italian Neorealism, the French New Wave, and other post-war movements and genres. Viewings of canonical films will be supplemented by more recent examples of global cinema. While historical in approach, this course emphasizes the theory and criticism of the sound film, and we will consider various methodological approaches to the aesthetic, socio-political, and psychological dimensions of cinema. Readings will provide historical context, and will introduce students to key concepts in film studies such as realism, formalism, spectatorship, the auteur theory, and genre studies. Fulfills the history requirement or the introductory course requirement for the Film Studies minor.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Film Studies
Units: 1.0
Instructor(s): King,H.
(Fall 2017)

HART B300 The Curator in the Museum

This course provides an introduction to theoretical and practical aspects of museums and to the links between practice and theory that are the defining characteristic of the museum curator’s work today. The challenges and opportunities confronting curators and their colleagues, peers, audiences, and constituents will be addressed through readings, discussions, guest presentations, writings, and individual and group projects.

Counts towards: Museum Studies
Units: 1.0
(Not Offered 2017-2018)

HART B301 Topics in Exhibition Strategies

This is a topics course. Course content varies.

Counts towards: Museum Studies; Praxis Program
Units: 1.0
(Not Offered 2017-2018)

HART B306 Film Theory

An introduction to major developments in film theory and criticism. Topics covered include: the specificity of film form; cinematic realism; the cinematic “author”; the politics and ideology of cinema; the relation between cinema and language; spectatorship, identification, and subjectivity; archival and historical problems in film studies; the relation between film studies and other disciplines of aesthetic and social criticism. Each week of the syllabus pairs critical writing(s) on a central principle of film analysis with a cinematic example. Class will be
Instructor(s): Cast,D.
Units: 1.0
(Fall 2017)

HART B311 Topics in Medieval Art
This is a topics course. Course content varies.
Units: 1.0
(Not Offered 2017-2018)

HART B316 Museum Studies Fieldwork Seminar
This course provides students a forum in which to ground, frame and discuss their hands-on work in museums, galleries, archives or collections. Whether students have arranged an internship at a local institution or want to pursue one in the Bryn Mawr College Collections, this course will provide a framework for these endeavors, coupling praxis with theory supported by readings from the discipline of Museum Studies. The course will culminate in a final poster presentation, an opportunity to reflect critically on the internship experience. Prior to taking the course, students will develop a Praxis Learning Plan through the LILAC office. All students will share a set syllabus, common learning objectives and readings, but will also be able to tailor those objectives to the specific museum setting or Special Collections project in which they are involved.
Counts towards: Museum Studies; Praxis Program
Units: 1.0
(Not Offered 2017-2018)

HART B318 Cultural Property and Museums
This course examines cultural heritage and the concept of cultural property in relation to museums and collections. We will consider the development of national and international laws in the 20th and 21st centuries to protect cultural heritage, museum responsibilities, and case studies on topics including the looting of archaeological sites, the fate of art during war, nationalism and politics, restitution of art, and fakes and forgeries.
Counts towards: Museum Studies
Units: 1.0
(Not Offered 2017-2018)

HART B323 Topics in Renaissance and Baroque Art
This is a topics course. Course content varies. Current topic description: This seminar is concerned with the history and idea of fresco painting in Italy, both as a matter of technique and as instances of explicitly political art. The materials for research can come also from other moments and places, from the WPA program in the United States, from Mexico to the Catholic and Unionist walls in Northern Ireland and beyond.
Units: 1.0
Instructor(s): Cast,D.
(Spring 2018)

HART B325 Care and Conservation of Contemporary Art
This course explores the ethics, principles, analysis and materials used in art conservation. Case studies, guest lectures, and museum visits will then introduce the unique problems involved in preserving, conserving and exhibiting contemporary art. There will be some hands on/lab component activities.

HART B330 Topics in Chinese Art
This is a topics course. Course content varies. Focusing on the east part of the Silk Road that connected Greece, Iran, India and...
Central Asia with China from antiquity to the medieval period, this course surveys a variety of artworks and visual materials not only in formal and iconographic terms but also from social, political, and religious perspectives.

Units: 1.0
Instructor(s): Shi,J.
(Fall 2017)

HART B373 Contemporary Art in Exhibition: Museums and Beyond
How does the collection and display of artwork create meanings beyond the individual art object? In recent decades, enormous shifts have occurred in exhibition design as artwork projected from the walls of the museum, moved outdoors to the space of the street, and eventually went online. We will study an array of contemporary exhibition practices and sites in their social and historical contexts, including the temporary exhibition, "the white cube," the "black box," museum installations, international biennials, and websites. During the seminar, we will examine how issues such as patronage, avant-gardism, globalization, and identity politics have progressively brought museums and other exhibition spaces into question.

Counts towards: Museum Studies
Units: 1.0
Instructor(s): Robbins,C.
(Fall 2017)

HART B374 Topics: Exhibition Seminar
This is a topics course. Course content varies. Students will gain practical experience in the production of an exhibition: conceiving a curatorial approach, articulating themes, writing didactics, researching a checklist, designing gallery layout, producing print and web materials, developing programs, and marketing the exhibit. Prerequisite: At least one previous HART course at Bryn Mawr College.

Counts towards: Museum Studies
Units: 1.0
(Not Offered 2017-2018)

HART B380 Topics in Contemporary Art
This is a topics course. Course content varies. Current topic description: This course, a special Flexner seminar, was inspired by a consideration of the work of our Fall 2017 Flexner lecturer, Bonnie Honig, and will explore the aesthetics and ethics of memory in contemporary art.

Units: 1.0
Instructor(s): Saltzman,L.
(Fall 2017)

HART B398 Senior Conference I
A critical review of the discipline of art history in preparation for the senior thesis. Required of all senior majors.

Prerequisite: BM undergraduate History of Art major.
Units: 1.0
Instructor(s): Saltzman,L., Houghteling,S.
(Fall 2017)

HART B399 Senior Conference II
A seminar for the discussion of senior thesis research and such theoretical and historical concerns as may be appropriate. Interim oral reports. Required of all majors; culminates in the senior thesis.

Units: 1.0
Instructor(s): Cast,D., Saltzman,L.
(Spring 2018)

HART B403 Supervised Work
Advanced students may do independent research under the supervision of a faculty member whose special competence coincides with the area of the proposed research. Consent of the supervising faculty member and of the major adviser is required.

Units: 1.0
(Fall 2017, Spring 2018)

HART B425 Praxis III
Students are encouraged to develop internship projects in the college’s collections and other art institutions in the region.

Counts towards: Praxis Program
Units: 1.0
(Not Offered 2017-2018)

HART B624 Topics in Dutch Painting
This is a topics course. Course content varies.

Units: 1.0
(Not Offered 2017-2018)

HART B630 Topics in Renaissance and Baroque Art
This is a topics course. Course content varies. Current topic description: This seminar has as its subject the history of objects from Italy and other European countries, now described as Mannerist. We are also concerned with the critical history of these works and the attention given to them within the History of Art, especially in Germany in the first years of the last century, and then ways this category can be used to speak of art at other moments and in other cultural contexts.

Units: 1.0
Instructor(s): Cast,D.
(Fall 2017)

HART B673 Contemporary Art in Exhibition: Museums and Beyond
How does the collection and display of artwork create meanings beyond the individual art object? In recent decades, enormous shifts have occurred in exhibition design as artwork projected from the walls of the museum, moved outdoors to the space of the street, and eventually went online. We will study an array of contemporary exhibition practices and sites in their social and historical contexts, including the temporary exhibition, "the white cube," the "black box," museum installations, international biennials, and websites. During the seminar, we will examine how issues such as patronage, avant-gardism, globalization, and identity politics have progressively brought museums and other exhibition spaces into question.

Units: 1.0
(Not Offered 2017-2018)

ANTH B271 Museum Anthropology: History, Politics, Practices
This course provides an in-depth exploration of museum anthropology: the critical study of museum practices from an anthropological perspective. The course will fundamentally consider the role of museums in exhibiting culture—the politics of placing cultures on display, from living humans and human remains to cultural objects and artifacts. The course will also
consider changing practices in museum anthropology, including repatriation efforts, shifting notions of heritage and identity and the emergence of community-curated exhibitions. This course complements the theoretical explorations of the museum with visits to area museums and hands-on work in Special Collections.

Approach: Course does not meet an Approach
Counts towards: None
Units: 1.0
(Not Offered 2017-2018)

ARCH B125 Classical Myths in Art and in the Sky

This course explores Greek and Roman mythology using an archaeological and art historical approach, focusing on the ways in which the traditional tales of the gods and heroes were depicted, developed and transmitted in the visual arts such as vase painting and architectural sculpture, as well as projected into the natural environment.

Approach: Inquiry into the Past (IP)
Counts towards: Museum Studies
Units: 1.0
(Not Offered 2017-2018)

ARCH B204 Animals in the Ancient Greek World

This course focuses on perceptions of animals in ancient Greece from the Geometric to the Classical periods. It examines representations of animals in painting, sculpture, and the minor arts, the treatment of animals as attested in the archaeological record, and how these types of evidence relate to the featuring of animals in contemporary poetry, tragedy, comedy, and medical and philosophical writings. By analyzing this rich body of evidence, the course develops a context in which participants gain insight into the ways ancient Greeks perceived, represented, and treated animals. Juxtaposing the importance of animals in modern society, as attested, for example, by their roles as pets, agents of healing, diplomatic gifts, and even as subjects of specialized studies such as animal law and animal geographies, the course also serves to expand awareness of attitudes towards animals in our own society as well as that of ancient Greece.

Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

ARCH B205 Greek Sculpture

One of the best preserved categories of evidence for ancient Greek culture is sculpture. The Greeks devoted immense resources to producing sculpture that encompassed many materials and forms and served a variety of important social functions. This course examines sculptural production in Greece and neighboring lands from the Bronze Age through the fourth century B.C.E. with special attention to style, iconography and historical and social context.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Donohue,A.
(Fall 2017)

ARCH B206 Hellenistic and Roman Sculpture

This course surveys the sculpture produced from the fourth century B.C.E. to the fourth century C.E., the period, beginning with the death of Alexander the Great, that saw the transformation of the classical world through the rise of Rome and the establishment and expansion of the Roman Empire. Style, iconography, and production will be studied in the contexts of the culture of the Hellenistic kingdoms, the Roman appropriation of Greek culture, the role of art in Roman society, and the significance of Hellenistic and Roman sculpture in the post-antique classical tradition.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Major Writing Requirement: Writing Attentive
Units: 1.0
(Not Offered 2017-2018)

ARCH B215 Classical Art

A survey of the visual arts of ancient Greece and Rome from the Bronze Age through Late Imperial times (circa 3000 B.C.E. to 300 C.E.). Major categories of artistic production are examined in historical and social context, including interactions with neighboring areas and cultures; methodological and interpretive issues are highlighted.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

ARCH B254 Cleopatra

This course examines the life and rule of Cleopatra VII, the last queen of Ptolemaic Egypt, and the reception of her legacy in the Early Roman Empire and the western world from the Renaissance to modern times. The first part of the course explores extant literary evidence regarding the upbringing, education, and rule of Cleopatra within the contexts of Egyptian and Ptolemaic cultures, her relationships with Julius Caesar and Marc Antony, her conflict with Octavian, and her death by suicide in 30 BCE. The second part examines constructions of Cleopatra in Roman literature, her iconography in surviving art, and her contributions to and influence on both Ptolemaic and Roman art. A detailed account is also provided of the afterlife of Cleopatra in the literature, visual arts, scholarship, and film of both Europe and the United States, extending from the papal courts of Renaissance Italy and Shakespearean drama, to Thomas Jefferson's art collection at Monticello and Joseph Mankiewicz's 1963 epic film, Cleopatra.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ARCH B303 Classical Bodies

An examination of the conceptions of the human body evidenced in Greek and Roman art and literature, with emphasis on issues that have persisted in the Western tradition. Topics include the fashioning of concepts of male and female standards of beauty and their implications; conventions of visual representation; the nude; clothing and its symbolism; the athletic ideal; physiognomy; medical theory and practice; the visible expression of character and emotions; and the formulation of the "classical ideal" in antiquity and later times.

Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ARCH B359 Topics in Classical Art and Archaeology

This is a topics course. Topics vary. A research-oriented course taught in seminar format, treating issues of current interest in Greek and Roman art and archaeology. Prerequisites: 200-level
coursework in some aspect of classical or related cultures, archeology, art history, or Cities.

Current topic description: TA research-oriented course taught in seminar format, treating issues of current interest in Greek and Roman art and archeology. Prerequisites: 200-level coursework in some aspect of classical or related cultures, archeology, art history, or Cities.

Units: 1.0
Instructor(s): Donohue,A.
(Spring 2018)

CITY B190 The Form of the City: Urban Form from Antiquity to the Present

This course studies the city as a three-dimensional artifact. A variety of factors—geography, economic and population structure, politics, planning, and aesthetics—are considered as determinants of urban form.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Lee,M.
(Spring 2018)

CITY B227 Topics in Modern Planning

This is a topics course. Course content varies.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

CITY B254 History of Modern Architecture

A survey of the development of modern architecture since the 18th century.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Lee,M.
(Fall 2017)

CITY B255 Survey of American Architecture

This survey course examines architecture within the global framework of “the modern.” Through an introduction to an architectural canon of works and figures, it seeks to foster a critical consideration of modernity, modernization, and modernism. The course explores each as a category of meaning that framed the theory and practice of architecture as a cultural, political, social, and technological enterprise. It also uses these conjugates to study the modes by which architecture may be said to have framed history. We will study practical and discursive activity that formed a dynamic field within which many of the contradictions of “the modern” were made visible (and visual) through architecture. In this course, we will engage architectural concepts and designs by studying drawings and buildings closely within their historical context. We will examine spheres of reception for architecture and its theoretical, discursive, and cultural life through a variety of media: buildings of course, but also journals, books, and film. We will also investigate architecture as a site and subject for critical inquiry. In particular, we will see what it may tell us about the globalization and politics of the twentieth century, and about history, theory, and criticism as epistemological tracks.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

CITY B306 Advanced Fieldwork Techniques: Places in Time

A workshop for research into the histories of places, intended to bring students into contact with some of the raw materials of architectural and urban history. A focus will be placed on historical images and texts, and on creating engaging informational experiences that are transparent to their evidentiary basis.

Units: 1.0
(Not Offered 2017-2018)

CITY B360 Topics: Urban Culture and Society

This is a topics course. Course content varies. Current topic description: This course explores intersections of migration, labor and cities in today's globalized economy. We will examine how broad trends have shaped labor markets in different urban contexts and shed light on the central role of migrant workers within them. Gaining a deeper understanding of migrant workers' experiences, struggles and contributions is a key objective of the course.

Units: 1.0
Instructor(s): Raddatz,L.
(Spring 2018)

CITY B377 Topics in Modern Architecture

This is a topics course on modern architecture. Topics vary.

Current topic description: This class offers the students the opportunity to engage architecture, architectural and urban history in a seminar format. For advanced majors but also open to others in history or history of art by permission of the instructor.

Units: 1.0
Instructor(s): Lee,M.
(Fall 2017)

CITY B378 Formative Landscapes: The Architecture and Planning of American Collegiate Campuses

The campus and buildings familiar to us here at the College reflect a long and rich design conversation regarding communicative form, architectural innovation, and orchestrated planning. This course will explore that conversation through varied examples, key models, and shaping conceptions over time.

Units: 1.0
Instructor(s): Cohen,J.
(Spring 2018)

CSTS B324 Roman Architecture

The course gives special attention to the architecture and topography of ancient Rome from the origins of the city to the later Roman Empire. At the same time, general issues in architecture and planning with particular reference to Italy and the provinces from republic to empire are also addressed. These include public and domestic spaces, structures, settings and uses, urban infrastructure, the relationship of towns and territories, “suburban” and working villas, and frontier settlements. Prerequisite: ARCH 102.

Units: 1.0
Instructor(s): Scott,R.
(Fall 2017)

EALC B212 Topics: Introduction to Chinese Literature

This is a topics course. Topics may vary.
ENGL B205 Introduction to Film

This course is intended to provide students with the tools of critical film analysis. Through readings of images and sounds, sections of films and entire narratives, students will cultivate the habits of critical viewing and establish a foundation for focused work in film studies. The course introduces formal and technical units of cinematic meaning and categories of genre and history that add up to the experiences and meanings we call cinema. Although much of the course material will focus on the Hollywood style of film, examples will be drawn from the history of cinema. Attendance at weekly screenings is mandatory.

Approach: Critical Interpretation (CI)
Counts towards: Film Studies
Units: 1.0
Instructor(s): Bryant, S.
(Fall 2017)

ENGL B336 Topics in Film

This is a topics course. Course content varies. Current topic description: We'll consider how voice has changed film & how film has changed the voice, studying cinema from 1920s to now & theories about voice.

Counts towards: Film Studies
Units: 1.0
Instructor(s): Bryant, S.
(Fall 2017)

ENGL B367 Asian American Film Video and New Media

The course explores the role of pleasure in the production, reception, and performance of Asian American identities in film, video, and the internet, taking as its focus the sexual representation of Asian Americans in works produced by Asian American artists from 1915 to present. In several units of the course, we will study graphic sexual representations, including pornographic images and sex acts some may find objectionable. Students should be prepared to engage analytically with all class material. To maintain an atmosphere of mutual respect and solidarity among the participants in the class, no auditors will be allowed.

Counts towards: Gender and Sexuality Studies; Film Studies
Units: 1.0
(Not Offered 2017-2018)

FREN B213 Theory in Practice: Critical Discourses in the Humanities

By bringing together the study of major theoretical currents of the 20th century and the practice of analyzing literary works in the light of theory, this course aims at providing students with skills to use literary theory in their own scholarship. The selection of theoretical readings reflects the history of theory (psychoanalysis, structuralism, narratology), as well as the currents most relevant to the contemporary academic field: Post-structuralism, Post-colonialism, Gender Studies, and Ecocriticism. They are paired with a diverse range of short stories (Poe, Kafka, Camus, Borges, Calvino, Morrison, Djebar, Ngozi Adichie) that we discuss along with our study of theoretical texts. The class will be conducted in English with an additional hour in French for students wishing to take it for French credit.

Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Sanquer, M.
(Fall 2017)

HART B623 Figures of Resistance: Classical and Modern

The GSem will explore classical figures of resistance such as Prometheus, Antigone, Electra, Medea, and Lysistrata and their reception in modern art and cinema. The focus will be on films and other works of art that re-appropriate and transform the ancient characters and their stories. We will discuss in particular how modern filmmakers re-contextualize the classical figures to shed light on contemporary historical, political, and social issues. Films will include Tony Harrison, Prometheus (Great Britain, 1998), Liliana Caveni, The Year of the Cannibals (Italy, 1970), Amy Greenfield, Antigone/Rites of Passion (USA, 1991), Ingmar Bergman, Persona (Sweden, 1966), Miklós Jancsó, Electra, My Love (Hungary, 1974), Arthur Ripstein, Asi Es La Vida (Mexico, 2000), and Spike Lee, Chi-raq (USA, 2015). Readings will be drawn from texts on reception studies, film and gender theory, psychoanalysis, and political theory.

Units: 1.0
Instructor(s): King, H., Baertschi, A.
(Fall 2017)

HART B603 Advanced Research Methods

Grounded in the foundational and emergent methods of the discipline, this seminar will immerse students in the process of advanced art historical research and writing. Designed to strengthen skills and facilitate the timely completion of MA theses, if not also, should more advanced students be interested, dissertations, this seminar will be at once an incubator and a workshop.

Units: 1.0
Instructor(s): King, H.
(Spring 2018)

HART B610 Topics in Medieval Art

This is a topics course. Course content varies. Current topic description: This course examines how Byzantine art and architecture have been represented in surveys of art history, medieval art, and Byzantine art. In addition to reading survey texts themselves, students consider scholarship that has analyzed and criticized the representation of Byzantium in these studies and in the field more broadly.

Units: 1.0
Instructor(s): Walker, A.
(Spring 2018)

HART B640 Topics in Baroque Art

This is a topics course. Course content varies.

Units: 1.0
(Not Offered 2017-2018)

HART B645 Problems in Representation

This seminar examines, as philosophy and history, the idea of realism, as seen in the visual arts since the Renaissance and beyond to the 19th and 20th centuries.

Units: 1.0
(Not Offered 2017-2018)
ITAL B319 Multiculturalism and Diversity in Medieval Italy
This interdisciplinary course will reflect upon history, religion, literature, politics, and built environment of Italy from ca. 1000 to 1400. Italy was famous for its diverse cultural landscape of urban towers and fortified castles, its Mediterranean trade, and its ethnically and religiously differentiated voices. The course examines cross-cultural interactions played out through the patronage, production, and reception of works of art, literature, and architecture. Sites of patronage and production include the cities of Venice, Palermo, and Pisa. It counts towards Art History and City.
Units: 1.0
Instructor(s): Kubati, R. (Fall 2017)

RUSS B238 Topics: The History of Cinema 1895 to 1945
This is a topics course. Course content varies.
Approach: Inquiry into the Past (IP)
Major Writing Requirement: Writing Attentive
Counts towards: Film Studies
Units: 1.0 (Not Offered 2017-2018)

HART B646 Topics in Material Culture
This is a topics course. Course content varies.
Units: 1.0
Instructor(s): Houghteling, S. (Spring 2018)

HART B650 Topics in Modern Art
This is a topics course. Topics vary.
Units: 1.0 (Not Offered 2017-2018)

HART B651 Topics: Interpretation and Theory
This is a topics course. Course content varies.
Units: 1.0 (Not Offered 2017-2018)

HART B671 Topics in German Art
This is a topics course. Topics vary. Current topic description: October 31, 2017 will mark the quint-centennial of the Lutheran Reformation, which entailed iconoclasm for theological and political reasons. Responses to the looting, destruction, and defacement of devotional sculpture and altarpieces included the secularization of art and art patronage, the making of art for private collectors, cabinets of curiosity, yet also the public use of the print combining image and text for propaganda, satire, and activism with wide-ranging agendas and audiences.
Units: 1.0
Instructor(s): Hertel, C. (Fall 2017)

HART B670 Supervised Work
Supervised Work
Units: 1.0
Instructor(s): Cast, D., Walker, A., Saltzman, L., King, H., Houghteling, S. (Fall 2017, Spring 2018)

ITAL B701 Supervised Work
Supervised Work
Units: 1.0
Instructor(s): Cast, D., Walker, A., Saltzman, L., King, H., Houghteling, S. (Fall 2017, Spring 2018)

ITAL B213 Theory in Practice: Critical Discourses in the Humanities
An examination in English of leading theories of interpretation from Classical Tradition to Modern and Post-Modern Time. This is a topics course. Course content varies.
Approach: Critical Interpretation (CI)
Units: 1.0 (Not Offered 2017-2018)

ITAL B219 Multiculturalism in Medieval Italy
This course examines cross-cultural interactions in medieval Italy played out through the patronage, production, and reception of works of art and architecture. Sites of patronage and production include the cities of Venice, Palermo, and Pisa. Media examined include buildings, mosaics, ivories, and textiles.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0 (Not Offered 2017-2018)

INTERNATIONAL STUDIES
Students may complete a major or minor in International Studies.

Faculty
Co-Directors
Michael Allen, Chair and Professor of Political Science on the Harvey Wexler Chair in Political Science and Co-Director of International Studies
Kalala Ngiamulume, Associate Professor of Africana Studies and History, Co-Director of International Studies, and Co-Director of Health Studies (spring)

Steering Committee
Grace Armstrong, Eunice M. Schenck 1907 Professor of French and Director of Middle Eastern Languages
Robert Dostal, Acting Provost (semester I) and Rufus M. Jones Professor and Chair of Philosophy
Carol Hager, Professor of Political Science on the Clowes Professorship in Science and Public Policy
Yonglin Jiang, Co-Chair and Associate Professor of East Asian Studies
Madhavi Kale, Chair and Professor of History
Mary Osirim, Provost and Professor of Sociology
Susan A. White, Professor of Chemistry and Co-Director of Health Studies (fall) (on leave semester II)

International Studies is the study of relationships among people and states affected by increasingly permeable borders and facing global issues. International Studies aims to prepare students to be responsible citizens by introducing them to issues of importance in an increasingly interdependent world of global dynamics in politics, economics, ideas, language, and culture. At Bryn Mawr, International Studies combines applied...
and theoretical approaches by drawing from disciplines in both the Social Sciences and Humanities. This broad conception of International Studies distinguishes our program from many others. It builds from a core of courses from politics, economics, and ethics, a branch of philosophy, and then incorporates electives from specified tracks that reflect areas of strength in faculty research and teaching. It allows students to explore the descriptive and normative aspects of living in a world characterized by the deep interconnections of a globalized world. It thus draws on Bryn Mawr’s longstanding interest in promoting justice with its already established coursework at the undergraduate level and at the Graduate School of Social Work and Social Research and on its well established programs in languages and cultures.

The curricular content is relevant in preparing graduates to participate critically and effectively in the many integrated transnational and global institutional networks of production, services, creative expression, research and governance. Thus students with specialties in the Humanities, Social Sciences, or Sciences can benefit from a visible and structured flow of courses in International Studies. The inter and multi-disciplinary approaches reflected in the structure for the major as well as for the minor reflect the kind of integrative thinking that is necessary for effective agency in the globalized world economy and society. Students in International Studies will be made aware of both the distinct modes of inquiry that may transcend disciplines and the cumulative effects of convergent examinations of phenomena from these different disciplinary perspectives.

International Studies engages students in the necessarily inter-and multi-disciplinary course work that will prepare them for productive roles in transnational or intergovernmental institutions and in the areas of public policy, law, governance, public health, medicine, business, diplomacy, journalism, and development. Courses cover both theoretical perspectives and empirical issues in different areas of the world. International Studies at Bryn Mawr provides a foundation for students interested in pursuing career opportunities in these areas or in entering graduate programs such as International Politics/Relations, International Political Economy/Development Studies, International Law and Institutions, and Organizational Theory and Leadership.

A Bryn Mawr graduate in International Studies will be

- Capable of integrative analysis from different disciplinary perspectives
- Ethically literate
- Prepared for work in related fields such as law, public health, medicine, business, and journalism as well as for graduate study in International Politics/Relations, International Political Economy/Development Studies, International Law and Institutions, and Organizational Theory and Leadership
- Able to contribute their knowledge and leadership skills within governmental and nongovernmental organizations at transnational, regional, or global levels or in cross-cultural settings.

Although language study is not required per se for the major or the minor, students can take advantage of Bryn Mawr’s traditional strength in the study of language and culture to enhance their study of non-Anglophone areas of the world. Those intending to study abroad in a non-Anglophone area must meet the level of proficiency required by the Junior Year Abroad program involved; and those intending to undertake graduate work in international studies should plan to acquire the advanced level of proficiency in one foreign language (at the time of admission or graduation) required by the most selective programs here and abroad. Since it began in 2005, the minor in International Studies has attracted a significant number of language majors who use their study of a particular language to select a coherent set of electives under a relevant track in the minor in order to pursue career and study opportunities in the international arena.

**Major Requirements**

Students majoring in International Studies must complete a total of ten courses, which include a core of four courses, an elective track of four courses, and a senior capstone experience of either two courses (398 and 399) OR 398 and an additional 300 level course. Students should work with their major adviser to identify one writing intensive or two writing attentive courses to fulfill the major writing requirement.

Please note that some of the courses listed in the core have prerequisites, which may increase the total number of courses for the major in International Studies to eleven. Also note that no more than two courses in an International Studies major work plan can be used to satisfy another major, minor, or concentration requirement.

**Core Courses**

The Core is a mix of 100-300 level courses in international fields. Students must choose one course from among four eligible courses in EACH of Politics, Economics, and Philosophy (at least one of which is at the 300 level). They must also choose one course from among ten in Culture and Interpretation, a requirement in the core that is unique to Bryn Mawr. The rationale for the two parts of the Core (Politics, Economics, and Philosophy and Culture and Interpretation) are given below along with corresponding lists of eligible courses under each. The disciplines of Politics, Economics, and Philosophy have become central to International Studies programs since markets, conflicts, diplomacy and rules are nested in values and norms as much as in state territories and institutional framings. The program at Bryn Mawr is distinctive in having the requirement that students take an ethics course in which they study topics in areas such as global ethical issues, development ethics, global justice, and human rights.

The eligible courses for the Politics, Economics, and Philosophy component of the core are:

**Political Science**

- Introduction to International Politics (POLS B250), or International Politics (POLS H151)
- Politics of International Law and Institutions (POLS B241)
- International Political Economy (POLS B391)
- Topics in International Politics (POLS H350)

**Economics**

- Economic Development (ECON B225), or Economic Development and Transformation: China vs. India (ECON H240)
- The Economics of Globalization (ECON B236)
- Democracy and Development (ECON B385), or Economics of Transition and Euro Adoption in Central and Eastern Europe (ECON H241)

**NOTE:** Introduction to Economics (ECON B105) is a prerequisite for all other Economics courses.
Elective Tracks allow students to focus on one theme or area in greater depth across four courses, one of which must be at the 300 level.

The electives continue to anchor the major in inter- and multidisciplinary work while also adding flexibility so that students may be creative and purposeful in structuring their own work. What makes International Studies at Bryn Mawr unique is that it draws upon its established faculty research, resources, and reputations in the individual tracks at the same time as it offers flexibility under clear advising for each of the individualized pathways of learning. Students should choose the four electives from the approved lists under one of the tracks identified below.

The FOUR elective courses are to be selected from (but are not limited to) courses listed under the tracks at brynmawr.edu/internationalstudies. The listed courses are a starting point for collaboration between the student and the major advisor. Students should also check the International Studies Web site or the Tri-College Course Guide for information about courses that are offered in the current year.

Students may choose one of the following tracks:

**Gender**

Bryn Mawr’s proud history of global leadership for women makes gender an obvious choice as one of the tracks enabling students to complete the Major in International Studies. To make good on Bryn Mawr’s mission to prepare students to be purposefully engaged citizens of an increasingly complex and interconnected world, the student in International Studies who selects the Gender track will study gender and its intersections with factors such as race, class, ethnicity, sexual orientation, age, religion, and disability in order to analyze gender with respect to the workings of the global economy and globalization more generally. Although not always the case, many organizations at the local, national, and global levels now understand gender to be a central factor in policies for alleviating poverty or promoting economic growth. The changes wrought by measures such as improving health care for women and children and increasing access to education, property, and work outside the home shows the importance of understanding gender and its intersections with other forms of discrimination in a globalized and interconnected world. The FOUR elective courses are to be selected from (but are not limited to) an approved list at brynmawr.edu/internationalstudies. The listed courses are a starting point for collaboration between the student and the major advisor.

**Development**

Development is most often understood in terms of processes of economic growth, industrialization, and modernization that result in a society’s achieving a high (per capita) gross domestic product. These descriptions of economic processes tend to embed assumptions about progress, transformation, and liberation as exemplified in concepts such as “underdeveloped” or “developing” countries. The student in International Studies who selects this track will study the concept of development in a broad sense by using a multidisciplinary approach that combines courses from disciplines such as Anthropology, Economics, Cities, History, Philosophy, Political Science, and Sociology to effectively understand development processes from multiple perspectives. One result is an exploration of development that broadens the study from describing economic deprivation in terms of levels of income, for example, to understanding the ways in which equality, justice, well-being, and human flourishing are affected by growth and modernization processes. The student selecting the Development track will become versed in the critical issues, problems, and achievements common not
only to developing regions of the world but also to developed countries and the world as a whole. The FOUR elective courses are to be selected from (but are not limited to) an approved list at brynmawr.edu/internationalstudies. The listed courses are a starting point for collaboration between the student and the major advisor.

Global Social Justice

Efforts to realize social justice are increasingly necessary in global systems as much as they had always been in national and local ones. The Global Social Justice track will allow students to make connections at all these levels. They will be able to draw on the long tradition of focus on Social Justice at Bryn Mawr and Haverford and on collaboration with the Graduate School of Social Work and Social Research and its thrust on Social Welfare. Bryn Mawr’s mission statement identifies the characteristics of a Bryn Mawr education as “critical thinking, interdisciplinary perspective, engagement in a diverse community, and purposeful vision of social justice.” The Global Social Justice track allows students to explore issues of social and political change in the context of economic and political transition in the globalized world. Students gain insight into how global issues affect relationships among people and cultures within and across national boundaries and how global issues are in turn affected by these relationships. They will study the ways in which dramatic economic disparities wrought by globalization and the global economy affect social welfare and thwart efforts to achieve social justice locally, nationally, and globally. The FOUR elective courses are to be selected from (but are not limited to) an approved list at brynmawr.edu/internationalstudies. The listed courses are a starting point for collaboration between the student and the major advisor.

Independent Design

Students who are so inclined may develop an independent design in consultation with an Advisor from the Center for International Studies. An Independent Design could include area studies that draw on Bryn Mawr’s strengths in the study of languages and cultures and on our programs in Africana Studies, East Asian Studies and Latin American, Latino and Iberian Peoples and Cultures.

Senior Capstone Experience

The capstone experience consists of two 300 level courses, 398 and 399, OR 398 and an additional 300 level course in International Studies.

The 398 seminar will have students do research, presentations, and final essays that delve deeper into topics from relevant courses in previously taken tracks and may incorporate experiences in Praxis courses, Summer internships, or Study Abroad. Should a student select to take 399 instead of an additional 300 level course, the 398 seminar could also be the basis for students to identify and begin preliminary work on research projects for 399, including the exploration of theoretical perspectives and research methods that will provide a framework for their research and the matching of students with faculty serving as individual supervisors.

While most individualized supervision for those taking 399 will be of students writing a senior thesis, designated advisors in International Studies will work with those students who select to produce an extended document using platforms such as DVD documentary, a website, or a PowerPoint talk with pictures and video clips instead of writing a senior thesis.
economics uses economic analysis to examine the behavioral causes of local, regional, and global environmental and natural resource problems and to evaluate policy responses to them. The three elective courses are to be selected in consultation with an Advisor from International Studies.

Area Studies
This track allows students to situate and apply the economic, political, and social theory provided in the core to the study of a particular geopolitical area. It provides students with a global frame of reference from which to examine issues such as history, migration, colonization, modernization, social change, and development through an area study. A coherent set of courses can be achieved by selecting the three electives from one of the following area studies: Africana, European, East Asian, and Latin American, Latino and Iberian Peoples and Cultures. The three elective courses are to be selected in consultation with an Advisor from International Studies.

Language and Arts
This track allows students to explore human interaction at the global level through language, literature, music, and the arts. Students in this track focus their studies on the forms of language and the arts that are generated through global processes and in turn affect the generation and exchange of ideas in and between different societies and cultures.

A coherent set of courses can be achieved by selecting the three electives from one of the following: English, French, German, Italian, Russian, Spanish, and Dance and Music.

The three elective courses are to be selected in consultation with an Advisor from International Studies.

COURSES

INST B398 Senior Seminar
This non-thesis capstone course is a seminar in which students do research, presentations and a final essay. These delve into topics from relevant courses in previously-taken tracks and may incorporate experiences from Praxis, Summer, or Study Abroad.
Counts towards: International Studies
Units: 1.0
Instructor(s): Allen,M.
(Spring 2017)

INST B399 Senior Project in International Studies
This involves the writing of a thesis or the production of an extended document on platforms such as a DVD or a website with the guidance of a designated adviser in International Studies.
Counts towards: International Studies
Units: 1.0
Instructor(s): Allen,M.
(Spring 2018)

INST B403 Supervised Work
Units: 1.0
(Not Offered 2017-2018)

ANTH B102 Introduction to Cultural Anthropology
An introduction to the methods and theories of cultural anthropology in order to understand and explain cultural similarities and differences among contemporary societies.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Child and Family Studies; Gender and Sexuality Studies; International Studies
Units: 1.0
Instructor(s): Pashigian,M., Campoamor,L.
(Not Offered 2017-2018)

ANTH B238 Chinese Culture and Society
This course encourages students to think critically about major developments in Chinese culture and society that have occurred during the twentieth and twenty-first centuries, with an emphasis on understanding both cultural change and continuity in China. Drawing on ethnographic material and case studies from rural and urban China over the traditional, revolutionary, and reform periods, this course examines a variety of topics including family and kinship; marriage, reproduction, and death; popular religion; women and gender; the Cultural Revolution; social and economic reforms and development; gift exchange and guanxi networks; changing perceptions of space and place; as well as globalization and modernity. Prerequisite: Sophomore standing or higher.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies; International Studies
Units: 1.0
(Not Offered 2017-2018)

ANTH B285 Anthropology of Development, Aid, and Activism
This course will provide tools to reflect critically on the meanings and effects of aid, or “doing good” for others in a world characterized by historically-rooted social, political, and economic inequalities. What goes into defining specific people or geographic regions as “in need”? What complex dynamics are at play when an outside actor – whether in the form of a government aid agency, an NGO, or an individual volunteer – enters a community in order to aid its members? How do those categorized as beneficiaries assert their own identities and offer their own perspectives on social change?
Approach: Cross-Cultural Analysis (CC)
Counts towards: International Studies; Peace, Justice and Human Rights
Units: 1.0
Instructor(s): Campoamor,L.
(Fall 2017)

ANTH B294 Culture, Power, and Politics
What do a country’s national politics have to do with culture? Likewise, how are politics hidden below the surface of our everyday social lives? This course explores questions like these through anthropological approaches. Drawing on both classic and contemporary ethnographic studies from the U.S. and around the world, we will examine how social and cultural frameworks help us understand politics in new ways. Topics will include states and political systems, nationalism and citizenship, gender, violence, rumor and conspiracy theory, and non-state forms of governance. Prerequisite: ANTH 102, B103 or permission of the instructor.
Approach: Cross-Cultural Analysis (CC)
Counts towards: International Studies
Units: 1.0
(Not Offered 2017-2018)
ANTH B301 Anthropology of Globalization: Wealth, Mobility, Insecurity

This course explores economic globalization from an anthropological perspective. With a focus on the social, cultural, and historical aspects of global connections, we seek to understand not only large-scale change in the world, but also how the growing integration of different countries and economic systems shapes everyday life experience. Conversely, we will also explore how individuals actively engage with, and sometimes help shape, changing global processes. We will examine the meanings and motivations that guide some people to accumulate capital, and we will consider the structural inequalities and barriers that prevent others from doing so. We will study the paths of mobile individuals around the world—those who cross borders "legally" as well as those whose movements are deemed "illegal"—and think critically about what exclusion and forced immobility means for people socially as well as economically. Finally, we will investigate patterns of economic, political, and social insecurity that often accompany processes of globalization. Working through a series of ethnographic analyses and conducting our own research, we will gain a better understanding of how people around the world experience and actively make "the global." Prerequisite: ANTH B102, ANTH H103 or permission of the instructor.

Units: 1.0
(Not Offered 2017-2018)

ANTH B316 Media, Performance, and Gender in South Asia

Examines gender as a culturally and historically constructed category in the modern South Asian context, focusing on the ways in which everyday experiences of and practices relating to gender are informed by media, performance, and political events. Prerequisite: Sophomore standing or higher.

Counts towards: Gender and Sexuality Studies; International Studies
Units: 1.0
(Not Offered 2017-2018)

ANTH B354 Political Economy, Gender, Ethnicity and Transformation in Vietnam

Today, Vietnam is in the midst of dramatic social, economic and political changes brought about through a shift from a central economy to a market/capitalist economy since the late 1980s. These changes have resulted in urbanization, a rise in consumption and shifts in social and economic relationships and cultural practices as the country has moved from low income to middle income status. This course examines culture and society in Vietnam focusing largely on contemporary Vietnam, but with a view to continuities and historical precedent in past centuries. In this course, we will draw on anthropological studies of Vietnam, as well as literature and historical studies. Relationships between the individual, family, gender, ethnicity, community and state will pervade the topics addressed in the course, as will the importance of political economy, nation, and globalization. Prerequisite: Sophomore standing or higher.

Counts towards: Gender and Sexuality Studies; International Studies
Units: 1.0
Instructor(s): Pashigian, M.
(Fall 2017)

COML B293 The Play of Interpretation

Designated theory course. A study of the methodologies and regimes of interpretation in the arts, humanistic sciences, and media and cultural studies, this course focuses on common problems of text, authorship, reader/spectator, and translation in their historical and formal contexts. Literary, oral, and visual texts from different cultural traditions and histories will be studied through interpretive approaches informed by modern critical theories. Readings in literature, philosophy, popular culture, and film will illustrate how theory enhances our understanding of the complexities of history, memory, identity, and the trials of modernity.

Approach: Critical Interpretation (CI)
Counts towards: International Studies
Units: 1.0
(Not Offered 2017-2018)

EALC B353 The Environment on China's Frontiers

This seminar explores environmental issues on China's frontiers from a historical perspective. It focuses on the particular relationship between the environment and the frontier, examining how these two variables have interacted. The course will deal with the issues such as the relationship between the environment and human ethnic and cultural traditions, social movements, economic growth, political and legal institutions and practices, and changing perceptions. The frontier regions under discussion include Tibet, Xinjiang, Inner Mongolia, and the southwestern ethnic areas, which are all important in defining what China is and who the Chinese are.

Units: 1.0
(Not Offered 2017-2018)

ECON B225 Economic Development

Examination of the issues related to and the policies designed to promote economic development in the developing economies of Africa, Asia, Latin America, and the Middle East. Focus is on why some developing economies grow faster than others and why some growth paths are more equitable, poverty reducing, and environmentally sustainable than others. Includes consideration of the impact of international trade and investment policy, macroeconomic policies (exchange rate, monetary and fiscal policy) and sector policies (industry, agriculture, education, population, and environment) on development outcomes in a wide range of political and institutional contexts. Prerequisite: ECON B105.

Counts towards: Environmental Studies; International Studies
Units: 1.0
Instructor(s): Rock, M.
(Fall 2017)

ECON B236 The Economics of Globalization

An introduction to international economics through theory, policy issues, and problems. The course surveys international trade and finance, as well as topics in international economics. It investigates why and what a nation trades, the consequences of such trade, the role of trade policy, the behavior and effects of exchange rates, and the macroeconomic implications of trade and capital flows. Topics may include the economics of free trade areas, world financial crises, outsourcing, immigration, and foreign investment. Prerequisites: ECON B105. The course is not open to students who have taken ECON B316 or B348.

Counts towards: International Studies
Units: 1.0
Instructor(s): Ceglowski,J.  
(Spring 2018)

**ECON B385 Democracy and Development**

From 1974 to the late 1990’s the number of democracies grew from 39 to 117. This "third wave," the collapse of communism and developmental successes in East Asia have led some to argue the triumph of democracy and markets. Since the late 1990’s, democracy’s third wave has stalled, and some fear a reverse wave and democratic breakdowns. We will question this phenomenon through the disciplines of economics, history, political science and sociology drawing from theoretical, case study and classical literature. Prerequisites: ECON 200; ECON 253 or 304; and one course in Political Science OR Junior or Senior Standing in Political Science OR Permission of the Instructor.

Counts towards: International Studies; Peace, Justice and Human Rights  
Units: 1.0  
Instructor(s): Rock,M.  
(Fall 2017)

**GERM B231 Cultural Profiles in Modern Exile**

This course investigates the anthropological, philosophical, psychological, cultural, and literary aspects of modern exile. It studies exile as experience and metaphor in the context of modernity, and examines the structure of the relationship between imagined/remembered homelands and transnational identities, and the dialectics of language loss and bi- and multilingualism. Particular attention is given to the psychocultural dimensions of linguistic exclusion and loss. Readings of works by Julia Alvarez, Albert Camus, Ana Castillo, Sigmund Freud, Eva Hoffman, Maxine Hong Kingston, Milan Kundera, Friedrich Nietzsche, Salman Rushdie, W. G. Sebald, Kurban Said, and others.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)  
Major Writing Requirement: Writing Attentive  
Counts towards: Latin American, Iberian and Latina/o Studies; International Studies  
Units: 1.0  
(Not Offered 2017-2018)

**GNST B245 Introduction to Latin American, Iberian and Latina/o Studies**

A broad, interdisciplinary survey of themes uniting and dividing societies from the Iberian Peninsula to the Americas. The class introduces the methods and interests of all departments in the concentration, posing problems of cultural continuity and change, globalization and struggles within dynamic histories, political economies, and creative expressions. Course is taught in English.

Approach: Cross-Cultural Analysis (CC)  
Counts towards: Latin American, Iberian and Latina/o Studies; International Studies  
Units: 1.0  
Instructor(s): Gaspar,M.  
(Spring 2018)

**HIST B102 Introduction to African Civilizations**

The course is designed to introduce students to the history of African and African Diaspora societies, cultures, and political economies. We will discuss the origins, state formation, external contacts, and the structural transformations and continuities of African societies and cultures in the context of the slave trade, colonial rule, capitalist exploitation, urbanization, and westernization, as well as contemporary struggles over authority, autonomy, identity and access to resources. Case studies will be drawn from across the continent.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)  
Counts towards: Africana Studies; Gender and Sexuality Studies; International Studies  
Units: 1.0  
Instructor(s): Ngalamulume,K.  
(Fall 2017)

**HIST B200 The Atlantic World 1492-1800**

The aim of this course is to provide an understanding of the way in which peoples, goods, and ideas from Africa, Europe, and the Americas came together to form an interconnected Atlantic World system. The course is designed to chart the manner in which an integrated system was created in the Americas in the early modern period, rather than to treat the history of the Atlantic World as nothing more than an expanded version of North American, Caribbean, or Latin American history.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)  
Counts towards: Africana Studies; Latin American, Iberian and Latina/o Studies; International Studies; Peace, Justice and Human Rights  
Units: 1.0  
(Not Offered 2017-2018)

**HIST B236 African History since 1800**

The course analyzes the history of Africa in the last two hundred years in the context of global political economy. We will examine the major themes in modern African history, including the 19th-century state formation, expansion, or restructuration; partition and resistance; colonial rule; economic, social, political, religious, and cultural developments; nationalism; post-independence politics, economics, and society, as well as conflicts and the burden of disease. The course will also introduce students to the sources and methods of African history.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)  
Counts towards: Africana Studies; International Studies  
Units: 1.0  
Instructor(s): Ngalamulume,K.  
(Spring 2018)

**HIST B237 Topic: Modern African History**

This is a topics course. Course content varies  
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)  
Counts towards: Africana Studies; Gender and Sexuality Studies  
Units: 1.0  
Instructor(s): Ngalamulume,K.  
Fall 2017: Urban History.  
Spring 2018: African Economic Development. This course examines the political economy of African development in historical perspectives. We will address the following questions: Why is the African continent, which is rich in natural resources, so poor? What are the causes of poverty in Africa? The course will analyze the environmental, economic, political, and historical factors that have affected the development of Africa. We will discuss the impact of slavery, colonial exploitation, foreign interventions, foreign aid, trade, and democratic transitions
HIST B258 British Empire: Imagining Indias
This course considers ideas about and experiences of "modern" India, i.e., India during the colonial and post-Independence periods (roughly 1757-present). While "India" and "Indian history" along with "British empire" and "British history" will be the ostensible objects of our consideration and discussions, the course proposes that their imagination and meanings are continually mediated by a wide variety of institutions, agents, and analytical categories (nation, religion, class, race, gender, to name a few examples). The course uses primary sources, scholarly analyses, and cultural productions to explore the political economies of knowledge, representation, and power in the production of modernity.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: International Studies
Units: 1.0
Instructor(s): Kale,M.
(Spring 2018)

HIST B336 Topics in African History
This is a topic course. Course content varies.
Counts towards: Africana Studies; International Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B337 Topics in African History
This is a topics course. Topics vary.
Counts towards: Africana Studies; Gender and Sexuality Studies; International Studies
Units: 1.0
Instructor(s): Ngalumulume,K.

Fall 2017: Global Health Histories in Africa

PHIL B221 Ethics
An introduction to ethics by way of an examination of moral theories and a discussion of important ancient, modern, and contemporary texts which established theories such as virtue ethics, deontology, utilitarianism, relativism, emotivism, care ethics. This course considers questions concerning freedom, responsibility, and obligation. How should we live our lives and interact with others? How should we think about ethics in a global context? Is ethics independent of culture? A variety of practical issues such as reproductive rights, euthanasia, animal rights and the environment will be considered.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Major Writing Requirement: Writing Attentive
Counts towards: Gender and Sexuality Studies; International Studies
Units: 1.0
Instructor(s): Bell,M.
(Spring 2018)

PHIL B225 Global Ethical Issues
The need for a critical analysis of what justice is and requires has become urgent in a context of increasing globalization, the emergence of new forms of conflict and war, high rates of poverty within and across borders and the prospect of environmental devastation. This course examines prevailing theories and issues of justice as well as approaches and challenges by non-western, post-colonial, feminist, race, class, and disability theorists.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies; International Studies
Units: 1.0
Instructor(s): Bell,M.
(Spring 2018)

PHIL B323 Culture and Interpretation
This course will discuss these questions. What are the aims of interpretation? Must we assume that, for cultural objects—like artworks, music, or literature—there must be a single right interpretation? If not, what is to prevent one from sliding into an interpretive anarchism? What is the role of a creator's intentions in fixing upon admissible interpretations? Does interpretation affect the identity of the object of interpretation? If an object of interpretation exists independently of interpretive practice, must it answer to only one right interpretation? In turn, if an object of interpretation is constituted by interpretive practice, must it answer to more than one right interpretation? This course encourages active discussions of these questions.

Major Writing Requirement: Writing Intensive
Counts towards: International Studies
Units: 1.0
(Not Offered 2017-2018)

PHIL B344 Development Ethics
This course explores the meaning of and moral issues raised by development. In what direction and by what means should a society "develop"? What role, if any, does the globalization of markets and capitalism play in processes of development and in systems of discrimination on the basis of factors such as race and gender? Answers to these sorts of questions will be explored through an examination of some of the most prominent theorists and recent literature. Prerequisites: a philosophy, political theory or economics course or permission of the instructor.

Major Writing Requirement: Writing Intensive
Counts towards: Gender and Sexuality Studies; International Studies
Units: 1.0
(Not Offered 2017-2018)

POL S B141 Introduction to International Politics
An introduction to international relations, exploring its main subdivisions and theoretical approaches. Phenomena and problems in world politics examined include systems of power management, imperialism, globalization, war, bargaining, and peace. Problems and institutions of international economy and international law are also addressed. This course assumes a reasonable knowledge of modern world history.

Approach: Cross-Cultural Analysis (CC)
Counts towards: International Studies; Peace, Justice and Human Rights
Units: 1.0
Instructor(s): Allen,M.
(Fall 2017)

POL S B241 The Politics of International Law and Institutions
An introduction to international law, which assumes a working knowledge of modern world history and politics since World War
II. The origins of modern international legal norms in philosophy and political necessity are explored, showing the schools of thought to which the understandings of these origins give rise. Significant cases are used to illustrate various principles and problems. Prerequisite: POLS B250.

Approach: Critical Interpretation (CI)
Counts towards: International Studies
Units: 1.0
(Not Offered 2017-2018)

**POLS B249 Politics of Economic Development**

How do we explain the variations of political and economic systems in the world? What is the relationship between the state and the market? To what extent does the timing of industrialization affect the viability of certain developmental strategies? This seminar introduces the intellectual history of comparative political economy and development studies with readings on both comparative political economy and international political economy. First, we will examine the debates on the dynamics of the state and the market in the development and globalization process. Second, we will explore specific case studies to discuss: 1) how the political and economic processes have changed in response to the interaction of the domestic and international arenas, 2) whether and how the late developers learned from the experiences of early developers, 3) how the international economy and international financial crisis shaped domestic development strategies. Lastly, we will analyze the developmental concerns at the sub-national level with financial liberalization. Prerequisite: Freshman can enroll after they have taken 100 level courses in social science and after getting instructor permission.

Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Oh,S.
(Spring 2018)

**POLS B324 Politics of the Arab Uprisings**

The recent uprisings in Arab countries have shocked the world. Long-entrenched authoritarian regimes have fallen. US allies have been ousted. This seminar is designed to introduce the politics of these recent uprisings. Their origins will be viewed through the lens of political and economic theories of authoritarianism and revolution. The outcomes will be assessed with an eye toward existing ideas about democracy. The course will aim to establish what political science can tell us about these events, and how political science must grow in reaction to them. Prerequisite: One course in political science or Middle East studies or consent of instructor.

Counts towards: International Studies
Units: 1.0
(Not Offered 2017-2018)

**POLS B391 International Political Economy**

This seminar examines the growing importance of economic issues in world politics and traces the development of the modern world economy from its origins in colonialism and the industrial revolution, through to the globalization of recent decades. Major paradigms in political economy are critically examined. Aspects of and issues in international economic relations such as development, finance, trade, migration, and foreign investment are examined in the light of selected approaches. This course is open to all students who have the prerequisites. It also serves as a thesis prep course for political science seniors. Prerequisite: One course in International Politics or Economics is required. Preference is given to seniors although juniors are accepted.

Major Writing Requirement: Writing Attentive
Counts towards: International Studies
Units: 1.0
Instructor(s): Allen,M.
(Fall 2017)

**SOCL B102 Society, Culture, and the Individual**

Analysis of the basic sociological methods, perspectives, and concepts used in the study of society, with emphasis on social structure, education, culture, the self, and power. Theoretical perspectives that focus on sources of stability, conflict, and change are emphasized throughout.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Gender and Sexuality Studies; International Studies
Units: 1.0
(Fall 2017, Spring 2018)

**SOCL B218 Sociology of International Development**

This course examines the persistent gap between the Global North and Global South around problems such as poverty, food insecurity, and access to health and education. We will examine theories and perspectives that address this disparity and explore alternatives to Western models of social organization, as put forth by social movements in the Global South. Throughout the course, we will read key primary texts (manifestos, communiqués, oral histories, and world financial institution reports) to understand the role of different players in the international development field, including global economic and governance institutions, non-governmental organizations, and—most importantly—feminist, afro-descendant, indigenous, and other voices emerging in the Global South.

Approach: Cross-Cultural Analysis (CC)
Units: 1.0
(Not Offered 2017-2018)

**SOCL B317 Comparative Social Policy: Cuba, China, US, Scandinavia**

This course will examine different countries’ policy choices to address different societal challenges. Four societal types - socialist (Cuba), post-socialist (China), capitalist (US), and social-democratic (Scandinavia) - will be studies to help us understand how these different kinds of societies conceive of social problems and propose and implement attempted solutions. We will examine particular problems/solutions in four domains: health/ sports; education; environment; technological development. As we explore these domains, we will attend to methodological issues involved in making historical and institutional comparisons.

Counts towards: Education; Health Studies
Units: 1.0
(Not Offered 2017-2018)

**SOWK B563 Global Public Health**

This course is open to graduate and undergraduate students and has relevance for students in Praxis, field education, study abroad and various internships (although these practice experiences are not required for the course). Globalization increasingly dictates the availability of social and economic resources as well as access to them, and at the same time presents a shared set of problems such as violence (particularly against women and children), unemployment, HIV-AIDS,
poverty and starvation, threats to indigenous populations, and environmental destruction, among others. Changes from globalization require new ways to conceptualize and implement the welfare state and an envisioning of social justice that crosses borders. A domestic perspective and the lens of cultural context are no longer adequate; they require expansion to include geographic context as well as ideas and practices to address troubles shared by nations (such as assimilation) and by populations crossing borders (into areas not always welcoming of them).

Units: 1.0
(Not Offered 2017-2018)

ITALIAN AND ITALIAN STUDIES

Students may complete a major or minor in Italian Studies.

Faculty

David Cast, Professor of History of Art
Roni Kubati, Visiting Assistant Professor
Nicholas Patruno, Katharine E. McBride Professor
Pamela Pisoni, Instructor
Roberta Ricci, Chair and Associate Professor of Italian

Based on an interdisciplinary approach that views culture as a global phenomenon, the aims of the major in Italian Studies are to acquire a knowledge of Italian language, literature, and culture, including cinema, art, journalism, pop culture, and music. The Department of Italian Studies also cooperates with the Departments of French and Spanish in the Romance Languages major and with the other foreign languages in the TriCo for a major in Comparative Literature. The Italian Department cooperates also with the Center for International Studies (CIS).

College Foreign Language Requirement

Before the start of the senior year, each student must complete, with a grade of 2.0 or higher, two units of foreign language. Students may fulfill the requirement by completing two sequential semester-long courses in one language, either at the elementary level or, depending on the result of their language placement test, at the intermediate level. A student who is prepared for advanced work may complete the requirement instead with two advanced free-standing semester-long courses in the foreign language(s) in which she is proficient. Non-native speakers of English may choose to satisfy all or part of this requirement by coursework in English literature.

Major Requirements

Italian Language/Literature (ILL) and Italian Cultural Studies (ICS) Major

The Italian Language/Literature major and the Italian Cultural Studies major consists of ten courses starting at the ITAL 101/102 level, or an equivalent two-semester sequence taken elsewhere. The department offers a two-track system as guidelines for completing the major in Italian or in Italian Studies. Both tracks require ten courses, including ITAL 101-102. For students in either Track A or B we recommend a senior experience offered with ITAL 398 and ITAL 399, courses that are required for honors. Students may complete either track.

Recommendations are included below --models of different pathways through the major:

Majors are required to complete one Writing Intensive (WI) course in the major. The WI courses will prepare students towards their senior project and to competent and appropriate writing, mainly in three ways: 1) Teach the writing process—planning, drafting, revising, and editing; 2) Emphasize the role of writing by allocating a substantial portion of the final grade to writing assignments; 3) Offer students the opportunity to receive feedback from professors and peers (through class peer review sessions). In responding to the feedback, students will experience writing as a process of discovery (re-visioning) and meaning. The goal of the new WI course will be to get students to re-think the argument, logical connection, focus, transition, evidence, quotes, organization, and sources.

ILL Major/ Track A

Major requirements in ILL are 10 courses. Track A may be appropriate for students with an interest in literary and language studies. Required: ITAL 101/102, plus six courses (or more) conducted in Italian and two selected from among a list of approved ICS courses in English that may be taken in either within the department or in various other disciplines offered at the College (i.e. History, History of Art, English, Visual Art and Film Studies, Philosophy, Comparative Literature, Cities, Archaeology, Classics). Adjustments will be made for students taking courses abroad. Of the courses taken in Italian, students are expected to enroll in the following areas: Dante (ITAL 301), Renaissance (ITAL 304 or 302), Survey (ITAL 307), and two courses on Modern Italian literature (ITAL 380, ITAL 310, ITAL 320, ITAL 306)

ICS/Track B

Major requirements in ICS are 10 courses. Track B may be appropriate for students with an interest in cultural and interdisciplinary studies. The concentration is open to all majors and consists of both interdisciplinary and single-discipline courses drawn from various academic departments at the college. Required: ITAL 101/102, plus three courses conducted in Italian and four related courses in English that may be taken either within the department or in an allied-related fields in various disciplines throughout the college, or courses taken on BMC approved study-abroad programs, such as: History, History of Art, Visual Art, and Film Studies, Comparative Literature, Cities, Classics. *Faculty in other programs may be willing to arrange work within courses that may count for the major. Courses must be approved by the Chair of the Italian Studies Department.

Major with Honors

Students may apply to complete the major with honors. The honors component requires the completion of a year-long thesis advised by a faculty member in the department. Students enroll in the senior year in ITAL 398 and ITAL 399. Application to it requires a GPA in the major of 3.7 or higher, as well as a written statement, to be submitted by the fall of senior year, outlining the proposed project (see further below) and indicating the faculty member who has agreed to serve as advisor. The full departmental faculty vets the proposals and will decide if honors will be given.

Students will write a 40 page thesis that aims to engage with primary texts and relevant secondary literature. By the end of the fall semester, students must have completed a formal proposal and a Table of Content in draft. Proposals for the thesis should describe the questions being asked in the research, and
assign final honors to the research project. Students must include a discussion of the primary sources on which the research will rest, as well as a preliminary bibliography of relevant secondary studies. They also must include a rough timetable indicating in what stages the work will be completed. It is expected that before submitting their proposals students will have conferred with a faculty member who has agreed to serve as advisor. In April students will give an oral presentation of their work of approximately one hour to faculty members and interested students. The final draft is due on or around April 28th of the senior year and will be graded by two faculty members (one of whom is the advisor). Faculty will retain the option to assign final honors to the research project.

Study Abroad

Students who are studying abroad for the Italian major for one year can earn two credits in Italian Literature and one credit in allied fields (total of four credits). Those who are studying abroad for one semester can earn no more than a total of two credits in Italian Literature or one credit in Italian Literature and one credit in an allied field (total of two credits).

University of Pennsylvania

Students majoring at BMC cannot earn more than two credits at the University of Pennsylvania in Italian.

Minor Requirements

Requirements for the minor in Italian Studies are ITAL 101, 102 and four additional units including two at the 200 level one of which in literature and one of which in Italian and two at the 300 level one of which in literature and one of which in Italian. With departmental approval, students who begin their work in Italian at the 200 level will be exempted from ITAL 101 and 102. For courses in translation, the same conditions for majors apply.

Elective Courses

- ARTW B240/COML B240 Literary Translation
- CITY B207 Topics in Urban Studies
- CITY B360 Digital Rome
- COML B225 Censorship: Historical Contexts, Local Practices and Global Resonance
- COML B213 Theory in Practice: Critical Discourses in the Humanities
- ENGL H385 Topics in Apocalyptic Writing at Haverford College
- ENGL H220 Epic at Haverford College
- HART B104-001 Critical Approaches to Visual Representation: The Classical Tradition
- HART B253: Survey of Western Architecture: 1400-1800
- HART B323: Topics in Renaissance Art
- HART/RUSSIAN B215 Russian Avant-Garde Art, Literature and Film
- HIST B238 From Bordellos to Cybersex History of Sexuality in Modern Europe
- HIST B319 Topics in Modern European History
- MUSC H207 Italian Keyboard Tradition

COURSES

ITAL B101 Intermediate Italian

This course provides students with a broader basis for learning to communicate effectively and accurately in Italian. While the principal aspect of the course is to further develop language abilities, the course also imparts a foundation for the understanding of modern and contemporary Italy. Students will gain an appreciation for Italian culture and be able to communicate orally and in writing in a wide variety of topics. We will read newspaper and magazine articles to analyze aspects on modern and contemporary Italy. We will also view and discuss Italian films and internet materials. Prerequisite: ITAL B101 or placement.

Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): Ricci, R.
(Fall 2017)

ITAL B102 Intermediate Italian II

This course provides students with a broader basis for learning to communicate effectively and accurately in Italian. While the principal aspect of the course is to further develop language abilities, the course also imparts a foundation for the understanding of modern and contemporary Italy. Students will gain an appreciation for Italian culture and be able to communicate orally and in writing in a wide variety of topics. We will read newspaper and magazine articles to analyze aspects on modern and contemporary Italy. We will also view and discuss Italian films and internet materials. Prerequisite: ITAL B101 or placement.

Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): Ricci, R.
(Spring 2018)

ITAL B207 Dante in Translation

A reading of the Vita Nuova (Poems of Youth) and The Divine Comedy: Hell, Purgatory and Paradise in order to discover the subtle nuances of meaning in the text and to introduce students to Dante’s tripartite vision of the afterlife. Dante’s masterpiece lends itself to study from various perspectives: theological, philosophical, political, allegorical, historical, cultural, and literary. Personal journey, civic responsibilities, love, genre, governmental accountability, church-state relations, the tenuous balance between freedom of expression and censorship—these are some of the themes that will frame the discussions. Course taught in English; One additional hour for students who want Italian credit (ITAL 301).

Approach: Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

ITAL B211 Primo Levi, the Holocaust, and Its Aftermath

A consideration, through analysis and appreciation of his major works, of how the horrific experience of the Holocaust awakened in Primo Levi a growing awareness of his Jewish heritage and led him to become one of the dominant voices of that tragic historical event, as well as one of the most original new literary figures of post-World War II Italy. Always in relation to Levi and his works, attention will also be given to Italian women writers whose works are also connected with the Holocaust. Course is taught in English. An extra hour will be scheduled for those students taking the course for Italian or Romance Languages credit.
Approach: Cross-Cultural Analysis (CC)
Units: 1.0
(Not Offered 2017-2018)

ITAL B212 Italy Today: New Voices, New Writers, New Literature
This course, taught in English, will focus primarily on the works of the so-called "migrant writers" who, having adopted the Italian language, have become a significant part of the new voice of Italy. In addition to the aesthetic appreciation of these works, this course will also take into consideration the social, cultural, and political factors surrounding them. The course will focus on works by writers who are now integral to Italian canon – among them: Cristina Ali-Farah, Igiaba Scego, Ghermandi Gabriella, Amara Lakhous. As part of the course, movies concerned with various aspects of Italian Migrant literature will be screened and analyzed. One additional hour for students who want Italian credit.
Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies; Film Studies
Units: 1.0
Instructor(s): Kubatí, R.
(Spring 2018)

ITAL B213 Theory in Practice: Critical Discourses in the Humanities
An examination in English of leading theories of interpretation from Classical Tradition to Modern and Post-Modern Time. This is a topics course. Course content varies.
Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

ITAL B214 The Myth of Venice (1800-2000)
In English. The Republic of Venice existed for over a millennium. This course begins in the year 1797 at the end of the Republic and the emerging of an extensive body of literature centered on Venice and its mythical facets. Readings will include the Romantic views of Venice (excerpts from Lord Byron, Fredrick Schiller, Wolfang von Goethe, Ugo Foscolo, Alessandro Manzoni) and the 20th century reshaping of the literary myth (readings from Thomas Mann, Filippo Tommaso Marinetti, Gabriele D’Annunzio, Henry James, and others). A journey into this fascinating tradition will shed light on how the literary and visual representation of Venice, rather than focusing on a nostalgic evocation of the death of the Republic, became a territory of exploration for literary modernity. The course is offered in English; all texts are provided in translation. One additional hour for students who want Italian credit. Suggested Preparation: Counts toward Comp Lit. Counts toward Film Studies.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

ITAL B219 Multiculturalism in Medieval Italy
This course examines cross-cultural interactions in medieval Italy played out through the patronage, production, and reception of works of art and architecture. Sites of patronage and production include the cities of Venice, Palermo, and Pisa. Media examined include buildings, mosaics, ivories, and textiles.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
(Not Offered 2017-2018)

ITAL B229 The Politics of Food in Italian Literature, Culture, and Cinema
In English. A profile of Italian literature/culture/cinema obtained through an analysis of gastronomic documents, films, literary texts, and magazines. We will also include a discussion of the Slow Food Revolution, a movement initiated in Italy in 1980 and now with a world-wide following, and its social, economic, ecological, aesthetic, and cultural impact to counteract fast food and to promote local food traditions. Course taught in English. One additional hour for students who want Italian credit.
Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

ITAL B235 Scrittrici e registe italiane: Heroines In and Out of the Canon
Emphasis will be put on Italian women writers and film directors, who are often left out of syllabi adhering to traditional canons. Particular attention will be paid to: a) women writers who have found their voices (through writing) as a means of psychological survival in a patriarchal world; b) women engaged in the women’s movement of the 70’s and who continue to look at, and rewrite, women’s stories of empowerment and solidarity; c) “divaism”, fame, via beauty and sex with a particular emphasis on the ’60s (i.e. Gina Lollobrigida, Sofia Loren, Claudia Cardinale). Counts toward Gender and Sexuality Studies; Counts toward Film Studies.
Approach: Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

ITAL B255 Uomini d’onore in Sicilia: Italian Mafia in Literature and Cinema
This course aims to explore representations of Mafia figures in Italian literature and cinema, starting from the ‘classical’ example of Sicily. From Sicily, the “octopus” (piovra), as the Mafia is called in Italy, has spread throughout Italy, and has pervaded almost every facet of Italian life, including cultural life. The course will introduce students to both Italian Studies from an interdisciplinary prospective and also to narrative, using fiction and non-fiction texts written by 19th, 20th, and 21st century writers. Novels, films, testimonies and TV series will offer different representations of the Mafia: its ethics, its relation with politics, religion and business, its ideas of friendship, family, masculinity and femininity. Internships in Italy will be available connected with this course. Course is taught in Italian. Prerequisite: ITAL B102 or permission of the instructor.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Film Studies
Units: 1.0
Instructor(s): Ricci, R.
(Fall 2017)

ITAL B301 Dante
A reading of the Vita Nuova (Poems of Youth) and The Divine Comedy: Hell, Purgatory and Paradise in order to discover the
ITAL B306 Youth in 20th Century Italian Literature and Cinema

This interdisciplinary course focuses on literary texts and visual material dealing with youth and youth culture in post-fascist Italy. How is youth described in Italian culture after WWII? What does youth represent in the Italian imagination of 20th century Italy? Which language is used by the youth? While the focus in analyzing the challenges faced by youth is primarily on literature and film studies, throughout the semester the course will also touch upon sociological, cultural, and anthropological perspectives concerning the role of the family, peer relationships, prostitution, drugs, criminality and violence, diversity, gender identity, and sexuality. Students will be required to attend film screenings or view films on their own devices. Prerequisite: One literature course at the 200 level or permission by the instructor.

Major Writing Requirement: Writing Intensive
Counts towards: Gender and Sexuality Studies; Film Studies
Units: 1.0
(Instructor(s): Ricci, R. (Spring 2018))

ITAL B307 Insiders and Outsiders: Otherness in Italian Literature

This course will introduce students to the most representative works in Italian literature of all genres—poetry, novels, scientific prose, theater, diaries, narrative, epistolary—throughout the centuries, with emphasis on marginalization, exile, political persecution, national identity, violence, and otherness. We will bring works of literature to the attention of students who are interested in the key role played by Italian culture in the development of a European civilization, including the international debate on modernity and post-modernity. Readings and lectures will move from 14th century writers (Dante, Boccaccio) to Humanistic Thought (Florentine political revolution) and the Renaissance (Machiavelli); from the Enlightenment (Foscolo, Leopardi, Manzoni) to modernity (Pirandello, Svevo) and post-modernism (Calvino). Prerequisite: One literature course at the 200 level or permission by the instructor.

Counts towards: Film Studies
Units: 1.0
(Instructor(s): Ricci, R. (Spring 2018))

ITAL B310 Detective Fiction

In English. Why is detective fiction so popular? What explains the continuing multiplication of detective texts despite the seemingly finite number of available plots? This course will explore the worldwide fascination with this genre beginning with European writers before turning to the more distant mystery stories from around the world. The international scope of the readings will highlight how authors in different countries have developed their own national detective typologies while simultaneously responding to international influence of the British-American model. Italian majors taking this course for Italian credit will be required to meet for an additional hour with the instructor and do the readings and writing in Italian. Prerequisite: One literature course at the 200 level or permission by the instructor. One additional hour for students who want Italian credit.

Major Writing Requirement: Writing Intensive
Counts towards: Film Studies
Units: 1.0
(Instructor(s): Kubati, R. (Fall 2017))

ITAL B319 Multiculturalism and Diversity in Medieval Italy

This interdisciplinary course will reflect upon history, religion, literature, politics, and built environment of Italy from ca. 1000 to 1400. Italy was famous for its diverse cultural landscape of urban towers and fortified castles, its Mediterranean trade, and its ethnically and religiously differentiated voices. The course examines cross-cultural interactions played out through the patronage, production, and reception of works of art, literature, and architecture. Sites of patronage and production include the cities of Venice, Palermo, and Pisa. It counts towards Art History and City.

Units: 1.0
Instructor(s): Kubati, R.
(Fall 2017)

ITAL B320 Nationalism and Freedom: The Italian Risorgimento in Foscolo, Manzoni, Leopardi

This course deals with 19th century Italian poetry and literary movement for Italian unification inspired by the realities of the new economic and political forces at work after 1815. As a manifestation of the nationalism sweeping over Europe during the nineteenth century, the Risorgimento aimed to unite Italy under one flag and one government. For many Italians, however, Risorgimento meant more than political unity. It described a movement for the renewal of Italian society and people beyond purely political aims. Among Italian patriots the common denominator was a desire for freedom from foreign control, liberalism, and constitutionalism. The course will discuss issues such as Enlightenment, Romanticism, Nationalism, and the complex relationship between history and literature in Foscolo, Manzoni, and Leopardi. This course is taught in Italian. Prerequisite: one 200 level Italian course.

Major Writing Requirement: Writing Intensive
Units: 1.0
(Instructor(s): Ricci, R. (Spring 2018))

ITAL B340 The Art of Italian Unification

This course examines cross-cultural interactions played out through the patronage, production, and reception of works of art, literature, and architecture. Sites of patronage and production include the cities of Venice, Palermo, and Pisa. It counts towards Art History and City.
ITAL B380 Modernity and Psychoanalysis: Crossing National Boundaries in 20th c. Italy and Europe

Designed as an in-depth interdisciplinary exploration of Italy’s intellectual life, the course is organized around major literary and cultural trends in 20th century Europe, including philosophical ideas and cinema. We investigate Italian fiction in the global and international perspective, from modernity to Freud and Psychoanalysis, going beyond national boundaries and proposing ethical models across historical times. Prerequisite: One 200-Level course in Italian
Unites: 1.0
(Note Offered 2017-2018)

ITAL B398 Senior Seminar

This course is open only to seniors in Italian and in Romance Languages. Under the direction of the instructor, each student prepares a senior thesis on an author or a theme that the student has chosen. By the end of the fall semester, students must have completed an abstract and a critical annotated bibliography to be presented to the department. See Thesis description. Prerequisite: This course is open only to seniors in Italian Studies and Romance Languages with a GPA of 3.7.
Unites: 1.0
Instructor(s): Ricci, R.
(Fall 2017)

ITAL B399 Senior Conference

Under the direction of the instructor, each student prepares a senior thesis on an author or a theme that the student has chosen. In April there will be an oral defense with members and majors of the Italian Department. See Thesis description. Prerequisite: This course is open only to seniors in Italian Studies and Romance Languages.
Unites: 1.0
Instructor(s): Ricci, R.
(Spring 2018)

ITAL B403 Supervised Work

Offered with approval of the Department.
Unites: 1.0
(Fall 2017)

CITY B360 Topics: Urban Culture and Society

This is a topics course. Course content varies. Current topic description: This course explores intersections of migration, labor and cities in today’s globalized economy. We will examine how broad trends have shaped labor markets in different urban contexts and shed light on the central role of migrant workers within them. Gaining a deeper understanding of migrant workers’ experiences, struggles and contributions is a key objective of the course.
Unites: 1.0
Instructor(s): Raddatz, L.
(Spring 2018)

FREN B213 Theory in Practice: Critical Discourses in the Humanities

By bringing together the study of major theoretical currents of the 20th century and the practice of analyzing literary works in the light of theory, this course aims at providing students with skills to use literary theory in their own scholarship. The selection of theoretical readings reflects the history of theory (psychoanalysis, structuralism, narratology), as well as the currents most relevant to the contemporary academic field: Post-structuralism, Post-colonialism, Gender Studies, and Ecocriticism. They are paired with a diverse range of short stories (Poe, Kafka, Camus, Borges, Calvino, Morrison, Djebar, Ngozi Adichie) that we discuss along with our study of theoretical texts. The class will be conducted in English with an additional hour in French for students wishing to take it for French credit.
Approach: Critical Interpretation (CI)
Unites: 1.0
Instructor(s): Sanquer, M.
(Fall 2017)

HART B339 The Art of Italian Unification

Following Italian unification (1815-1871), the statesman, novelist, and painter Massimo d’Azeglio remarked, “Italy has been made; now it remains to make Italians.” This course examines the art and architectural movements of the roughly 100 years between the uprisings of 1848 and the beginning of the Second World War, a critical period for defining Italianità. Subjects include the paintings of the Macchiaioli, reactionaries to the 1848 uprisings and the Italian Independence Wars, the politics of nineteenth-century architectural restoration in Italy, the re-urbanization of Italy’s new capital Rome, Fascist architecture and urbanism, and the architecture of Italy’s African colonies.
Major Writing Requirement: Writing Intensive
Unites: 1.0
(Note Offered 2017-2018)

HART B630 Topics in Renaissance and Baroque Art

This is a topics course. Course content varies. Current topic description: This seminar has as its subject the history of objects from Italy and other European countries, now described as Mannerist. We are also concerned with the critical history of these works and the attention given to them within the History of Art, especially in Germany in the first years of the last century, and then ways this category can be used to speak of art at other moments and in other cultural contexts.
Unites: 1.0
Instructor(s): Cast, D.
(Fall 2017)

HIST B238 From Bordellos to Cybersex History of Sexuality in Modern Europe

This course is a detailed examination of the changing nature and definition of sexuality in Europe from the late nineteenth century to the present. Throughout the semester we critically examine how understandings of sexuality changed—from how it was discussed and how authorities tried to control it to how the practice of sexuality evolved. Focusing on both discourses and lived experiences, the class will explore sexuality in the context of the following themes: prostitution and sex trafficking, the rise of medicine with a particular attention to sexology, psychiatry and psychoanalysis; the birth of the homo/hetero/bisexual divide; the rise of the “New Woman”; abortion and contraception; the “sexual revolution” of the 60s; pornography and consumerism; LGBTQ activism; concluding with considering sexuality in the age of cyber as well as genetic technology. In examining these issues we will question the role and influence of different political systems and war on sexuality. By paying special attention to
LATIN AMERICAN, IBERIAN, AND LATINA/O STUDIES

Students may complete a minor in Latin American, Iberian and Latina/o Studies.

Faculty

Coordinators

Martin Gaspar, Assistant Professor of Spanish and Acting Co-Director of the Latin American, Latina/o and Iberian Studies Program

Jennifer Harford-Vargas, Associate Professor of English on the Rosabeth Moss Kanter Change Master Fund and Co-Director of the Latin American, Latina/o and Iberian Studies Program (on leave semesters I and II)

Veronica Montes, Assistant Professor of Sociology and Co-Director of the Latin American, Latina/o and Iberian Studies Program

Minor Requirements

To fulfill the requirements, the student must complete:

- An introductory course, GNST 245: Introduction to Latin American, Latina/o and Iberian Studies or its Haverford equivalent: SPAN 240 Latin American and Iberian Culture and Civilization.
- Five courses that count toward the minor. At least one of them should be at the 300-level.
- In the spring of the senior year, an individual presentation on an issue relevant to LAILS. Minors will present their individual projects in a conference-style panel.

It is strongly recommended that students seek proficiency in one of the languages spoken by peoples of Iberia or Latin America.

COURSES

CITY B229 Topics in Comparative Urbanism

This is a topics course. Course content varies. Current topic description: City, Nature and Culture - Creativity, sprawl, alienation, mobility, nature and artifice—what do developments beyond the metropolis tell us about urban life. Probing suburban places, experiences, imagery and reforms around Paris, Hong Kong, Buenos Aires and Philadelphia, this required major writing seminar examines suburbs for both problems from the past and ideas for the future.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)

Major Writing Requirement: Writing Intensive

Counts towards: Latin American, Iberian and Latina/o Studies

Units: 1.0

Instructor(s): McDonogh, G.

(Spring 2018)
ENGL B217 Narratives of Latinidad

This course explores how Latina/o writers fashion bicultural and transnational identities and narrate the intertwined histories of the U.S. and Latin America. We will focus on topics of shared concern among Latino groups such as struggles for social justice, the damaging effects of machismo and racial hierarchies, the politics of Spanglish, and the affective experience of migration. By analyzing a range of cultural production, including novels, poetry, testimonial narratives, films, activist art, and essays, we will unpack the complexity of Latinidad in the Americas.

Approach: Critical Interpretation (CI)
Counts towards: Africana Studies; Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B236 Latina/o Culture and the Art of Migration

Gloria Anzaldúa has famously described the U.S.-Mexico border as an open wound and the border culture that arises from this fraught site as a third country. This course will explore how Chicana/os and Latina/os creatively represent different kinds of migrations across geo-political borders and between cultural traditions to forge transnational identities and communities. We will use cultural production as a lens for understanding how citizenship status, class, gender, race, and language shape the experiences of Latin American migrants and their Latina/o children. We will also analyze alternative metaphors and discourses of resistance that challenge anti-immigrant rhetoric and reimage the place of undocumented migrants and Latina/os in contemporary U.S. society. Over the course of the semester, we will probe the role that literature, art, film, and music can play in the struggle for migrants’ rights and minority civil rights, querying how the imagination and aesthetics can contribute to social justice. We will examine a number of different genres, as well as read and apply key theoretical texts on the borderlands and undocumented migration.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B239 African American Poetry

This course explores the work of black poets in the Americas. Focusing on a range of poetic forms from the 18th century through the present, we will consider key questions that have animated the works of black poets in North America and the Caribbean, and how they have used poetic strategy to engage these questions. How do black poets explore black political and social life in various historical and geographical contexts? How do they use particular formal strategies (for example, form poetry, free verse, narrative poetry, and experimental modes) to interrogate notions of blackness? How do political movements around gender, class, and sexuality factor in? As we approach these questions, we will consider important critical conversations on African American poetry and poetics, examining how both well-known and underexplored poets use form to complicate blackness and imagine various forms of freedom. Our work will take us through several poetic genres and forms, including print works, performance poetry, hip hop music, and digital media. Throughout our analysis, we will consider how discourses on gender, sexuality, class, national and transnational identity, and other engagements with difference shape black poetic expression, both historically and in our current moment.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Africana Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Sullivan, M.
(Fall 2017)

ENGL B320 Black Feminist Literature

This course explores contemporary black feminist literature and culture on a transnational stage. We will consider the works of prominent, emerging, and underexplored black feminist writers from various African diaspora locations, including South Africa, West Africa, Europe, North America, and the Caribbean. How do these writers engage with key currents in global black feminist politics, including understandings of gender, sexuality, class, nationality and colonialism? How do they complicate these discussions in their work? We will ground our exploration in close study of black feminist poetics—the specific formal and creative choices that black feminist poets, fiction writers, visual artists, hip hop artists, webseries producers and others use to examine gender and sexuality in their art. Paying particular attention to the work of queer and LGBTI+ (Lesbian, Gay, Bisexual, Trans* and Intersex) artists, we will consider the various meanings of terms such as “black,” “feminist,” and “queer” in various parts of the African Diaspora. Our work will emphasize close analysis of black feminist writers’ works, as well as collaborative exercises and invited in-class discussions with several contemporary black diasporic feminist artists themselves. Requirements include two short papers, regular response papers, and a final project.

Counts towards: Africana Studies; Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Sullivan, M.
(Not Offered 2017-2018)

ENGL B345 Topics in Narrative Theory

This is a topics course. Course content varies.

Counts towards: Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

GERM B231 Cultural Profiles in Modern Exile

This course investigates the anthropological, philosophical, psychological, cultural, and literary aspects of modern exile. It studies exile as experience and metaphor in the context of modernity, and examines the structure of the relationship between imagined/remembered homelands and transnational identities, and the dialectics of language loss and bi- and multilingualism. Particular attention is given to the psychocultural dimensions of linguistic exclusion and loss. Readings of works by Julia Alvarez, Albert Camus, Ana Castillo, Sigmund Freud,

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Major Writing Requirement: Writing Attentive
Counts towards: Latin American, Iberian and Latina/o Studies; International Studies
Units: 1.0
(Not Offered 2017-2018)

**GNST B245 Introduction to Latin American, Iberian and Latina/o Studies**

A broad, interdisciplinary survey of themes uniting and dividing societies from the Iberian Peninsula to the Americas. The class introduces the methods and interests of all departments in the concentration, posing problems of cultural continuity and change, globalization and struggles within dynamic histories, political economies, and creative expressions. Course is taught in English.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Latin American, Iberian and Latina/o Studies; International Studies
Units: 1.0
Instructor(s): Gaspar, M.
(Spring 2018)

**HIST B127 Indigenous Leaders 1492-1750**

Studies the experiences of indigenous men and women who exercised local authority in the systems established by European colonizers. In return for places in the colonial administrations, these leaders performed a range of tasks. At the same time they served as imperial officials, they exercised "traditional" forms of authority within their communities, often free of European presence. These figures provide a lens through which early modern colonialism is studied.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Latin American, Iberian and Latina/o Studies; Peace, Justice and Human Rights
Units: 1.0
Instructor(s): Gallup-Díaz, I.
(Spring 2018)

**HIST B129 The Religious Conquest of the Americas**

The course examines the complex aspects of the European missionization of indigenous people, and explores how two traditions of religious thought/practice came into conflict. Rather than a transposition of Christianity from Europe to the Americas, something new was created in the contested colonial space.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

**HIST B200 The Atlantic World 1492-1800**

The aim of this course is to provide an understanding of the way in which peoples, goods, and ideas from Africa, Europe, and the Americas came together to form an interconnected Atlantic World system. The course is designed to chart the manner in which an integrated system was created in the Americas in the early modern period, rather than to treat the history of the Atlantic World as nothing more than an expanded version of North American, Caribbean, or Latin American history.

Approach: Inquiry into the Past (IP)
Counts towards: Africana Studies; Latin American, Iberian and Latina/o Studies; Peace, Justice and Human Rights
Units: 1.0
(Not Offered 2017-2018)

**HIST B212 Pirates, Travelers, and Natural Historians: 1492-1750**

In the early modern period, conquistadors, missionaries, travelers, pirates, and natural historians wrote interesting texts in which they tried to integrate the New World into their existing frameworks of knowledge. This intellectual endeavor was an adjunct to the physical conquest of American space, and provides a framework through which we will explore the processes of imperial competition, state formation, and indigenous and African resistance to colonialism.

Approach: Inquiry into the Past (IP)
Counts towards: Africana Studies; Environmental Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Gallup-Díaz, I.
(Fall 2017)

**HIST B215 Europe and the Other 1492-1800**

This course will introduce students to process through which Europeans created systems and categories of difference into which they placed Indigenous, African, and Asian peoples between the years 1492 and 1815. Topics of study include Indigenous leaders, slave and free communities, and cultural mediators on colonial frontiers.

Approach: Inquiry into the Past (IP)
Counts towards: Africana Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Gallup-Díaz, I.
(Fall 2017)

**HIST B265 Colonial Encounters in the Americas**

The course explores the confrontations, conquests and accommodations that formed the "ground-level" experience of day-to-day colonialism throughout the Americas. The course is comparative in scope, examining events and structures in North, South and Central America, with particular attention paid to indigenous peoples and the nature of indigenous leadership in the colonial world of the 18th century.

Approach: Inquiry into the Past (IP)
Counts towards: Africana Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

**HIST B327 Topics in Early American History**

This is a topics course. Course content varies.
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

**HIST B339 The Making of the African Diaspora 1450-1800**

This course explores the emergence, development, and challenges to the ideologies of whiteness and blackness, that have been in place from the colonial period to the present. Through the reading of primary and secondary sources, we
will explore various ways through which enslaved people imagined freedom, personal rights, community membership, and some of the paths they created in order to improve their experiences and change the social order. In an attempt to have a comparative approach, we will look at particular events and circumstances that took place in few provinces in the Americas, with an emphasis on Latin America and the Caribbean. The course will also look at the methodological challenges of studying and writing history of people who in principle, were not allowed to produce written texts. Throughout, we will identify and underscore the contribution that people of African descent have made to the ideas of rights, freedom, equality, and democracy.

Counts towards: Africana Studies; Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B371 Topics in Atlantic History: The Early Modern Pirate in Fact and Fiction
This course will explore piracy in the Americas in the period 1550-1750. We will investigate the historical reality of pirates and what they did, and the manner in which pirates have entered the popular imagination through fiction and films. Pirates have been depicted as lovable rogues, anti-establishment rebels, and enlightened multiculturists who were skilled in dealing with the indigenous and African peoples of the Americas. The course will examine the facts and the fictions surrounding these important historical actors.

Major Writing Requirement: Writing Intensive
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Gallup-Díaz,I.
(Spring 2018)

SOCL B225 Women in Society
A study of the contemporary experiences of women of color in the Global South. The household, workplace, community, and the nation-state, and the positions of women in the private and public spheres are compared cross-culturally. Topics include feminism, identity and self-esteem; globalization and transnational social movements and tensions and transitions encountered as nations embark upon development.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Africana Studies; Child and Family Studies; Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Montes,V.
(Spring 2018)

SOCL B235 Mexican-American Communities
For its unique history, the number of migrants, and the two countries’ proximity, Mexican migration to the United States represents an exceptional case in world migration. There is no other example of migration with more than 100 years of history. The copious presence of migrants concentrated in a host country, such as we have in the case of the 11.7 million Mexican migrants residing in the United States, along with another 15 million Mexican descendants, is unparalleled. The 1,933-mile-long border shared by the two countries makes it one of the longest boundary lines in the world and, unfortunately, also one of the most dangerous frontiers in the world today. We will examine the different economic, political, social and cultural forces that have shaped this centenarian migration influx and undertake a macro-, meso-, and micro-levels of analysis. At the macro-level of political economy, we will investigate the economic interdependency that has developed between Mexico and the U.S. over different economic development periods of these countries, particularly, the role the Mexican labor force has played to boosting and sustaining both the Mexican and the American economies. At the meso-level, we will examine different institutions both in Mexico and the U.S. that have determined the ways in which millions of Mexican migrate to this country. Last, but certainly not least, we will explore the impacts that both the macro-and meso-processes have had on the micro-level by considering the imperatives, aspirations, and dreams that have prompted millions of people to leave their homes and communities behind in search of better opportunities. This major life decision of migration brings with it a series of social transformations in family and community networks, this will look into the cultural impacts in both the sending and receiving migrant communities. In sum, we will come to understand how these three levels of analysis work together.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies; Praxis Program
Units: 1.0
Instructor(s): Montes,V.
(Fall 2017)

SOCL B246 Sociology of Migration: A Cross-Cultural Overview of Contemporary Challenges
The twenty-first century began much as the twentieth century did for the United States with high levels of immigration. This has affected not only the nation, but the discipline of sociology. Just as early twentieth century Chicago School sociology focused on immigration and settlement issues, so too the first decade of the twenty-first century shows a flurry of sociological imagination devoted to immigration scholarship. This course will center on the key texts, issues, and approaches coming out of this renovated sociology of immigration, but we will also include approaches to the study of immigration from history, anthropology, and ethnic studies. While we will consider comparative and historical approaches, our focus will be on the late twentieth century through the present, and we will spend a good deal of time focusing on the longest running labor migration in the world, Mexican immigration to the U.S., as well as on Central American migrant communities in the U.S. Students with an interest in contemporary U.S. immigration will be exposed to a survey of key theoretical approaches and relevant issues in immigration studies in the social sciences. Current themes, such as globalization, transnationalism, gendered migration, immigrant labor markets, militarization of the U.S.-Mexican border, U.S. migration policy, the new second generation and segmented assimilation, and citizenship will be included. Prerequisite: SOCL 235

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Montes,V.
(Spring 2018)

SPAN B110 Análisis cultural y grámatica en contexto
An introduction to the history and cultures of the Spanish-speaking world in a global context: art, folklore, geography, literature, sociopolitical issues, and multicultural perspectives. Written and oral proficiency is emphasized. This course is a
SPAN B200/B202; or another SPAN 200-level course. Critical Interpretation (CI) Counts towards: Latin American, Iberian and Latina/o Studies Units: 1.0 (Not Offered 2017-2018)

SPAN B208 Drama y sociedad en España
A study of the rich dramatic tradition of Spain from the Golden Age (16th and 17th centuries) to the 20th century within specific cultural and social contexts. The course considers a variety of plays as manifestations of specific sociopolitical issues and problems. Topics include theater as a site for fashioning a national identity; the dramatization of gender conflicts; and plays as vehicles of protest in repressive circumstances. Counts toward the Latin American, Latino and Iberian Peoples and Cultures Concentration. Prerequisite: SPAN B110 and/or B120 (previously SPAN B200/B202); or another SPAN 200-level course.
Approach: Critical Interpretation (CI); Inquiry into the Past (IP) Counts towards: Latin American, Iberian and Latina/o Studies Units: 1.0 (Not Offered 2017-2018)

SPAN B209 Lo que hemos comido: Identidades en España
This course considers the relationship between the food we eat and our sense of identity in the context of regional identity politics in Spain. We will review the historical tension as they surface in diverse linguistic and cultural communities and currently challenged by the new wave of immigration to the peninsula. Amid this intersection of different cultures and practices, we will study how each region as turned to its traditional cuisine and local culinary products to strengthen their sense of regional identity while strategizing to communicate this uniqueness beyond the brand of “Spain” to the world. We will examine, for instance, how this new trend compares to the tourism industry endorsed by the dictatorship in the 1960s. This discussion will serve as a case study to explore how communities remember and narrate their own histories to themselves and to others, using concepts such as taste, terroir, memory, and identity. Students in the course will view films and read fiction, essays, and culinary essays from around Spain. Prerequisite: SPAN 120 or SPAN 110.
Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI) Counts towards: Latin American, Iberian and Latina/o Studies Units: 1.0
(Not Offered 2017-2018)

SPAN B211 Borges y sus lectores
Primary emphasis on Borges and his poetics of reading; other writers are considered to illustrate the semiotics of texts, society, and traditions. Prerequisite: SPAN B110 and/or B120 (previously SPAN B200/B202); or another SPAN 200-level course.
Approach: Critical Interpretation (CI) Counts towards: Latin American, Iberian and Latina/o Studies Units: 1.0 (Not Offered 2017-2018)

SPAN B219 Focus: Imaginando Barcelona
An introduction to the textual and visual representation of the city of Barcelona, a key geographical, historical, political, and cultural referent for Spain and Catalonia. In this course we will read past and present texts that narrate the origins and the symbolic significance of this city and discuss recent films that capture the evolving experience of its residents, as a global destination for many and a city of immigrants. Prerequisite: SPAN B110 or SPAN B120.
Approach: Critical Interpretation (CI) Counts towards: Latin American, Iberian and Latina/o Studies Units: 0.5 (Not Offered 2017-2018)

SPAN B223 Género y modernidad en la narrativa del siglo XIX
A reading of 19th-century Spanish narrative by both men and women writers, to assess how they come together in configuring new ideas of female identity and its social domains, as the country is facing new challenges in its quest for modernity. Prerequisites: SPAN B110 and/or B120 (previously SPAN B200/B202); or another SPAN 200-level course.
Approach: Inquiry into the Past (IP) Major Writing Requirement: Writing Intensive Counts towards: Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies Units: 1.0 (Not Offered 2017-2018)

SPAN B231 El cuento y novela corta en España
Traces the development of the novella and short story in Spain, from its origins in the Middle Ages to our time. The writers will include Pardo Bazán, Cervantes, Clarín, Don Juan Manuel, Matute, Zayas, and a number of contemporary writers such as Mayoral and Montero. Our approach will include formal and thematic considerations, and attention will be given to sociopolitical and historical contexts. Prerequisite: SPAN B110 and/or B120; or another SPAN 200-level course. Critical Interpretation (CI) Counts toward Latin American, Iberian, and Latino/a Studies.
Approach: Critical Interpretation (CI) Counts towards: Latin American, Iberian and Latina/o Studies Units: 1.0 Instructor(s): Quintero, M. (Spring 2018)

SPAN B233 Focus: La Habana y sus textos
La Habana (a historical, artistic and literary crossroad) is studied in its intersemiotic complexity. Readings from the colonial period to the present. Authors included, among others: La Condesa de Merlin, Alexander von Humboldt, Alejo Carpentier, José Lezama

Instructor(s): Gaspar, M., Song, R. (Fall 2017, Spring 2018)
Instructor(s):  
Units:  
Counts towards: Latin American, Iberian and Latina/o Studies

Counts towards: Latin American culture. Prerequisite: SPAN B110 and/or B120  
(Not Offered 2017-2018)

SPAN B234 El cuento de lo fantástico en Hispanoamérica  
A survey of Spanish American short story, focused on the fantastic. Authors include Poe, Quiroga, Borges, Cortázar, Ocampo, Peri Rossi, Ferré, Mutis, Poniatowska and Valenzuela. Taught in Spanish. Prerequisite: Spanish 120  
Approach: Critical Interpretation (CI)  
Counts towards: Latin American, Iberian and Latina/o Studies  
Instructor(s): Sacerio-Garí,E.  
(Fall 2017)

SPAN B243 Temas de la literatura hispana  
This is a topic course. Topics vary. Prerequisite: SPAN B110 and/or B120 (previously SPAN B200/B202); or another 200-level.  
Approach: Critical Interpretation (CI)  
Major Writing Requirement: Writing Intensive  
Counts towards: Latin American, Iberian and Latina/o Studies  
Instructor(s): Sacerio-Garí,E.  
(Fall 2017)

SPAN B252 Compassion, Indignation, and Anxiety in Latin American Film  
Stereotypically, Latin Americans are viewed as “emotional people”—often a euphemism to mean irrational, impulsive, wildly heroic, fickle. This course takes this expression at face value to ask: Are there particular emotions that identify Latin Americans? And, conversely, do these “people” become such because they share certain emotions? Can we find a correlation between emotions and political trajectories? To answer these questions, we will explore three types of films that seem to have, at different times, taken hold of the Latin American imagination and feelings: melodramas (1950s-1960s), documentaries (1970s-1990s), and “low-key” comedies (since 2000s.)  
Approach: Cross-Cultural Analysis (CC)  
Counts towards: Film Studies; Latin American, Iberian and Latina/o Studies  
Units: 1.0  
(Instructor(s): Song,R.  
(Spring 2018)

SPAN B260 Ariel/Calibán y el discurso americano  
A study of the transformations of Ariel/Calibán as images of Latin American culture. Prerequisite: SPAN B110 and/or B120 (previously SPAN B200/B202); or another SPAN 200-level course.  
Approach: Critical Interpretation (CI); Inquiry into the Past (IP)  
Counts towards: Latin American, Iberian and Latina/o Studies  
Units: 1.0  
(Instructor(s): Sacerio-Garí,E.  
(Fall 2017)

SPAN B265 Escritoras españolas: entre tradición, renovación y migración  
Fiction by women writers from Spain in the 20th and 21st century. Breaking the traditional female stereotypes during and after Franco’s dictatorship, the authors explore through their creative writing changing sociopolitical and cultural issues including regional identities and immigration. Topics of discussion include gender marginality, feminist studies and the portrayal of women in contemporary society. Prerequisite: SPAN B110 and/or B120 (previously SPAN B200/B202); or another SPAN 200-level course.  
Approach: Critical Interpretation (CI)  
Counts towards: Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies  
Units: 1.0  
Instructor(s): Song,R.  
(Spring 2018)

SPAN B307 Cervantes  
A study of themes, structure, and style of Cervantes’ masterpiece Don Quijote and its impact on world literature. In addition to a close reading of the text and a consideration of narrative theory, the course examines the impact of Don Quijote on the visual arts, music, film, and popular culture. Counts toward the Latin American, Latino and Iberian Peoples and Cultures Concentration. Prerequisite: at least one SPAN 200-level course.  
Counts towards: Latin American, Iberian and Latina/o Studies  
Units: 1.0  
(Instructor(s): Sacerio-Garí,E.  
(Fall 2017)

SPAN B309 La mujer en la literatura española del Siglo de Oro  
A study of the depiction of women in the fiction, drama, and poetry of 16th- and 17th-century Spain. Topics include the construction of gender; the idealization and codification of women’s bodies; the politics of feminine enclosure (convent, home, brothel, palace); and the performance of honor. The first half of the course will deal with representations of women by male authors (Calderón, Cervantes, Lope, Quevedo) and the second will be dedicated to women writers such as Teresa de Ávila, Ana Caro, Juana Inés de la Cruz, and María de Zayas. Prerequisite: at least one SPAN 200-level course.  
Counts towards: Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies  
Units: 1.0  
(Instructor(s): Sacerio-Garí,E.  
(Fall 2017)

SPAN B315 El futuro ya llegó: relatos del presente en América Latina  
Taught in Spanish. In the 21st Century, “Here and now” is not what it used to be. There is no single “here” but instead multiple, coexisting realities (that of the cellphone, the street, the world.) There’s no clear present when the “now” is multiple. In this course we will explore 21st century Latin American shorts-stories, films, works of art, and novellas that synchronize with our contemporary circumstances—fictions and representations where realities alternate, identities flow, and the world appears oddly out of scale. As contemporaries, you will also be asked to write fictions about life “here and now.” Throughout, we will keep two fundamental questions in mind: What is reality (here)? What is the contemporary (now)? Prerequisite: at least one SPAN 200-level course.  
Counts towards: Latin American, Iberian and Latina/o Studies  
Units: 1.0  
Instructor(s): Sacerio-Garí,E.  
(Fall 2017)
SPAN B317 Poéticas del deseo y el poder en la lírica del Siglo de Oro
A study of the evolution of the lyric in Spain during the Renaissance and Baroque periods beginning with the oral tradition and the imitation of Petrarch. Topics include: the representation of women as objects of desire and pre-texts for writing, the political and national subtexts for lyric production, the self-fashioning and subjectivity of the lyric voice, theories of parody and imitation, and the feminine appropriation of the Petrarchan tradition. Although concentrating on the poetry of Spain, reading will include texts from Italy, France, England and Mexico. Taught in Spanish. Prerequisites: at least one 200-level course. Counts toward Latin American, Iberian, and Latina/o Studies
Counts towards: Latin American, Iberian and Latina/o Studies Units: 1.0 (Not Offered 2017-2018)

SPAN B318 Adaptaciones literarias en el cine español
Film adaptations of literary works have been popular since the early years of cinema in Spain. This course examines the relationship between films and literature, focusing on the theory and practice of film adaptation. Attention will be paid to the political and cultural context in which these texts are being published and made into films. Students will be required to attend film screenings or view films on their own devices. Prerequisite: A 200-level course in Spanish.
Counts towards: Gender and Sexuality Studies; Film Studies; Latin American, Iberian and Latina/o Studies Units: 1.0 Instructor(s): Song,R. (Fall 2017)

SPAN B321 Surrealismo al afrorrealismo
Examines artistic texts that trace the development and relationships of surrealism, lo real maravilloso americano, realismo mágico and afrorrealismo. Manifestos and literary works by Latin American authors will be emphasized: Miguel Angel Asturias, Alejo Carpentier, Gabriel García Márquez, Isabel Allende, Laura Esquivel, Quince Duncan. Prerequisite: at least one SPAN 200-level course.
Counts towards: Latin American, Iberian and Latina/o Studies Units: 1.0 (Not Offered 2017-2018)

SPAN B322 Queens, Nuns, and Other Deviants in the Early Modern Iberian World
The course examines literary, historical, and legal texts from the early modern Iberian world (Spain, Mexico, Peru) through the lens of gender studies. The course is divided around three topics: royal bodies (women in power), cloistered bodies (women in the convent), and delinquent bodies (figures who defy legal and gender normativity). Course is taught in English and is open to all juniors or seniors who have taken at least one 200-level course in a literature department. Students seeking Spanish credit must have taken BMC Spanish 110 and/or 120 and at least one other Spanish course at a 200-level, or received permission from instructor.
Counts towards: Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies Units: 1.0 (Not Offered 2017-2018)

SPAN B323 Memoria y Guerra Civil
A look into the Spanish Civil War and its wide-ranging international significance as both the military and ideological testing ground for World War II. This course examines the endurance of myths related to this conflict and the cultural memory it has produced along with the current negotiations of the past that is taking place in democratic Spain. Prerequisite: at least one SPAN 200-level course.
Counts towards: Latin American, Iberian and Latina/o Studies Units: 1.0 Instructor(s): Song,R. (Spring 2018)

SPAN B332 Novelas de las Américas
What do we gain by reading a Latin American or a US novel as “American” in the continental sense? What do we learn by comparing novels from “this” America to classics of the “other” Americas? Can we find through this Panamericanist perspective common aesthetics, interests, conflicts? In this course we will explore these questions by connecting and comparing major US novels with Latin American classics of the 20th and 21st century. We will read these works in clusters to illuminate aesthetic, political and cultural resonances and affinities. This course is taught in Spanish. Prerequisite: at least one SPAN 200-level course.
Counts towards: Latin American, Iberian and Latina/o Studies Units: 1.0 (Not Offered 2017-2018)

SPAN B350 Lo fantástico y el cuento hispanoamericano
Examines artistic texts that trace the development and relationships of surrealism, lo real maravilloso americano, realismo mágico and afrorrealismo. Manifestos and literary works by Latin American authors will be emphasized: Miguel Angel Asturias, Alejo Carpentier, Gabriel García Márquez, Isabel Allende, Laura Esquivel, Quince Duncan. Prerequisite: at least one SPAN 200-level course.
Counts towards: Latin American, Iberian and Latina/o Studies Units: 1.0 (Not Offered 2017-2018)

SPAN B351 Tradición y revolución: Cuba y su literatura
An examination of Cuba, its history and its literature with emphasis on the analysis of cultural and economic transformations. Major topics include slavery and resistance; Cuba’s struggles for freedom; changing cultural policies and film of the Revolution. Prerequisite: at least one SPAN 200-level course.
Counts towards: Latin American, Iberian and Latina/o Studies Units: 1.0 (Not Offered 2017-2018)

SPAN B370 Literatura y delincuencia
A study of the origins, development and transformation of the picaresque genre from its origins in 16th- and 17th-century Spain through the 21st century. Using texts, literature, painting, and film from Spain and Latin America, we will explore topics such as the construction of the fictive self, the poetics and politics of criminality, transgression in gender and class. Among the topics to be discussed: criminalization of poverty, prostitution, and the feminine picaresque. Prerequisite: At least one SPAN 200-level course.
Counts towards: Latin American, Iberian and Latina/o Studies Units: 1.0
Major Requirements
The Tri-Co Linguistics Department offers two majors:
• Linguistics
• Linguistics and Language
Students may learn more about the major requirements at the following websites:
http://www.haverford.edu/linguistics/
http://www.swarthmore.edu/SocSci/Linguistics/
All Linguistics and Linguistics and Languages course majors must take one course or seminar from each of the following three lists:
• Sounds: LING H115 at HC or LING045 at SC
• Forms: LING H113 at HC or LING050 at SC
• Meanings: LING H114 at HC or LING026, 040 at SC
All Linguistics and Linguistics and Languages course majors are required to take the structure of a non-Indo-European Language, typically LING282 at HC, or LING061, 062, 064 at SC.
All majors must take three elective courses in Linguistics or related fields.
In addition, all Linguistics and Linguistics and Languages course majors are required to write a senior thesis in the fall of their senior year in LING H399 or LING100 (Research Seminar). This paper constitutes the comprehensive requirement. All Linguistics and Linguistics and Languages honors majors are required to write a senior thesis in the fall of the senior year in LING195 for two credits.
Honors majors do all of the above plus two research projects (each carries one credit) to be completed independently in the spring of their senior year and conclude with an oral examination.

Minor Requirements
Students may minor in linguistics by completing six credits in the following three areas of study:
A. Mandatory Foundation Courses (three credits)
LING H113 or LING S050 Introduction to Syntax
LING H114 or LING S040 Introduction to Semantics
LING H115 Phonetics and Phonology
B. Synthesis Courses (choose one):
LING H282 Structure of Chinese
LING H382 Topics in Chinese Syntax and Semantics
LING S060 Structure of Navajo
LING S062 Structure of American Sign Language
LING S064 Structure of Tuvan
C. Elective Courses (choose two):
LING/PSYC H238 The Psychology of Language
LING B101 Introduction to Linguistics
LING/PHIL H253 Analytic Philosophy of Language
LING/PHIL H260 Historical Introduction to Logic
LING/ANTH B281 Language in the Social Context
LING/CMSC B325 Computational Linguistics
LING/SPAN H365 The Politics of Language in the Spanish-Speaking World
LING/EAST H382 Topics in Chinese Syntax and Semantics

All linguistics courses offered at Swarthmore College will be accepted for minor credit for various categories.

Students who plan to declare either major in the Linguistics Department:

- At the college level, students must fill out the major declaration form as required by the Registrar’s Office of your college.
- At the departmental level, students must fill out the Sophomore Paper, scan it and email it to Shizhe Huang AND Dorothy Kunzig (dkunzig1@swarthmore.edu).

Contact Information for Bi-Co students: Shizhe Huang, Co-Chair of Tri-Co Linguistics Department, shuang@haverford.edu.

COURSES

LING B101 Introduction to Linguistics

An introductory survey of linguistics as a field. This course examines the core areas of linguistic structure (morphology, phonology, syntax, semantics), pragmatics, and language variation in relation to language change. The course provides rudimentary training in the analysis of language data, and focuses on the variety of human language structures and on the question of universal properties of language.

Approach: Cross-Cultural Analysis (CC)
Units: 1.0
Instructor(s): Lillegaunen,B.
(Fall 2017)

ANTH B281 Language in Social Context

Studies of language in society have moved from the idea that language reflects social position/identity to the idea that language plays an active role in shaping and negotiating social position, identity, and experience. This course will explore the implications of this shift by providing an introduction to the fields of sociolinguistics and linguistic anthropology. We will be particularly concerned with the ways in which language is implicated in the social construction of gender, race, class, and cultural/national identity. The course will develop students’ skills in the ethnographic analysis of communication through several short ethnographic projects. Prerequisite: ANTH B102, ANTH H103 or permission of instructor.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

SPAN B216 Introducción a la lingüística hispánica

A survey of the field of Hispanic linguistics. We will explore the sounds and sound patterns of Spanish (phonetics and phonology), how words are formed (morphology), the structure and interpretation of sentences (syntax and semantics), language use (pragmatics), the history and dialects of the Spanish language, and second language acquisition. Prerequisite: SPAN B110 or SPAN B120 or permission of the instructor. Critical Interpretation (CI)

Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

MATHEMATICS

Students may complete a major or minor in Mathematics. Within the major, students may complete the requirements for secondary school certification. Majors may complete an M.A. in Mathematics, if accepted into the combined A.B./M.A. program, or may enter the 3-2 Program in Engineering and Applied Science at the California Institute of Technology or the 4+1 Partnership with the University of Pennsylvania’s School of Engineering and Applied Science.

Faculty

Leslie Cheng, Professor of Mathematics (on leave semester II)
Victor Donnay, Professor of Mathematics on the William R. Kenan, Jr. Chair and Director of Environmental Studies
Erica Graham, Assistant Professor of Mathematics
Peter Kasius, Instructor in Mathematics
Paul Melvin, Professor of Mathematics
Djordje Miličević, Assistant Professor of Mathematics
Amy Myers, Senior Lecturer in Mathematics and Math Program Coordinator
Daisy Sudparid, Instructor
Lisa Traynor, Chair and Professor of Mathematics

The Mathematics curriculum is designed to expose students to a wide spectrum of ideas in modern mathematics, train students in the art of logical reasoning and clear expression, and provide students with an appreciation of the beauty of the subject and of its vast applicability.

Major Requirements

A minimum of 10 semester courses is required for the major, including the six core courses listed below and four electives at or above the 200 level.

Core Requirements:

MATH B201 Multivariable Calculus (H121 or H216)
MATH B203 Linear Algebra (H215)
MATH B301 Real Analysis I (H317)
MATH B303 Abstract Algebra I (H333)
MATH B302 Real Analysis II (H318) or MATH B304 Abstract Algebra II (H334)
MATH B398 or B399 Senior Conference

The analysis and algebra sequences, MATH 301/302 and MATH 303/304, both have a strong proof writing focus. Consequently, students often find it useful to take a course such as MATH 206 (Transition to Higher Mathematics) before they enroll in these sequences, and in any case should consult with the instructor if they are unsure about their level of preparation.

With the exception of Senior Conference, equivalent courses at Haverford or elsewhere may be substituted for Bryn Mawr courses with approval of the major adviser. A student may also, in consultation with a major adviser, petition the department to accept courses in fields outside of mathematics as electives if these courses have serious mathematical content appropriate to the student’s program.
Mathematics majors are encouraged to complete their core requirements other than Senior Conference by the end of their junior year. Senior Conference must be taken during the senior year. Students considering the possibility of graduate study in mathematics or related fields are urged to go well beyond the minimum requirements of the major. In such cases, a suitable program of study should be designed with the advice of a major adviser.

Major Writing Requirement
Students will take two writing attentive courses to satisfy the major writing requirement. Courses that are designated as writing attentive are MATH B206, MATH B301, and MATH B303.

Honors
A degree with honors in mathematics will be awarded by the department to students who complete the major in mathematics and also meet the following further requirements: at least two additional units of work at the 300 level or above (which may include one or two units of MATH 395/396 or MATH 403), completion of a meritorious project consisting of a written thesis and an oral presentation of the thesis, and a major grade point average of at least 3.6, calculated at the end of the senior year. A draft of the written thesis should be submitted to the Math Department Office one week before the last day of classes.

Minor Requirements
The minor requires five courses in mathematics at the 200 level or higher, of which at least two must be at the 300 level or higher.

Advanced Placement
Students entering with a 4 or 5 on the Calculus AB advanced placement test will be given credit for MATH 101 and could enroll in MATH 102 or MATH 201 as their first mathematics course. Students entering with a 4 or 5 on the Calculus BC advanced placement test will be given credit for MATH 101 and 102, and should enroll in MATH 201 as their first mathematics course. All other students are strongly encouraged to take the Mathematics Placement Exam so they can be best advised.

A.B./M.A. Program
For students entering with advanced placement credits it is possible to earn both the A.B. and M.A. degrees in an integrated program in four (or possibly five) years.

3-2 Program in Engineering and Applied Science
See the description of the 3-2 Program in Engineering and Applied Science, offered in cooperation with the California Institute of Technology, for earning both an A.B. at Bryn Mawr and a B.S. at Cal Tech.

4+1 Partnership with Penn’s School of Engineering and Applied Science
See the description of the 4+1 Partnership with Penn’s School of Engineering, offered in cooperation with the University of Pennsylvania’s School of Engineering and Applied Science, for beginning work on a Master’s degree in Engineering while still enrolled as an undergraduate at Bryn Mawr.

COURSES

**MATH B101 Calculus I**
A first course in one-variable calculus: functions, limits, continuity, the derivative, differentiation formulas, applications of the derivative, the integral, integration by substitution, fundamental theorem of calculus. May include a computer component. Prerequisite: adequate score on calculus placement exam, or permission of the instructor. Students should have a reasonable command of high school algebra, geometry and trigonometry.

Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR)
Units: 1.0
Instructor(s): Myers,A., Smiley, D.
(Fall 2017)

**MATH B102 Calculus II**
A continuation of Calculus I: transcendental functions, techniques of integration, applications of integration, infinite sequences and series, convergence tests, power series. May include a computer component. Math 102 assumes familiarity of the content covered in Math 101 or its equivalent.

Approach: Quantitative Methods (QM)
Units: 1.0
Instructor(s): Kasius,P., Myers, A.
(Fall 2017, Spring 2018)

**MATH B104 Basic Probability and Statistics**
This course introduces students to key concepts in both descriptive and inferential statistics. Students learn how to collect, describe, display, and interpret both raw and summarized data in meaningful ways. Topics include summary statistics, graphical displays, correlation, regression, probability, the law of averages, expected value, standard error, the central limit theorem, hypothesis testing, sampling procedures, and bias. Students learn to use statistical software to summarize, present, and interpret data. This course may not be taken after any other statistics course. Prerequisite: Quantitative Readiness Required.

Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR)
Units: 1.0
Instructor(s): Sudparid,D.
(Fall 2017, Spring 2018)

**MATH B201 Multivariable Calculus**
Vectors and geometry in two and three dimensions, partial derivatives, extremal problems, double and triple integrals, vector analysis (gradients, curl and divergence), line and surface integrals, the theorems of Gauss, Green and Stokes. May include a computer component. Prerequisite: MATH 102 or permission of instructor.

Approach: Quantitative Methods (QM)
Units: 1.0
Instructor(s): Kasius,P., Donnay,V.
(Fall 2017)

**MATH B203 Linear Algebra**
Systems of linear equations, matrix algebra, determinants, vector spaces and subspaces, linear independence, bases and dimension, linear transformations and their representation by matrices, eigenvectors and eigenvalues, orthogonality, and
applications of linear algebra. Prerequisite or corequisite: MATH 102, or permission of the instructor.  

Approach: Quantitative Methods (QM)  
Units: 1.0  
Instructor(s): Traynor, L.  
(Spring 2018)  

MATH B206 Transition to Higher Mathematics  
An introduction to higher mathematics with a focus on proof writing. Topics include active reading of mathematics, constructing appropriate examples, problem solving, logical reasoning, and communication of mathematics through proofs. Students will develop skills while exploring key concepts from algebra, analysis, topology, and other advanced fields. Corequisite: MATH 203; not open to students who have had a 300-level math course.  

Approach: Quantitative Methods (QM)  
Major Writing Requirement: Writing Attentive  
Units: 1.0  
Instructor(s): Myers, A.  
(Spring 2018)  

MATH B210 Differential Equations with Applications  
Ordinary differential equations, including general first-order equations, linear equations of higher order and systems of equations, via numerical, geometrical, and analytic methods. Applications to physics, biology, and economics. Co-requisite: MATH 201 or 203.  

Approach: Quantitative Methods (QM)  
Units: 1.0  
Instructor(s): Graham, E.  
(Spring 2018)  

MATH B221 Introduction to Topology and Geometry  
An introduction to the ideas of topology and geometry through the study of knots and surfaces in three-dimensional space. The course content may vary from year to year, but will generally include some historical perspectives and some discussion of connections with the natural and life sciences. Co-requisite: MATH 201 or 203.  

Approach: Quantitative Methods (QM)  
Units: 1.0  
Instructor(s): Traynor, L.  
(Spring 2018)  

MATH B225 Introduction to Financial Mathematics  
Topics to be covered include market conventions and instruments, Black-Scholes option-pricing model, and practical aspects of trading and hedging. All necessary definitions from probability theory (random variables, normal and lognormal distribution, etc.) will be explained. Prerequisite: MATH 102. ECON 105 is recommended.  

Approach: Quantitative Methods (QM)  
Units: 1.0  
Instructor(s): Cheng, L.  
(Fall 2017)  

MATH B251 Chaotic Dynamical Systems  
Topics to be covered may include iteration, orbits, graphical and computer analysis, bifurcations, symbolic dynamics, fractals, complex dynamics and applications. Prerequisite: MATH B102  

Units: 1.0  
(Not Offered 2017-2018)  

MATH B290 Elementary Number Theory  
Properties of the integers, divisibility, primality and factorization, congruences, Chinese remainder theorem, multiplicative functions, quadratic residues and quadratic reciprocity, continued fractions, and applications to computer science and cryptography. Prerequisite: MATH 102.  

Approach: Quantitative Methods (QM)  
Units: 1.0  
(Not Offered 2017-2018)  

MATH B295 Select Topics in Mathematics  
This is a topics course. Course content varies.  
Prerequisite: MATH B102 or the equivalent (merit score on the AP Calculus BC Exam or placement).  

Approach: Quantitative Methods (QM)  
Units: 1.0  
Instructor(s): Graham, E., Donnay, V.  

Fall 2017: Computational Modeling. Mathematical models are constructed to describe the world within and around us. Computational methods are often employed to visualize and solve these models. Collectively, computational modeling from a mathematical perspective focuses on using computers to simulate dynamics that are described mathematically. This course will provide an introduction to programming in R and mathematical modeling. Topics may include discrete and continuous dynamical systems, data fitting, regression, and simulation techniques.  

Spring 2018: Math Modeling and Sustainability. This course will explore how to create mathematical models of problems in sustainability such as CO2 levels, ground water flow, energy use in transportation and heating, and energy generation via wind and solar power. This is a Praxis II course in which students will work in teams and use their mathematical knowledge to carry out a sustainability project of use to a community partner. Not open to first year students.  

MATH B301 Real Analysis I  
A first course in real analysis, providing a rigorous development of single variable calculus, with a strong focus on proof writing. Topics covered: the real number system, elements of set theory and topology, limits, continuous functions, the intermediate and extreme value theorems, differentiable functions and the mean value theorem, uniform continuity, the Riemann integral, the fundamental theorem of calculus. Possible additional topics include analysis on metric spaces or dynamical systems. Prerequisite: MATH 201. Some students also find it helpful to have taken a transitional course such as MATH 206 before enrolling in this course.  

Major Writing Requirement: Writing Attentive  
Units: 1.0  
Instructor(s): Donnay, V., Milićević, D.  
(Fall 2017)  

MATH B302 Real Analysis II  
A continuation of Real Analysis I: Infinite series, power series, sequences and series of functions, pointwise and uniform convergence, and additional topics selected from: Fourier series,
calculus of variations, the Lebesgue integral, dynamical systems, and calculus in higher dimensions. Prerequisite: MATH 301.

Units: 1.0  
Instructor(s): Miličević,D.  
(Spring 2018)

MATH B303 Abstract Algebra I

A first course in abstract algebra, including an introduction to groups, rings and fields, and their homomorphisms. Topics covered: cyclic and dihedral groups, the symmetric and alternating groups, direct products and finitely generated abelian groups, cosets, Lagrange's Theorem, normal subgroups and quotient groups, isomorphism theorems, integral domains, polynomial rings, ideals, quotient rings, prime and maximal ideals. Possible additional topics include group actions and the Sylow Theorems, free abelian groups, free groups, PIDs and UFDs. Prerequisite: MATH 203. Some students also find it helpful to have taken a transitional course such as MATH 206 before enrolling in this course.

Major Writing Requirement: Writing Attentive  
Units: 1.0  
Instructor(s): Melvin,P., Cheng,L.  
(Fall 2017)

MATH B304 Abstract Algebra II

A continuation of Abstract Algebra I. Vector spaces and linear algebra, field extensions, algebraic and transcendental extensions, finite fields, fields of fractions, field automorphisms, the isomorphism extension theorem, splitting fields, separable and inseparable extensions, algebraic closures, and Galois theory. Also, if not covered in Abstract Algebra I: group actions and Sylow theorems, free abelian groups, free groups, PIDs and UFDs. Possible additional topic: finitely generated modules over a PID and canonical forms of matrices. Prerequisite: MATH 303.

Units: 1.0  
Instructor(s): Melvin,P.  
(Spring 2018)

MATH B308 Applied Mathematics I

This course will provide a general introduction to methods and modeling in applied mathematics. A variety of mathematical tools will be used to develop and study a wide range of models, including deterministic, discrete, and stochastic methods. Additional emphasis will be placed on techniques for analyzing mathematical models, including phase plane methods, stability analysis, dimensional analysis, bifurcation theory, and computer simulations. Applications to biology, physics, chemistry, engineering, and the social sciences may be discussed. Prerequisite: Math 203 and Math 210, or permission from instructor.

Units: 1.0  
(Not Offered 2017-2018)

MATH B310 Introduction to the Mathematics of Financial Derivatives

An introduction to the mathematics utilized in the pricing models of derivative instruments. Topics to be covered may include Arbitrage Theorem, pricing derivatives, Wiener and Poisson processes, martingales and martingale representations, Ito's Lemma, Black-Scholes partial differentiation equation, Girsanov Theorem and Feynman-Kac Formula. Prerequisite: MATH 201 or permission of instructor.

Units: 1.0  
(Not Offered 2017-2018)

MATH B311 Partial Differential Equations

Heat and wave equations on bounded and unbounded domains, Laplace's equation, Fourier series and the Fourier transform, qualitative behavior of solutions, computational methods. Applications to the physical and life sciences. Prerequisite: MATH 301 or permission of instructor.

Units: 1.0  
(Not Offered 2017-2018)

MATH B312 Topology

General topology (topological spaces, continuity, compactness, connectedness, quotient spaces), the fundamental group and covering spaces, introduction to geometric topology (classification of surfaces, manifolds). Typically offered yearly in alternation with Haverford. Co-requisite: MATH 301, MATH 303, or permission of instructor.

Units: 1.0  
(Not Offered 2017-2018)

MATH B322 Functions of Complex Variables

Analytic functions, Cauchy's theorem, Laurent series, calculus of residues, conformal mappings, Moebius transformations. Prerequisite: MATH 301 or permission of instructor.

Units: 1.0  
Instructor(s): Traynor,L.  
(Spring 2018)

MATH B390 Number Theory

Study of integers with an emphasis on their multiplicative structure and topics related to analysis, and a first course in analytic number theory. Core topics: divisibility and primes, arithmetic functions, average and extremal orders, techniques of analytic number theory, Riemann zeta function, prime number theorem, Dirichlet characters, L-functions. Possible additional topics may include approximations by rational numbers, geometry of numbers, algebraic numbers and class numbers, sums of squares, and the idea of modular forms. Prerequisite: Math 201, and some familiarity with writing proofs (such as Math 206, Math 301/303 as a co-requisite, or permission of instructor).

Approach: Quantitative Methods (QM)  
Units: 1.0  
Instructor(s): Miličević,D.  
(Fall 2017)

MATH B395 Research Seminar

A research seminar for students involved in individual or small group research under the supervision of the instructor. With permission, the course may be repeated for credit. This is a topics course. Prerequisite: Permission of instructor.

Units: 1.0  
Instructor(s): Melvin,P., Cheng,L., Donnay,V., Traynor,L., Graham,E., Miličević,D.  
(Fall 2017)

MATH B396 Research Seminar

A research seminar for students involved in individual or small group research under the supervision of the instructor. With permission, the course may be repeated for credit. Prerequisite: Permission of instructor.

Units: 1.0
MATH B505 Graduate Topology I
This is the first course of a 2 semester sequence, covering
the basic notions of algebraic topology. The focus will be on
homology theory, which will be introduced axiomatically (via the
Eilenberg-Steenrod axioms) and then studied from a variety
of points of view (simplicial, singular and cellular homology).
The course will also treat cohomology theory and duality (on
manifolds), and the elements of homotopy theory.
Units: 1.0
(Note Offered 2017-2018)

MATH B506 Graduate Topology II
Math 505 and Math 506 offer an introduction to topology at the
graduate level. These courses can be taken in either order. Math
506 focuses on differential topology. Topics covered include
smooth manifolds, smooth maps, and differential forms.
Units: 1.0
(Instructor(s): Traynor,L.
(Fall 2017)

CHEM B221 Physical Chemistry I
Introduction to quantum theory and spectroscopy. Atomic and
molecular structure; molecular modeling; rotational, vibrational,
electronic and magnetic resonance spectroscopy. Lecture three
hours. Prerequisites: CHEM B104 and MATH B201.
Approach: Quantitative Methods (QM)
Counts towards: Biochemistry and Molecular Biology
Units: 1.0
(Instructor(s): Francl,M.
(Fall 2017)

CMSC B231 Discrete Mathematics
An introduction to discrete mathematics with strong applications
to computer science. Topics include propositional logic, proof
techniques, recursion, set theory, counting, probability theory
and graph theory. Co-requisites: CMSC B110 or MATH B105 or H107.
Approach: Quantitative Methods (QM)
Units: 1.0
(Instructor(s): Eisenberg,R.
(Fall 2017)

CMSC B310 Computational Geometry
A study of algorithms and mathematical theories that focus on
solving geometric problems in computing, which arise naturally
from a variety of disciplines such as Computer Graphics,
Computer Aided Geometric Design, Computer Vision, Robotics
and Visualization. The materials covered sit at the intersection of
pure Mathematics and application-driven Computer Science and
efforts will be made to accommodate Math majors and Computer
Science majors of varying math/computational backgrounds.
Topics include: graph theory, triangulation, convex hulls,
geometric structures such as Voronoi diagrams and Delaunay
triangulations, as well as curves and polyhedra surface topology.
Prerequisite: CMSC B231/ MATH B231.
Approach: Quantitative Readiness Required (QR)
Units: 1.0
(Note Offered 2017-2018)

CMSC B340 Analysis of Algorithms
This course will cover qualitative and quantitative analysis of
algorithms and their corresponding data structures from a precise
mathematical point of view. Topics include: performance bounds,
asymptotic and probabilistic analysis, worst case and average case behavior and correctness and complexity. Particular classes of algorithms will be studied in detail.

Prerequisite: CMSC B206 or H106 or H107, and B231 or H231 or permission from instructor.

Approach: Quantitative Readiness Required (QR)

Major Writing Requirement: Writing Intensive

Units: 1.0

Instructor(s): Xu,D.

(Fall 2017)

**ECON B304 Econometrics**

The econometric theory presented in ECON 253 is further developed and its most important empirical applications are considered. Each student does an empirical research project using multiple regression and other statistical techniques.

Prerequisites: ECON 203 or 204 or 253; ECON 200 or both 202 and MATH 201.

Units: 1.0

Instructor(s): Sfekas,A.

(Spring 2018)

**MATH B425 Praxis III**

Counts towards: Praxis Program

Units: 1.0

(Not Offered 2017-2018)

**MATH B670 Graduate Perspectives in Mathematics Pedagogy**

This course will cover a spectrum of topics in mathematics pedagogy of importance for graduate students serving as mathematics teaching assistants as well as those preparing to teach high school, community college, or university-level mathematics. It will meet every other week for three hours following a seminar format combining some lectures and guest speakers with extended discussion.

Units: 1.0

(Not Offered 2017-2018)

**MATH B701 Supervised Work**

Prerequisite: GSAS students only.

Units: 1.0

Instructor(s): Melvin,P., Cheng,L., Donnay,V., Traynor,L., Graham,E., Miličević,D.

(Fall 2017, Spring 2018)

**MATH B702 Research Seminar**

Units: 1.0

Instructor(s): Melvin,P., Cheng,L., Donnay,V., Traynor,L., Graham,E., Miličević,D.

(Fall 2017, Spring 2018)

**PHYS B306 Mathematical Methods in the Physical Sciences**

This course presents topics in applied mathematics useful to students, including physicists, engineers, physical chemists, geologists, and computer scientists studying the natural sciences. Topics are taken from Fourier series, integral transforms, advanced ordinary and partial differential equations, special functions, boundary-value problems, functions of complex variables, and numerical methods. Lecture three hours and additional recitation sessions as needed. Prerequisite: MATH 201 and 203.

Units: 1.0

Instructor(s): Schaffner,D.

(Fall 2017)

---

**MIDDLE EASTERN STUDIES**

Students may complete a concentration in Middle Eastern Studies.

---

**Faculty**

Grace Armstrong, Eunice M. Schenck 1907 Professor of French and Director of Middle Eastern Languages

Assef Ashraf, Postdoctoral Fellow in History  
Manar Darwish, Instructor of Arabic and Coordinator of the Bi-Co Arabic Program

Sofia Fenner, Assistant Professor of Political Science

Azade Seyhan, Fairbank Professor in the Humanities and Chair and Professor of German and Comparative Literature

Elly Truitt, Associate Professor of History

Sharon Ullman, Professor of History

Alicia Walker, Associate Professor of History on the Marie Neuberger Fund for the Study of Arts and Director of Middle Eastern Studies

The Middle Eastern Studies Program focuses on the study of the area from Morocco to Afghanistan from antiquity to the present day. Students can investigate the history, politics and cultures of the Middle East through coursework, independent study, study abroad, and events here and at neighboring institutions.

There are two tracks to Middle East Studies Concentration; one requires study or competence in a Middle Eastern language, the other does not.

---

**Track 1**

The first track consists of six courses in the Humanities or Social Sciences that focus on the ancient or modern Middle East distributed in the following manner:

- A basic course that offers a broad introduction to the region and its peoples. When available, students should take Introduction to Middle East Studies (HIST 234) at Bryn Mawr. When this course is not available, students will select a comparable introductory course in consultation with their advisor.

- Three elective Middle Eastern topic courses, including at least one at the 300 level in a specific area to be chosen in consultation with the student’s advisor. This area might be defined in terms of conceptual, historical, or geographical
Of the six courses only three may be in the student’s major.

- Two additional Middle Eastern topic courses, at least one of which must be in either the Humanities or Social Sciences if a student’s work in (1) and (2) does not include one or the other of these;
- Of the six courses one must be pre-modern in content;
- Of the six courses only three may be in the student’s major.

**Track 2**

The second track consists of language study and other courses. Students opting for this track must take the equivalent of two years of study of a modern Middle Eastern language or pass a proficiency exam in one of these languages, whereby they may also meet the standard set for the A.B. degree for the foreign language requirement. Four additional courses distributed as follows are required for the concentration:

- A basic course that offers a broad introduction to the region and its peoples. When available, students should take Introduction to Middle East Studies (HIST 234) at Bryn Mawr. When this course is not available, students will select a comparable introductory course in consultation with their advisor.
- Three elective Middle Eastern topic courses, which meet the following conditions:
  — One course must be in the Social Sciences;
  — One course must be in the Humanities;
- At least one course must be at the 300 level to be selected after consultation with the student’s advisor so as to expose the student to in-depth study of the Middle East with a geographic, conceptual, or particular historical focus;
- At least one course must be pre-modern in content;
- Of the four courses, only two may also form a part of the student’s major.

In addition to offering a concentration, the Program in Middle Eastern Studies also supports students who wish to undertake study abroad (both summer and academic year) or independent study abroad (both summer and academic year) or independent study abroad (including independent majors) in the field. To discuss these opportunities, please contact the Program Director.

**COURSES**

**ARCH B104 Archaeology of Agricultural and Urban Revolutions**

This course examines the archaeology of the two most fundamental changes that have occurred in human society in the last 12,000 years, agriculture and urbanism, and we explore these in Egypt and the Near East as far as India. We also explore those societies that did not experience these changes.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Geoarchaeology; Middle Eastern & Islamic Studies
Units: 1.0
(Not Offered 2017-2018)

**ARCH B230 Archaeology and History of Ancient Egypt**

A survey of the art and archaeology of ancient Egypt from the Pre-Dynastic through the Graeco-Roman periods, with special emphasis on Egypt’s Empire and its outside connections, especially the Aegean and Near Eastern worlds.

Approach: Inquiry into the Past (IP)
Major Writing Requirement: Writing Attentive
Counts towards: Africana Studies; Middle Eastern & Islamic Studies
Units: 1.0
(Not Offered 2017-2018)

**ARCH B240 Archaeology and History of Ancient Mesopotamia**

A survey of the material culture of ancient Mesopotamia, modern Iraq, from the earliest phases of state formation (circa 3500 B.C.E.) through the Achaemenid Persian occupation of the Near East (circa 331 B.C.E.). Emphasis will be on art, artifacts, monuments, religion, kingship, and the cuneiform tradition. The survival of the cultural legacy of Mesopotamia into later ancient and Islamic traditions will also be addressed.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Middle Eastern & Islamic Studies
Units: 1.0
(Not Offered 2017-2018)

**ARCH B244 Great Empires of the Ancient Near East**

A survey of the history, material culture, political and religious ideologies of, and interactions among, the five great empires of the ancient Near East of the second and first millennia B.C.E.: New Kingdom Egypt, the Hittite Empire in Anatolia, the Assyrian and Babylonian Empires in Mesopotamia, and the Persian Empire in Iran.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Middle Eastern & Islamic Studies
Units: 1.0
(Not Offered 2017-2018)

**COML B225 Censorship: Historical Contexts, Local Practices and Global Resonance**

The course is in English. It examines the ban on books and art in a global context through a study of the historical and sociopolitical conditions of censorship practices. The course raises such questions as how censorship is used to fortify political power, how it is practiced locally and globally, who censors, what are the categories of censorship, how censorship succeeds and fails, and how writers and artists write and create against and within censorship. The last question leads to an analysis of rhetorical strategies that writers and artists employ to translate the expression of repression, trauma, and torture into idioms of resistance. German majors/minors can get German Studies credit. Prerequisite: EMILY B001 or a 100-level intensive writing course.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Latin American, Iberian and Latina/o Studies; Middle Eastern & Islamic Studies
Units: 1.0
(Not Offered 2017-2018)

**HART B217 Introduction to Medieval Islamic Art and Architecture**

This course traces the development of Islamic art and architecture beginning with the emergence of Islam in the early seventh century and ending with the Mongol invasion and the fall of the Abbassid Empire in the mid-thirteenth century. Special attention is paid to issues of particular importance to medieval Islamic art, including aniconism (the rejection of figural imagery in artistic production), the role of script as an expressive art form,
and the relationship of early Islamic art to the artistic traditions of other late antique and medieval cultures. Prerequisites: At least one course in History of Art at the 100 or 200 level, or a course in Middle Eastern Studies at the 100 or 200 level is recommended but not required.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Middle Eastern & Islamic Studies
Units: 1.0
Instructor(s): Walker,A. (Spring 2018)

HIST B123 The Early Medieval World
The first of a two-course sequence introducing medieval European history. The chronological span of this course is from the early 4th century and the Christianization of the Roman Empire to the early 10th century and the disintegration of the Carolingian Empire. This course number was previously HIST B223.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Middle Eastern & Islamic Studies
Units: 1.0
Instructor(s): Truitt,E. (Fall 2017)

HIST B128 Crusade, Conversion and Conquest
A thematic focus course exploring the nature of Christian religious expansion and conflict in the medieval period. Based around primary sources with some background readings, topics include: early medieval Christianity and conversion; the Crusades and development of the doctrines of “just war” and “holy war”; the rise of military order such as the Templars and the Teutonic Kings; and later medieval attempts to convert and colonize Eastern Europe.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Middle Eastern & Islamic Studies
Units: 1.0
Instructor(s): Truitt,E. (Spring 2018)

HIST B210 From Empire to Nation-State in the Middle East
The aim of this course is to provide an introduction to the history of the Middle East from the late 18th century until the present. Islam and the classical Ottoman period will be discussed to provide the requisite background for the modern period. From the late Ottoman period onward, we will consider the impact of a series of events - from the incorporation of the Empire into a global economic system, to the rise of ethnic and national politics, the Ottoman reform movement, colonial expansion, the dissolution of the Empire, the emergence of the modern system of states, the Cold War, and the collapse of Soviet power. We will conclude with a discussion of the Arab Spring. Emphasis will be placed on links, continuity, and transitions during this two-hundred year period.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Middle Eastern & Islamic Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B234 An Introduction to Middle Eastern History
This course serves as an introduction to the history of the modern Middle East. We will also explore the narratives and debates that have shaped the field of Middle East history. Topics include orientalism, colonialism, political reform, social, cultural, and intellectual movements, nationalism, and the Cold War. Readings will be drawn from the fields of history, anthropology, politics, and literature.

Approach: Inquiry into the Past (IP)
Counts towards: Middle Eastern & Islamic Studies
Units: 1.0
Instructor(s): Ashraf,A. (Fall 2017)

HIST B351 Intoxicated Identities: Alcohol Consumption in Mod Mideast
This class aims to show not only that people in the Middle East drink, that is irrefutable, but that the reasons why they did so provide an interesting prism through which to view the history of the region. It will show that the alcohol consumption habits of residents of the Middle East between the years 600 and the present can serve as an excellent entry point for the discussion of many important historiographical issues including constructions of masculinity and femininity, identity formation, youth culture, leisure, and class formation.

Counts towards: Middle Eastern & Islamic Studies
Units: 1.0
(Not Offered 2017-2018)

POLS B283 Introduction to the Politics of the Modern Middle East and North Africa
This course is a multidisciplinary approach to understanding the politics of the region, using works of history, political science, political economy, film, and fiction as well as primary sources.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Middle Eastern & Islamic Studies
Units: 1.0
Instructor(s): Fenner,S. (Spring 2018)

POLS B360 Islam and Politics
This course will strive to answer but also to critique common questions about the role of Islam in political life: Is Islam compatible with democracy? Is Islam bad for women’s or minority rights? Does Islam cause violence? Will including Islamist organizations in democratic politics induce them to moderate their views? And what are the political consequences of asking and debating such questions? More broadly, this course will consider evolving approaches to culture, religion, and ideology in political science, exploring not just the effect of Islam on politics but also the ways in which politics have shaped the Islamic tradition over time. This course is open to all students who have the prerequisites. It also serves as a thesis prep course for political science senior majors. Prerequisite: POLS B283 or instructor consent.

Major Writing Requirement: Writing Attentive
Counts towards: Middle Eastern & Islamic Studies
Units: 1.0
Instructor(s): Fenner,S. (Spring 2018)
MUSEUM STUDIES

Student may minor in Museum Studies.

Faculty

Steering Committee

Carrie Robbins, Curator, Academic Liaison for Art and Artifacts
Lisa Saltzman, Chair and Professor of History of Art and the Andrew W. Mellon Foundation Chair in the Humanities
Monique Scott, Director of Museum Studies

Museum Studies is a pilot program that offers students a rich and dynamic education in both museum theory and practice. Students have the opportunities to learn about the history of museums and their roles in society as well as to engage with critical, theoretical museum scholarship. Through coursework and internships, students will also have the opportunity to gain practical hands-on experience in Bryn Mawr’s Special Collections as well as in museums in Philadelphia and beyond. This dynamic and inter-disciplinary program intersects disciplines such as the History of Art, Anthropology, Archaeology, History, Education, Cities, Biology and Geology. The Bryn Mawr Museum Studies program aims to empower students to become significant contributors to various professions throughout museums, galleries and archives.

The Museum Studies program calls upon the College’s extensive collection of art and artifacts, rare books and prints, photographs and manuscripts, which facilitates research and experiential learning for students. Through Bryn Mawr’s Special Collections, students can draw upon the in-house expertise of a strong group of curators and other museum professionals working in the department. Bryn Mawr is in close proximity to the museum-rich Philadelphia region, and students have the opportunity to work with distinguished and diverse museum professionals across the city.

Museum Studies Minor Curriculum

The requirements for the minor are six courses that include:

- Core courses (2): “Museum Studies: History, Theory, Practice” and one course with an exhibition planning component, including the “Exhibition Seminar”
- Elective courses (2-3): These can be courses officially taught in museum studies as well as courses in other disciplines that include museum studies content. Students also can take advantage of relevant courses at Haverford and Swarthmore. The Director of Museum Studies in addition to the Professor of the elective must deem the course acceptable as a museum studies course.
- Experiential courses (1-2): Praxis courses and/or Fieldwork Seminar.

A student declares Museum Studies as a minor by meeting with the Director of Museum Studies and completing a minor work plan. The student can major in any department. Student internships in museums are considered vital “hands-on” learning opportunities for those who seek careers in museum practice. Students will also be encouraged to seek summer museum internships.

Museum Studies Core Courses

- HART B281 Museum Studies: History, Theory, Practice
- HART B301 Topics in Exhibition Seminar
- HART B200-level Fieldwork Seminar

COURSES

ANTH B271 Museum Anthropology: History, Politics, Practices

This course provides an in-depth exploration of museum anthropology: the critical study of museum practices from an anthropological perspective. The course will fundamentally consider the role of museums in exhibiting culture—the politics of placing cultures on display, from living humans and human remains to cultural objects and artifacts. The course will also consider changing practices in museum anthropology, including repatriation efforts, shifting notions of heritage and identity and the emergence of community-curated exhibitions. This course complements the theoretical explorations of the museum with visits to area museums and hands-on work in Special Collections.

Approach: Course does not meet an Approach
Counts towards: Museum Studies
Units: 1.0
(Not Offered 2017-2018)

ARCH B102 Introduction to Classical Archaeology

A historical survey of the archaeology and art of Greece, Etruria, and Rome.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Museum Studies
Units: 1.0
Instructor(s): Lindenlauf, A.
(Spring 2018)

ARCH B125 Classical Myths in Art and in the Sky

This course explores Greek and Roman mythology using an archaeological and art historical approach, focusing on the ways in which the traditional tales of the gods and heroes were depicted, developed and transmitted in the visual arts such as vase painting and architectural sculpture, as well as projected into the natural environment.

Approach: Inquiry into the Past (IP)
Counts towards: Museum Studies
Units: 1.0
(Not Offered 2017-2018)

ARCH B306 Monumental Painting

The Mediterranean tradition of large-scale painting begins in prehistoric times and continues through Late Antiquity and beyond. Important examples survive on the walls of houses, tombs and other structures at sites in the Bronze Age Aegean, in Archaic, Classical and Hellenistic Anatolia, Macedonia, Magna Graecia, and Etruria. Rome and the famous sites of Pompeii and Herculaneum preserved by the eruption of Mount Vesuvius. Technical, artistic, cultural and interpretive issues will be considered.

Counts towards: Museum Studies
Units: 1.0
Instructor(s): McFadden, S.
(Fall 2017)
FREN B105 Directions de la France contemporaine

An examination of contemporary society in France and Francophone cultures as portrayed in recent documents and film. Emphasizing the tension in contemporary French-speaking societies between tradition and change, the course focuses on subjects such as family structures and the changing role of women, cultural and linguistic identity, an increasingly multiracial society, the individual and institutions (religious, political, educational), and “les loisirs”. In addition to the basic text and review of grammar, readings are chosen from newspapers, contemporary literary texts and magazines, complemented by video materials. Prerequisite: FREN 005 or 101.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Museum Studies
Units: 1.0
Instructor(s): Peysson-Zeiss, A., Sanquer, M.
(Fall 2018)

HART B226 Perspectives on African Art

This course is an exploration of a selected range of art that represent the role and place of art in Africa and demonstrate the changes in artwork over time. The course begins with an examination of what defines the art of Africa, and proceeds to seek an understanding of its philosophical underpinnings and aesthetics. It then conducts a cultural as well as an historical exploration of selected art traditions on the continent. The course will emphasize the diversity of African aesthetics as well as highlight the similarities and differences between African people within and across various artistic practices in secular and non-secular settings.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Africana Studies; Museum Studies; Praxis Program
Units: 1.0
Instructor(s): Labi, K.
(Fall 2017)

HART B279 Exhibiting Africa: Art, Artifact and New Articulations

At the turn of the 20th century, the Victorian natural history museum played an important role in constructing and disseminating images of Africa to the Western public. The history of museum representations of Africa and Africans reveals that exhibitions—both museum exhibitions and “living” World’s Fair exhibitions—has long been deeply embedded in politics, including the persistent “othering” of African people as savages or primitives. While paying attention to stereotypical exhibition tropes about Africa, we will also consider how art museums are creating new constructions of Africa and how contemporary curators and conceptual artists are creating complex, challenging new ways of understanding African identities.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Africana Studies; Museum Studies
Units: 1.0
(Not Offered 2017-2018)

HART B281 Museum Studies: History, Theory, Practice

Using the museums of Philadelphia as field sites, this course provides an introduction to the theoretical and practical aspects of museum studies and the important synergies between theory and practice. Students will learn: the history of museums as institutions of recreation, education and leisure; how the museum itself became a symbol of power, prestige and sometimes alienation; debates around the ethics and politics of collecting objects of art, culture and nature; and the qualities that make an exhibition effective (or not). By visiting exhibitions and meeting with a range of museum professionals in art, anthropology and science museums, this course offers a critical perspective on the inner workings of the museum as well as insights into the “new museology.”

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Museum Studies
Units: 1.0
Instructor(s): Feliz, M.
(Fall 2017)

HART B300 The Curator in the Museum

This course provides an introduction to theoretical and practical aspects of museums and to the links between practice and theory that are the defining characteristic of the museum curator’s work today. The challenges and opportunities confronting curators and their colleagues, peers, audiences, and constituents will be addressed through readings, discussions, guest presentations, writings, and individual and group projects.

Counts towards: Museum Studies
Units: 1.0
(Not Offered 2017-2018)

HART B301 Topics in Exhibition Strategies

This is a topics course. Course content varies.

Counts towards: Museum Studies; Praxis Program
Units: 1.0
(Not Offered 2017-2018)

HART B316 Museum Studies Fieldwork Seminar

This course provides students a forum in which to ground, frame and discuss their hands-on work in museums, galleries, archives or collections. Whether students have arranged an internship at a local institution or want to pursue one in the Bryn Mawr College Collections, this course will provide a framework for these endeavors, coupling praxis with theory supported by readings from the discipline of Museum Studies. The course will culminate in a final poster presentation, an opportunity to reflect critically on the internship experience. Prior to taking the course, students will develop a Praxis Learning Plan through the LILAC office. All students will share a set syllabus, common learning objectives and readings, but will also be able to tailor those objectives to the specific museum setting or Special Collections project in which they are involved.

Counts towards: Museum Studies; Praxis Program
Units: 1.0
(Not Offered 2017-2018)

HART B318 Cultural Property and Museums

This course examines cultural heritage and the concept of cultural property in relation to museums and collections. We will consider the development of national and international laws in the 20th and 21st centuries to protect cultural heritage, museum responsibilities, and case studies on topics including the looting of archaeological sites, the fate of art during war, nationalism and politics, restitution of art, and fakes and forgeries.
Counts towards: Museum Studies
Units: 1.0
(Not Offered 2017-2018)

HART B325 Care and Conservation of Contemporary Art
This course explores the ethics, principles, analysis and materials used in art conservation. Case studies, guest lectures, and museum visits will then introduce the unique problems involved in preserving, conserving and exhibiting contemporary art. There will be some hands on/lab component activities.
Prerequisites: At least one previous HART course at Bryn Mawr College. Understanding of basic chemistry helpful.
Major Writing Requirement: Writing Attentive
Counts towards: Museum Studies
Units: 1.0
Instructor(s): Weldon,M. (Fall 2017)

HART B345 Topics in Material Culture
This is a topics course. Course content varies. Current topic description: This seminar will explore the myriad textile traditions of Asia. Through close study of woven objects in the Bryn Mawr Special Collections and visits to the Penn Museum and the Philadelphia Museum of Art, this course will trace the history of the interconnected textile traditions of Eastern and Western Asia, from Chinese and Indonesian textile traditions to the weavings of Iran and Turkey. We will consider interdisciplinary approaches to textiles and the ways that textiles are catalogued and exhibited in museum spaces. As an advanced art history seminar, we will discuss how to write art historical essays that animate non-figural textiles and how to conduct research on decorative arts and material culture.
Counts towards: Museum Studies
Units: 1.0
Instructor(s): Houghteling, S. (Fall 2017)

HART B373 Contemporary Art in Exhibition: Museums and Beyond
How does the collection and display of artwork create meanings beyond the individual art object? In recent decades, enormous shifts have occurred in exhibition design as artwork projected from the walls of the museum, moved outdoors to the space of the street, and eventually went online. We will study an array of contemporary exhibition practices and sites in their social and historical contexts, including the temporary exhibition, “the white cube,” the “black box,” museum installations, international biennials, and websites. During the seminar, we will examine how issues such as patronage, avant-gardism, globalization, and identity politics have progressively brought museums and other exhibition spaces into question.
Counts towards: Museum Studies
Units: 1.0
Instructor(s): Robbins, C. (Fall 2017)

HART B374 Topics: Exhibition Seminar
This is a topics course. Course content varies. Students will gain practical experience in the production of an exhibition: conceiving a curatorial approach, articulating themes, writing didactics, researching a checklist, designing gallery layout, producing print and web materials, developing programs, and marketing the exhibit. Prerequisite: At least one previous HART course at Bryn Mawr College.
Counts towards: Museum Studies
Units: 1.0
(Not Offered 2017-2018)

HIST B245 Focus: Topics in Modern US History
This is a topics course in 20th century America social history. Topics vary by half semester
Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies; Museum Studies; Praxis Program
Units: 1.0
Instructor(s): Vider, S. (Fall 2017)

HIST B274 Focus: Topics in Modern US History
This is a topics course in 20th century America social history. Topics vary by half semester
Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies; Museum Studies; Praxis Program
Units: 0.5
(Not Offered 2017-2018)

HIST B349 Topics in Comparative History
This is a topics course. Course content varies. Current topic description: This seminar will explore the myriad textile traditions of Asia. Through close study of woven objects in the Bryn Mawr Special Collections and visits to the Penn Museum and the Philadelphia Museum of Art, this course will trace the history of the interconnected textile traditions of Eastern and Western Asia, from Chinese and Indonesian textile traditions to the weavings of Iran and Turkey. We will consider interdisciplinary approaches to textiles and the ways that textiles are catalogued and exhibited in museum spaces. As an advanced art history seminar, we will discuss how to write art historical essays that animate non-figural textiles and how to conduct research on decorative arts and material culture.
Counts towards: Museum Studies
Units: 1.0
Instructor(s): Vider, S. (Fall 2017)

PSYC B231 Health Psychology
This course will provide an overview of the field of health psychology using lecture, exams, videos, assignments, and an article critique. We will examine the current definition of health psychology, as well as the theories and research behind many areas in health psychology (both historical and contemporary). The course will focus on specific health and social psychological theories, empirical research, and applying the theory and research to real world situations. Prerequisite: Introductory Psychology (PSYC B105) or Foundations of Psychology (PSYC H100)
Approach: Course does not meet an Approach
Counts towards: Health Studies; Museum Studies
Units: 1.0
(Not Offered 2017-2018)

Spring 2018: Public History and Praxis

MUSIC

The Department of Music is located at Haverford and offers well-qualified students a major and minor in music. For a list of requirements and courses offered, see Music at Haverford.
Students with financial need who are studying for academic credit. The department helps to subsidize the cost of lessons for teachers in the Philadelphia area with whom we are affiliated. Students can arrange private music lessons through the department or independently. We have a referral list of many fine teachers in the Philadelphia area with whom we are affiliated. The department helps to subsidize the cost of lessons for students with financial need who are studying for academic credit.

Private Lessons

Students can arrange private music lessons through the department or independently. We have a referral list of many fine teachers in the Philadelphia area with whom we are affiliated. The department helps to subsidize the cost of lessons for students with financial need who are studying for academic credit.

Performance

Haverford's music performance program offers opportunities to participate in the Haverford-Bryn Mawr Chamber Singers, Chorale, Orchestra, and chamber ensembles. Students can receive academic credit for their participation (MUSC 102, 214, 215, and 216), and can receive credit for Private Study (MUSC 208 for Instrumental Study, MUSC 209 for Voice Study, and MUSC 210 for Keyboard Study). Student chamber ensembles, solo instrumentalists, and vocalists also give informal recitals during the year. Courses such as Art Song and Topics in Piano have a built-in performance component.

The music curriculum is designed to deepen students' understanding of musical form and expression through the development of skill in composition and performance joined with analysis of musical works and their place in various cultures. A major in music provides a foundation for further study leading to a career in music.

As a result of having majored in our department, students exhibit proficiency in various skills appropriate to a specific area of the curriculum as listed below. But beyond such competence, we seek to develop their awareness of aesthetics and of their place in the history of musical performance, craft, and scholarship.

Composition/Theory

The composition/theory program stresses proficiency in aural, keyboard, and vocal skills, and written harmony and counterpoint. Composition following important historical models and experimentation with contemporary styles are emphasized.

Musicology

The musicology program, which emphasizes European, North American, and Asian traditions, considers music in the rich context of its social, religious, and aesthetic surroundings.

Performance

Haverford's music performance program offers opportunities to participate in the Haverford-Bryn Mawr Chamber Singers, Chorale, Orchestra, and chamber ensembles. Students can receive academic credit for their participation (MUSC 102, 214, 215, and 216), and can receive credit for Private Study (MUSC 208 for Instrumental Study, MUSC 209 for Voice Study, and MUSC 210 for Keyboard Study). Student chamber ensembles, solo instrumentalists, and vocalists also give informal recitals during the year. Courses such as Art Song and Topics in Piano have a built-in performance component.

Private Lessons

Students can arrange private music lessons through the department or independently. We have a referral list of many fine teachers in the Philadelphia area with whom we are affiliated. The department helps to subsidize the cost of lessons for students with financial need who are studying for academic credit.

Major Requirements

1. Composition/Theory: MUSC 203, 204, and 303.
2. Musicology: Three courses, MUSC 229; plus any one of MUSC 220, 221, 222, 223, 224, or 225.
4. Performance
   - Participation in a department-sponsored performance group for at least a year.
   - MUSC 208, 209, or 210 instrumental or vocal private study for one year.
5. We strongly urge continuing ensemble participation and instrumental or vocal private study.
6. A Senior Project (as detailed below)
7. We expect majors to attend the majority of department-sponsored concerts, lectures, and colloquia.

Minor Requirements

1. Composition/Theory: MUSC 203 and 204.
2. Musicology: MUSC 229; plus any one of 220, 221, 222, 223, 224, or 225.
3. One elective from the following: MUSC 149, 207, 220, 221, 222, 223, 224, 225, 227, 250, 254, 265, 266, 270, 303, 304, and 325.
4. MUSC 208, 209, 210 instrumental/vocal private study or department ensemble participation for one year.
5. We expect minors to attend the majority of department-sponsored concerts, lectures, and colloquia.

COURSES

MUSC H102 CHORALE

Chorale is a large mixed chorus that performs major works from the oratorio repertoire with orchestra and student soloists. Attendance at weekly two-hour rehearsals and dress rehearsals during performance week is required. Entrance by audition. Students can start Chorale at the beginning of any semester. (Offered Fall 2017)

MUSC H107 INTRODUCTORY PIANO

An introduction to the art of playing the piano and the music written for it. No prior musical experience is required. This course consists of weekly hour-long sessions in the form of either a class lecture/workshop given on Tuesday evenings, or self-directed listening sessions posted on Moodle, as well as weekly 20-minute private lessons at an arranged time. It is expected that the student will practice an hour each day, six days a week, and keep a listening journal, giving personal responses to the required listening as well as to three professional concerts. The final exam is a performance of two or more short works on the class recital at the end of the term. (Offered Fall 2017)

MUSC H110 INTRODUCTION TO MUSIC THEORY

An intensive introduction to the notational and theoretical materials of music, complemented by work in sight-singing,
keyboard harmony, and dictation. This course is appropriate for students who sing or play an instrument, but who have had little or no systematic instruction in music theory. Topics include time and pitch and their notation, scales, intervals, triads, basic harmonic progressions, melodic construction, harmonization of melody, non-harmonic tones, transposition, and key change (modulation). Students who wish to explore the art of musical composition will find this course especially useful, as two creative projects are assigned: the composition of a pair of melodies in the major and minor modes, and a 32-bar piece which changes key. Preparation for these projects is provided through listening and analysis of works in a variety of musical styles. Students having completed this course will be prepared to enter Music 203, the first semester of the theory sequence for music majors. (Offered Fall 2017 and Spring 2018)

**MUSC H111 LISTENING TO CLASSICAL MUSIC**

A survey of the European musical tradition from the middle ages to modern times. Students will hear music by Monteverdi, Bach, Mozart, Beethoven, Wagner, Stravinsky, Glass, among many others, developing both listening skills and an awareness of how music relates to the culture that fosters it. In addition to listening and reading, students will attend concerts and prepare written assignments. (Offered Fall 2017)

**MUSC H127 LISTENING TO JAZZ**

A study of jazz and its cultural meanings. Starting with an overview of jazz styles and European idioms closely bound to jazz history, the course gives students a basic aural education in musical forms, the process of improvisation, and the fabric of musical performance. Critical methodologies are also explored, especially recent writings on art and society, identity and difference, and acculturation and change. (Offered Spring 2018)

**MUSC H132 WRITING ABOUT BEETHOVEN**

An exploration of Beethoven's life and works, considered in the context of changing aesthetic and cultural values of the last two centuries. Students will listen to Beethoven's music, study some of his letters and conversation books, and read some of the many responses his art has engendered. In their written responses to all of this material, students will think about Beethoven's music, his artistic personality, and the ideas and assumptions that have guided the critical reception of his art and life. They will learn to cultivate their skills as readers and listeners while improving their craft as writers. (Offered occasionally)

**MUSC H203 TONAL HARMONY I**

The harmonic vocabulary and compositional techniques of Bach, Haydn, Mozart, Beethoven, Schubert, and others. Analysis of musical literature in a variety of genres and harmonization in four parts. Composition of minuet and trio, set of variations, or other homophonic piece is the final project. Requires three class hours plus laboratory period covering related aural and keyboard harmony skills. Required for the Music major and minor; should be taken no later than fall of sophomore year. Prerequisite(s): MUSC 110 or instructor consent. (Offered Fall 2017)

**MUSC H204 PRINCIPLES OF TONAL HARMONY II**

Continuation of Music 203, covering chromatic harmony and focusing on the development of sonata forms from the Classical through the Romantic period. Composition of a sonata exposition is the final project. Three class hours plus laboratory period covering related aural and keyboard harmony skills. Required for the Music major or minor; should be taken the semester after MUSC 203. Prerequisite(s): MUSC 203. (Offered Spring 2018)

**MUSC H207 TOPICS IN PIANO**

Combines private lessons and studio/master classes, musical analysis, research questions into performance practice and historical context, and critical examination of sound recorded sources. Requires preparation of works of selected composer or style period for end-of-semester recital. Recent topics have included The Italian Keyboard Tradition, J.S. Bach and his Trans-Generational Impact, and American Roots. (Offered Spring 2018)

**MUSC H208 PRIVATE STUDY: INSTRUMENTAL**

All students enrolled in the private study program should be participating in a departmentally directed ensemble or activity (Chorale, Orchestra, etc.) as advised by their program supervisor. Students receive ten hour-long lessons with approved teachers for one-half credit, graded. All students in the private study program perform for a faculty jury at the end of the semester. Students assume the cost of their lessons, but may apply for private study subsidies at the beginning of each semester’s study through the department. (Offered Fall 2017)

**MUSC H209 PRIVATE STUDY: VOICE**

All students enrolled in the private study program should be participating in a departmentally directed ensemble or activity (Chorale, Orchestra, etc.) as advised by their program supervisor. Students receive ten hour-long lessons with approved teachers for one-half credit, graded. All students in the private study program perform for a faculty jury at the end of the semester. Students assume the cost of their lessons, but may apply for private study subsidies at the beginning of each semester’s study through the department. (Offered Fall 2017)

**MUSC H210 PRIVATE STUDY: KEYBOARD**

All students enrolled in the private study program should be participating in a departmentally directed ensemble or activity (Chorale, Orchestra, etc.) as advised by their program supervisor. Students receive ten hour-long lessons with approved teachers for one-half credit, graded. All students in the private study program perform for a faculty jury at the end of the semester. Students assume the cost of their lessons, but may apply for private study subsidies at the beginning of each semester’s study through the department. (Offered Fall 2017)

**MUSC H214 CHAMBER SINGERS**

A 30-voice mixed choir that performs a wide range of mostly a cappella repertoire from the Renaissance to the present day, in original languages. The choir performs on and off campus, both public concerts and outreach concerts to underserved audiences. International tours revolving around shared concerts with choirs in the cities visited happen every 3-4 years. Requires attendance at three 80-minute rehearsals weekly. Entrance by audition at the beginning of the Fall semester each year. (Offered Fall 2017)

**MUSC H215 CHAMBER MUSIC**

Intensive rehearsal of works for small instrumental groups, with supplemental assigned research and listening. Performance is required. Students enrolled in Chamber Music have the opportunity to receive coaching from visiting artists on the Concert Artist Series and from resident ensembles. Performances take place at Haverford and Bryn Mawr Colleges, and other community venues. This course is available to those students who are concurrently studying privately, or who have
studied privately immediately prior to the start of the semester. In addition, all students playing orchestral instruments must participate concurrently in the Orchestra, unless granted permission by the music director. Entrance by audition only. (Offered Fall 2017)

**MUSC H216 ORCHESTRA**

The Haverford-Bryn Mawr Orchestra has over seventy members and performs a wide range of symphonic repertory. Orchestra members are expected to attend one two-and-a-half hour rehearsal per week, and are guided in sectional rehearsals by professional musicians. There are three/four performances a year, including Parents/Family Weekend concerts. The spring Orchestra concert features the winner of the annual student concerto competition. Entrance by audition only. (Offered Fall 2017)

**MUSC H219 ART SONG**

A performance course devoted to the French, German, English, and American art song literature from Schubert to the present. Weekly performance classes will be accompanied by weekly individual coaching with the instructor, culminating in a public recital at the end of the semester. Prerequisite(s): Audition and instructor consent. (Offered Spring 2018)

**MUSC H221 MUSIC IN THE RENAISSANCE: RITUAL AND REPRESENTATION**

This course explores the remarkable emergence of new ways of representing poetic and dramatic texts in musical form, charting the cultural forces of Renaissance, Reformation, and printing in the 15th and 16th centuries. We will explore changes in musical style, and the changing role that music played in European culture. We’ll hear music by composers like Dufay, Josquin, Palestrina, Lasso, and Marenzio, among many others. Three class hours plus listening laboratory period. Prerequisite(s): Any full-credit course in Music, or equivalent prior experience in musical study. (Offered Spring 2018)

**MUSC H222 BACH AND THE BAROQUE**

This course traces sharp changes in 17th-century musical style and the equally striking changes in roles for soloists, composers, and audiences that prepared the way for Bach’s extraordinary synthesis of musical technique in the first half of the 18th century. Attention to contexts of patronage, publishing, church, and theater, and to composers including Monteverdi, Vivaldi, and Handel. Prerequisite(s): Any full-credit course in Music, or instructor consent. (Offered Fall 2017)

**MUSC H223 MOZART’S WORLD: MUSIC OF THE CLASSICAL ERA**

This course takes students on a musical tour of Europe in the age of Mozart. Traveling from Naples to Paris, London, and Vienna, we consider how politics, religion, commerce, and technology shaped local musical cultures. At the same time, we explore the formation of a pan-European musical language, the galant style, in works by Mozart and his contemporaries. Prerequisite(s): Any full-credit course in Music, or instructor consent. (Typically offered every other year)

**MUSC H224 BEETHOVEN’S CENTURY: MUSIC OF THE ROMANTIC ERA**

This course traces new paths forged by Beethoven and his successors in the dazzling musical world of the 19th century. Beethoven is a touchstone as we explore the songs, operas, piano music, and symphonic works of Schubert, Chopin, the Schumanns, Berlioz, Liszt, Wagner, Verdi, Brahms, and Mahler. We situate changing musical form and style in the contexts of literary Romanticism, nationalism, and the evolving social world of musicians and their institutions. Prerequisite(s): Any full-credit course in music, or instructor consent. (Typically offered every other year)

**MUSC H229 THINKING ABOUT MUSIC: IDEAS, HISTORY, AND MUSICOLOGY**

Core concepts and perspectives for the serious study of music. Students explore music, meaning, and musicological method in a variety of contexts through a set of six foundational themes and questions: Music and the Idea of Genius, Who Owns Music?, Music and Technology, The Global Soundscape, Music and the State, and Tonality, Sense, and Reason. Each unit uses a small number of musical works, performances, or documents as a focal point. In each unit we also read current musicological work in an attempt to understand the methods, arguments, and perspectives through which scholars interpret music and its many meanings. This course is required of all music majors and minors in their sophomore or junior year. Prerequisite(s): MUSC 110, 111, or 203, or instructor consent. (Offered Fall 2017)

**MUSC H254 TONES, WORDS, AND IMAGES**

This course is designed around a core group of works that demonstrate musical interaction with a variety of media such as literary and dramatic text, visual art and architecture, and the physical movement of dance. Drawing from the rich resource of Western tradition, examples for study range from the German Lied of the Classical and Romantic periods to the contemporary collaborations of Philip Glass and filmmaker Godfrey Reggio. Along the way we encounter many of the principal currents in the development of the arts—impressionism, symbolism, expressionism, pointillism, verismo, abstraction—and the genres of song cycle, opera, melodrama, tone poem, ballet, theater and film. Among the composers represented are Mozart, Beethoven, Schubert, Schumann, Liszt, Wagner, Tschaikovsky, Thomas, Wolf, Fauré, Debussy, Dukas, Sibelius, Schoenberg, Stravinsky, Bartók, Puccini, Cage, and Glass; among authors Goethe, Eichendorff, Heine, Rückert, Bouilly, Poe, Baudelaire, Louÿs, Mallarmé, Maeterlinck, Balázs, Guiraud, George, Sardou, Auden, Updike, Joyce; in the visual realm Palladio, Friedrich, Rossetti, Monet, Baudelaire, Balanchine, Abrahams, Cunningham, Morris, Tharp. Prerequisite(s): any 100-level music course or its equivalent, or instructor consent. (Offered Fall 2017)

**MUSC H265 SYMPHONIC TECHNIQUE AND TRADITION**

In this course, we will be familiarizing ourselves with significant orchestral repertory of the past three centuries, learning to read the orchestral score, studying the capabilities of various orchestral instruments and how they are used together, and tracing the evolution of orchestral writing and orchestral forms from the Classical period to the present. Weekly exercises in scoring for orchestra. Attendance at rehearsals and/or performances of the Philadelphia Orchestra. Prerequisite(s): MUSC 204 or instructor consent. (Typically offered every other year)

**MUSC H266 COMPOSITION**

Preparation of a portfolio of compositions for various instruments and ensembles. Weekly assignments designed to invite creative, individual responses to a variety of musical ideas;
experimentation with harmony, form, notation, and text-setting. Performance of student works-in-progress and final reading/recording session with professional musicians. Recent classes have had their compositions read by Network for New Music, percussionist Phillip O’Banion, and the Amernet String Quartet. Prerequisite(s): MUSC 204 and instructor consent (Typically offered every other year)

MUSC H270 POPULAR MUSIC IN AMERICA
Introductory history of American popular music, c. 1790–1980. Covers early musical theater, minstrelsy, the blues, rock, film music, and minimalism, exploring themes of cultural hierarchy, technology, race, and transnationalism. Prerequisite(s): First year writing seminar or instructor consent. (Typically offered every other year)

MUSC H303 ADVANCED TONAL HARMONY
Study of late 19th-century harmonic practice in selected works of Liszt, Wagner, Brahms, Fauré, Wolf, Debussy, and Mahler. Exploration of chromatic harmony through analysis and short compositions; final composition project consisting of either art song or piano piece such as nocturne or intermezzo. Musicianship lab covers related aural and keyboard harmony skills. Prerequisite(s): MUSC 204 or instructor consent. (Offered Fall 2017)

MUSC H304 COUNTERPOINT
18th-century contrapuntal techniques and forms with emphasis on the works of J.S. Bach. Composition of two-part contrapuntal dances and inventions, canon, chorale prelude, fugue in three voices. Attention is also paid to counterpoint in later style periods, especially the twentieth century. Three class hours plus laboratory period covering related aural and keyboard harmony skills. Prerequisite(s): MUSC 204 or instructor consent. (Offered Spring 2018)

MUSC H325 SEMINAR IN 20TH/21ST CENTURY MUSIC
Study of composers, works, and trends since 1900, with reference to theoretical and aesthetic writings and their relation to world events. Recent topics have included European émigré influence on American music, and Make It New: Music by Philadelphia Composers. Prerequisite(s): MUSC 204 or instructor consent. (Offered Spring 2018)

MUSC H480 INDEPENDENT STUDY
Prerequisite(s): Approval of department and consent of instructor (Offered Fall 2017)

NEUROSCIENCE
Students may complete a minor in Neuroscience as an adjunct to any major at Bryn Mawr or Haverford pending approval of the student’s coursework plan by their respective Neuroscience adviser. The minor in Neuroscience is designed to allow students to pursue their interests in behavior and the nervous system across disciplines. The first requirement for the minor is a course that acts as a gateway to the discipline and should be taken early in a student’s academic plan.

Faculty
Advisory Committee
William (Dustin) Albert, Assistant Professor of Psychology
Douglas Blank, Associate Professor of Computer Science (on leave semester II)
Laura Been, Psychology at Haverford College
Peter Brodfuehrer, Eleanor A. Bliss Professor of Biology
Rebecca Compton, Psychology at Haverford College
Karen Greif, Professor of Biology
Mary Ellen Kelly, Adviser Psychology at Haverford College
Roshan Jain, Biology at Haverford College
Deepak Kumar, Professor of Computer Science
Leslie Rescorla, Professor of Psychology on the Class of 1897 Professorship of Science and Director of Child Study Institute
Anjali Thapar, Professor of Psychology (on leave semester II)
Earl Thomas, Adviser for Psychology

The desire to understand human and animal behavior in terms of nervous system structure and function is long standing. Historically, this task has been approached from a variety of disciplines including medicine, biology, psychology, philosophy and physiology. The field of neuroscience emerged as an interdisciplinary approach, combining techniques and perspectives from these disciplines, as well as emerging fields such as computation and cognitive science, to yield new insights into the workings of the nervous system and behavior.

Minor Requirements
- HC Psych 217 (Biological Psychology) or BMC Psych 218 (Behavioral Neuroscience) or BMC Bio 202 (Introduction to Neuroscience).
- Five credits from advanced courses on the following lists, with these constraints:
  - The five credits must sample from three different disciplines.
  - At least three of the five credits must be from List A (neuroscience courses); the remainder can be from List A or B (courses from allied disciplines).
  - At least one of the credits must be at the 300-level or higher.
  - One of the five credits may come from supervised senior research in neuroscience.

  - With permission of major and minor advisers, a student may count no more than two of the six minor credits towards the student’s major.

List of Courses
List A: Neuroscience courses
* denotes half-credit course
- BIOL B244 Behavioral Endocrinology
- BIOL B304 Cell and Molecular Neurobiology
- BIOL B321 Neuroethology
- BIOL B326 From Channels to Behavior
- BIOL B364 Developmental Neurobiology
BIOL B250 Computational Models in the Sciences
BIOL H302 Cell Architecture
*BIOL H306 Inter and Intra Cellular Communication
*BIOL H312 Development and Evolution
CMSC B250 Computational Models in the Sciences
CMSC B325 Computational Linguistics
CMSC B361 Emergence
CMSC B371 Cognitive Science
CMSC B372 Introduction to Artificial Intelligence
CMSC B376 Developmental Robotics
LING B101 Introduction to Linguistics
LING H113 Introduction to Syntax
LING H114 Introduction to Semantics
LING H115 Phonetics and Phonology
PHIL B244 Philosophy and Cognitive Science
PHIL B319 Philosophy of Mind
PHIL H102 Rational Animals
PHIL H106 Philosophy of Consciousness
PHIL H110 Mind and World
PHIL H112 Mind, Myth, and Memory
PHIL H251 Philosophy of Mind
PHIL B271 Minds and Machines
PHIL H351 Topics in Philosophy of Mind
PSYC B201 Learning Theory and Behavior
PSYC B212 Human Cognition
PSYC B350 Developmental Cognitive Disorders
PSYC B351 Developmental Psychopathology
PSYC H213 Memory and Cognition
PSYC H220 Psychology of Time
PSYC H238 Psychology of Language
PSYC H316 Embodied Cognition

COURSES

BIOL B202 Introduction to Neuroscience
An introduction to the nervous system and its broad contributions to function. The class will explore fundamentals of neural anatomy and signaling, sensory and motor processing and control, nervous system development and examples of complex brain functions. Lecture three hours a week. Prerequisite: One semester of BIOL 110-111 or permission of instructor.
Approach: Scientific Investigation (SI)
Counts towards: Biochemistry and Molecular Biology; Neuroscience
Units: 1.0
Instructor(s): Greif, K.
(Fall 2017)

BIOL B244 Behavioral Endocrinology
An interdisciplinary-based analysis of the nature of hormones, how hormones affect cells and systems, and how these effects alter the behavior of animals. Topics will be covered from a research perspective using a combination of lectures, discussions and student presentations. Prerequisites: One semester of BIOL 110-111 or one of the following courses: BIOL B202, PSYC B218 or PSYC H217.
Approach: Scientific Investigation (SI)
Counts towards: Neuroscience
Units: 1.0
(Not Offered 2017-2018)

BIOL B250 Computational Methods in the Sciences
A study of how and why modern computation methods are used in scientific inquiry. Students will learn basic principles of visualizing and analyzing scientific data through hands-on programming exercises. The majority of the course will use the R programming language and corresponding open source statistical software. Content will focus on data sets from across the sciences. Six hours of combined lecture/lab per week.
Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR); Scientific Investigation (SI)
Major Writing Requirement: Writing Attentive
Counts towards: Biochemistry and Molecular Biology; Environmental Studies; Neuroscience
Units: 1.0
(Not Offered 2017-2018)

BIOL B321 Neuroethology
This course provides an opportunity for students to understand the neuronal basis of behavior through the examination of how particular animals have evolved neural solutions to specific...
problems posed to them by their environments. The topics will be covered from a research perspective using a combination of lectures, discussions and student presentations. Prerequisite: BIOL 202, PSYC 218 or PSYC 217 at Haverford.

Counts towards: Neuroscience
Units: 1.0
Instructor(s): Brodfuehrer,P.
(Spring 2018)

**BIOL B326 From Channels to Behavior**
Introduces the principles, research approaches, and methodologies of cellular and behavioral neuroscience. The first half of the course will cover the cellular properties of neurons using current and voltage clamp techniques along with neuron simulations. The second half of the course will introduce students to state-of-the-art techniques for acquiring and analyzing data in a variety of rodent models linking brain and behavior. Prerequisites: one semester of BIOL 110-111 and one of the following: PSYC B218/PSYC H217, or BIOL 202.

Major Writing Requirement: Writing Attentive
Counts towards: Neuroscience
Units: 1.0
Instructor(s): Brodfuehrer,P.
(Fall 2017)

**BIOL B364 Developmental Neurobiology**
A lecture/discussion course on major topics in the development of the nervous system. Lecture three hours a week. Prerequisite: BIOL 201 or 271, BIOL 202 or equivalent, or permission of instructor.

Counts towards: Neuroscience
Units: 1.0
(Not Offered 2017-2018)

**BIOL B401 Supervised Research in Neuroscience**
Laboratory or library research under the supervision of a member of the Neuroscience committee. Required for those with the concentration. Prerequisite: permission of instructor.

Counts towards: Neuroscience
Units: 1.0
(Fall 2017)

**CMSC B371 Cognitive Science**
Cognitive science is the interdisciplinary study of intelligence in mechanical and organic systems. In this introductory course, we examine many topics from computer science, linguistics, neuroscience, mathematics, philosophy, and psychology. Can a computer be intelligent? How do neurons give rise to thinking? What is consciousness? These are some of the questions we will examine. No prior knowledge or experience with any of the subfields is assumed or necessary. Prerequisite: CMSC B206 or H106 and CMSC B231 or permission of instructor.

Counts towards: Neuroscience
Units: 1.0
(Not Offered 2017-2018)

**CMSC B372 Artificial Intelligence**
Survey of Artificial Intelligence (AI), the study of how to program computers to behave in ways normally attributed to “intelligence” when observed in humans. Topics include heuristic versus algorithmic programming; cognitive simulation versus machine intelligence; problem-solving; inference; natural language understanding; scene analysis; learning; decision-making. Topics are illustrated by programs from literature, programming projects in appropriate languages and building small robots. Prerequisites: CMSC B206 or H106 and CMSC B231.

Counts towards: Neuroscience
Units: 1.0
Instructor(s): Kumar,D.
(Fall 2017)

**PHIL B244 Philosophy and Cognitive Science**
Cognitive science is a multidisciplinary approach to the study of human cognition, spanning philosophy, linguistics, psychology, computer science, and neuroscience. A central claim of cognitive science is that the mind is like a computer. We will critically examine this claim by exploring issues surrounding mental representation and computation. We’ll address such questions as: does the mind represent the world? Could our minds extend into the world beyond the brain and body? Is there a language of thought?

Approach: Critical Interpretation (CI)
Counts towards: Neuroscience
Units: 1.0
(Not Offered 2017-2018)

**PHIL B319 Philosophy of Mind**
The conscious mind remains a philosophical and scientific mystery. In this course, we will explore the nature of consciousness and its place in the physical world. Some questions we will consider include: How is consciousness related to the brain and the body? Are minds a kind of computer? Is the conscious mind something non-physical or immaterial? Is it possible to have a science of consciousness, or will consciousness inevitably resist scientific explanation? We will explore these questions from a philosophical perspective that draws on relevant literature from cognitive neuroscience.

Counts towards: Neuroscience
Units: 1.0
(Not Offered 2017-2018)

**PSYC B212 Human Cognition**
This course provides an overview of the field of Cognitive Psychology, the branch of psychology that studies how we acquire, store, process and communicate information. Over the semester we will survey classic and contemporary theory and findings on a wide range of mental processes that are used every day in almost all human activities – from attention and memory to language and problem solving – and our goal will be to understand how the human mind works! Prerequisite: PSYC B105 or H100 (Introductory Psychology), or instructor’s permission.

Approach: Scientific Investigation (SI)
Counts towards: Neuroscience
Units: 1.0
(Not Offered 2017-2018)

**PSYC B218 Behavioral Neuroscience**
An interdisciplinary course on the neurobiological bases of experience and behavior, emphasizing the contribution of the various neurosciences to the understanding of basic problems of psychology. An introduction to the fundamentals of neuroanatomy, neurophysiology, and neurochemistry with an emphasis upon synaptic transmission; followed by the application
of these principles to an analysis of sensory processes and perception, emotion, motivation, learning, and cognition. Lecture three hours a week. Prerequisite: Introductory Psychology (PSYC 105).

Approach: Course does not meet an Approach
Counts towards: Neuroscience
Units: 1.0
Instructor(s): Thomas,E.
(Spring 2018)

**PSYC B323 Advanced Topics in Cognitive Neuroscience**
This is a topics course. Course content varies.
Counts towards: Neuroscience
Units: 1.0
(Not Offered 2017-2018)

**PSYC B351 Developmental Psychopathology**
This course will examine emotional and behavioral disorders of children and adolescents, including autism, attention deficit disorder, conduct disorder, phobias, obsessive-compulsive disorder, depression, anorexia, and schizophrenia. Major topics covered will include: contrasting models of psychopathology; empirical and categorical approaches to assessment and diagnosis; outcome of childhood disorders; risk, resilience, and prevention; and therapeutic approaches and their efficacy. Prerequisite: PSYC 206 or 209.
Counts towards: Child and Family Studies; Health Studies; Neuroscience
Units: 1.0
(Not Offered 2017-2018)

**PSYC B355 Neurobiology of Anxiety, Stress and Anxiety Disorders**
A seminar course examining the neurobiological basis of fear and anxiety and the stress that is often associated with these emotions. We will also consider anxiety and stress disorders including generalized anxiety disorder, panic disorder, specific phobias, obsessive compulsive disorder, and post-traumatic stress disorder. Implications for various forms of therapy for anxiety disorders, including psychotherapy and pharmacotherapy, will be addressed. Prerequisite: PSYC B218, PSYC B209, BIOL B202 or permission of instructor.
Counts towards: Neuroscience
Units: 1.0
(Not Offered 2017-2018)

**PSYC B395 Psychopharmacology**
A study of the role of drugs in understanding basic brain-behavior relations. Topics include the pharmacological basis of motivation and emotion; pharmacological models of psychopathology; the use of drugs in the treatment of psychiatric disorders such as anxiety, depression, and psychosis; and the psychology and pharmacology of drug addiction. Prerequisite: PSYC B218 or BIOL B202 or PSYC H217 or permission of instructor.
Counts towards: Health Studies; Neuroscience
Units: 1.0
Instructor(s): Thomas,E.
(Spring 2018)

**PSYC B401 Supervised Research in Neuroscience**
Laboratory or field research on a wide variety of topics. Students should consult with faculty members to determine their topic and faculty supervisor, early in the semester prior to when they will begin.
Counts towards: Neuroscience
Units: 1.0
(Fall 2017, Spring 2018)

---

**PEACE, CONFLICT, AND SOCIAL JUSTICE STUDIES**

Students may complete a concentration in Peace, Conflict, and Social Justice Studies.

**Faculty**

*Advisory Committee*

Alison Cook-Sather, Mary Katharine Woodworth Chair and Professor in the Bryn Mawr/Haverford Education Program and Director of Peace, Conflict, and Social Justice Studies

Lee Smithe, Associate Professor of Sociology and Coordinator of Peace and Conflict Studies, Swarthmore College

Jill Stauffer, Associate Professor of Philosophy & Director of Peace, Justice & Human Rights, Haverford College

The Peace, Conflict, and Social Justice Studies program reflects Bryn Mawr’s interest in the study of conflicts, peacemaking, and social justice and offers students the opportunity to design a course of study, to sustain a thematic focus across disciplinary boundaries, and to enrich their major program in the process. Students are encouraged to draw courses from the programs at Haverford and Swarthmore as well.

Students in the concentration can pursue a wide range of theoretical and substantive interests concerning questions such as: intra-state and international causes of conflict; cooperative and competitive strategies of negotiation and bargaining; intergroup relations and the role of culturally constituted institutions and practices in conflict management; social movements; protests and revolutions; the role of religion in social conflict and its mitigation; human rights and transitional justice in post conflict societies; and social justice and identity questions arising from ethnic, religious and cultural diversity and the implications of these constructions for the distribution of material and symbolic resources in society as well as the practical capacities to engage individuals and groups across constructions of difference by linking practice and theory. Below is a general description of the concentration requirements.

Students in the concentration are encouraged to explore alternative conceptions of peace and social justice in different cultural contexts and historical moments by emphasizing the connections between the intellectual scaffolding needed to analyze the construction of social identities and the social, political and economic implications of these constructions for the distribution of material and symbolic resources within and between societies and the challenges and opportunities to engage individuals and groups to move their communities and societies towards peace and social justice.

**Concentration Requirements**

Students who wish to take the concentration meet with a faculty advisor by the spring of their sophomore year to develop a plan of study. All concentrators are required to take three core
courses: (1) an introductory course, Introduction to Peace, Social Justice and Human Rights at Haverford or Introduction to Peace and Conflict Studies at Swarthmore; (2) a 200-level course (Conflict and Conflict Management, International Law, Politics of Humanitarianism, or Forgiveness, Mourning, and Mercy in Law and Politics), and (3) a project involving community participation and reflection by participation in bi-semester meetings, attendance at lectures/workshops, and development of a portfolio in their junior and senior years. This constellation of this second option earns students a single credit that is awarded upon the successful completion of all components.

In addition, students are required to take three courses chosen in consultation with their advisor, working out a plan that focuses this second half of their concentration regionally, conceptually or around a particular substantive problem. These courses might include international conflict and resolution; social justice, diversity and identity, ethnic conflict in general or in a specific region of the world (e.g. Southern Africa, the Middle East, Northern Ireland); a theoretical approach to the field, such as nonviolence, social justice movements, bargaining or game theory; an applied approach, such as reducing violence among youth, the arts and peacemaking, community mediation or a particular policy question such as immigration or bilingual education.

The following courses are pre-approved. To see if other courses might be counted toward the concentration, contact the program coordinator, Alison Cook-Sather, acooksat@brynmawr.edu.

COURSES

ANTH B285 Anthropology of Development, Aid, and Activism
This course will provide tools to reflect critically on the meanings and effects of aid, or “doing good” for others in a world characterized by historically-rooted social, political, and economic inequalities. What goes into defining specific people or geographic regions as “in need”? What complex dynamics are at play when an outside actor – whether in the form of a government aid agency, an NGO, or an individual volunteer – enters a community in order to aid its members? How do those categorized as beneficiaries assert their own identities and offer their own perspectives on social change?
Approach: Cross-Cultural Analysis (CC)
Counts towards: International Studies; Peace, Justice and Human Rights
Units: 1.0
Instructor(s): Campoamor,L.
(Fall 2017)

ECON B385 Democracy and Development
From 1974 to the late 1990’s the number of democracies grew from 39 to 117. This “third wave,” the collapse of communism and developmental successes in East Asia have led some to argue the triumph of democracy and markets. Since the late 1990’s, democracy’s third wave has stalled, and some fear a reverse wave and democratic breakdowns. We will question this phenomenon through the disciplines of economics, history, political science and sociology drawing from theoretical, case study and classical literature. Prerequisites: ECON 200; ECON 253 or 304; and one course in Political Science OR Junior or Senior Standing in Political Science OR Permission of the Instructor.
Counts towards: International Studies; Peace, Justice and Human Rights
Units: 1.0
Instructor(s): Allen,M.
(Fall 2017)

HIST B127 Indigenous Leaders 1492-1750
Studies the experiences of indigenous men and women who exercised local authority in the systems established by European colonizers. In return for places in the colonial administrations, these leaders performed a range of tasks. At the same time they served as colonial officials, they exercised “traditional” forms of authority within their communities, often free of European presence. These figures provide a lens through which early modern colonialism is studied.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: African Studies; Latin American, Iberian and Latina/o Studies; Peace, Justice and Human Rights
Units: 1.0
Instructor(s): Gallup-Díaz,l.
(Spring 2018)

HIST B200 The Atlantic World 1492-1800
The aim of this course is to provide an understanding of the way in which peoples, goods, and ideas from Africa, Europe, and the Americas came together to form an interconnected Atlantic World system. The course is designed to chart the manner in which an integrated system was created in the Americas in the early modern period, rather than to treat the history of the Atlantic World as nothing more than an expanded version of North American, Caribbean, or Latin American history.
Approach: Inquiry into the Past (IP)
Counts towards: African Studies; Latin American, Iberian and Latina/o Studies; International Studies; Peace, Justice and Human Rights
Units: 1.0
(Not Offered 2017-2018)

POLS B141 Introduction to International Politics
An introduction to international relations, exploring its main subdivisions and theoretical approaches. Phenomena and problems in world politics examined include systems of power management, imperialism, globalization, war, bargaining, and peace. Problems and institutions of international economy and international law are also addressed. This course assumes a reasonable knowledge of modern world history.
Approach: Cross-Cultural Analysis (CC)
Counts towards: International Studies; Peace, Justice and Human Rights
Units: 1.0
Instructor(s): Allen,M.
(Fall 2017)

PSYC B358 Political Psychology of Ethnic Conflict
This seminar explores the common interests of psychologists and political scientists in ethnic identification and ethnic-group conflict. Rational choice theories of conflict from political science will be compared with social psychological theories of conflict that focus more on emotion and essentializing. Each student will contribute a 200-300 word post in response to a reading or film assignment each week. Students will represent their posts in seminar discussion of readings and films. Each student will write a final paper analyzing the origins and trajectory of a case of violent ethnic conflict chosen by agreement with the instructor.
Grading includes posts, participation in discussion, and the final paper. Prerequisite: PSYC B208, or PSYC B120, or PSYC B125, or one 200 level course in political science, or instructor’s permission.

Counts towards: Peace, Justice and Human Rights
Units: 1.0
(Not Offered 2017-2018)

**SOCL B350 Movements for Social Justice in the US**

Throughout human history, powerless groups of people have organized social movements to improve their lives and their societies. Powerful groups and institutions have resisted these efforts in order to maintain their own privilege. Some periods of history have been more likely than others to spawn protest movements. What factors seem most likely to lead to social movements? What determines their success/failure? We will examine 20th-century social movements in the United States to answer these questions. Includes a film series. Prerequisite: At least one prior social science course or permission of the instructor.

Counts towards: Gender and Sexuality Studies; Peace, Justice and Human Rights
Units: 1.0
Instructor(s): Karen, D.
(Fall 2017)

**PHILOSOPHY**

Students may complete a major or minor in Philosophy.

**Faculty**

Macalester Bell, Associate Professor of Philosophy (on leave semester I)

Robert Dostal, Rufus M. Jones Professor and Chair of Philosophy

Adrienne Prettyman, Assistant Professor of Philosophy

Collin Rice, Assistant Professor of Philosophy

The Department of Philosophy introduces students to some of the most compelling answers to questions of human existence and knowledge. It also grooms students for a variety of fields that require analysis, conceptual precision, argumentative skill, and clarity of thought and expression. These include administration, the arts, business, computer science, health professions, law, and social services. The major in Philosophy also prepares students for graduate-level study leading to careers in teaching and research in the discipline.

The curriculum focuses on three major areas: the systematic areas of philosophy, such as logic, theory of knowledge, metaphysics, ethics, and aesthetics; the history of philosophy through the study of key philosophers and philosophical periods; and the philosophical explication of methods in such domains as art, history, religion, and science.

The department is a member of the Greater Philadelphia Philosophy Consortium comprising 13 member institutions in the Delaware Valley. It sponsors conferences on various topics in philosophy and an annual undergraduate student philosophy conference.

**Major Requirements**

Students majoring in Philosophy must take a minimum of 11 semester courses in the discipline and attend the monthly noncredit departmental colloquia which feature leading visiting scholars. The following five courses are required for the major: the two-semester Historical Introduction (PHIL 101 and 102); Ethics (PHIL 221); Theory of Knowledge (PHIL 211), Metaphysics (PHIL 212), or Logic (PHIL 103); and Senior Conference (PHIL 398 and PHIL 399). At least three other courses at the 300 level are required, one of which must concentrate on the work of a single philosopher or a period of philosophy.

All majors will be required to complete two writing attentive courses prior to the start of their senior year.

Philosophy majors are encouraged to supplement their philosophical interests by taking advantage of courses offered in related areas, such as anthropology, history, history of art, languages, literature, mathematics, political science, psychology, and sociology.

**Honors**

Honors will be awarded by the department based on the senior thesis and other work completed in the department. The Milton C. Nahm Prize in Philosophy is a cash award presented to the graduating senior major whose senior thesis the department judges to be of outstanding caliber. This prize need not be granted every year.

**Minor Requirements**

Students may minor in Philosophy by taking six courses in the discipline at any level. They must also attend the monthly noncredit department colloquia.

**Cross-Registration**

Students may take advantage of cross-registration arrangements with Haverford College, Swarthmore College, and the University of Pennsylvania. Courses at these institutions may satisfy Bryn Mawr requirements, but students should check with the major advisor to make sure specific courses meet requirements.

**Prerequisites**

No introductory-level course carries a prerequisite. However, most courses at both the intermediate and advanced levels carry prerequisites. Unless stated otherwise in the course description, any introductory course satisfies the prerequisite for an intermediate-level course, and any intermediate course satisfies the prerequisite for an advanced-level course.

**COURSES**

**PHIL B101 Happiness and Reality in Ancient Thought**

What makes us happy? The wisdom of the ancient world has importantly shaped the tradition of Western thought but in some important respects it has been rejected or forgotten. What is the nature of reality? Can we have knowledge about the world and ourselves, and, if so, how? In this course we explore answers to these sorts of metaphysical, epistemological, ethical, and political questions by examining the works of the two central Greek philosophers: Plato and Aristotle. We will consider earlier Greek religious and dramatic writings, a few Presocratic philosophers, and the person of Socrates who never wrote a word.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)

Major Writing Requirement: Writing Intensive
PHIL B102 Science and Morality in Modernity

In this course, we explore answers to fundamental questions about the nature of the world and our place in it by examining the works of some of the central figures in modern western philosophy. Can we obtain knowledge of the world and, if so, how? Does God exist? What is the nature of the self? How do we determine morally right answers? What sorts of policies and political structures can best promote justice and equality? These questions were addressed in "modern" Europe in the context of the development of modern science and the religious wars. In a time of globalization we are all, more or less, heirs of the Enlightenment which sees its legacy to be modern science and the mastery of nature together with democracy and human rights. This course explores the above questions and considers them in their historical context. Some of the philosophers considered include Descartes, Locke, Hume, Kant, and Wollstonecraft.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Rice, C.
(Spring 2018)

PHIL B103 Introduction to Logic

Logic is the study of formal reasoning, which concerns the nature of valid arguments and inferential fallacies. In everyday life our arguments tend to be informal and sometimes imprecise. The study of logic concerns the structure and nature of arguments, and so helps to analyze them more precisely. Topics will include: valid and invalid arguments, determining the logical structure of ordinary sentences, reasoning with truth-functional connectives, and inferences involving quantifiers and predicates. This course does not presuppose any background knowledge in logic.

Approach: Quantitative Methods (QM)
Units: 1.0
Instructor(s): Prettyman, A.
(Spring 2018)

PHIL B205 Medical Ethics

The field of medicine provides a rich terrain for the study and application of philosophical ethics. This course will introduce students to fundamental ethical theories and present ways in which these theories connect to particular medical issues. We will also discuss what are often considered the four fundamental principles of medical ethics (autonomy, beneficence, non-maleficence, and justice) in connection to specific topics related to medical practice (such as reproductive rights, euthanasia, and allocation of health resources).

Approach: Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies; Health Studies
Units: 1.0
(Not Offered 2017-2018)

PHIL B206 Introduction to the Philosophy of Science

Scientific ideas and inferences have a huge impact on our daily lives and the lives of practicing scientists. But what is science, how does it work, and what does it able us to know? In this introductory course, we will be considering some traditional philosophical questions applied to the foundations and practice of natural science. These questions may include the history of philosophical approaches in science, the nature of scientific knowledge, changes in scientific knowledge over time, how science provides explanations of what we observe, the justification of false assumptions in science, the nature of scientific theories, and some questions about the ethics and values involved in scientific practice.

Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

PHIL B211 Theory of Knowledge

Varieties of realism and relativism address questions about what sorts of things exist and the constraints on our knowledge of them. The aim of this course is to develop a sense of how these theories interrelate, and to instill philosophical skills in the critical evaluation of them. Discussions will be based on contemporary readings.

Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Rice, C.
(Spring 2018)

PHIL B212 Metaphysics

Metaphysics is inquiry into basic features of the world and ourselves. This course considers two topics of metaphysics, free will and personal identity, and their relationship. What is free will and are we free? Is freedom compatible with determinism? Does moral responsibility require free will? What makes someone the same person over time? Can a person survive without their body? Is the recognition of others required to be a person?

Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Intensive
Units: 1.0
(Not Offered 2017-2018)

PHIL B221 Ethics

An introduction to ethics by way of an examination of moral theories and a discussion of important ancient, modern, and contemporary texts which established theories such as virtue ethics, deontology, utilitarianism, relativism, emotivism, care ethics. This course considers questions concerning freedom, responsibility, and obligation. How should we live our lives and interact with others? How should we think about ethics in a global context? Is ethics independent of culture? A variety of practical issues such as reproductive rights, euthanasia, animal rights and the environment will be considered.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Major Writing Requirement: Writing Attentive
Counts towards: Gender and Sexuality Studies; International Studies
Units: 1.0
Instructor(s): Bell, M.
(Spring 2018)

PHIL B225 Global Ethical Issues

The need for a critical analysis of what justice is and requires has become urgent in a context of increasing globalization, the emergence of new forms of conflict and war, high rates of poverty within and across borders and the prospect of environmental devastation. This course examines prevailing theories and issues of justice as well as approaches and challenges by non-western, post-colonial, feminist, race, class, and disability theorists.
PHIL B238 Science, Technology and the Good Life

“Science, Technology, and the Good Life” considers the relation of science and technology to each other and to everyday life, particularly with respect to questions of ethics and politics. In this course, we try to get clear about how we understand these domains and their interrelationships in our contemporary world. We try to clarify the issues relevant to these questions by looking at the contemporary debates about the role of automation and digital media and the problem of climate change. These debates raise many questions including: the appropriate model of scientific inquiry (is there a single model for science?, how is science both experimental and deductive?, is science merely trial and error?, is science objective?, is science value-free?), the ideological standing of science (has science become a kind of ideology?), the autonomy of technology (have the rapidly developing technologies escaped our power to direct them?), the politics of science (is science somehow essentially democratic?, and are “scientific” cultures more likely to foster democracy?, or is a scientific culture essentially elitist and autocratic?), the relation of science to the formation of public policy (experts rule?, are we in or moving toward a technocracy?), the role of technology and science in the process of modernization, Westernization, and globalization (what role has science played in industrialization and what role does it now play in a post-industrial world?). To find an appropriate way to consider these questions, we look at the pairing of science with democracy in the Enlightenment project and study contemporary work in the philosophy of science, political science, and ethics.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Dostal,R.
(Fall 2017)

PHIL B240 Environmental Ethics

This course surveys rights- and justice-based justifications for ethical positions on the environment. It examines approaches such as stewardship, intrinsic value, land ethic, deep ecology, ecofeminism, Asian and aboriginal. It explores issues such as obligations to future generations, to nonhumans and to the biosphere.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Dostal,R.
(Spring 2018)

PHIL B244 Philosophy and Cognitive Science

Cognitive science is a multidisciplinary approach to the study of human cognition, spanning philosophy, linguistics, psychology, computer science, and neuroscience. A central claim of cognitive science is that the mind is like a computer. We will critically examine this claim by exploring issues surrounding mental representation and computation. We’ll address such questions as: does the mind represent the world? Could our minds extend into the world beyond the brain and body? Is there a language of thought?

Approach: Critical Interpretation (CI)
Counts towards: Neuroscience
Units: 1.0
(Not Offered 2017-2018)

PHIL B247 Science, Mind, and Culture

Both human minds and our culture are extremely complex and intimately intertwined. As a result, several sciences—including biology, psychology, and archeology—are required to give a full understanding of who we are and how we got to be this way. This interdisciplinary project raises several philosophical questions about how to study the human mind and its relationship to biology and culture. In this course we will first look at philosophical questions that arise for each of these sciences independently. These include issues regarding the role of adaptation in biology and psychology, the nature of mental concepts, the relationship between thought and language, and the use of artifacts and computational models as evidence. In the second part of the course, we will focus on the challenges and benefits of integrating these disciplines to inform our views about human nature, cultural change, and how our minds interact with the world.

Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Rice,C.
(Spring 2018)

PHIL B252 Feminist Theory

Beliefs that gender discrimination has been eliminated and women have achieved equality have become commonplace. We challenge these assumptions examining the concepts of patriarchy, sexism, and oppression. Exploring concepts central to feminist theory, we attend to the history of feminist theory and contemporary accounts of women’s place and status in different societies, varied experiences, and the impact of the phenomenon of globalization. We then explore the relevance of gender to philosophical questions about identity and agency with respect to moral, social and political theory. Prerequisite: one course in philosophy or permission of instructor.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

PHIL B271 Minds and Machines

What is the relationship between the mind and the body? What is consciousness? Is your mind like a computer, or do some aspects of the mind resist this analogy? Is it possible to build an artificial mind? In this course, we’ll explore these questions and more, drawing on perspectives from philosophy, psychology and cognitive neuroscience. We will consider the viability of different ways of understanding the relationship between mind and body as a framework for studying the mind, as well as the distinctive issues that arise in connection with the phenomenon of consciousness. No prior knowledge or experience with any of the subfields is assumed or necessary.

Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Intensive
Units: 1.0
Instructor(s): Prettyman,A.
(Fall 2017)

PHIL B305 Topics in Value Theory
Major Writing Requirement: Writing Attentive
Units: 1.0
(Not Offered 2017-2018)

PHIL B310 Philosophy of Science
This course investigates philosophical problems arising from consideration about the practice of science and the inferences used in scientific reasoning. Typical topics include the nature of scientific laws and theories, the character of explanation and prediction, the role of idealization in science, the goals of scientific inquiry, the existence of "non-observable" theoretical entities such as electrons and genes, the problem of justifying induction, scientific realism vs. constructivism, the role of values and ethics in science, the evolution of scientific knowledge over time, the social structures of science, and some puzzles associated with probability. We will also look at more specific philosophical issues within particular scientific disciplines (e.g. philosophy of physics, biology, or social science) as they arise throughout the course.

Units: 1.0
Instructor(s): Rice,C.
(Fall 2017)

PHIL B317 Philosophy of Creativity
Here are some questions we will discuss in this course. What are the criteria of creativity? Is explaining creativity possible? If it is, what model(s) of explanation is appropriate for doing so? Should we understand creativity in terms of persons, processes or products? What is the relation between creativity and skill? What is the relation between the context of creativity and the context of criticism? What is the relation between tradition and creativity? What is creative imagination? Is there a significant relationship between creativity and self-transformation? This course encourages active discussions arising from students' non-graded entries into their journals that will address the application of their readings to their own related creative activities.

Major Writing Requirement: Writing Intensive
Units: 1.0
(Not Offered 2017-2018)

PHIL B319 Philosophy of Mind
The conscious mind remains a philosophical and scientific mystery. In this course, we will explore the nature of consciousness and its place in the physical world. Some questions we will consider include: How is consciousness related to the brain and the body? Are minds a kind of computer? Is the conscious mind something non-physical or immaterial? Is it possible to have a science of consciousness, or will consciousness inevitably resist scientific explanation? We will explore these questions from a philosophical perspective that draws on relevant literature from cognitive neuroscience.

Counts towards: Neuroscience
Units: 1.0
(Not Offered 2017-2018)

PHIL B323 Culture and Interpretation
This course will discuss these questions. What are the aims of interpretation? Must we assume that, for cultural objects—like artworks, music, or literature—there must be a single right interpretation? If not, what is to prevent one from sliding into an interpretive anarchism? What is the role of a creator's intentions in fixing upon admissible interpretations? Does interpretation affect the identity of the object of interpretation? If an object of interpretation exists independently of interpretive practice, must it answer to only one right interpretation? In turn, if an object of interpretation is constituted by interpretive practice, must it answer to more than one right interpretation? This course encourages active discussions of these questions.

Major Writing Requirement: Writing Intensive
Counts towards: International Studies
Units: 1.0
(Not Offered 2017-2018)

PHIL B330 Kant
The significance of Kant's transcendental philosophy for thought in the 19th and 20th centuries cannot be overstated. His work is profoundly important for both the analytical and the so-called "continental" schools of thought. This course will provide a close study of Kant's breakthrough work: The Critique of Pure Reason. We will read and discuss the text with reference to its historical context and with respect to its impact on developments in epistemology, metaphysics, philosophy of mind, philosophy of science, philosophy of religion as well as developments in German Idealism, 20th-century phenomenology, and contemporary analytic philosophy. Prerequisite: PHIL 102 or at least one 200 level Philosophy course.

Major Writing Requirement: Writing Intensive
Units: 1.0
(Not Offered 2017-2018)

PHIL B338 Phenomenology: Heidegger and Husserl
This upper-level seminar will consider the two main proponents of phenomenology—a movement in philosophy in the 20th century that attempted to restart philosophy in a radical way. Its concerns are philosophically comprehensive: ontology, epistemology, philosophy of science, ethics, and so on. Phenomenology provides the important background for other later developments in 20th-century philosophy and beyond: existentialism, deconstruction, post-modernism. This seminar will focus primarily on Edmund Husserl's Crisis of the European Sciences and Martin Heidegger's Being and Time. Other writings to be considered include some of Heidegger's later work and Merleau-Ponty's preface to his Phenomenology of Perception.

Units: 1.0
Instructor(s): Dostal,R.
(Spring 2018)

PHIL B344 Development Ethics
This course explores the meaning of and moral issues raised by development. In what direction and by what means should a society "develop"? What role, if any, does the globalization of markets and capitalism play in processes of development and in systems of discrimination on the basis of factors such as race and gender? Answers to these sorts of questions will be explored through an examination of some of the most prominent theorists and recent literature. Prerequisites: a philosophy, political theory or economics course or permission of the instructor.

Major Writing Requirement: Writing Intensive
Counts towards: Gender and Sexuality Studies; International Studies
Units: 1.0
(Not Offered 2017-2018)
PHIL B398 Senior Seminar
Senior majors are required to write an undergraduate thesis on an approved topic. The senior seminar is a two-semester course in which research and writing are directed. Seniors will meet collectively and individually with the supervising instructor.
Prerequisite: BM undergraduate Philosophy major.
Units: 1.0
Instructor(s): Prettyman,A.
(Fall 2017)

PHIL B399 Senior Seminar
The senior seminar is a required course for majors in Philosophy. It is the course in which the research and writing of an undergraduate thesis is directed both in and outside of the class time. Students will meet sometimes with the class as a whole and sometimes with the professor separately to present and discuss drafts of their theses.
Prerequisite: BM undergraduate Philosophy major.
Units: 1.0
Instructor(s): Prettyman,A.
(Spring 2018)
PHIL B403 Supervised Work
Units: 1.0
(Fall 2017)

CMSC B372 Artificial Intelligence
Survey of Artificial Intelligence (AI), the study of how to program computers to behave in ways normally attributed to "intelligence" when observed in humans. Topics include heuristic versus algorithmic programming; cognitive simulation versus machine intelligence; problem-solving; inference; natural language understanding; scene analysis; learning; decision-making. Topics are illustrated by programs from literature, programming projects in appropriate languages and building small robots.
Prerequisites: CMSC B206 or H106 and CMSC B231.
Counts towards: Neuroscience
Units: 1.0
Instructor(s): Kumar,D.
(Fall 2017)

COML B293 The Play of Interpretation
Designated theory course. A study of the methodologies and regimes of interpretation in the arts, humanistic sciences, and media and cultural studies, this course focuses on common problems of text, authorship, reader/spectator, and translation in their historical and formal contexts. Literary, oral, and visual texts from different cultural traditions and histories will be studied through interpretive approaches informed by modern critical theories. Readings in literature, philosophy, popular culture, and film will illustrate how theory enhances our understanding of the complexities of history, memory, identity, and the trials of modernity.
Approach: Critical Interpretation (CI)
Counts towards: International Studies
Units: 1.0
(Not Offered 2017-2018)

FREN B213 Theory in Practice: Critical Discourses in the Humanities
By bringing together the study of major theoretical currents of the 20th century and the practice of analyzing literary works in the light of theory, this course aims at providing students with skills to use literary theory in their own scholarship. The selection of theoretical readings reflects the history of theory (psychoanalysis, structuralism, narratology), as well as the currents most relevant to the contemporary academic field: Post-structuralism, Post-colonialism, Gender Studies, and Ecocriticism. They are paired with a diverse range of short stories (Poe, Kafka, Camus, Borges, Calvino, Morrison, Djebbar, Ngozi Adichie) that we discuss along with our study of theoretical texts. The class will be conducted in English with an additional hour in French for students wishing to take it for French credit.
Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Sanquer,M.
(Fall 2017)

FREN B356 Rousseau polémiste
This course will explore Rousseau's work not as a closed system, but as a polemical reaction to major trends of the French Enlightenment. Although he was denying any taste for polemics, Rousseau fought intellectual battles most of his life. The author of the ultimate best-seller of the 18th century, he harshly criticized novels. He also opposed theatre, established a new form of pedagogy, and undermined the foundations of the Western political theory by stating that men are not political animals. We will thus consider Rousseau not only as a philosopher, but also as one of the most brilliant polemists of his time.
Units: 1.0
(Not Offered 2017-2018)

GERM B212 Marx, Nietzsche, Freud, and the Rhetoric of Modernity
This course examines selected writings by Marx, Nietzsche, and Freud as pre-texts for a critique of cultural reason and underlines their contribution to questions of language, representation, history, ethics, and art. These three visionaries of modernity have translated the abstract metaphysics of "the history of the subject" into a concrete analysis of human experience. Their work has been a major influence on the Frankfurt School of critical theory and has also led to a revolutionary shift in the understanding and writing of history and literature now associated with the work of modern French philosophers Jacques Derrida, Michel Foucault, Julia Kristeva, and Jacques Lacan. Our readings will, therefore, also include short selections from these philosophers in order to analyze the contested history of modernity and its intellectual and moral consequences. Special attention will be paid to the relation between rhetoric and philosophy and the narrative forms of "the philosophical discourse(s) of modernity" (e.g., sermon and myth in Marx; aphorism and oratory in Nietzsche, myth, fairy tale, case his/story in Freud). Course is taught in English. One additional hour will be added for those students wanting German credit. Cross-listed with Philosophy 204.
Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Major Writing Requirement: Writing Attentive
Units: 1.0
(Not Offered 2017-2018)

ITAL B213 Theory in Practice: Critical Discourses in the Humanities
An examination in English of leading theories of interpretation from Classical Tradition to Modern and Post-Modern Time. This is a topics course. Course content varies.
POLS B228 Introduction to Political Philosophy: Ancient and Early Modern

An introduction to the fundamental problems of political philosophy, especially the relationship between political life and the human good or goods. Readings from Herodotus, Thucydides, Plato, Aristotle, Polybius, Cicero, Epictetus, Machiavelli, and others.

Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Schlosser, J.
(Spring 2018)

POLS B231 Introduction to Political Philosophy: Modern

A continuation of POLS 228, although 228 is not a prerequisite. Particular attention is given to the various ways in which the concept of freedom is used in explaining political life. Readings from Hobbes, Locke, Adam Smith, Marx, Emma Goldman, Frantz Fanon, and others.

Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

POLS B245 Philosophy of Law

Introduces students to a variety of questions in the philosophy of law. Readings will be concerned with the nature of law, the character of law as a system, the ethical character of law, and the relationship of law to politics, power, authority, and society.

Readings will include philosophical arguments about law, as well as judicial cases through which we examine these ideas within specific contexts, especially tort and contracts. Most or all of the specific issues discussed will be taken from Anglo-American law, although the general issues considered are not limited to those legal systems.

Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Elkins, J.
(Fall 2017)

POLS B290 Power and Resistance

What more is there to politics than power? What is the force of the “political” for specifying power as a practice or institutional form? What distinguishes power from authority, violence, coercion, and domination? How is power embedded in and generated by cultural practices, institutional arrangements, and processes of normalization? This course seeks to address questions of power and politics in the context of domination, oppression, and the arts of resistance. Our general topics will include authority, the moralization of politics, the dimensions of power, the politics of violence (and the violence of politics), language, sovereignty, emancipation, revolution, domination, normalization, governmentality, genealogy, and democratic power. Writing projects will seek to integrate analytical and reflective analyses as we pursue these questions in common.

Writing Intensive.

Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Intensive
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Schlosser, J.
(Spring 2018)

POLS B320 Topics in Greek Political Philosophy

This is a topics course, course content varies. Past topics include: Aristotle’s Nicomachean Ethics and Politics and Thucydides, Plato, Aristotle. Prerequisites: At least two semesters of philosophy or political theory, including some work with Greek texts, or consent of the instructor.

Units: 1.0
Instructor(s): Salkever, S.
(Spring 2018)

POLS B327 Political Philosophy in the 20th Century

A study of 20th- and 21st-century extensions of three traditions in Western political philosophy: the adherents of the German and English ideas of freedom and the founders of classical nationalism. Authors read include Hannah Arendt, Michel Foucault, Jurgen Habermas, and John Rawls. Topics include the relationship of individual rationality and political authority, the “crisis of modernity,” and the debate concerning contemporary democratic citizenship. Prerequisites: POLS 228 and 231, or PHIL 101 and 201.

Major Writing Requirement: Writing Attentive
Units: 1.0
(Not Offered 2017-2018)

POLS B350 Politics and Equality

What is the relationship between democracy and equality? Is equality a presupposition or precondition for democracy? Is the problem of equality separable from equality? Are there any respects in which democracy presupposes or relies on...
inequality? For all of these, an important sub-question to that of the relationship of democracy and equality will be: equality of what? We will examine these various questions at both an abstract level (reading essays of political theory, moral philosophy and such) and in the context of particular problems of politics, law, and/or policy. While the instructor will be largely responsible for assigning readings of the first sort, students will share the responsibility for finding readings of the second. They will do this as part of their own semester-long research projects. This course is open to all students who have the prerequisites. It also serves as a thesis prep course for political science senior majors. Suggested Preparation: At least one course in political theory OR Political Science Senior OR consent of instructor.

Major Writing Requirement: Writing Attentive
Units: 1.0
(Not Offered 2017-2018)

POLS B371 Topics in Political Philosophy
An advanced seminar on a topic in political or legal philosophy/theory. Topics vary by year. This course fulfills the 300-level thesis prep course to be taken in the fall semester of the senior year by political science majors. It is also open to non-seniors and other majors. Prerequisite: At least one course in political theory or philosophy or consent of instructor. Current topic description: Topics in Pol Theory on “Justice” with thesis component
Units: 1.0
Instructor(s): Schlosser, J.
(Fall 2017)

POLS B381 Nietzsche
This course examines Nietzsche’s thought, with particular focus on such questions as the nature of the self, truth, irony, aggression, play, joy, love, and morality. The texts for the course are drawn mostly from Nietzsche’s own writing, but these are complemented by some contemporary work in moral philosophy and philosophy of mind that has a Nietzschean influence. Prerequisite: One course in Political Theory or Philosophy or prior consent of instructor.
Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Elkins, J.
(Fall 2017)

PHYSICS

Students may complete a major or minor in Physics. Within the major, students may complete a minor in educational studies or complete the requirements for secondary education certification. Students may complete an M.A. in the combined A.B./M.A. program.

Faculty
Newshaw Bahreyni, Visiting Assistant Professor
Xuemei Cheng, Chair and Associate Professor of Physics
Kathryne J. Daniel, Assistant Professor of Physics
Mark Matlin, Senior Lecturer and Lab Coordinator of Physics
Michael Noel, Marion Reilly Professor of Physics
David Schaffner, Assistant Professor of Physics

Michael Schulz, Associate Professor of Physics (on leave semesters I & II)

The courses in Physics emphasize the concepts and techniques that have led to our present way of modeling the physical world. They are designed both to relate the individual parts of physics to the whole and to treat the various subjects in depth. Opportunities exist for interdisciplinary work and for participation by qualified majors in research with members of the faculty and their graduate students. In addition, qualified seniors may take graduate courses.

Required Introductory Courses for the Major and Minor
The introductory courses required for the physics major and minor are PHYS 121 and PHYS 122 (or PHYS 101 and 102) and MATH 101 and MATH 102. Students are encouraged to place out of MATH 101 and 102 if that is appropriate. Although College credit is given for a score of 4 or 5 on the AP tests and for a score of 5 or above on the IB examination, the AP and IB courses are not equivalent to PHYS 121 and PHYS 122 and advanced placement will not, in general, be given. However, students with a particularly strong background in physics are encouraged to take the departmental placement examination during the summer before entering Bryn Mawr or just prior to, or during, the first week of classes. Then, the department can place students in the appropriate course. Students are not given credit for courses they place out of as a result of taking this placement exam. It is best for a student considering a physics major to complete the introductory requirements in the first year. However, the major sequence is designed so that a student who completes the introductory sequence by the end of the sophomore year can major in physics.

Major Requirements
The physics major provides depth in the discipline through a series of required courses, as well as the flexibility to choose from a range of electives in physics and related fields. This allows students to follow various paths through the major and thus tailor their program of study to best meet their career goals and scientific interests.

Beyond the two introductory physics courses and the two introductory mathematics courses, ten additional courses are required for the major. (Haverford courses may be substituted for Bryn Mawr courses where appropriate.) Five of the ten courses must be PHYS 201, 214, 306, and MATH 201, 203. In addition, either PHYS 331 or 305 is required as well as the half-credit Senior Seminar, PHYS 398 offered each fall. PHYS 331 and PHYS 305 are Writing Intensive courses and by completing at least one of them, students can meet the Writing Requirement in the major. The remaining three courses must be chosen from among the other 300-level physics courses, one of which may be substituted with one course from among ASTR 342, 343, and 344, or a 300-level math course, with the approval of the major’s advisor. Other substitutions from related disciplines such as chemistry, geology, and engineering) may be possible. Please consult with the major’s advisor to discuss such options.

Four-Year Plan meeting the minimum requirements for the major:

1st Year
PHYS 121, 122
MATH 101, 102
Minor in Educational Studies or Secondary-School Teacher Certification

Students majoring in physics can pursue a minor in educational studies or state certification to teach at the secondary-school level. Students seeking the minor need to complete six education courses including a two-semester senior seminar, which requires five to eight hours per week of fieldwork. To earn secondary-school certification (grades 7-12) in physics, students must: complete the physics major plus two semesters of chemistry and one semester as a teaching assistant in a laboratory for introductory or intermediate physics courses; complete six education courses; and student teach full-time (for two course credits) second semester of their senior year. For additional information, see the "Education" section of the catalog.

Pre-Health Professions

A major in physics can be excellent preparation for a career in the health professions. A recent (2010) study by the American Institute of Physics finds that “…as a group, physics bachelor’s degree recipients achieve among the highest scores of any college major on the entrance exams for medical school…” In addition to one year of physics, most medical and dental schools require one year of English, one year of biology, one year of general chemistry, and one year of organic chemistry. Students wishing to pursue this path should consult the physics major’s advisor early in their studies as well as the Health Professions Advising Office to develop an appropriate major plan. For additional information, see the “Education” section of the catalog.

Engineering Options

Although Bryn Mawr does not offer engineering courses, several options are available to students with an interest in this field.

A Physics Major With an Engineering Focus

A path through the physics major can be developed that provides a solid preparation for further studies at the masters or doctoral level in engineering. This path can include coursework in engineering taken at Swarthmore College or the University of Pennsylvania.

3-2 Program in Engineering and Applied Science with Caltech

Students can pursue engineering through the 3-2 Program in Engineering and Applied Science, offered in cooperation with the California Institute of Technology, earning both an A.B. at Bryn Mawr and a B.S. at Caltech in five years. For additional information see the "Academic Opportunities" section of the catalog.

4+1 Program in Engineering with UPenn

Students can pursue engineering through the 4+1 Program in Engineering and Applied Science offered in cooperation with the University of Pennsylvania, earning an A.B. at Bryn Mawr and an M.A. at U. Penn in five years.

A.B./M.A. Program

To earn an M.A. degree in physics in the College’s A.B./M.A. program, a student must complete the requirements for an undergraduate physics major and also must complete six units
of graduate level work in physics. Of these six units, as many as two units may be undergraduate courses at the 300 level taken for graduate credit (these same two courses may be used to fulfill the major requirements for the A.B. degree), at least two units must be graduate seminars at the 500 level, and two units must be graduate research at the 700 level leading to the submission and oral defense of an acceptable M.A. thesis.

Courses at Haverford College

Many upper-level physics courses are taught at Haverford and Bryn Mawr in alternate years as indicated in the listings of the specific courses below. These courses (numbered 302, 303, 308, 309, and 322) may be taken at either institution to satisfy major requirements. Haverford 335 and Bryn Mawr 325 are both topics in advanced theoretical physics and they also tend to alternate. In addition, 100- and 200-level courses at Haverford can be used to replace 100- and 200-level courses at Bryn Mawr but these courses are not identical and careful planning is required.

Introductory Physics Sequences

Students on a pre-health professions track wanting to take one year of physics should take PHYS 101 and PHYS 102. Some students on a physical sciences major track could take PHYS 121 and PHYS 122 and others might take PHYS 122 and PHYS 201. See your major adviser and carefully note the math pre- and co-requisites for these courses. PHYS 121/122/201/214 is a coordinated, four-semester sequence in physics. Students are encouraged to place out of MATH 101 and 102 if that is appropriate.

COURSES

PHYS B101 Introductory Physics I

PHYS 101/102 is an introductory sequence intended primarily for students on the pre-health professions track. Emphasis is on developing an understanding of how we study the universe, the ideas that have arisen from that study, and on problem solving. Topics are taken from among Newtonian kinematics and dynamics, relativity, gravitation, fluid mechanics, waves and sound, electricity and magnetism, electrical circuits, light and optics, quantum mechanics, and atomic and nuclear physics. An effective and usable understanding of algebra and trigonometry is assumed. First year students who will take or place out of MATH 101 should take PHYS 121. Lecture three hours, laboratory two hours.

Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR); Scientific Investigation (SI)
Units: 1.0
Instructor(s): Matlin,M., Daniel,K., Schaffner,D.
(Spring 2018)

PHYS B102 Introductory Physics II

PHYS 101/102 is an introductory sequence intended primarily for students on the pre-health professions track. Emphasis is on developing an understanding of how we study the universe, the ideas that have arisen from that study, and on problem solving. Topics are taken from among Newtonian kinematics and dynamics, relativity, gravitation, fluid mechanics, waves and sound, electricity and magnetism, electrical circuits, light and optics, quantum mechanics, and atomic and nuclear physics. An effective and usable understanding of algebra and trigonometry is assumed. Lecture three hours, laboratory two hours.

Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR); Scientific Investigation (SI)
Units: 1.0
Instructor(s): Matlin,M., Noel,M., Cheng,X., Bahreyni,N.
(Fall 2017)

PHYS B121 Modern Physics

PHYS B121 Modern Physics

This course presents current conceptual understandings and mathematical formulations of fundamental ideas used in physics. Students will develop physical intuition and problem-solving skills by exploring key concepts in physics such as conservation laws, symmetries and relativistic space-time, as well as topics in modern physics taken from the following: fundamental forces, nuclear physics, particle physics, and cosmology. This course can serve as a stand-alone survey of physics or as the first of a four-semester sequence designed for those majoring in the physical sciences. The laboratory involves quantum mechanics, solid state physics, and optics experiments. Lecture three hours, laboratory three hours. Co-requisite: MATH B101.

Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR); Scientific Investigation (SI)
Units: 1.0
Instructor(s): Daniel,K., Cheng,X., Bahreyni,N.
(Fall 2017)

PHYS B122 Classical Mechanics

PHYS B122 Classical Mechanics

The lecture material covers Newtonian Mechanics of single particles, systems of particles, rigid bodies, and continuous media with applications, one-dimensional systems including forced oscillators, scattering and orbit problems. Lecture three hours, laboratory two hours. Prerequisites: PHYS 121 and MATH 101. Corequisite: MATH 102.

Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR); Scientific Investigation (SI)
Units: 1.0
Instructor(s): Matlin,M.
(Spring 2018)

PHYS B201 Electromagnetism

PHYS B201 Electromagnetism

The lecture material covers electro- and magneto-statics, electric and magnetic fields, induction, Maxwell’s equations, and electromagnetic radiation. Scalar and vector fields and vector calculus are developed as needed. The laboratory involves passive and active circuits and projects in analog and digital electronics. Lecture three hours, laboratory three hours. Prerequisite: PHYS 102 or 122. Corequisite: MATH 201.

Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR); Scientific Investigation (SI)
Units: 1.0
Instructor(s): Schaffner,D.
(Fall 2017)

PHYS B214 Introduction to Quantum Mechanics

PHYS B214 Introduction to Quantum Mechanics

An introduction to the principles governing systems at the atomic scale and below. Topics include the experimental basis of quantum mechanics, wave-particle duality, Schrödinger’s equation and its solutions, and the time dependence of quantum states. Recent developments, such as paradoxes calling attention to the counter-intuitive aspects of quantum physics, will be discussed. Additional topics may be included at the discretion of the instructor. The laboratory provides an introduction to a variety of computational tools and programming techniques. Lecture three hours, laboratory three hours. Prerequisite:
Instructor(s): Matlin, M., Daniel, K.
Units: 1.0
Instructor(s): Bahreyni, N.
(Spring 2018)

**PHYS B302 Advanced Quantum Mechanics and Applications**

This course presents nonrelativistic quantum mechanics, including Schrodinger’s equation, the eigenvalue problem, the measurement process, the harmonic oscillator, angular momentum, spin, the periodic table, perturbation theory, and the relationship between quantum and Newtonian mechanics. Lecture three hours and additional recitation sessions as needed. Prerequisites: PHYS B214 and PHYS B306 or PHYS H213.

Units: 1.0
Instructor(s): Bahreyni, N.
(Spring 2018)

**PHYS B303 Statistical Mechanics and Thermodynamics**

This course presents the statistical description of the macroscopic states of classical and quantum systems, including conditions for equilibrium, the microcanonical, canonical, and grand canonical ensembles, and Bose-Einstein, Fermi-Dirac, and Maxwell Boltzmann statistics. The statistical basis of classical thermodynamics is investigated. Examples and applications are drawn from among solid state physics, low temperature physics, atomic and molecular physics, electromagnetic waves, and cosmology. Lecture three hours and additional recitation sessions as needed. Prerequisite: PHYS B214 or H214. Co-requisite: PHYS B306 or H213.

Units: 1.0
(Not Offered 2017-2018)

**PHYS B305 Advanced Electronics Lab**

This laboratory course is a survey of electronic principles and circuits useful to experimental physicists and engineers. Topics include the design and analysis of circuits using transistors, operational amplifiers, feedback and analog-to-digital conversion. Also covered is the use of electronics for automated control and measurement in experiments, and the interfacing of computers and other data acquisition instruments to experiments. Lecture three hours and additional recitation sessions as needed. Prerequisite: PHYS B201.

Major Writing Requirement: Writing Intensive
Units: 1.0
Instructor(s): Noel, M.
(Spring 2018)

**PHYS B306 Mathematical Methods in the Physical Sciences**

This course presents topics in applied mathematics useful to students, including physicists, engineers, physical chemists, geologists, and computer scientists studying the natural sciences. Topics are taken from Fourier series, integral transforms, advanced ordinary and partial differential equations, special functions, boundary-value problems, functions of complex variables, and numerical methods. Lecture three hours and additional recitation sessions as needed. Prerequisite: MATH 201 and 203.

Units: 1.0
Instructor(s): Schaffner, D.
(Fall 2017)

**PHYS B308 Advanced Classical Mechanics**

This course presents kinematics and dynamics of particles and macroscopic systems using Newtonian, Lagrangian, and Hamiltonian mechanics. Topics include oscillations, normal mode analysis, inverse square laws, nonlinear dynamics, rotating rigid bodies, and motion in noninertial reference frames. Lecture three hours and additional recitation sessions as needed. Prerequisite: PHYS B201 or PHYS B214 or PHYS H214. Co-requisite: PHYS B306 or H213.

Units: 1.0
Instructor(s): Cheng, X., Bahreyni, N.
(Fall 2017)

**PHYS B309 Advanced Electromagnetic Theory**

This course presents electrostatics and magnetostatics, dielectrics, magnetic materials, electrodynamics, Maxwell’s equations, electromagnetic waves, and special relativity. Some examples and applications may come from superconductivity, plasma physics, and radiation theory. Lecture three hours and additional recitation sessions as needed. Prerequisites: PHYS B201 and B306 OR H213 and H214.

Units: 1.0
(Not Offered 2017-2018)

**PHYS B322 Solid State Physics**

This course presents the physics of solids and nanomaterials. Topics include crystal structure and diffraction, the reciprocal lattice and Brillouin zones, crystal binding, lattice vibrations and normal modes, phonon dispersion, Einstein and Debye models for the specific heat, the free electron model, the Fermi surface, electrons in periodic structures, the Bloch theorem and band structure. Additional topics are taken from nanoscale structures (0-D nanodots, 1-D nanowires, and 2-D thin films), nanomagnetism, spintronics, superconductivity, and experimental methods for fabrication and characterization of nanomaterials. Lecture three hours and additional recitation sessions as needed. Prerequisites: PHYS B201 and PHYS B214 and B306 OR PHYS H213 and H214.

Units: 1.0
Instructor(s): Cheng, X.
(Spring 2018)

**PHYS B324 Optics**

This course covers principles of geometrical and physical optics. Topics include electromagnetic waves and their propagation in both isotropic and anisotropic media; interference, diffraction, and Fourier optics; coherence theory; ray optics and image formation; and, as time permits, an introduction to the quantum nature of light. Prerequisites: PHYS B201 (or H106); Co-Requisites: PHYS B306 (or H213)

Units: 1.0
(Not Offered 2017-2018)

**PHYS B325 Advanced Theoretical Physics**

This course presents one or more of several subjects, depending on instructor availability and student interest. The possible subjects are (1) special relativity, general relativity, and gravitation, (2) the standard model of particle physics, (3) particle astrophysics and cosmology, (4) relativistic quantum mechanics, (5) grand unified theories, (6) string theory, loop quantum
PHYS B331 Advanced Experimental Physics
This laboratory course consists of set-piece experiments as well as directed experimental projects to study a variety of phenomena in atomic, molecular, optical, nuclear, and solid state physics. The experiments and projects serve as an introduction to contemporary instrumentation and the experimental techniques used in physics research laboratories in industry and in universities. Students write papers in a format appropriate for research publications and make a presentation to the class. Laboratory eight hours a week. Corequisite: PHYS 214.
Major Writing Requirement: Writing Intensive
Units: 1.0
(Not Offered 2017-2018)

PHYS B350 Computational Methods in the Physical Sciences
This course provides an introduction to a variety of computational tools and programming techniques that physical science graduates might encounter in graduate work or employment in STEM-related fields. Tools explored will include both command-line and GUI programming environments, both scripting and scientific programming languages, basic programming concepts such as loops and function calls, and key scientific programming applications such as integration, finding of roots and minima/maxima, least-square fitting, solution of differential equations, boundary-value problems, finite-element analysis, Monte Carlo techniques, and possibly neural networks. Where possible, examples will be taken from multiple scientific disciplines, in addition to physics. This course is intended for second semester sophomores, juniors and seniors. Co-requisite: MATH B203 and three units of science (Biology, Physics, Chemistry or Geology).
Units: 1.0
(Not Offered 2017-2018)

PHYS B380 Physics Pedagogy
Students work with a faculty member as assistant teachers in a college course in physics, or as assistants to a faculty member developing new teaching materials. Students will be involved in some combination of the following: directed study of the literature on teaching and learning pedagogy, construction and design of parts of a course, and actual teaching in a lecture course or laboratory. Corequisite: PHYS 201 or 214.
Units: 1.0
(Fall 2017)

PHYS B390 Independent Study
At the discretion of the department, juniors or seniors may supplement their work in physics with the study of topics not covered in regular course offerings.
Units: 1.0
(Fall 2017)

PHYS B398 Senior Seminar
Required for senior Physics majors. Students meet weekly with faculty to discuss recent research findings in physics as well as career paths open to students with a major in Physics. Students are required to attend all colloquia and student research presentations hosted by the Bryn Mawr College Physics department. Prerequisite: Senior Standing.
Units: 0.5
Instructor(s): Cheng, X.
(Fall 2017)

PHYS B503 Electromagnetic Theory I
This course is the first semester of a year-long standard sequence on electromagnetism. This semester begins with topics in electrostatics, including Coulomb's and Gauss's Laws, Green functions, the method of images, expansions in orthogonal functions, boundary-value problems, and dielectric materials. The focus then shifts to magnetic phenomena, including the magnetic fields of localized currents, boundary-value problems in magnetostatics, and the interactions of fields and magnetic materials. The last portion of the course treats Maxwell's equations, transformation properties of electromagnetic fields, electromagnetic waves and their propagation and, time permitting, the basics of waveguides. This course is taught in a seminar format, in which students are responsible for presenting much of the course material in class meetings.
Units: 1.0
(Not Offered 2017-2018)

PHYS B504 Electromagnetic Theory II
This course is the second semester of a two semester graduate level sequence on electromagnetic theory. Topics include electromagnetic radiation, multiple fields, scattering and diffraction theory, special relativity, Lagrangian and Hamiltonian descriptions, radiation from point particle motion, Lienard-Wiechert potentials, classical electron theory and radiation reaction. Additional topics may be included at the discretion of the instructor. This course is taught in a seminar format, in which students are responsible for presenting much of the course material in class meetings. Prerequisite: PHYS 503
Units: 1.0
(Not Offered 2017-2018)

PHYS B505 Classical Mechanics I
This course will cover mechanics topics familiar from the undergraduate curriculum, but from deeper theoretical and mathematical perspectives. Topics will include Lagrange & Hamilton methods, the central force problem, rigid body motion, oscillations, and canonical transformations. Time permitting, other topics that might be explored include chaos theory, special relativity, and the application of Lagrangian and Hamiltonian methods to continuous systems. This course is taught in a seminar format, in which students are responsible for presenting much of the course material in class meetings.
Units: 1.0
(Not Offered 2017-2018)

PHYS B507 Statistical Mechanics I
Review of Thermodynamics; Equilibrium statistical mechanics -- microcanonical and canonical ensembles; Ideal gases, photons, electrons in metals; Phase transitions; Monte Carlo techniques; Classical fluids, Non-equilibrium statistical mechanics.
MATH B203 Linear Algebra
Systems of linear equations, matrix algebra, determinants, vector spaces and subspaces, linear independence, bases and dimension, linear transformations and their representation by matrices, eigenvectors and eigenvalues, orthogonality, and applications of linear algebra. Prerequisite or corequisite: MATH 102, or permission of the instructor.
Approach: Quantitative Methods (QM)
Units: 1.0
Instructor(s): Donnay,V.
(Spring 2018)

MATH B251 Chaotic Dynamical Systems
Topics to be covered may include iteration, orbits, graphical and computer analysis, bifurcations, symbolic dynamics, fractals, complex dynamics and applications. Prerequisite: MATH B102
Units: 1.0
(Not Offered 2017-2018)

PHYS B106 The Interplay of Physics and Music
The course is intended for non-science majors and will explore the deep connection between physics and music. Basic principles of physics and scientific reasoning will be taught in the context of the production and perception of music, emphasizing the historic and scientific interplay between physics and music. No previous knowledge of physics or music is assumed. Through learning the physical concepts used to describe music, students will be able to extend their understanding to additional examples of physical phenomena. Lecture three hours, laboratory two hours, per week. Also see PHYS156 for the lecture only course.
Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR); Scientific Investigation (SI)
Units: 1.0
(Not Offered 2017-2018)

MATH B101 Calculus I
A first course in one-variable calculus: functions, limits, continuity, the derivative, differentiation formulæ, applications of the derivative, the integral, integration by substitution, fundamental theorem of calculus. May include a computer component. Prerequisite: adequate score on calculus placement exam, or permission of the instructor. Students should have a reasonable command of high school algebra, geometry and trigonometry.
Approach: Quantitative Methods (QM); Quantitative Readiness Required (QR)
Units: 1.0
Instructor(s): Myers,A.
(Fall 2017)

MATH B102 Calculus II
A continuation of Calculus I: transcendental functions, techniques of integration, applications of integration, infinite sequences and series, convergence tests, power series. May include a computer component. Math 102 assumes familiarity of the content covered in Math 101 or its equivalent.
Approach: Quantitative Methods (QM)
Units: 1.0
Instructor(s): Kasius,P.
(Fall 2017, Spring 2018)

MATH B201 Multivariable Calculus
Vectors and geometry in two and three dimensions, partial derivatives, extremal problems, double and triple integrals, vector analysis (gradients, curl and divergence), line and surface integrals, the theorems of Gauss, Green and Stokes. May include a computer component. Prerequisite: MATH 102 or permission of instructor.
Approach: Quantitative Methods (QM)
Units: 1.0
Instructor(s): Kasius,P., Donnay,V.
(Fall 2017)
Student may complete a major or minor in Political Science. Within the major, students may complete a minor in Environmental Studies.

Faculty

Michael Allen, Chair and Professor of Political Science on the Harvey Wexler Chair in Political Science
Jeremy Elkins, Associate Professor of Political Science
Sofia Fenner, Assistant Professor of Political Science
Marissa Golden, Associate Professor of Political Science on the Joan Coward Chair in Political Economics
Carol Hager, Professor of Political Science on the Clowes Professorship in Science and Public Policy
Seung-Youn Oh, Assistant Professor of Philosophy and Director of the Center for Social Sciences
Stephen G. Salkever, Mary Katharine Woodworth Professor Emeritus in Political Science
Joel Schlosser, Assistant Professor of Political Science

Political Science is the study of justice and authority, peace and conflict, public policies and elections, government and law, democracy and autocracy, freedom and oppression. More than any other social science, Political Science uses a wide variety of approaches to explain political phenomena and to evaluate the actions of polities and leaders. The Political Science major develops reading, writing, and thinking skills necessary for a critical understanding of the political world. The major prepares students to go on to public policy or law schools as well as to graduate work in Political Science. Majors in the department have pursued careers worldwide in public service, journalism, advocacy, law, and education, to name a few.

Major Requirements

Students who wish to declare Political Science as a major should choose an advisor, who can be any member of the Political Science faculty. It is generally best to choose an advisor whose courses fall into at least one substantive area in which the student intends to focus. Students should write a brief essay on the kinds of questions or problems that they would like to pursue in the study of politics. The essay should be submitted and discussed with the advisor. Based on this discussion, the student and advisor will formulate a course plan for the major.

All Haverford Political Science courses count toward the Bryn Mawr major (the same is generally true for courses at Swarthmore and Penn). Majors in the Bryn Mawr department must take at least three of their major courses here, in addition to the senior sequence.

The study of politics covers a wide ground, and the Political Science major is designed to give students an opportunity to focus their study while also attending to questions, issues, and problems that run through the study of politics more generally, and that connect the study of politics to other disciplines. We have organized the major along the lines of four general themes or fields of concentration. They are:

- Identity and Difference
- Policy Formation and Political Action
- Interdependence and Conflict
- Political Theory

The Political Science major consists of a minimum of 10 courses:

- Two introductory-level courses, which prospective majors should complete by the end of their sophomore year, from this list: 101, 121, 123 (at HC), 131, 141, 143 (at HC), 151 (at HC), 228, and 231. These courses may be taken in any order.
- Two concentrations, at least one of which should be from among the four general themes. The second concentration is normally also chosen from those themes, but it can be based on a more substantive focus (e.g. gender, environmental politics, or the politics of a particular region), to be determined in consultation with the student’s advisor. Each concentration consists of three courses, at least one of which must be at the 300 level and all of which must be either at the 200 or 300 level.
- A 300-level thesis prep course, to be taken in the fall semester of the senior year. Thesis prep courses are marked as such in the course guide. They are also open to non-seniors and to other majors, but they contain material designed specifically to help students formulate a thesis question and begin the research process.
- Senior Essay (399), to be taken in the spring semester of the senior year.
- At least three courses, in addition to senior sequence, must be taken in the Bryn Mawr Political Science Department.

Major Credit for Courses Outside the Political Science Department

Up to three courses from departments other than Political Science may be accepted for major credit, if in the judgment of the department these courses are an integral part of a student’s major plan. Decisions as to which outside courses count for Political Science major credit are made by the faculty on a case by case basis. When in doubt, students should consult their major advisor or the department chair. Ordinarily, 100-level courses taken in other departments may not be counted for major credit in Political Science.

We encourage students to spend a semester abroad during their junior year. We generally count one course taken abroad for credit toward the major. Courses taken abroad count at the 200 level only.

Writing Intensive and Writing Attentive Courses

Students are required to take at least one writing intensive course or two writing attentive courses in their major. Political Science generally offers one writing intensive course annually. In addition, a number of 300-level courses that count as writing attentive will be offered annually.

Departmental Honors

Students who have done distinguished work in their courses in the major and who write outstanding senior essays will be considered for departmental honors.
Minor Requirements

A minor in Political Science consists of six courses distributed across a minimum of two fields. At least four of these courses must be at the 200 level or higher, and at least two of them must be at the 300 level. At least three of the courses must be taken from the Bryn Mawr Department of Political Science course offerings.

The four fields are:

- Identity and Difference
- Policy Formation and Political Action
- Interdependence and Conflict
- Political Theory

Course Designations

Almost every course offered in the Political Science Departments at Bryn Mawr and Haverford will count for at least one of the four fields of concentration, and some may count for more than one (no single course, however, may be counted as part of more than one field of concentration). Many courses offered at Swarthmore and Penn will also count toward these. Students should consult their advisor for information on classifying any courses that do not appear on this list.

Identity and Difference

123 American Politics: Difference and Discrimination (H)
131 Introduction to Comparative Politics
206 Conflict and Conflict Management
220 Constitutional Law
226 Social Movement Theory (H)
228 Introduction to Political Philosophy: Ancient and Early Modern
229 Latino Politics in the U.S. (H)
231 Introduction to Political Philosophy: Modern
235 African Politics (H)
243 African and Caribbean Perspectives in World Politics
245 Philosophy of Law
248 Modern Middle East Cities
253 Feminist Theory
282 The Exotic Other
285 Religion and the Limits of Liberalism (H)
286 Religion and American Public Life (H)
287 Media and Politics: The Middle East Transformed
316 Ethnic Group Politics—Identity and Conflict
320 Democracy in America (H)
336 Democracy and Democratization (H)
340 Postcolonialism and the Politics of Nation-building (H)
345 Islam, Democracy and Development (H)
348 Culture and Ethnic Conflict identity and conflict
354 Comparative Social Movements
358 Political Psychology and Ethnic Conflict
370 Becoming a People: Power, Justice, and the Political (H)
375 Perspectives on Work, and Family in the U.S.
379 Feminist Political Theory (H)
383 Islamic Reform and Radicalism

Policy Formation and Political Action

121 American Politics
H121 American Politics and Its Dynamics (H)
131 Introduction to Comparative Politics
H123 American Politics: Difference and Discrimination (H)
H131 Comparative Government and Politics (H)
131 Introduction to Comparative Politics
205 European Politics
222 Introduction to Environmental Issues: Policy Making in Comparative Perspective
H223 American Political Process: The Congress (H)
H224 The American Presidency (H)
H225 Mobilization Politics (H)
H226 Social Movement Theory (H)
H227 Urban Politics (H)
H228 Urban Policy (H)
H230 Topics in Comparative Politics (H)
H235 African Politics (H)
H237 Latin American Politics (H)
242 Women in War and Peace (H)
248 Modern Middle East Cities
H249 The Soviet System and Its Demise (H)
254 Bureaucracy and Democracy
H257 The State System (H)
259 Comparative Social Movements in Latin American
265 Politics, Markets and Theories of Capitalism (H)
274 Education Politics and Policy
278 Oil, Politics, Society, and Economy
279 State Transformation/Conflict
288 The Political Economy of the Middle East and North Africa
287 Media and Politics: The Middle East Transformed
308 Political Transformation in Eastern and Western Europe: Germany and Its Neighbors
310 Comparative Public Policy
314 Strategic Advocacy: Lobbying and Interest Group Politics in Washington, D.C. (H)
315 Public Policy Analysis (H)
320 Democracy in America (H)
321 Technology and Politics
325 Grassroots Politics in Philadelphia (H)
333 Transformations in American Politics: late 20th-early 21st century
334 Politics of Violence (H)
339 The Policymaking Process
345 Islam, Democracy and Development (H)
354 Comparative Social Movements: Power, Protest, and Mobilization
375 Perspectives on Work and Family in the U.S.
378 Origins of American Constitutionalism
385 Democracy and Development
393 US Welfare Politics: Theory and Practice

Interdependence and Conflict

151 International Politics (H)
205 European Politics
206 Conflict and Conflict Management
211 Politics of Humanitarianism
233 Perspectives on Civil War and Revolution: Southern Europe and Central America (H)
235 Transitional Justice in Post-Conflict Societies
239 The United States and Latin America (H)
240 Inter-American Dialogue (H)
242 Women in War and Peace (H)
247 Political Economy of Developing Countries (H)
248 Modern Middle East Cities
250 International Politics
252 International Politics of the Middle East (H)
253 Introduction to Terrorism Studies (H)
256 The Evolution of the Jihad Movement (H)
258 The Politics of International Institutions (H)
259 American Foreign Policy (H)
261 Global Civil Society (H)
262 Human Rights and Global Politics (H)
264 Politics of Commodities
265 Politics, Markets and Theories of Capitalism (H)
278 Oil, Politics, Society, and Economy
279 State Transformation/Conflict
283 Modern Middle East/North Africa
288 The Political Economy of the Middle East and North Africa
287 Media and Politics: The Middle East Transformed
308 Political Transformation in Eastern and Western Europe: Germany and Its Neighbors
316 Ethnic Group Politics—Identity and conflict
339 Transitional Justice (H)
347 Advanced Issues in Peace and Conflict
340 Postcolonialism and the Politics of Nation-building (H)
348 Culture and Ethnic Conflict identity and conflict
350 Topics in International Politics (H)
357 International Relations Theory: Conflict and the Middle East (H)
358 The War on Terrorism (H)
358 Psychological Politics and Ethnic Conflict
361 Democracy and Global Governance (H)
362 Global Justice (H)
365 Solidarity Economy Movements (H)
378 Origins of American Constitutionalism
379 The United Nations and World Order
383 Islamic Reform and Radicalism
385 Democracy and Development
391 International Political Economy
392 State in Theory and History

Political Theory
171 Introduction to Political Theory: Democratic Authority (H)
228 Introduction to Political Philosophy: Ancient and Early Modern
231 Introduction to Political Philosophy: Modern
234 Legal Rights in the Administrative State
241 Politics of International Law & Institutions
245 Philosophy of Law
253 Feminist Theory
266 Sovereignty (H)
272 Democratic Theory: Membership, Citizenship and Community (H)
276 American Political Thought from Founding to Civil War (H)
277 American Political Thought: Post Civil War (H)
284 Modernity and its Discontents
300 Nietzsche, Kant, Plato: Modes of Practical Philosophy
320 Greek Political Philosophy
327 Political Philosophy: 1950-Present
336 Democracy and Democratization (H)
365 Erotica: Love and Art in Plato and Shakespeare
370 Becoming a People: Power, Justice, and the Political (H)
371 Topics in Legal and Political Philosophy
378 Origins of American Constitutionalism
379 Feminist Political Theory (H)
380 Persons, Morality and Modernity
381 Nietzsche, Self, and Morality
392 State in Theory and History

COURSES

POLS B121 Introduction to American Politics
An introduction to the major features and characteristics of the American political system. Features examined include voting and elections; the institutions of government (Congress, the Presidency, the courts and the bureaucracy); the policy-making process; and the role of groups (interest groups, women, and ethnic and racial minorities) in the political process.

POLS B131 Introduction to Comparative Politics
This course is designed to provide an introduction to the discipline of comparative politics. We will explore the primary approaches and concepts scholars employ in order to systematically analyze the political world. In doing so, we will also examine the political structures, institutions, and behaviors of a number of countries around the world. Questions we will engage include: What is power and how is it exercised? What are the differences between democratic and authoritarian regimes? How do different countries develop their economies? What factors affect the way countries behave in the international arena? By the end of this course, students will be equipped to answer these questions and prepared for further study in political science.

POLS B141 Introduction to International Politics
An introduction to international relations, exploring its main subdivisions and theoretical approaches. Phenomena and problems in world politics examined include systems of power management, imperialism, globalization, war, bargaining, and peace. Problems and institutions of international economy and international law are also addressed. This course assumes a reasonable knowledge of modern world history.

POLS B213 Political Economy of Human Rights
This course will investigate the political economic logic underlying governmental decisions on human rights protection/abuse and the consequences of such decisions. It will consider factors at both domestic and international levels that influence respect for human rights. It covers countries in both developed and developing worlds, and in both democratic and non-democratic settings. It also effectively integrates relevant philosophical and sociological perspectives into the investigation. It emphasizes equally quantitative and qualitative analyses. Upon finishing this course, students will not only acquire a deeper/new understanding of widely known human rights incidents in the past and the present, but will also furnish themselves with a valid analytical toolkit to better understand incidents of such kinds in the future.

POLS B220 Topics in Constitutional Law and Theory
Through a reading of (mostly) Supreme Court cases and other materials, this course takes up some central theoretical questions concerning the role of constitutional principles and constitutional review in mediating the relationship between public and private power.
POLS B222 Environmental Issues: Movements and Policy Making in Comparative Perspective

An exploration of the ways in which different cultural, economic, and political settings have shaped issue emergence and policy making. We examine the politics of particular environmental issues in selected countries and regions, paying special attention to the impact of environmental movements. We also assess the prospects for international cooperation in addressing global environmental problems such as climate change.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)

POLS B224 Comparative Political Phil: China, Greece, and the “West”

An introduction to the dialogic construction of comparative political philosophy, using texts from several cultures or worlds of thought: ancient and modern China, ancient Greece, and the modern West. The course will have three parts. First, a consideration of the synchronous emergence of philosophy in ancient (Axial Age) China and Greece; second, the 19th century invention of the modern “West” and Chinese responses to this development; and third, the current discussions and debates about globalization, democracy, and human rights now going on in China and the West. Prerequisite: At least one course in either Philosophy, Political Theory, or East Asian Studies, or consent of the instructor.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

POLS B227 Field Seminar in Comparative Politics

This seminar introduces the intellectual history of comparative politics, and explore the primary approaches and concepts scholars employ in order to systematically analyze the political world. In doing so, we will also examine the political structures, institutions, and behaviors of a number of countries around the world. Key questions we will discuss include: What is power and how is it exercised? What are the differences between democratic and authoritarian regimes? How do different countries develop their economies? What factors affect the way that countries behave in the international arena? By the end of this course, students will be equipped to answer these questions, and prepared for further study in political science. Freshman may not take this course and can take POLS B131. If you took POLS 131 in 2014 or 2015, you may not take this course.

Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Schlosser,J.
(Fall 2017)

POLS B228 Introduction to Political Philosophy: Ancient and Early Modern

An introduction to the fundamental problems of political philosophy, especially the relationship between political life and the human good or goods. Readings from Herodotus, Thucydides, Plato, Aristotle, Polybius, Cicero, Epictetus, Machiavelli, and others.

Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Schlosser,J.
(Spring 2018)

POLS B231 Introduction to Political Philosophy: Modern

A continuation of POLS 228, although 228 is not a prerequisite. Particular attention is given to the various ways in which the concept of freedom is used in explaining political life. Readings from Hobbes, Locke, Adam Smith, Marx, Emma Goldman, Frantz Fanon, and others.

Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

POLS B241 The Politics of International Law and Institutions

An introduction to international law, which assumes a working knowledge of modern world history and politics since World War II. The origins of modern international legal norms in philosophy and political necessity are explored, showing the schools of thought to which the understandings of these origins give rise. Significant cases are used to illustrate various principles and problems. Prerequisite: POLS B250.

Approach: Critical Interpretation (CI)
Counts towards: International Studies
Units: 1.0
(Not Offered 2017-2018)

POLS B243 African and Caribbean Perspectives in World Politics

This course makes African and Caribbean voices audible as they create or adopt visions of the world that explain their positions and challenges in world politics. Students learn analytical tools useful in understanding other parts of the world. Prerequisite: POLS 141 or 1 course in African or Latin American history.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Africana Studies
Units: 1.0
Instructor(s): Allen,M.
(Spring 2018)

POLS B245 Philosophy of Law

Introduces students to a variety of questions in the philosophy of law. Readings will be concerned with the nature of law, the character of law as a system, the ethical character of law, and the relationship of law to politics, power, authority, and society. Readings will include philosophical arguments about law, as well as judicial cases through which we examine these ideas within specific contexts, especially tort and contracts. Most or all of the specific issues discussed will be taken from Anglo-American law, although the general issues considered are not limited to those legal systems.

Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Elkins,J.
(Fall 2017)
POLS B249 Politics of Economic Development
How do we explain the variations of political and economic systems in the world? What is the relationship between the state and the market? To what extent does the timing of industrialization affect the viability of certain developmental strategies? This seminar introduces the intellectual history of comparative political economy and development studies with readings on both comparative political economy and international political economy. First, we will examine the debates on the dynamics of the state and the market in the development and globalization process. Second, we will explore specific case studies to discuss: 1) how the political and economic processes have changed in response to the interaction of the domestic and international arenas, 2) whether and how the late developers learned from the experiences of early developers, 3) how the international economy and international financial crisis shaped domestic development strategies. Lastly, we will analyze the developmental concerns at the sub-national level with financial liberalization. Prerequisite: Freshman can enroll after they have taken 100 level courses in social science and after getting instructor permission.

Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Oh,S.
(Spring 2018)

POLS B251 Democracy, Politics and the Media
A consideration of the mass media as a pervasive fact of U.S. political life and how they influence American politics. Topics include how the media have altered American political institutions and campaigns, how selective attention to particular issues and exclusion of others shape public concerns, and the conditions under which the media directly influence the content of political beliefs and the behavior of citizens. Prerequisite: one course in political science, preferably POLS 121.

Units: 1.0
(Not Offered 2017-2018)

POLS B256 Global Politics of Climate Change
This course will introduce students to important political issues raised by climate change locally, nationally, and internationally, paying particular attention to the global implications of actions at the national and subnational levels. It will focus not only on specific problems, but also on solutions; students will learn about some of the technological and policy innovations that are being developed worldwide in response to the challenges of climate change.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Hager,C.
(Fall 2017)

POLS B272 The Power of the People: Democratic Revolutions
We often invoke “democracy” as the very ground of political legitimacy, but there is very little agreement on what democracy means, why we might desire it, or how state institutions, law, and political culture might embody it. In this seminar we will grapple with some recent and influential accounts of democratic governance and democratic movements today. Our objective will be to develop a critical vocabulary for understanding what democracy might mean, what conditions it requires, and what “best practices” citizens committed to democracy might enlist to confront political challenges such as the structural divisions that persist among class, gender, and race; persistent inequality and influence of money and corporations; and the potential for democratic, grass-roots power as a vital ingredient to democratic flourishing.

Approach: Course does not meet an Approach
Major Writing Requirement: Writing Intensive
Units: 1.0
(Not Offered 2017-2018)

POLS B273 Race and the Law in the American Context
An examination of the intersection of race and law, evaluating the legal regulations of race, the history and meanings of race, and how law, history and the Supreme Court helped shape and produce those meanings. It will draw on materials from law, history, public policy, and critical race theory.

Units: 1.0
(Not Offered 2017-2018)

POLS B283 Introduction to the Politics of the Modern Middle East and North Africa
This course is a multidisciplinary approach to understanding the politics of the region, using works of history, political science, political economy, film, and fiction as well as primary sources.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Middle Eastern & Islamic Studies
Units: 1.0
Instructor(s): Fenner,S.
(Spring 2018)

POLS B290 Power and Resistance
What more is there to politics than power? What is the force of the “political” for specifying power as a practice or institutional form? What distinguishes power from authority, violence, coercion, and domination? How is power embedded in and generated by cultural practices, institutional arrangements, and processes of normalization? This course seeks to address questions of power and politics in the context of domination, oppression, and the arts of resistance. Our general topics will include authority, the moralization of politics, the dimensions of power, the politics of violence (and the violence of politics), language, sovereignty, emancipation, revolution, domination, normalization, governmentality, genealogy, and democratic power. Writing projects will seek to integrate analytical and reflective analyses as we pursue these questions in common.

Writing Intensive.

Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Intensive
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Schlosser,J.
(Spring 2018)

POLS B291 Arts of Freedom
Observing political life in the early United States, Alexis de Tocqueville wrote: “It cannot be repeated too often: nothing is more fertile in wondrous effects than the art of being free, but nothing is harder than freedom’s apprenticeship.” What is this “art of freedom” and how can we take up “freedom’s apprenticeship”? This course investigates questions of freedom in the contexts of democracy, oppression, and revolution. Together we will study not just the historical meanings of freedom but also
POLS B310 Comparative Public Policy
A comparison of policy processes and outcomes across space and time. Focusing on particular issues such as health care, domestic security, water and land use, we identify institutional, historical, and cultural factors that shape policies. We also examine the growing importance of international-level policy making and the interplay between international and domestic pressures on policy makers. Prerequisite: One course in Political Science or public policy.
Counts towards: Environmental Studies; Health Studies
Units: 1.0
(Not Offered 2017-2018)

POLS B313 Advanced Topics in Constitutional Law
This course will focus on cases that are on the Supreme Court’s docket for decision in the current term. Through readings of cases and secondary material, students will examine the background of the current controversies, and the political and social issues that they raise. As a part of the course, each student will participate in mock hearings on the cases, acting sometimes as an advocate for one party and sometimes as a judge. In preparation for this, students will conduct research under supervision. Students will also participate in gathering materials on the broader political-social implications of the controversies which will be read and discussed by the class.
Prerequisite: one course requiring the reading of legal cases (POLS B220, POLS/PHIL B245, POLS B273, POLS H215, H216) or consent of instructor.
Units: 1.0
(Not Offered 2017-2018)

POLS B320 Topics in Greek Political Philosophy
This is a topics course, course content varies. Past topics include: Aristotle’s Nicomachean Ethics and Politics and Thucydides, Plato, Aristotle. Prerequisites: At least two semesters of philosophy or political theory, including some work with Greek texts, or consent of the instructor.
Units: 1.0
Instructor(s): Salkever, S.
(Spring 2018)

POLS B321 Technology and Politics
A multi-media analysis of the complex role of technology in political and social life. We focus on the relationship between technological change and democratic governance. We begin with historical and contemporary Luddism as well as pro-technology movements around the world. Substantive issue areas include security and surveillance, electoral politics, economic development and women’s empowerment, warfare, social media, net neutrality, GMO foods and industrial agriculture, climate change and energy politics.
Major Writing Requirement: Writing Attentive
Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)

POLS B327 Political Philosophy in the 20th Century
A study of 20th- and 21st-century extensions of three traditions in Western political philosophy: the adherents of the German and English ideas of freedom and the founders of classical naturalism. Authors read include Hannah Arendt, Michel Foucault, Jurgen Habermas, and John Rawls. Topics include the relationship of individual rationality and political authority, the “crisis of modernity,” and the debate concerning contemporary democratic citizenship. Prerequisites: POLS 228 and 231, or PHIL 101 and 201.
Major Writing Requirement: Writing Attentive
Units: 1.0
(Not Offered 2017-2018)

POLS B334 Three Faces of Chinese Power: Money, Might, and Minds
China’s extraordinary growth for the past 30 years has confirmed the power of free markets, while simultaneously challenging our thoughts on the foundations and limits of the market economy. Moreover, China’s ever-increasing economic freedom and prosperity have been accompanied by only limited steps toward greater political freedom and political liberalization, running counter to one of the most consistent patterns of political economic development in recent history. This course examines China’s unique economic and political development path, and the opportunities and challenges it accompanies. This course has three aims: 1) to facilitate an in-depth understanding of the political and economic development with Chinese characteristics, 2) to conduct a comprehensive analysis of three dimensions of Chinese economic, political and cultural power, and 3) to construct a thorough understanding of challenges and opportunities for China from its extraordinary developmental path. This is a senior seminar. Prerequisite: two courses either in Political Science or East Asian Languages and Culture. Junior or Senior Standing required.
Units: 1.0
Instructor(s): Oh, S.
(Spring 2018)

POLS B339 Policy Making in a Democracy
This course examines the processes by which we make and implement public policy in the United States, and the institutions and actors involved in those processes. The aim of the course is to increase our understanding of how these institutions and actors interact and the roles that science and evidence play in the policy making process. Examples will include science and education policy. Counts as POLS 300-level pre-thesis seminar. Enrollment is limited to 18 students.
Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Golden, M.
(Fall 2017)
POLS B339 Race, Ethnicity, & Politics in the U.S.
This upper-level course examines the political experience in the United States of the four principal racial minority groups: blacks, Latinos, Asian Americans and American Indians. The importance of race and ethnicity in American politics, and the historical, legal, attitudinal, and behavioral experiences of these groups are explored in the context of a majority white nation via protest activity and conventional electoral politics. We will describe and analyze how the structures of the American political system and its present operation disadvantage and/or advantage these groups as they attempt to gain the full benefits of American society. A variety of theories are explored towards that end.
Units: 1.0
(Not Offered 2017-2018)

POLS B350 Politics and Equality
What is the relationship between democracy and equality? Is equality a presupposition or precondition for democracy? Is the problem of equality separable from equality? Are there any respects in which democracy presupposes or relies on inequality? For all of these, an important sub-question to that of the relationship of democracy and equality will be: equality of what? We will examine these various questions at both an abstract level (reading essays of political theory, moral philosophy and such) and in the context of particular problems of politics, law, and/or policy. While the instructor will be largely responsible for assigning readings of the first sort, students will share the responsibility for finding readings of the second. They will do this as part of their own semester-long research projects. This course is open to all students who have the prerequisites. It also serves as a thesis prep course for political science senior majors. Suggested Preparation: At least one course in political theory OR Political Science Senior OR consent of instructor.
Major Writing Requirement: Writing Attentive
Units: 1.0
(Not Offered 2017-2018)

POLS B354 Comparative Social Movements: Power and Mobilization
A consideration of the conceptualizations of power and "legitimate" and "illegitimate" participation, the political opportunity structure facing potential activists, the mobilizing resources available to them, and the cultural framing within which these processes occur. Specific attention is paid to recent movements within and across countries, such as feminist, environmental, and anti-globalization movements, and to emerging forms of citizen mobilization, including transnational and global networks, electronic mobilization, and collaborative policymaking institutions. Prerequisite: one course in POLS or SOCL or permission of instructor.
Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)

POLS B356 Topics in American Politics
This course helps prepare students for the senior thesis by exploring a gamut of “hot topics” in the study of American politics. Its focus is on points of contention-theoretical, empirical and methodological-between and among the political scientists studying these topics. This course is open to all students who have the prerequisites. It also serves as a thesis prep course for political science senior majors.
Units: 1.0
Instructor(s): Schlosser, J.
(Fall 2017)

POLS B360 Islam and Politics
This course will strive to answer but also to critique common questions about the role of Islam in political life: Is Islam compatible with democracy? Is Islam bad for women’s or minority rights? Does Islam cause violence? Will including Islamist organizations in democratic politics induce them to moderate their views? And what are the political consequences of asking and debating such questions? More broadly, this course will consider evolving approaches to culture, religion, and ideology in political science, exploring not just the effect of Islam on politics but also the ways in which politics have shaped the Islamic tradition over time. This course is open to all students who have the prerequisites. It also serves as a thesis prep course for political science senior majors. Prerequisite: POLS B283 or instructor consent.
Major Writing Requirement: Writing Attentive
Counts towards: Middle Eastern & Islamic Studies
Units: 1.0
Instructor(s): Fenner, S.
(Spring 2018)

POLS B367 China and the World: Implications of China’s Rise
In the 20th Century, China’s rise has been one of the most distinctive political affairs changing the landscape of regional and world politics. Especially, China’s breathtaking growth has challenged the foundations and limits of the market economy and political liberalization theoretically and empirically. This course examines the Chinese economic and political development and its implications for other Asian countries and the world. This course has three aims: 1) to facilitate an in-depth understanding of the Chinese Economic development model in comparison to other development models, 2) to conduct a comprehensive analysis of political and socio-economic exchanges of China and its relations with other major countries in East Asia, and 3) to construct a thorough understanding of challenges and opportunities for China from its extraordinary economic growth. This is a senior seminar, and a previous course in comparative politics, international relations or East Asian studies is required. It also serves as a thesis prep course for political science majors. Prerequisite: junior or senior.
Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Intensive
Units: 1.0
Instructor(s): Oh, S.
(Fall 2017)

POLS B371 Topics in Political Philosophy
An advanced seminar on a topic in political or legal philosophy/ theory. Topics vary by year. This course fulfills the 300-level thesis prep course to be taken in the fall semester of the senior year by political science majors. It is also open to nonseniors and other majors. Prerequisite: At least one course in political theory or philosophy or consent of instructor. Current topic description: Topics in Pol Theory on “Justice” with thesis component
Units: 1.0
Instructor(s): Schlosser, J.
(Fall 2017)
POLS B372 Comparative Democratic Institutions
This course examines the emergence of democratic institutions. We will consider differences between parliamentary and presidential systems, between different electoral systems, and different systems for power sharing such as federalism and consociationalism. Particular attention will be paid to the process of democratization from authoritarian regimes, especially in the developing world. Counts as a 300-level thesis prep course for Political Science Seniors.
Units: 1.0
Instructor(s): Fenner,S.
(Fall 2017)

POLS B374 Education Politics & Policy
This course will examine education policy through the lens of federalism and federalism through a case study of education policy. The dual aims are to enhance our understanding of this specific policy area and our understanding of the impact that our federal system of government has on policy effectiveness.
Units: 1.0
(Not Offered 2017-2018)

POLS B375 Gender, Work and Family
As the number of women participating in the paid workforce who are also mothers exceeds 50 percent, it becomes increasingly important to study the issues raised by these dual roles. This seminar will examine the experiences of working and nonworking mothers in the United States, the roles of fathers, the impact of working mothers on children, and the policy implications of women, work, and family.
Counts towards: Child and Family Studies; Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

POLS B376 Origins of American Constitutionalism
This course will explore some aspects of early American constitutional thought, particularly in the periods immediately preceding and following the American Revolution. The premise of the course is that many of the questions that arose during that period—concerning, for example, the nature of law, the idea of sovereignty, and the character of legitimate political authority—remain important questions for political, legal, and constitutional thought today, and that studying the debates of the revolutionary period can help sharpen our understanding of these issues.
Prerequisites: sophomore standing and previous course work in American history, American government, political theory, or legal studies.
Units: 1.0
(Not Offered 2017-2018)

POLS B381 Nietzsche
This course examines Nietzsche’s thought, with particular focus on such questions as the nature of the self, truth, irony, aggression, play, joy, love, and morality. The texts for the course are drawn mostly from Nietzsche’s own writing, but these are complemented by some contemporary work in moral philosophy and philosophy of mind that has a Nietzschean influence.
Prerequisite: One course in Political Theory or Philosophy or prior consent of instructor.
Approach: Critical Interpretation (CI)

POLS B391 International Political Economy
This seminar examines the growing importance of economic issues in world politics and traces the development of the modern world economy from its origins in colonialism and the industrial revolution, through to the globalization of recent decades. Major paradigms in political economy are critically examined. Aspects of and issues in international economic relations such as development, finance, trade, migration, and foreign investment are examined in the light of selected approaches. This course is open to all students who have the prerequisites. It also serves as a thesis prep course for political science seniors. Prerequisite: One course in International Politics or Economics is required. Preference is given to seniors although juniors are accepted.
Major Writing Requirement: Writing Attentive Counts towards: International Studies
Units: 1.0
Instructor(s): Allen,M.
(Fall 2017)

POLS B399 Senior Essay
Prerequisite: BM undergraduate Political Science major.
Units: 1.0
Instructor(s): Golden,M., Allen,M., Oh,S., Schlosser,J., Fenner,S.
(Spring 2018)

POLS B403 Supervised Work
Units: 1.0
(Fall 2017)

POLS B425 Praxis III: Independent Study
Praxis III courses are Independent Study courses and are developed by individual students, in collaboration with faculty and field supervisors. A Praxis courses is distinguished by genuine collaboration with fieldsite organizations and by a dynamic process of reflection that incorporates lessons learned in the field into the classroom setting and applies theoretical understanding gained through classroom study to work done in the broader community.
Counts towards: Praxis Program
Units: 1.0
(Not Offered 2017-2018)

ARCH B244 Great Empires of the Ancient Near East
A survey of the history, material culture, political and religious ideologies of, and interactions among, the five great empires of the ancient Near East of the second and first millennia B.C.E.: New Kingdom Egypt, the Hittite Empire in Anatolia, the Assyrian and Babylonian Empires in Mesopotamia, and the Persian Empire in Iran.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Middle Eastern & Islamic Studies
Units: 1.0
(Not Offered 2017-2018)

ECON B385 Democracy and Development
From 1974 to the late 1990’s the number of democracies grew from 39 to 117. This “third wave,” the collapse of communism and developmental successes in East Asia have led some to argue the triumph of democracy and markets. Since the late
PHIL B225 Global Ethical Issues
The need for a critical analysis of what justice is and requires has become urgent in a context of increasing globalization, the emergence of new forms of conflict and war, high rates of poverty within and across borders and the prospect of environmental devastation. This course examines prevailing theories and issues of justice as well as approaches and challenges by non-western, post-colonial, feminist, race, class, and disability theorists.
Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies; International Studies
Units: 1.0
Instructor(s): Bell, M.
(Fall 2017)

PHIL B238 Science, Technology and the Good Life
“Science, Technology, and the Good Life” considers the relation of science and technology to each other and to everyday life, particularly with respect to questions of ethics and politics. In this course, we try to get clear about how we understand these domains and their interrelationships in our contemporary world. We try to clarify the issues relevant to these questions by looking at the contemporary debates about the role of automation and digital media and the problem of climate change. These debates raise many questions including: the appropriate model of scientific inquiry (is there a single model for science?, how is science both experimental and deductive?, is science merely trial and error?, is science objective?, is science value-free?), the ideological standing of science (has science become a kind of ideology?), the autonomy of technology (have the rapidly developing technologies escaped our power to direct them?), the politics of science (is science somehow essentially democratic?, and are “scientific” cultures more likely to foster democracy?, or is a scientific culture essentially elitist and autocratic?), the relation of science to the formation of public policy (experts rule?, are we in or moving toward a technocracy?), the role of technology and science in the process of modernization, Westernization, and globalization (what role has science played in industrialization and what role does it now play in a post-industrial world?). To find an appropriate way to consider these questions, we look at the pairing of science with democracy in the Enlightenment project and study contemporary work in the philosophy of science, political science, and ethics.
Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Dostal, R.
(Fall 2017)

PHIL B240 Environmental Ethics
This course surveys rights- and justice-based justifications for ethical positions on the environment. It examines approaches such as stewardship, intrinsic value, land ethic, deep ecology, ecofeminism, Asian and aboriginal. It explores issues such as obligations to future generations, to nonhumans and to the biosphere.
Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Environmental Studies
Units: 1.0
Instructor(s): Dostal, R.
(Spring 2018)

PHIL B252 Feminist Theory
Beliefs that gender discrimination has been eliminated and women have achieved equality have become commonplace. We challenge these assumptions examining the concepts of patriarchy, sexism, and oppression. Exploring concepts central to feminist theory, we attend to the history of feminist theory and contemporary accounts of women’s place and status in different societies, varied experiences, and the impact of the phenomenon of globalization. We then explore the relevance of gender to philosophical questions about identity and agency with respect to moral, social and political theory. Prerequisite: one course in philosophy or permission of instructor.
Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies
Units: 1.0
Not Offered 2017-2018

PHIL B344 Development Ethics
This course explores the meaning of and moral issues raised by development. In what direction and by what means should a society “develop”? What role, if any, does the globalization of markets and capitalism play in processes of development and in systems of discrimination on the basis of factors such as race and gender? Answers to these sorts of questions will be explored through an examination of some of the most prominent theorists and recent literature. Prerequisites: a philosophy, political theory or economics course or permission of the instructor.
Major Writing Requirement: Writing Intensive
Counts towards: Gender and Sexuality Studies; International Studies
Units: 1.0
Not Offered 2017-2018

PSYC B358 Political Psychology of Ethnic Conflict
This seminar explores the common interests of psychologists and political scientists in ethnic identification and ethnic-group conflict. Rational choice theories of conflict from political science will be compared with social psychological theories of conflict that focus more on emotion and essentializing. Each student will contribute a 200-300 word post in response to a reading or film assignment each week. Students will represent their posts in seminar discussion of readings and films. Each student will write a final paper analyzing the origins and trajectory of a case of violent ethnic conflict chosen by agreement with the instructor. Grading includes posts, participation in discussion, and the final paper. Prerequisite: PSYC B208, or PSYC B120, or PSYC B125, or one 200 level course in political science, or instructor’s permission.
Counts towards: Peace, Justice and Human Rights
Units: 1.0
(Not Offered 2017-2018)

**SOCL B262 Public Opinion**

This course explores public opinion: what it is, how it is measured, how it is shaped, and how it changes over time. Specific attention is given to the role of elites, the mass media, and religion in shaping public opinion. Examples include racial/ethnic civil rights, abortion, gay/lesbian/transgendered sexuality, and inequalities.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Wright, N.
(Fall 2017)

**SOCL B317 Comparative Social Policy: Cuba, China, US, Scandinavia**

This course will examine different countries' policy choices to address different societal challenges. Four societal types - socialist (Cuba), post-socialist (China), capitalist (US), and social-democratic (Scandinavia) - will be studied to help us understand how these different kinds of societies conceive of social problems and propose and implement attempted solutions. We will examine particular problems/solutions in four domains: health/sports; education; environment; technological development. As we explore these domains, we will attend to methodological issues involved in making historical and institutional comparisons.

Counts towards: Education; Health Studies
Units: 1.0
(Not Offered 2017-2018)

---

**PSYCHOLOGY**

Students may complete a major or minor in Psychology. Within the major, students also have the opportunity to pursue an area of further study such as a minor in Neuroscience, Child and Family Studies, or Computational Methods.

**Faculty**

William (Dustin) Albert, Assistant Professor of Psychology
Jodie A. Baird, Visiting Assistant Professor
Kimberly Wright Cassidy, President of the College and Professor of Psychology
Jeong Min Lee, Visiting Assistant Professor
Hee Jung Park, Assistant Professor of Psychology
Laurel Peterson, Assistant Professor of Psychology (on leave semesters I & II)
Leslie Rescorla, Professor of Psychology on the Class of 1897 Professorship of Science and Director of Child and Family Studies and the Director of the Child Study Institute
Marc Schulz, Chair and Professor of Psychology and Rachel C. Hale Professor in the Sciences and Mathematics
Anjali Thapar, Professor of Psychology (on leave semester II)
Earl Thomas, Professor of Psychology
Robert Wozniak, Professor of Psychology (on leave semester I)

The department offers the student a major program that allows a choice of courses from among a wide variety of fields in psychology: biological, clinical, cognitive, developmental, health, and social. In addition to the considerable breadth offered, the program encourages the student to focus on more specialized areas through advanced coursework, seminars and supervised research. Students have found that the major program provides a strong foundation for graduate work in psychology, and related fields such as, law, social work, medicine, public policy, business, education and data science.

**Major Requirements**

The major requirements in Psychology are PSYC 105 (or a one-semester introductory psychology course taken elsewhere); PSYC 205; two half-credit 200-level laboratory courses (courses designated as PSYC 28X), six courses at the 200 and 300 level (at least two 200-level and two 300-level), one semester of Junior Brown Bag, and one Senior Requirement. Majors may elect to fulfill their Senior Requirement with PSYC 399 (Senior Seminar in Psychology) or by completing two semesters of supervised thesis research (PSYC 398 or PSYC 401).

Major Writing Requirement: Majors must complete the writing requirement prior to the start of the senior year. The writing requirement can be met by completing two half-credit 200-level writing intensive laboratory courses or a full credit writing intensive course.

Majors may substitute advance placement credit (score of 5 on the Psychology Advanced Placement exam) for PSYC 105. In general, courses at the 200 level survey major content areas of psychological research. With the exception of PSYC 205, all 200-level courses require PSYC 105 or the permission of the instructor. Courses at the 300 level typically have a 200-level survey course as a prerequisite and offer either specialization within a content area or integration across areas. PSYC 398, 399, and 401 are senior capstone courses and are intended to provide psychology majors with an intensive and integrative culminating experience in psychology.

Majors are also required to attend a one-hour, weekly brown bag in the junior year for one semester. This requirement is designed to sharpen students’ analytical and critical thinking skills, to introduce students to faculty members’ areas of research, to provide additional opportunities for student-faculty interactions, and to build a sense of community.

**Advising**

The selection of courses to meet the major requirements is made in consultation with the student’s major adviser. Any continuing faculty member can serve as a major adviser. It is expected that the student will sample broadly among the diverse fields represented in the curriculum. Courses outside the department may be taken for major credit if they satisfy the above descriptions of 200-level and 300-level courses and are approved by the student’s major adviser. Students should contact their major adviser about major credit for a course outside the department before taking the course.

**Honors**

Departmental honors (called Honors in Research in Psychology) are awarded on the merits of a report of research (the design and execution; and the scholarship exhibited in the writing of a paper based on the research). To be considered for honors, students must have a grade point average in psychology of 3.6 or higher at the end of the fall semester of the senior year.
Haverford College Courses that Count toward the Major

Certain psychology courses offered at Haverford College may be substituted for the equivalent Bryn Mawr courses for purposes of the Bryn Mawr psychology major (the same is true for psychology courses offered at Swarthmore and the University of Pennsylvania). Specifically, PSYC 100 at Haverford may be substituted for PSYC 105, PSYC 200 at Haverford may be substituted for PSYC 205. Additionally, although the half-unit 300-level laboratory courses at Haverford may be substituted for the half-unit 200-level laboratory courses at Bryn Mawr, the Haverford laboratory courses will not count towards the new college-wide writing requirement in the major. For all other courses, a student should consult with her major advisor.

Minor Requirements

A student may minor in Psychology by taking PSYC 105 and PSYC 205 and any other four courses that meet the requirements of the major.

Minor in Neuroscience

Students majoring in psychology can minor in Neuroscience. The minor comprises six courses: one gateway course (Behavioral Neuroscience BMC PSYC 218, Biological Psychology HC PSYC 217, or Introduction to Neuroscience BMC BIO 202), plus five additional courses. The five courses must sample from three different disciplines and at least one course must be at the 300-level or higher. Additional information for the minor is listed on the Psychology Department's website.

Minor in Computational Methods

Students majoring in psychology can minor in computational methods. The minor consists of one gateway course (Introduction to Computer Science, CS 110 or CS 205), a course in data structures (CS 206) and discrete mathematics (CS 231), plus three additional courses. Additional information for the minor is listed on the Computer Science Department's website.

Minor in Child and Family Studies

Students majoring in psychology can minor in Child and Family Studies. The minor comprises six courses: one gateway course (Developmental Psychology PSYC 206, Educational Psychology PSYC 203, Critical Issues in Education EDUC 200, or Study of Gender in Society SOCL 201), plus five additional courses, at least two of which must be outside of the major department and at least one of which must be at the 300 level. Additional information for the minor is listed on the Child and Family Studies's website.

COURSES

PSYC B105 Introductory Psychology

How do biological predispositions, life experiences, and culture contribute to individual differences in human and animal behavior? This biopsychosocial theme will be examined by studying both “normal” and “abnormal” behaviors in domains such as perception, cognition, learning, motivation, emotion, and social interaction thereby providing an overview of psychology’s many areas of inquiry. There is a laboratory component of this course that meets 2 hours per week (four evening times, one on Sunday).

Approach: Quantitative Readiness Required (QR); Scientific

Investigation (SI)
Units: 1.0
Instructor(s): Park,H., Rescorla,L.
(Fall 2017, Spring 2018)

PSYC B160 Focus: Psychology of Negotiations

Explores the psychology, art, and science of negotiations. The core of the course is a series of seven simulations designed to allow students to experiment with negotiation techniques. Debriefings and discussions of negotiation theory and behavioral research complement the simulations. This is a half-semester, 0.5 unit course.

Approach: Course does not meet an Approach
Units: 0.5
(Not Offered 2017-2018)

PSYC B203 Educational Psychology

Topics in the psychology of human cognitive, social, and affective behavior are examined and related to educational practice. Issues covered include learning theories, memory, attention, thinking, motivation, social/emotional issues in adolescence, and assessment/learning disabilities. This course provides a Praxis Level I opportunity. Classroom observation is required.
Prerequisite: PSYC B105 (Introductory Psychology).
Approach: Course does not meet an Approach
Counts towards: Child and Family Studies; Praxis Program
Units: 1.0
Instructor(s): Cassidy,K.
(Fall 2017)

PSYC B205 Research Methods and Statistics

An introduction to experimental design, general research methodology, and the analysis and interpretation of data. Emphasis will be placed on issues involved with conducting psychological research. Topics include descriptive and inferential statistics, experimental design and validity, analysis of variance, and correlation and regression. Each statistical method will also be executed using computers. Lecture three hours, laboratory 90 minutes a week.

Approach: Quantitative Methods (QM); Scientific Investigation (SI)
Units: 1.0
Instructor(s): Albert,D., Thapar,A.
(Fall 2017, Spring 2018)

PSYC B206 Developmental Psychology

A topical survey of psychological development from infancy through adolescence, focusing on the interaction of personal and environmental factors in the ontogeny of perception, language, cognition, and social interactions within the family and with peers. Topics include developmental theories; infant perception; attachment; language development; theory of mind; memory development; peer relations, schools and the family as contexts of development; and identity and the adolescent transition.
Prerequisite: PSYC B105 or PSYC H100
Approach: Course does not meet an Approach
Counts towards: Child and Family Studies
Units: 1.0
Instructor(s): Albert,D.
(Fall 2017)
PSYC B208 Social Psychology
A survey of theories and data in the study of human social behavior. Special attention to methodological issues of general importance in the conduct and evaluation of research with humans. Topics include group dynamics (conformity, leadership, encounter groups, crowd behavior, intergroup conflict); attitude change (consistency theories, attitudes and behavior, mass media persuasion); and person perception (stereotyping, essentializing, moral judgment). Prerequisite: PSYC B105 or H100 (Introductory Psychology), or instructor’s permission.
Approach: Scientific Investigation (SI)
Units: 1.0
(Fall 2017)

PSYC B209 Abnormal Psychology
This course examines the experience, origins and consequences of psychological difficulties and problems. Among the questions we will explore are: What do we mean by abnormal behavior or psychopathology? What are the strengths and limitations of the ways in which psychopathology is assessed and classified? What are the major forms of psychopathology? How do psychologists study and treat psychopathology? How is psychopathology experienced by individuals? What causes psychological difficulties and what are their consequences? How do we integrate social, biological and psychological perspectives on the causes of psychopathology? Do psychological treatments (therapies) work? How do we study the effectiveness of psychology treatments? Prerequisite: Introductory Psychology (PSYC B105 or H100).

Approach: Course does not meet an Approach
Counts towards: Child and Family Studies; Health Studies
Units: 1.0
(Not Offered 2017-2018)

PSYC B212 Human Cognition
This course provides an overview of the field of Cognitive Psychology, the branch of psychology that studies how we acquire, store, process and communicate information. Over the semester we will survey classic and contemporary theory and findings on a wide range of mental processes that are used every day in almost all human activities – from attention and memory to language and problem solving – and our goal will be to understand how the human mind works! Prerequisite: PSYC B105 or H100 (Introductory Psychology), or instructor’s permission.

Approach: Scientific Investigation (SI)
Counts towards: Neuroscience
Units: 1.0
(Not Offered 2017-2018)

PSYC B218 Behavioral Neuroscience
An interdisciplinary course on the neurobiological bases of experience and behavior, emphasizing the contribution of the various neurosciences to the understanding of basic problems of psychology. An introduction to the fundamentals of neuroanatomy, neurophysiology, and neurochemistry with an emphasis upon synaptic transmission; followed by the application of these principles to an analysis of sensory processes and perception, emotion, motivation, learning, and cognition. Lecture three hours a week. Prerequisite: Introductory Psychology (PSYC 105).

Approach: Course does not meet an Approach
Counts towards: Neuroscience
Units: 1.0
Instructor(s): Thomas,E.
(Spring 2018)

PSYC B224 Cross-Cultural Psychology
Explores human behavior as a product of cultural context. Why are some aspects of human behavior the same across cultures, while others differ? Topics include the relationships between culture and development, cognition, the self, and social behaviors. Discussions include implications of cross-cultural psychology for psychological theory and applications. Prerequisite: ANTH101, PSYCB105, PSYCH100, SOCL102 or permission of instructor.

Approach: Cross-Cultural Analysis (CC)
Units: 1.0
Instructor(s): Park,H.
(Fall 2017)

PSYC B230 Forensic Psychology
The major goal of this course is to provide students with a broad overview of the field of forensic psychology and the numerous ways that psychology interacts with the law. Throughout this course, students will develop an understanding of the nature, scope, and basic methods used in forensic psychology and how these methods can be applied to a variety of legal questions. We will begin with an introduction, which will encompass the definition of the area, the scope of the field, and an overview of the relevant methods used in the practice of forensic psychology. We will then consider a number of legal questions for which judges and attorneys can be informed by forensic psychological evaluation; these legal questions will include criminal, civil, and family law. Prerequisite: PSYC B105 or H100.

Units: 1.0
(Not Offered 2017-2018)

PSYC B231 Health Psychology
This course will provide an overview of the field of health psychology using lecture, exams, videos, assignments, and an article critique. We will examine the current definition of health psychology, as well as the theories and research behind many areas in health psychology (both historical and contemporary). The course will focus on specific health and social psychological theories, empirical research, and applying the theory and research to real world situations. Prerequisite: Introductory Psychology (PSYC B105) or Foundations of Psychology (PSYC H100).

Approach: Course does not meet an Approach
Counts towards: Health Studies; Museum Studies
Units: 1.0
(Not Offered 2017-2018)

PSYC B240 Evolution of Human Nature
Explores human nature as a product of evolutionary processes. The course will begin by introducing the evolutionary perspective and the roles of sex and mating strategies within the context of the animal kingdom. Topics will include the evolutionary origins of altruism, social structures, language, domestic and intergroup violence, and religion. Prerequisite: ANTH101, BIOL110/B111, ECON105, PSYCB105, PSYCH100, SOCL102, or permission of instructor.

Units: 1.0
(Not Offered 2017-2018)
PSYC B250 Autism Spectrum Disorders
Focuses on theory of and research on Autism Spectrum Disorders (ASD). Topics include the history of autism; classification and diagnosis; epidemiology and etiology; major theories; investigations of sensory and motor atypicalities, early social communicative skills, affective, cognitive, symbolic and social factors; the neuropsychology of ASD; and current approaches to intervention. Prerequisite: Introductory Psychology (PSYC 105).

Approach: Course does not meet an Approach
Counts towards: Child and Family Studies
Units: 1.0
Instructor(s): Wozniak, R.
(Fall 2017)

PSYC B260 The Psychology of Mindfulness
This course focuses on psychological theory and research on mindfulness and meditative practices. Readings and discussion will introduce students to modern conceptualizations and implementation of mindfulness practices that have arisen in the West. Students will be encouraged to engage in mindfulness activities as part of their involvement in this course.

Approach: Course does not meet an Approach
Counts towards: Health Studies
Units: 1.0
(Not Offered 2017-2018)

PSYC B282 Laboratory in Cognitive Psychology
This laboratory course will provide hands-on experience in designing and conducting research in cognitive psychology, with an emphasis on the study of memory and cognition. Over the semester, students will have the opportunity to develop specific research skills, such as understanding how to design a study appropriate to a research question, collecting data, conducting and interpreting statistical analyses, writing about research, etc. Other goals include practicing and further developing critical thinking skills and communicating research ideas and results both verbally and in writing. Students will be exposed to behavioral and electrophysiological (EEG, ERP) techniques to study memory and cognition. The course will culminate with a final project in which students design and conduct a novel experiment, analyze the data, and prepare an APA style research report. This class is a writing intensive class and, as a .5 unit class, is designed to meet half of the writing requirement in the major. Prerequisite: Psych 205 (Methods and Statistics); Suggested preparation: Psych 212 (Human Cognition) is helpful, but not required.

Approach: Scientific Investigation (SI)
Major Writing Requirement: Writing Intensive
Units: 0.5
Instructor(s): Thapar, A.
(Fall 2017)

PSYC B283 Laboratory in Developmental Psychology
This laboratory course is designed to provide students with hands-on exposure to the principles and practices that guide scientific research on human psychological development. We will examine the crucial steps in the scientific research process, including developing research questions and hypotheses, identifying an appropriate research design, insuring measurement reliability and validity, collecting and analyzing data, and communicating results. Special attention will be given to the research topics and methodological approaches important to the interdisciplinary field of developmental cognitive neuroscience, which aims to elucidate the neurological changes underlying psychological development. Through lab activities and group projects, students will gain specific exposure to the use of neuroimaging methods to examine developmental questions. Prerequisite: Psych 205 (Methods and Statistics).

Suggested preparation: Psych 206 (Developmental Psychology) is helpful but not required.

Approach: Scientific Investigation (SI)
Major Writing Requirement: Writing Intensive
Units: 0.5
Instructor(s): Albert, D.
(Spring 2018)

PSYC B284 Laboratory in Health Psychology
This laboratory/writing intensive/scientific inquiry quarter course will provide hands-on experience conducting health psychology research and writing APA-style manuscripts. Students will be exposed to various aspects of the scientific process such as: literature reviews, hypothesis-generation, data collection, analysis, writing (drafting and polishing), peer-reviewing, and oral dissemination of scientific findings. The course will focus on biopsychosocial theory and challenge students to apply the theory to their own research project(s) and write papers on the results. Prerequisite: PSYC B205 (Methods and Statistics).

Suggested preparation: PSYC B231 (Health Psychology).

Approach: Scientific Investigation (SI)
Major Writing Requirement: Writing Intensive
Units: 0.5
(Not Offered 2017-2018)

PSYC B285 Laboratory in Cultural Psychology
This writing-intensive laboratory course will provide students an opportunity to learn the entire process of psychological research in a small scale. Students will formulate research questions within the area of cultural psychology, review the relevant literature, collect, code, and analyze data, and produce APA-style manuscripts. This lab course will expose students to qualitative, quantitative, and mixed-method approaches to investigating research questions in cultural psychology. Prerequisites: Psych 205 (Methods and Statistics).

Suggested preparation: Psych 224 (Cross Cultural Psychology) is helpful but not required.

Approach: Scientific Investigation (SI)
Major Writing Requirement: Writing Intensive
Units: 0.5
Instructor(s): Park, H.
(Fall 2017)

PSYC B288 Laboratory in Social Psychology
This laboratory course will offer experience in designing and conducting research in social psychology, statistical analysis of research results, and research reporting in the style of a journal article in psychology. Each student will participate in two research projects. This is a 0.5 unit course that meets for the full semester. Suggested Preparation: Statistics (PSYC 205 or equivalent).

Approach: Quantitative Readiness Required (QR); Scientific Investigation (SI)
Major Writing Requirement: Writing Intensive
Units: 0.5
(Spring 2018)
PSYC B289 Laboratory in Clinical Psychology

At its core, this laboratory course is designed to explore how it is that psychologists come to know (or think they know) things and how they communicate what they think they know. The class focuses on the scientific principles and practices underlying research in psychology with an emphasis on techniques and topics important to the subfield of clinical psychology. This course is intended to provide hands-on training in how to conduct research. Through lab activities and class projects, students will learn about important methodological issues and steps in the research process including how to identify important questions, measurement issues such as reliability and validity, different modes of data collection, and how to collect, analyze, and interpret data. This class is a writing intensive class and, as a .5 unit class, is designed to meet half of the writing requirement in the major. Prerequisite: Psych 205 (Methods and Statistics); Suggested preparation: Psych 209 (Abnormal Psychology) is helpful, but not required.

Approach: Quantitative Readiness Required (QR); Scientific Investigation (SI)
Major Writing Requirement: Writing Intensive
Units: 0.5
Instructor(s): Schulz, M.
(Fall 2017)

PSYC B303 Portraits of Maladjustment in Classic Children’s Novels

This writing-intensive seminar (maximum enrollment = 16 students) .5 unit course deals with critical analysis of how various forms of psychological maladjustment and health are depicted in selected classic novels for children. Many such novels were written in the Victorian period. Long before developmental psychopathology was a scientific discipline, its main questions were insightfully probed by 19th and early 20th century novelists in books such as “The Secret Garden.” In this course, each book will be analyzed for the literary devices used to portray healthy adjustment and maladjustment, the implicit theories of psychological causation captured in the narratives, and the ways the novelist depicts life experiences that bring about mental health and personal growth. Each book will be discussed in its historical/literary contexts, and compared with current views drawn from psychological research. The course integrates literary analysis of classic children’s novels with important concepts derived from the field of developmental psychopathology.

Major Writing Requirement: Writing Intensive
Counts towards: Child and Family Studies; Health Studies
Units: 0.5
(Not Offered 2017-2018)

PSYC B312 History of Modern American Psychology

An examination of major 20th-century trends in American psychology and their 18th- and 19th-century social and intellectual roots. Topics include physiological and philosophical origins of scientific psychology; growth of American developmental, comparative, social, and clinical psychology; and the cognitive revolution. Prerequisite: any 200-level survey course.

Units: 1.0
Instructor(s): Wozniak, R.
(Spring 2018)

PSYC B322 Culture and Development

This course focuses on adolescents and their families in cultural, social, and ecological contexts. Topics include family dynamics, parent-adolescent relationship, socioeconomic status, immigration, social change, and globalization. Prerequisites: PSYC 105, and PSYC 206 or PSYC 224.

Counts towards: Child and Family Studies
Units: 1.0
Instructor(s): Park, H.
(Spring 2018)

PSYC B323 Advanced Topics in Cognitive Neuroscience

This is a topics course. Course content varies.
Counts towards: Neuroscience
Units: 1.0
(Not Offered 2017-2018)

PSYC B325 Judgment and Decision-Making

This course will explore the psychology of reasoning and decision-making processes in depth. We will examine affective, cognitive, and motivational processes, as well as recent research in neuroscience. Among other topics, we will discuss notions of rationality and irrationality, accuracy, heuristics, biases, metacognition, evaluation, risk perception, and moral judgment. Prerequisites: ECONB136, ECONH203, PSYCB205 or PSYCH200, and PSYCB212, PSYCH260 or permission of instructor.

Units: 1.0
(Not Offered 2017-2018)

PSYC B327 Adolescent Development

Is adolescence a biologically distinct stage of life, or a social “holding ground” invented by modern culture for young people unready or unwilling to assume the responsibilities of adulthood? Are adolescents destined to make risky decisions because of their underdeveloped brains? At what age should they be held accountable as adults in a court of law? This course will explore these and other questions about the biological, social, and legal forces that define the boundaries and shape the experience of adolescents growing up in the modern world. Students will learn about: (1) historical changes in understanding and treatment of adolescents; (2) puberty-related biological changes marking the beginning of adolescence; (3) brain, behavioral, cognitive, and social development during adolescence; and (4) contemporary debates regarding age of adult maturity, and their implications for law and policy. Prerequisite: PSYC B206 (Developmental Psychology) or permission or instructor. PSYC B205 is recommended. Current topic description: Mindfulness
Counts towards: Health Studies
Units: 1.0
Instructor(s): Albert, D.
(Fall 2017)

PSYC B331 Health Behavior and Context

This seminar will be devoted to a discussion of theory and research in health psychology. We will investigate both historical and contemporary perspectives on the psychology of wellness and illness. We will begin with a consideration of how psychosocial forces influence health cognitions, behaviors, and physiological processes. The second half of the course will focus on contextual factors, interventions, and emerging topics in research. We will debate the question of whether/how
psychological forces influence health outcomes. Prerequisite: PSYC B105 and PSYC B231 or PSYC B208, or by permission of the instructor.

Counts towards: Health Studies
Units: 1.0
(Not Offered 2017-2018)

**PSYC B351 Developmental Psychopathology**

This course will examine emotional and behavioral disorders of children and adolescents, including autism, attention deficit disorder, conduct disorder, phobias, obsessive-compulsive disorder, depression, anorexia, and schizophrenia. Major topics covered will include: contrasting models of psychopathology; empirical and categorical approaches to assessment and diagnosis; outcome of childhood disorders; risk, resilience, and prevention; and therapeutic approaches and their efficacy. Prerequisite: PSYC 206 or 209.

Counts towards: Child and Family Studies; Health Studies; Neuroscience
Units: 1.0
(Not Offered 2017-2018)

**PSYC B353 Advanced Topics in Clinical Psychology**

This course provides an in-depth examination of research and theory in a particular area of clinical psychology. Topics will vary from year to year. Current topic description: This course focuses on psychological theory and research on mindfulness and meditative practices. Readings and discussion will introduce students to modern conceptualizations and implementation of mindfulness practices that have arisen in the West. Prerequisite: PSYC 209 or 351.

Units: 1.0
Instructor(s): Schulz,M.
(Fall 2017)

**PSYC B354 Asian American Psychology**

This course will provide an overview of the nature and meaning of being Asian American in the United States. We will examine the history, struggle, and success of Asian Americans, drawing upon psychological theory and research, interdisciplinary ethnic studies scholarship, and memoirs. Students will also learn to evaluate the media portrayal of Asian Americans while examining issues affecting Asian American communities such as stereotypes, discrimination, family relationships, dating/marriage, education, and health disparities. Prerequisite: Introduction to Psychology (Psych 105) is required, Research Methods and Statistics (Psych 205) is recommended.

Units: 1.0
(Not Offered 2017-2018)

**PSYC B355 Neurobiology of Anxiety, Stress and Anxiety Disorders**

A seminar course examining the neurobiological basis of fear and anxiety and the stress that is often associated with these emotions. We will also consider anxiety and stress disorders including generalized anxiety disorder, panic disorder, specific phobias, obsessive compulsive disorder, and post-traumatic stress disorder. Implications for various forms of therapy for anxiety disorders, including psychotherapy and pharmacotherapy, will be addressed. Prerequisite: PSYC B218, PSYC B209, BIOL B202 or permission of instructor.

Counts towards: Neuroscience

**PSYC B357 Movies and Madness: Abnormal Psychology Through Films**

This writing-intensive seminar (maximum enrollment = 16 students) deals with critical analysis of how various forms of psychopathology are depicted in films. The primary focus of the seminar will be evaluating the degree of correspondence between the cinematic presentation and current research knowledge about the disorder, taking into account the historical period in which the film was made. For example, we will discuss how accurately the symptoms of the disorder are presented and how representative the protagonist is of people who typically manifest this disorder based on current research. We will also address the theory of etiology of the disorder depicted in the film, including discussion of the relevant intellectual history in the period when the film was made and the prevailing accounts of psychopathology in that period. Another focus will be how the film portrays the course of the disorder and how it depicts treatment for the disorder. This cinematic presentation will be evaluated with respect to current research on treatment for the disorder as well as the historical context of prevailing treatment for the disorder at the time the film was made. Prerequisite: PSYC B209.

Major Writing Requirement: Writing Intensive
Counts towards: Child and Family Studies; Film Studies; Health Studies
Units: 1.0
Instructor(s): Rescorla,L.
(Fall 2017)

**PSYC B358 Political Psychology of Ethnic Conflict**

This seminar explores the common interests of psychologists and political scientists in ethnic identification and ethnic-group conflict. Rational choice theories of conflict from political science will be compared with social psychological theories of conflict that focus more on emotion and essentializing. Each student will contribute a 200-300 word post in response to a reading or film assignment each week. Students will represent their posts in seminar discussion of readings and films. Each student will write a final paper analyzing the origins and trajectory of a case of violent ethnic conflict chosen by agreement with the instructor. Grading includes posts, participation in discussion, and the final paper. Prerequisite: PSYC B208, or PSYC B120, or PSYC B125, or one 200 level course in political science, or instructor's permission.

Counts towards: Peace, Justice and Human Rights
Units: 1.0
(Not Offered 2017-2018)

**PSYC B375 Psychopharmacology**

A study of the role of drugs in understanding basic brain-behavior relations. Topics include the pharmacological basis of motivation and emotion; pharmacological models of psychopathology; the use of drugs in the treatment of psychiatric disorders such as anxiety, depression, and psychosis; and the psychology and pharmacology of drug addiction. Prerequisite: PSYC B218 or BIOL B202 or PSYC H217 or permission of instructor.

Counts towards: Health Studies; Neuroscience
Units: 1.0
Instructor(s): Thomas,E.
(Spring 2018)
PSYC B398 Senior Thesis
Senior psychology majors who are doing a thesis should register for Senior Thesis (PSYC B398) with their adviser for both the Fall and Spring semester. Students will receive one unit per semester. Prerequisite: Psychology major.
Units: 1.0
Instructor(s): Thomas, E., Wozniak, R., Rescorla, L., Schulz, M., Thapar, A., Peterson, L., Albert, D., Park, H., Lee, J. (Fall 2017, Spring 2018)

PSYC B399 Senior Seminar
This seminar is intended to serve as a capstone experience for senior psychology majors who have opted not to do a senior thesis. The focus of the seminar will be on analyzing the nature of public discourse (coverage in newspapers, magazines, on the Internet) on a variety of major issues, identifying material in the psychological research literature relating to these issues, and to the extent possible relating the public discourse to the research.
Prerequisite: BM undergraduate Psychology major.
Units: 1.0
Instructor(s): Wozniak, R. (Spring 2018)

PSYC B401 Supervised Research in Neuroscience
Laboratory or library research under the supervision of a member of the Neuroscience committee. Required for those with the concentration. Prerequisite: permission of instructor.
Counts towards: Neuroscience
Units: 1.0 (Fall 2017)

PSYC B403 Supervised Research
Laboratory or field research on a wide variety of topics. Students should consult with faculty members to determine their topic and faculty supervisor, early in the semester prior to when they will begin.
Counts towards: Neuroscience
Units: 1.0 (Fall 2017, Spring 2018)

PSYC B425 Praxis III: Independent Study
Praxis III courses are Independent Study courses and are developed by individual students, in collaboration with faculty and field supervisors. A Praxis course is distinguished by genuine collaboration with fieldsite organizations and by a dynamic process of reflection that incorporates lessons learned in the field into the classroom setting and applies theoretical understanding gained through classroom study to work done in the broader community.
Counts towards: Praxis Program
Units: 1.0 (Not Offered 2017-2018)

PSYC B499 Junior Brown Bag
Majors are also required to attend a one-hour, weekly brown bag in the junior year for one semester. This requirement is designed to sharpen students’ analytical and critical thinking skills, to introduce students to faculty members’ areas of research, to provide additional opportunities for student-faculty interactions, and to build a sense of community.
Units: 1.0 (Not Offered 2017-2018)

PSYC B508 Social Psychology
Provides an introduction to basic social psychological theories and research. Topics covered include: group dynamics, stereotypes and group conflict, attitude measurement, and attitudes and behavior. An emphasis is placed on research methods in the study of social psychology.
Units: 1.0 (Not Offered 2017-2018)

PSYC B612 Historical Issues in Clinical Developmental Psychology
Familiarizes students with 20th century developments in clinical psychology and with the 18th and 19th century social and intellectual trends from which they emerged. Topics include: Mesmerism and the rise of dynamic psychiatry in Europe and America; changing patterns in the institutionalization of the insane; the Bost Group (James, Prince, Sidis) and the development of abnormal psychology and psychotherapy; the American reception of psychoanalysis; the Mental Hygiene and Child Guidance movements; the growth of psychometrics; personality theories and theorists; and trends in the professionalization of clinical psychology after WWII.
Units: 0 (Fall 2017)

PSYC B614 Advanced Data Science: Regression & Multivariate Statistics
This course is designed to improve your data science skills by introducing you to advanced statistical techniques that have become increasingly important in psychology and a variety of fields. The focus will be on understanding the advantages and limitations of regression approaches and multivariate analytic techniques that permit simultaneous prediction of multiple outcomes. Topics covered will include basic regression approaches, advanced regression strategies, structural equation modeling, factor analysis, measurement models, path modeling, modeling of longitudinal data sets, multilevel modeling approaches and growth curve modeling. Students will gain familiarity with these techniques by working with actual data sets. Prerequisites: Required: PSYCH Research Methods and Statistics 205 (BMC), Psych 200 (HC) Experimental Methods and Statistics, or BIOL B215 Experimental Design and Statistics. Students with good statistical preparation in math or other disciplines and some knowledge of core methods used in social science or health-related research should consult with the instructor to gain permission to take the class.
Units: 1.0
Instructor(s): Schulz, M. (Spring 2018)

PSYC B620 Historical Issues in Clinical Developmental Psychology
Familiarizes students with 20th century developments in clinical psychology and with the 18th and 19th century social and intellectual trends from which they emerged. Topics include: Mesmerism and the rise of dynamic psychiatry in Europe and America; changing patterns in the institutionalization of the insane; the Bost Group (James, Prince, Sidis) and the development of abnormal psychology and psychotherapy; the American reception of psychoanalysis; the Mental Hygiene and Child Guidance movements; the growth of psychometrics; personality theories and theorists; and trends in the professionalization of clinical psychology after WWII.
Units: 1.0 (Not Offered 2017-2018)
The major in religion is designed to help students develop a coherent set of academic skills and expertise in the study of religion, while at the same time encouraging interdisciplinary work in the humanities and social sciences. The major consists of 11 courses with the following requirements:

- Five courses within an area of concentration: each major is expected to fashion a coherent major program focused around work in one of three designated areas of concentration:
  - Religious Traditions in Cultural Context. The study of religious traditions and the textual, historical, sociological and cultural contexts in which they develop. Critical analysis of formative texts and issues that advance our notions of religious identities, origins, and ideas.
  - Religion, Literature, and Representation. The study of religion in relation to literary expressions and other forms of representation, such as performance, music, film, and the plastic arts.
  - Religion, Ethics, and Society. The exploration of larger social issues such as race, gender, and identity as they relate to religion and religious traditions. Examines how moral principles, cultural values, and ethical conduct help to shape human societies.

The five courses within the area of concentration must include at least one department seminar at the 300 level. Where appropriate and relevant to the major’s program, up to two courses for the major may be drawn from outside the field of religion, subject to departmental approval.

- RELG 299 (Theoretical Perspectives in the Study of Religion).
- RELG 398A and 399B, a two-semester senior seminar and thesis program.
- Three additional half-year courses drawn from outside the major’s area of concentration.
- Junior Colloquium: an informal required gathering of the junior majors once each semester. Students should complete the Religion Major Worksheet in advance in consultation with their major adviser and bring copies of the completed worksheet to the meeting.
- At least six of each major’s 11 courses must be taken in the Haverford Religion Department.

In some rare cases, students may petition the department for exceptions to the major requirements. Such petitions must be presented to the department for approval in advance.

Final evaluation of the major program will consist of written work, including a thesis, and an oral conversation completed in the context of the Senior Seminar (RELG 398A and 399B).

Advising for the major takes place in individual meetings between majors and faculty advisers and in a departmental Junior Colloquium held once each semester. At this colloquium, majors will present their proposed programs of study with particular attention to their work in the area of concentration. All majors should fill out and bring the Religion Major Worksheet, which can be found on the Religion Department website, to the colloquium.
Minor Requirements

The minor in religion, like the major, is designed to help students develop a coherent set of academic skills and expertise in the study of religion, while at the same time encouraging interdisciplinary work in the humanities and social sciences. The minor consists of six courses with the following requirements:

- Five courses within an area of concentration, with at least one at the 300 level:
- Religious Traditions in Cultural Context. The study of religious traditions and the textual, historical, sociological and cultural contexts in which they develop. Critical analysis of formative texts and issues that advance our notions of religious identities, origins, and ideas.
- Religion, Literature, and Representation. The study of religion in relation to literary expressions and other forms of representation, such as performance, music, film, and the plastic arts.
- Religion, Ethics, and Society. The exploration of larger social issues such as race, gender, and identity as they relate to religion and religious traditions. Examines how moral principles, cultural values, and ethical conduct help to shape human societies.
- RELG 299 (Theoretical Perspectives in the Study of Religion).
- Junior Colloquium: an informal required gathering of the junior majors once each semester. Students should complete the Religion Minor Worksheet, available on the Religion Department website, in advance in consultation with their major adviser and bring copies of the completed worksheet to the meeting.

All six courses must be taken in the Haverford Religion Department. In some rare cases, students may petition the department for exceptions to the minor requirements. Such petitions must be presented to the department for approval in advance.

Requirements for Honors

The department awards honors and high honors in religion on the basis of the quality of work in the major and on the completed thesis.

Study Abroad

Students planning to study abroad must construct their programs in advance with the department. Students seeking religion credit for abroad courses must write a formal petition to the department upon their return and submit all relevant course materials. We advise students to petition courses that are within the designated area of concentration.

Courses

RELG H101 INTRODUCTION TO THE STUDY OF RELIGION
An introduction to the study of religion from multiple perspectives: overviews of several religions with classroom discussion of primary sources; cross-cultural features common to many religions; theories of religion and approaches to its study and interpretation. (Typically offered every other year)

RELG H104 RELIGION AND SOCIAL ETHICS
Introduces students to debates in social ethics, with a focus on Jewish, Protestant, and Catholic perspectives on the theological and ethical significance of race, class, and gender in contemporary society. Topics may include racism, incarceration, poverty, gender-based domination, and same-sex marriage. (Offered Spring 2018)

RELG H105 FOOD & RELIGION
An exploration of the role of food in religious beliefs and practices. Topics include the role of food in religious rituals, the connection between religious foodways and religious identities, and the ethics of food production and consumption. (Offered Spring 2018)

RELG H107 VOCABULARIES OF ISLAM
Provides students with an introduction to the foundational concepts of Islam, its religious institutions, and the diverse ways in which Muslims understand and practice their religion. We explore the vocabularies surrounding core issues of scripture, prophethood, law, ritual, theology, mysticism, literature, and art from the early period to the present. (Offered Fall 2017)

RELG H110 SACRED TEXTS AND RELIGIOUS TRADITIONS
An introduction to Religion through the close reading of selected sacred texts of various religious traditions in their historical, literary, philosophical, and religious contexts. (Typically offered every other fall)

RELG H111 INTRODUCTION TO HINDUISM
An introduction to the diverse and fluid tradition known as Hinduism, which we will examine through the many streams that feed into it: theological and philosophical beliefs, ritual and devotional practices, literature, visual art, music and drama. (Typically offered every other year)

RELG H113 ANIMALS AND RELIGION
The course explores central themes in the study of religion such as myth and ritual through a focus on animals. To do so, we will engage a selection of primary sources and scholarly articles that examine the place of animals in the major world religions: Christianity, Islam, Judaism, Buddhism, Hinduism, Chinese traditions, as well as American indigenous traditions. (Not offered 2017-18)

RELG H122 INTRODUCTION TO THE NEW TESTAMENT
An introduction to the New Testament and early Christian literature. Special attention will be given to the Jewish origins of the Jesus movement, the development of traditions about Jesus in the earliest Christian communities, and the social contexts and functions of various texts. Readings will include non-canonical writings, in addition to the writings of the New Testament canon. (Typically offered every spring)

RELG H124 INTRODUCTION TO CHRISTIAN THOUGHT
An examination of some central concepts of the Christian faith, approached within the context of contemporary theological discussion. Basic Christian ideas will be considered in relation to one another and with attention to their classic formulations, major historical transformations, and recent reformulations under the pressures of modernity and postmodernity. (Offered Fall 2017)

RELG H150 SOUTH ASIAN RELIGIOUS CULTURES
An introductory course covering the variegated expressions of Hinduism, Buddhism, Jainism, Islam, and Sikhism in South Asia. (Offered Fall 2017)
RELG H201 INTRODUCTION TO BUDDHISM
Focusing on the East Asian Buddhist tradition, the course examines Buddhist philosophy, doctrine and practice as textual traditions and as lived religion. Crosslisted: East Asian Languages & Cultures, Religion (Typically offered every other year)

RELG H202 THE END OF THE WORLD AS WE KNOW IT
Why are people always predicting the coming endtime? This course will explore the genre of apocalypse, looking for common themes that characterize this form of literature. Our primary source readings will be drawn from the Bible and non-canonical documents from the early Jewish and Christian traditions. We will use an analytical perspective to explore the social functions of apocalyptic, and ask why this form has been so persistent and influential. (Offered Fall 2017)

RELG H208 POETICS OF RELIGIOUS EXPERIENCE IN SOUTH ASIA
An examination of religious poetry from three South Asian traditions: Hinduism, Islam, and Sikhism. Topics may include poetry and religious experience, poetry as locus of inter-religious dialogue, and poetry as religious critique. (Offered Spring 2018)

RELG H212 JERUSALEM: CITY, HISTORY AND REPRESENTATION
An examination of the history of Jerusalem as well as a study of Jerusalem as religious symbol and how the two interact over the centuries. Readings from ancient, medieval, modern and contemporary sources as well as material culture and art. (Offered Spring 2018)

RELG H221 WOMEN AND GENDER IN EARLY CHRISTIANITY
An examination of the representations of women and gender in early Christian texts and their significance for contemporary Christianity. Topics include images of women and sexuality in early Christian literature, and the roles of women in various Christian communities. (Typically offered every year)

RELG H222 Gnosticism
The phenomenon of Gnosticism examined through close reading of primary sources, including the recently discovered texts of Nag Hammadi. Topics include the relation of Gnosticism to Greek, Jewish, and Christian thought; the variety of Gnostic schools and sects; gender imagery, mythology and other issues in the interpretation of Gnostic texts. (Not offered 2017-18)

RELG H223 BODY, SEXUALITY AND CHRISTIANITY
Christianity’s deeply-ingrained discomfort with the human body and sexuality has had a disproportionate impact on women, making rules about proper behavior that confined women’s roles in church and society. At the same time, Christianity has always inspired a powerful feminism, prompting women to break all the rules. This course will explore Western Christianity during the medieval period, when the tension between misogyny and feminism was particularly powerful and when many of the tensions still felt in Western society were formed. (Offered Spring 2018)

RELG H230 RELIGION AND BLACK FREEDOM STRUGGLE
This course will examine the background for and the key events, figures, philosophies, tactics, and consequences of the modern black freedom struggle in United States. The period from 1955-1965 will receive special attention, but the roots of the freedom struggle and the effect on recent American political, social, and cultural history will also be considered. (Offered Fall 2017)

RELG H240 HISTORY AND PRINCIPLES OF QUAKERISM
The development of Quakerism and its relationship to other religious movements and to political and social life, especially in America. The roots of the Society of Friends in 17th-century Britain, and the expansion of Quaker influences among Third World populations, particularly the Native American, Hispanic, east African, and Asian populations. Crosslisted: Religion, History (Offered Spring 2018)

RELG H248 THE QURAN
Overview of the Qur’an, the scripture of Islam. Major themes include: orality, textuality, sanctity and material culture; revelation, translation, and inimitability; calligraphy, bookmaking and architecture; along with modes of scriptural exegesis as practiced over time by both Muslims and non-Muslims alike. Crosslisted: Religion, Comparative Literature (Not offered 2017-18)

RELG H254 RAP AND RELIGION: RHYMES ABOUT GOD AND THE GOOD
We will explore the origins, existential, and ethical dimensions of Rhythm and Poetry (RAP) music. Giving attention to RAP songs written and produced by African American artists, including Tupac, Nas, Jay-Z, The Roots, Lauryn Hill, and Kanye West, we will analyze their work with an interest in understanding a) the conceptions of God and the good reflected in them, b) how these conceptions connect to and reflect African American social and cultural practices, and c) how the conceptions under consideration change over time. (Offered Spring 2018)

RELG H257 THE YOGA TRADITION IN SOUTH ASIA AND BEYOND
Examines strands in the history of yoga practice and thought from the earliest textual discussions of yoga until the present day. Topics include the shifting meanings attributed to the term yoga across a range of communities, Islam and yoga, and the impact of colonialism and nationalism on shaping modern perceptions. (Offered Spring 2018)

RELG H258 GENDER AND POWER IN RECENT JEWISH AND CHRISTIAN THOUGHT
An exploration of gender in Judaism and Christianity through a study of feminist and queer thinkers who critique and contribute to these traditions. Topics include sex/gender difference, the gender of God, and the nature of divine authority. Prerequisite(s): Familiarity with philosophical and/or theoretical inquiry is recommended. (Typically offered every other year)

RELG H259 GENDER AND SEXUALITY IN ISLAMIC TEXTS AND PRACTICES
This course explores competing notions of gender and sexuality in Islamic societies from the time of Muhammad to the contemporary period. Readings include primary sources in translation as well as scholarly articles, works of fiction and nonfiction. (Not offered 2017-18)
RELG H268 ANARCHISM: RELIGION, ETHICS, POLITICAL OBLIGATION
Anarchism emerged in the nineteenth century as an important transnational sociopolitical philosophy and religious movement. Course participants will analyze anarchism as a political philosophy and as a social movement, from the nineteenth century labor movement to the ongoing global justice movement. (Offered Spring 2018)

RELG H273 GRAPHIC RELIGION: THE ETHICS OF REPRESENTATION
An examination of multiple visual “texts”—film, photography, graphic novels, and other plastic arts—to uncover the ethical obligations, moral commitments, theological convictions, individual attachments, and communal duties that arise in seeing religion. (Typically offered every other year)

RELG H276 RELIGION AND U.S. POLITICS: SEXUALITY, RACE, AND GENDER
This course examines why religion is commonly invoked in political debates about sexuality and gender even though the United States promotes itself as a secular democracy. The class will question if the United States has a secular government, explore what the separation of church and state means, and analyze if American citizens have religious freedom. The class will also explore the role religion has played in political movements centered on race, gender, and sexuality, and question why women’s reproductive rights and LGBTQ issues have been a common focus for government regulations and religious lobbying. (Offered Fall 2017)

RELG H280 ETHICS AND THE GOOD LIFE
This course examines influential accounts of the “good life” in Western religious and philosophical traditions, and the ways that contemporary ethicists draw on those accounts to think about religion, ethics, and politics today. We pay particular attention to the social and political dimensions of these accounts of the good life, to consider how we can live well together in spite of our differences. (Typically offered every other year)

RELG H299 THEORETICAL PERSPECTIVES IN THE STUDY OF RELIGION
An introduction to theories of the nature and function of religion from theological, philosophical, psychological, anthropological, and sociological perspectives. Readings may include: Schleiermacher, Marx, Nietzsche, Freud, Tylor, Durkheim, Weber, James, Otto, Benjamin, Eliade, Geertz, Foucault, Douglas, Smith, Berger, Haraway. (Offered Fall 2017)

RELG H303 RELIGION, LITERATURE AND REPRESENTATION: IMAGES OF KRISHNA
This course approaches the Hindu god Krishna through varied expressions in architecture, sculpture, paintings, textiles, landscape design, poetry, music, dance, and drama. We will ask how these practices were employed to visualize the divine, to nurture faith and passion, and to gain proximity to the transcendent deity. Class work will include field trips to local temples and museums. (Offered Fall 2017)

RELG H305 SEMINAR IN RELIGION, ETHICS, AND SOCIETY: MONOGAMY AND MARRIAGE IN AMERICA
This course will explore how coupled, monogamous marriage became the sexual and romantic ideal in the United States, and, in particular, how that ideal is connected to religion, race, gender, and sexuality. The class will question why politicians, religious leaders, and average citizens have promoted monogamy as the only legitimate sexual relationship. We will study queer theoretical arguments about monogamy and polyamory, anti-miscegenation laws, religious alternatives to monogamy, and the role religion has played in shaping social norms about acceptable sexual citizens. (Offered Fall 2017)

RELG H308 MYSTICAL LITERATURES OF ISLAM
Overview of the literary expressions of Islamic mysticism through the study of poetry, philosophy, hagiographies, and anecdotes. Topics include: unio mystica; symbol and structure; love and the erotic; body / gender; language and experience. (Offered occasionally)

RELG H312 RITUAL AND THE BODY
An exploration of the meaning and function of ritual, and of the ways that rituals shape bodies, habits, and identities. Special attention will be given to the relationship between ritual and gender. Readings include Durkheim, Mauss, Bourdieu, Butler, and Mahmood. Prerequisite(s): At least one 200-level course in the department, or instructor consent. (Offered Spring 2018)

RELG H316 HEGEL’S SOCIAL ETHICS
An examination of religion, ethics, and politics in Hegel’s Phenomenology of Spirit (in translation). As we work through Hegel’s monumental text, we will consider its influence over modern and contemporary discussions of gender, domination, ethical conflict and religious pluralism. Prerequisite(s): At least one 200-level course in philosophy, political theory, or religious thought, or instructor consent. (Typically offered every other year)

RELG H319 BLACK QUEER SAINTS: SEX, GENDER, RACE, CLASS AND THE QUEST FOR LIBERATION
Drawing on fiction, biography, critical theory, film, essays, and memoirs, participants will explore how certain African American artists, activists, and religionists have resisted, represented, and reinterpreted sex, sexuality, and gender norms in the context of capitalist, white supremacist, male supremacist, and heteronormative cultures. Crosslisted: Africana Studies, Religion; Prerequisite(s): 200-level course in philosophy, political theory, or religious studies. (Typically offered every other year)

RELG H389 SENIOR THESIS SEMINAR PART 1
A practical methodology course which prepares senior Religion majors to write their senior theses. (Offered Fall 2017)

RELG H399 SENIOR SEMINAR AND THESIS
Senior Thesis (Offered Spring 2018)

ROMANCE LANGUAGES
Students may complete a major in Romance Languages.

Faculty
Brigitte Mahuzier, Chair and Professor of French
Maria Cristina Quintero, Chair and Professor of Spanish
Roberta Ricci, Chair and Associate Professor of Italian
The Departments of French and Francophone Studies, Italian, and Spanish cooperate in offering a major in Romance Languages that requires advanced work in at least two Romance languages and literatures. Additional work in a third language and literature is suggested.

**Major Requirements**

The requirements for the major are a minimum of nine courses, including the Senior Conference and/or Senior Essay, described below, in the first language and literature and six courses in the second language and literature, including the Senior Conference in French, if French is selected as second. Students should consult with their advisers no later than their sophomore year in order to select courses in the various departments that complement each other.

Students must complete a writing requirement in the major. Students will work with their major advisors in order to identify either two writing attentive or one writing intensive course within their major plan of study.

Students should consult with their advisers no later than their sophomore year in order to select courses in the various departments that complement each other.

Haverford students intending to major in Romance Languages must have their major work plan approved by a Bryn Mawr College adviser.

The following sequence of courses is recommended when the various languages are chosen for primary and secondary concentration, respectively (see the departmental listings for course descriptions).

**Writing Requirement**

Students must complete a writing requirement in the major. Students will work with their major advisors in order to identify either two writing attentive or one writing intensive course within their major plan of study.

**First Language and Literature**

**French**

FREN 101-102 or 101-105; or 005-102 or 005-105. Four literature courses at the 200 level, including FREN 213. Advanced language course: FREN 260 (BMC) or 212 (HC). Two courses at the 300 level.

**Italian**

ITAL 101, 102. Four courses at the 200 level. Three courses at the 300 level.

**Spanish**

SPAN 110, SPAN 120. Four courses at the 200 level. Two courses at the 300 level.

**Second Language and Literature**

**French**

FREN 101-102 or 101-105; or 005-102 or 005-105. Two literature courses at the 200 level. FREN 260 (BMC) or 212 (HC). One course at the 300 level.

**Italian**

ITAL 101, 102. Two literature courses at the 200 level. Two literature courses at the 300 level.

**Spanish**

SPAN 110, SPAN 120. Two courses at the 200 level. Two courses at the 300 level.

In addition to the coursework described above, when the first language and literature is Spanish, majors in Romance Languages must enroll in SPAN 398 (Senior Seminar).* When French is chosen as either the first or second language, students must take the first semester Senior Conference in French (FREN 398) in addition to the coursework described above.** When Italian is chosen, students must take ITAL 398 and ITAL 399, offered in consultation with the department, in addition to the coursework described above in order to receive honors.*** An oral examination (following the current model in the various departments) may be given in one or both of the two languages, according to the student's preference, and students follow the practice of their principal language as to written examination or thesis. Please note that 398 does not count as one of the two required 300-level courses.

Interdepartmental courses at the 200 or 300 level are offered from time to time by the cooperating departments. These courses are conducted in English on such comparative Romance topics as epic, romanticism, or literary vanguard movements of the 20th century. Students should be able to read texts in two of the languages in the original.

* In order to receive honors, students whose first language is Spanish should have a minimum 3.7 GPA in Spanish and are required to write a senior essay (SPAN 399).

** For students whose first language is French, honors are awarded on the basis of performance in Senior Conference and on a successfully completed thesis (FREN 403) or senior essay, the latter completed in a third 300-l. course in semester II of senior year.

*** In order to receive honors, students whose first language is Italian are required to write a senior essay (ITAL 398 and ITAL 399)

---

**RUSSIAN**

Students may complete a major or minor in Russian.

**Faculty**

Bella Grigoryan, Assistant Professor of Russian

Timothy Harte, Chair and Associate Professor of Russian on the Myra T. Cooley Lectureship in Russian

Marina Rojavin, Lecturer

Jesse Stavis, Visiting Assistant Professor

Irina Walsh, Lecturer in Russian

The Russian major is a multidisciplinary program designed to provide students with a broad understanding of Russian culture and the Russophone world. The major places a strong emphasis on the development of functional proficiency in the Russian language. Language study is combined with a specific area of concentration to be selected from the fields of Russian literature, history, economics, language/linguistics, or area studies.
**Russian**

**College Foreign Language Requirement**

The College’s foreign language requirement may be satisfied by completing RUSS 001 and 002 with an average grade of at least 2.0 or with a grade of 2.0 or better in RUSS 002.

**Major Requirements**

A total of 10 courses is required to complete the major: two in Russian language at the 200 level or above; four in the area of concentration, two at the 200 level and two at the 300 level or above (for the concentration in area studies, the four courses must be in four different fields); three in Russian fields outside the area of concentration; and either RUSS 398, Senior Essay, or RUSS 399, Senior Conference.

Russian majors have the option of fulfilling the College’s writing requirement through Writing Attentive (WA) courses either through upper-level Russian language courses, where the focus is on writing in Russian, or through 200-level courses on Russian literature (in translation), culture or film, where the focus is on writing in English. Majors also have the option of completing one WA course in Russian and one WA course in English.

Majors are encouraged to pursue advanced language study in Russia in summer, semester, or year-long academic programs. Majors may also take advantage of intensive immersion language courses offered during the summer by the Bryn Mawr Russian Language Institute. As part of the requirement for RUSS 398/399, all Russian majors take senior comprehensive examinations that cover the area of concentration and Russian language competence.

**Honors**

All Russian majors are considered for departmental honors at the end of their senior year. The awarding of honors is based on a student’s overall academic record and all work done in the major.

**Minor Requirements**

Students wishing to minor in Russian must complete six units at the 100 level or above, two of which must be in the Russian language.

**COURSES**

**RUSS B001 Elementary Russian Intensive**

Study of basic grammar and syntax. Fundamental skills in speaking, reading, writing, and oral comprehension are developed. Eight hours a week including conversation sections and language laboratory work.

Approach: Course does not meet an Approach
Units: 1.5
Instructor(s): Harte,T.
(Fall 2017)

**RUSS B002 Elementary Russian Intensive**

Study of basic grammar and syntax. Fundamental skills in speaking, reading, writing, and oral comprehension are developed. Eight hours a week including conversation sections and language laboratory work.

Approach: Course does not meet an Approach
Units: 1.5
Instructor(s): Stavis,J.
(Spring 2018)

**RUSS B101 Intermediate Russian**

Continuing development of fundamental skills with emphasis on vocabulary expansion in speaking and writing. Readings in Russian classics and contemporary works. Five hours a week.

Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): Grigoryan,B.
(Fall 2017)

**RUSS B102 Intermediate Russian**

Continuing development of fundamental skills with emphasis on vocabulary expansion in speaking and writing. Readings in Russian classics and contemporary works. Five hours a week.

Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): Grigoryan,B.
(Spring 2018)

**RUSS B201 Advanced Russian**

Intensive practice in speaking and writing skills using a variety of modern texts and contemporary films and television. Emphasis on self-expression and a deeper understanding of grammar and syntax. Five hours a week.

Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): Walsh,I.
(Fall 2017)

**RUSS B202 Advanced Russian**

Intensive practice in speaking and writing skills using a variety of modern texts and contemporary films and television. Emphasis on self-expression and a deeper understanding of grammar and syntax. Five hours a week.

Approach: Course does not meet an Approach
Units: 1.0
Instructor(s): Walsh,I.
(Spring 2018)

**RUSS B206 Dostoevsky in Translation**

This course provides a dynamic and comprehensive survey of Fyodor Dostoevsky’s career. We will study the formal and thematic dimensions of his works in detail and contextualize his oeuvre in relation to such areas as Russian and European literary, intellectual, cultural, and political history; the relevant secular and religious philosophical traditions and currents; Dostoevsky’s own rather storied biography; his frequently polemical (but always robust) responses to West European cultural and intellectual trends; the reception of his works both in Russia and abroad, and their impact on foundational theoretical approaches to the study of literature broadly and the novel especially. Readings include Notes from Underground, Crime and Punishment, The Brothers Karamazov, and a number of celebrated short works. All readings in English translation.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Major Writing Requirement: Writing Attentive
Units: 1.0
Instructor(s): Grigoryan,B.
(Fall 2017)

**RUSS B209 Russia and the East: Siberia in Russian Culture**

“We are Asians!,” famously declared the Russian poet Aleksandr Blok in 1918. Russian culture has long celebrated the nation’s close ties to the east as well as its ancient eastern heritage.
From the time of Genghis Khan and the Mongolian yoke’s invasion of Kievan Rus’ in the 13th century to the present day and Vladimir Putin’s ongoing geopolitical pivot to the east, Russia has grappled with its eastern roots, its vast eastern expanse, and Sino-Russian relations. This course will explore a wide variety of cultural manifestations of Russia’s eastern orientation: Russian philosophy at the turn into the 20th century that emphasized Russia’s eastern, mystical focus; Russian symbolist poetry and prose that amplified Russia’s ties to the East; silent cinema of the 1920s that linked revolution to the East; non-fiction accounts of penal colonies and work camps scattered throughout Siberia (with particular emphasis on the work of Chekhov, Solzhenitsyn, Shalamov); late Soviet fiction probing life in rural Siberia; and contemporary Russian fiction that revisits Russia’s eastern mysticism. Exploring Russia’s ties to the East from a variety of historical, artistic, and social perspectives, this course aims to explore Russian culture’s Eurasian essence.

Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

RUSS B214 Anna Karenina and the Tasks of Literature
This course takes Lev Tolstoy’s Anna Karenina as its centerpiece and most sustained point of interest. We will begin with a few of Tolstoy’s important early works (notably, his Childhood, Boyhood, Youth,). Then read Anna Karenina slowly and in detail, identifying its chief formal and thematic characteristics and thinking about the novel’s aesthetics in relation to the ethical questions it raises. These questions traverse a broad range of topics from marital infidelity and legally recognized forms of kinship to a critique of Russian imperial geopolitics and military interventions from a standpoint that prefigures Tolstoy’s late-in-life radical pacifism. Next, we will read three novels (Gustave Flaubert’s Madame Bovary, Nathaniel Hawthorne’s The Scarlet Letter, Alexander Pushkin’s Eugene Onegin) that, much as they predate Tolstoy’s masterpiece, help us bring the central preoccupations of Anna Karenina into sharper focus. We will conclude the course with Tolstoy’s late short works, a short story by Anton Chekhov, and Virginia Woolf’s Mrs. Dalloway, which we will contemplate as a reply to and a potential re-writing of Anna Karenina, since the English modernist famously declared that she had “nearly every scene of Anna Karenina branded in [her.]” All readings in English.

Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Grigoryan,B.
(Spring 2018)

RUSS B217 The Cinema of Andrei Tarkovsky
This course will probe the cinematic oeuvre of the great Soviet filmmaker Andrei Tarkovsky, who produced some of the most compelling, significant film work of the 20th century. Looking at not only Tarkovsky’s films but also those films that influenced his work, we will explore the aesthetics, philosophy, and ideological pressure underlying Tarkovsky’s unique brand of cinema.

Approach: Critical Interpretation (CI)
Counts towards: Film Studies
Units: 1.0
(Not Offered 2017-2018)

RUSS B221 The Serious Play of Pushkin and Gogol
This course explores major contributions to the modern Russian literary tradition by its two founding fathers, Aleksander Pushkin and Nikolai Gogol. Comparing short stories, plays, novels, and letters written by these pioneering artists, the course addresses Pushkin’s and Gogol’s shared concerns about human freedom, individual will, social injustice, and artistic autonomy, which each author expressed through his own distinctive filter of humor and playfulness. No knowledge of Russian is required.

Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Attentive
Units: 1.0
(Not Offered 2017-2018)

RUSS B223 Russian and East European Folklore
This interdisciplinary course introduces students to major issues in Russian and East European folklore including epic tales, fairy tales, calendar and life-cycle rituals, and folk beliefs. The course also presents different theoretical approaches to the interpretation of folk texts as well as emphasizes the influence of folklore on literature, music, and art. No knowledge of Russian is required.

Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

RUSS B228 Soviet and Eastern European Cinema of the 1960s
This course examines 1960s Soviet and Eastern European “New Wave” cinema, which won worldwide acclaim through its treatment of war, gender, and aesthetics. Films from Czechoslovakia, Hungary, Poland, Russia, and Yugoslavia will be viewed and analyzed, accompanied by readings on film history and theory. All films shown with subtitles; no knowledge of Russian or previous study of film required.
Counts towards: Film Studies
Major Writing Requirement: Writing Attentive
Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Units: 1.0
Instructor(s): Harte, T.
(Fall 2017)

RUSS B271 Chekhov: His Short Stories and Plays in Translation
A study of the themes, structure and style of Chekhov’s major short stories and plays. The course will also explore the significance of Chekhov’s prose and drama in the English-speaking world, where this masterful Russian writer is the most staged playwright after Shakespeare. All readings and lectures in English.
Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Major Writing Requirement: Writing Attentive
Units: 1.0
(In Not Offered 2017-2018)

RUSS B277 Nabokov in Translation
A study of Vladimir Nabokov's writings in various genres, focusing on his fiction and autobiographical works. The continuity between Nabokov’s Russian and English works is considered in the context of the Russian and Western literary traditions. All readings and lectures in English.
Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Harte, T.
(Spring 2018)

RUSS B321 The Serious Play of Pushkin and Gogol
This course explores major contributions to the modern Russian literary tradition by its two founding fathers, Aleksander Pushkin and Nikolai Gogol. Comparing short stories, plays, novels, and letters written by these pioneering artists, the course addresses Pushkin’s and Gogol’s shared concerns about human freedom, individual will, social injustice, and artistic autonomy, which each author expressed through his own distinctive filter of humor and playfulness. The course is taught jointly with Russian 221; students enrolled in 321 will meet with the instructor for an additional hour to study texts in the original Russian.
Units: 1.0
(Not Offered 2017-2018)

RUSS B342 Russian Culture Today
This seminar focuses on current cultural trends in Russia, with special emphasis on the interplay between various artistic media and post-Soviet Russia’s rapidly developing society. Students will be introduced to contemporary Russian literature, painting, television, film, and music while considering such topics as Russia’s ambiguous attitude toward the West, the rise of violence in Russian society, and Russia’s evaluation of the past. Prerequisite: RUSS 102 or the equivalent.
Units: 1.0
Instructor(s): Walsh, I.
(Fall 2017)

RUSS B365 Russian and Soviet Film Culture
This seminar explores the cultural and theoretical trends that have shaped Russian and Soviet cinema from the silent era to the present day. The focus will be on Russia’s films and film theory, with discussion of the aesthetic, ideological, and historical issues underscoring Russia’s cinematic culture. Taught in Russian. No previous study of cinema required, although RUSS 201 or the equivalent is required.
Units: 1.0
Instructor(s): Rojavin, M.
(Spring 2018)

RUSS B380 Seminar in Russian Studies
An examination of a focused topic in Russian literature such as a particular author, genre, theme, or decade. Introduces students to close reading and detailed critical analysis of Russian literature in the original language. Readings in Russian. Some discussions and lectures in Russian. Prerequisites: RUSS 102 and one 200-level Russian literature course.
Units: 1.0
Instructor(s): Walsh, I.
(Spring 2018)

RUSS B390 Russian for Pre-Professionals I
This capstone to the overall language course sequence is designed to develop linguistic and cultural proficiency in Russian to the advanced level or higher, preparing students to carry out academic study or research in Russian in a professional field. Suggested Preparation: study abroad in Russia for at least one summer, preferably one semester; and/or certified proficiency levels of 'advanced-low' or 'advanced-mid' in two skills, one of which must be oral proficiency.
Major Writing Requirement: Writing Attentive
Units: 1.0
Instructor(s): Rojavin, M.
(Fall 2017)

RUSS B391 Russian for Pre-Professionals II
Second part of year long capstone language sequence designed to develop linguistic and cultural proficiency to the "advanced level," preparing students to carry out advanced academic study or research in Russian in a professional field. Prerequisite: RUSS 390 or equivalent.
Major Writing Requirement: Writing Attentive
Units: 1.0
Instructor(s): Rojavin, M.
(Spring 2018)

RUSS B398 Senior Essay
Independent research project designed and conducted under the supervision of a departmental faculty member. May be undertaken in either fall or spring semester of senior year.
Units: 1.0
(Not Offered 2017-2018)

RUSS B403 Supervised Work
Units: 1.0
(Fall 2017)

FREN B213 Theory in Practice: Critical Discourses in the Humanities
By bringing together the study of major theoretical currents of the 20th century and the practice of analyzing literary works in the light of theory, this course aims at providing students with skills to use literary theory in their own scholarship. The selection of theoretical readings reflects the history of theory (psychoanalysis,
structuralism, narratology), as well as the currents most relevant to the contemporary academic field: Post-structuralism, Post-colonialism, Gender Studies, and Ecocriticism. They are paired with a diverse range of short stories (Poe, Kafka, Camus, Borges, Calvino, Morrison, Djebar, Ngozi Adichie) that we discuss along with our study of theoretical texts. The class will be conducted in English with an additional hour in French for students wishing to take it for French credit.

Approach: Critical Interpretation (CI)
Units: 1.0
Instructor(s): Sanquer, M.

(Fall 2017)

ITAL B213 Theory in Practice: Critical Discourses in the Humanities

An examination in English of leading theories of interpretation from Classical Tradition to Modern and Post-Modern Time. This is a topics course. Course content varies.

Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

RUSS B106 Intensive Survival Russian

This course will be an intensive “crash” course in Russian for those enrolled in the 360 who have no prior experience studying or speaking Russian (those in the 360 who have studied the Russian language in the past will be expected to take a concurrent Russian language course at the College). This course will entail 5 hrs./week of elementary language instruction in Russian, with special emphasis on speaking skills needed for the trip.

Units: 1.0
(Not Offered 2017-2018)

RUSS B701 Supervised Work

Units: 1.0
(Not Offered 2017-2018)

SOCIOLGY

Students may complete a major or minor in Sociology.

Faculty

Piper Coutinho-Sledge, Assistant Professor of Sociology
David Karen, Professor of Sociology
Veronica Montes, Assistant Professor of Sociology and Co-Director of the Latin American, Latina/o and Iberian Studies Program
Mary Osirim, Provost and Professor of Sociology
Robert Washington, Professor of Sociology
Nathan Wright, Chair and Associate Professor of Sociology

The major in Sociology aims to provide understanding of the organization and functioning of modern society by analyzing its major institutions, social groups, and values, and their connections to culture and power. To facilitate these analytical objectives, the department offers rigorous preparation in social theory and problem-focused training in quantitative as well as qualitative methodologies.

Major Requirements

Requirements for the major are SOCL 102, 265, 302, 303 (Junior Seminar), which fulfills the College writing intensive requirement, 398 (Senior Seminar), five additional courses in sociology (one of which may be at the 100 level and at least one of which must be at the 300 level). In addition, the student must take two additional courses in sociology or an allied subject; the allied courses are to be chosen in consultation with the faculty adviser. The department strongly recommends that majors take a history course focused on late 19th and 20th century American history. Students with an interest in quantitative sociology are encouraged to elect as allied work further training in mathematics, statistics and computer science. Those with an interest in historical or theoretical sociology are encouraged to elect complementary courses in history, philosophy, and anthropology. In general, these allied courses should be chosen from the social sciences.

Senior Experience

The Senior Seminar is required of all senior sociology majors regardless of whether or not they wish to do a thesis. Depending on the number of students, in some years the Senior Seminar will have two sections. The content of the two sections may differ, but the structure of the seminars will be the same. Students will focus on their writing in a series of assignments, emphasizing, as the new college-wide writing requirement suggests, the process and elements of good writing.

Senior Thesis

During senior year, seniors will have the option of doing a one-semester thesis in the fall, a one-semester thesis in the spring, or a two-semester thesis (one grade for the year). To become eligible to write a senior thesis, a student must have a minimum 3.0 GPA in sociology (this will also be the minimum GPA for a student to do an independent study in sociology). Junior sociology majors will need to approach a faculty member as early as possible about the possibility of advising their thesis and will need to indicate in their thesis proposal their preferred adviser. The department will attempt to follow these preferences but will take responsibility for assigning an adviser.

Rising seniors who wish to write a senior thesis will need to submit by June 30 to the Chair of sociology a 1-2 page thesis proposal that includes the following information:

1. Proposed term of thesis-writing: fall semester; spring semester; both semesters
2. Timeline: brief indication of when the data will be collected, when/how it will be analyzed, when the write-up will take place, etc.
3. Preferred adviser
4. Thesis proposal (should include the research question, its sociological significance, the proposed method, plan of analysis, and anticipated value)
   a. The thesis proposal should also state clearly whether the research will require IRB approval, if approval has already been secured, or when it will be secured
   b. Please indicate if you have any previous preparation/work in the thesis topic area.

The chair will distribute the proposals to department members, collect their comments, and inform the student of a yes/no decision by July 15. Please note that students who are not selected to do a senior thesis may still pursue independent
work with a faculty member (if their GPA in the major is 3.0 or above). If you are unsure of whether your topic is really a thesis you should discuss this with a faculty member. The following broad categories of work have been considered in the past to be theses: students conduct an analysis of empirical data (this can be qualitative or quantitative; collected by the student or by someone else; contemporary or historical; etc.) or students undertake to research a question using already published evidence (so the thesis could be a very focused, extensive literature review). Students would be welcome to propose developing a research paper that they wrote in a course. This kind of proposal needs to be very specific as to what the new/additional goals are.

The Department of Sociology offers concentrations in gender and society and African American studies. In pursuing these concentrations, majors should inquire about the possibility of coursework at Haverford and Swarthmore Colleges and the University of Pennsylvania.

Minor Requirements
Requirements for the minor are SOCL 102, 265, 302, and three additional courses within the department. Students may choose electives from courses offered at Haverford College. Bryn Mawr majors should consult their department about major credit for courses taken at other institutions.

Honors
Honors in Sociology are available to those students who have a grade point average in the major of 3.5 or higher and who write a senior thesis that is judged outstanding by the department. The thesis would be written under the direction of a Sociology faculty member.

Concentrations Within the Sociology Major

Gender and Society
Three courses are required for this concentration; at least two of these courses must be in sociology. The remaining course can be in sociology or an allied social science field. Students who pursue this concentration are required to take at least one of the core courses in this area offered by the department: The Study of Gender in Society (SOCL 201) or Women in Contemporary Society: The Southern Hemisphere (SOCL 225). The department encourages students in this concentration to take courses that focus on the study of gender in both the Global North and the Global South. In addition to taking courses in this field at Bryn Mawr, students may also take courses towards this concentration in their study abroad programs or at Haverford, Swarthmore, and the University of Pennsylvania. Any course taken outside of the Bryn Mawr Department of Sociology must be approved by the department for concentration credit.

African American Studies
Three courses are required for this concentration; at least two of these courses must be in sociology. The remaining course can be in either sociology or an allied field. Students who pursue this concentration are required to take the core course offered by the Bryn Mawr Department of Sociology: Black America In Sociological Perspective (SOCL 229). Students are encouraged to take courses on Black America listed under the Bryn Mawr and Haverford Africana Studies Programs. Courses taken outside the Bryn Mawr Department of Sociology must be approved by the department for concentration credit. Majors interested in this concentration should consult Robert Washington for further information.

COURSES

SOCL B102 Society, Culture, and the Individual
Analysis of the basic sociological methods, perspectives, and concepts used in the study of society, with emphasis on social structure, education, culture, the self, and power. Theoretical perspectives that focus on sources of stability, conflict, and change are emphasized throughout.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Gender and Sexuality Studies; International Studies
Units: 1.0
(Fall 2017, Spring 2018)

SOCL B130 Sociology of Harry Potter
J.K. Rowling's Harry Potter series is a worldwide phenomenon that has sold hundreds of millions of books and been translated into dozens of languages. Over the last decade, academic studies of Harry Potter have taken root in English and Theology departments, but very few sociologists have taken a scholarly look at the rich society Rowling has created. This course will introduce students to the fundamental concepts of sociology using the lens of the Harry Potter series. We will explore questions of hierarchy, inequality, terrorism, consumption, race, class, and gender, and we will discuss the ways in which stratification in the wizarding world compares and contrasts to similar issues in the Muggle world. Class discussions and exercises will assume that students have read all seven Harry Potter books.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

SOCL B201 The Study of Gender in Society
The definition of male and female social roles and sociological approaches to the study of gender in the United States, with attention to gender in the economy and work place, the division of labor in families and households, and analysis of class and ethnic differences in gender roles. Of particular interest in this course is the comparative exploration of the experiences of women of color in the United States.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Child and Family Studies; Gender and Sexuality Studies
Units: 1.0
Instructor(s): Sledge, P.
(Fall 2017)

SOCL B205 Social Inequality
Introduction to the major sociological theories of gender, racial-ethnic, and class inequality with emphasis on the relationships among these forms of stratification in the contemporary United States, including the role of the upper class(es), inequality between and within families, in the work place, and in the educational system.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Gender and Sexuality Studies
Units: 1.0
(Fall 2017)
SOCL B217 The Family in Social Context
A consideration of the family as a social institution in the United States, looking at how societal and cultural characteristics and dynamics influence families; how the family reinforces or changes the society in which it is located; and how the family operates as a social organization. Included is an analysis of family roles and social interaction within the family. Major problems related to contemporary families are addressed, such as domestic violence and divorce. Cross-cultural and subcultural variations in the family are considered.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Child and Family Studies; Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

SOCL B218 Sociology of International Development
This course examines the persistent gap between the Global North and Global South around problems such as poverty, food insecurity, and access to health and education. We will examine theories and perspectives that address this disparity and explore alternatives to Western models of social organization, as put forth by social movements in the Global South. Throughout the course, we will read key primary texts (manifestos, communiqués, oral histories, and world financial institution reports) to understand the role of different players in the international development field, including global economic and governance institutions, non-governmental organizations, and—most importantly—feminist, Afro-descendant, indigenous, and other voices emerging in the Global South.
Approach: Cross-Cultural Analysis (CC)
Units: 1.0
(Not Offered 2017-2018)

SOCL B225 Women in Society
A study of the contemporary experiences of women of color in the Global South. The household, workplace, community, and the nation-state, and the positions of women in the private and public spheres are compared cross-culturally. Topics include feminism, identity and self-esteem; globalization and transnational social movements and tensions and transitions encountered as nations embark upon development.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Africana Studies; Child and Family Studies; Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Montes, V.
(Spring 2018)

SOCL B227 Sports in Society
Using a sociological, historical, and comparative approach, this course examines such issues as the role of the mass media in the transformation of sports; the roles played in sports by race, ethnicity, class, and gender; sports as a means of social mobility; sports and socialization; the political economy of sports; and sports and the educational system.
Approach: Cross-Cultural Analysis (CC)
Units: 1.0
(Not Offered 2017-2018)

SOCL B229 Black America in Sociological Perspective
This course presents sociological perspectives on various issues affecting black America as a historically unique minority group in the United States: the legacy of slavery and the Jim Crow era; the formation of urban black ghettos; the civil rights reforms; the problems of poverty and unemployment; the problems of crime and other social problems; the problems of criminal justice; the continuing significance of race; the varied covert modern forms of racial discrimination; and the role of race in American politics.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Counts towards: Africana Studies; Child and Family Studies
Units: 1.0
(Not Offered 2017-2018)

SOCL B235 Mexican-American Communities
For its unique history, the number of migrants, and the two countries’ proximity, Mexican migration to the United States represents an exceptional case in world migration. There is no other example of migration with more than 100 years of history. The copious presence of migrants concentrated in a host country, such as we have in the case of the 11.7 million Mexican migrants residing in the United States, along with another 15 million Mexican descendants, is unparalleled. The 1,933-mile-long border shared by the two countries makes it one of the longest boundary lines in the world and, unfortunately, also one of the most dangerous frontiers in the world today. We will examine the different economic, political, social and cultural forces that have shaped this centenarian migration influx and undertake a macro-, meso-, and micro-levels of analysis. At the macro-level of political economy, we will investigate the economic interdependency that has developed between Mexico and the U.S. over different economic development periods of these countries, particularly, the role the Mexican labor force has played to boosting and sustaining both the Mexican and the American economies. At the meso-level, we will examine different institutions both in Mexico and the U.S. that have determined the ways in which millions of Mexican migrant to this country. Last, but certainly not least, we will explore the impacts that both the macro- and meso-processes have had on the micro-level by considering the imperatives, aspirations, and dreams that have prompted millions of people to leave their homes and communities behind in search of better opportunities. This major life decision of migration brings with it a series of social transformations in family and community networks, this will look into the cultural impacts in both the sending and receiving migrant communities. In sum, we will come to understand how these three levels of analysis work together.
Approach: Cross-Cultural Analysis (CC)
Counts towards: Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies; Praxis Program
Units: 1.0
Instructor(s): Montes, V.
(Fall 2017)

SOCL B246 Sociology of Migration: A Cross-Cultural Overview of Contemporary Challenges
The twenty-first century began much as the twentieth century did for the United States with high levels of immigration. This has affected not only the nation, but the discipline of sociology. Just as early twentieth century Chicago School sociology focused on immigration and settlement issues, so too the first decade of the twenty-first century shows a flurry of sociological imagination devoted to immigration scholarship. This course
SOCL B257 Marginals and Outsiders: The Sociology of Deviance

An examination of non-normative and criminal behavior viewed from the standpoint of different theoretical perspectives on deviance (e.g., social strain, anomie, functionalism, social disorganization, symbolic interaction, and Marxism) with particular emphasis on social construction and labeling perspectives; and the role of subcultures, social movements and social conflicts in changing the normative boundaries of society. Topics include robbery, homicide, Black inner city violence, sexual deviance, prostitution, white collar crime, drug addiction and mental disorders.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Gender and Sexuality Studies
Units: 1.0
Instructor(s): Montes,V.
(Not Offered 2017-2018)

SOCL B258 Sociology of Education

Major sociological theories of the relationships between education and society, focusing on the effects of education on inequality in the United States and the historical development of primary, secondary, and post-secondary education in the United States. Other topics include education and social selection, testing and tracking, and micro- and macro-explanations of differences in educational outcomes. This is a Praxis I I course; placements are in local schools.

Approach: Cross-Cultural Analysis (CC)
Counts towards: Child and Family Studies; Praxis Program
Units: 1.0
Instructor(s): Karen,D.
(Fall 2017)

SOCL B262 Public Opinion

This course explores public opinion: what it is, how it is measured, how it is shaped, and how it changes over time. Specific attention is given to the role of elites, the mass media, and religion in shaping public opinion. Examples include racial/ethnic civil rights, abortion, gay/lesbian/transgendered sexuality, and inequalities.

Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)

SOCL B265 Quantitative Methods

An introduction to the conduct of empirical, especially quantitative, social science inquiry. In consultation with the instructor, students may select research problems to which they apply the research procedures and statistical techniques introduced during the course. Using SPSS, a statistical computer package, students learn techniques such as cross-tabular analysis, ANOVA, and multiple regression. Required of Bryn Mawr Sociology majors and minors. Non-society majors and minors with permission of instructor.

Approach: Quantitative Readiness Required (QR); Quantitative Readiness Required (QR)
Units: 1.0
Instructor(s): Wright,N.
(Fall 2017)

SOCL B275 Introduction to Survey Research Methods

The purpose of this course is to give the students the tools necessary to critically evaluate survey collection processes and the resulting data, as well as equip them with the skills to develop, execute, and analyze their own surveys to produce meaningful results. Topics include: proposal development, instrument design, question design, measurement, sampling techniques, survey pretesting, survey collection media, interviewing, index and scale construction, data analysis, interpretation and report writing. The course also examines the effects of demographic and socioeconomic factors in contemporary survey data collection.

Approach: Quantitative Readiness Required (QR)
Units: 1.0
(Not Offered 2017-2018)

SOCL B302 Social Theory

This course focuses primarily on the works of classical social theorists. The theorists include: George Herbert Meade, Emile Durkheim, Karl Marx, and Max Weber; and secondarily their influences on the works of more contemporary theorists: C. Wright Mills, Shulamith Firestone, Antonio Gramsci, Erving Goffman, Randall Collins, Robert Bellah, Howard Becker, and Pierre Bourdie. Among the theoretical conceptions examined: culture, religion, the sacred, power, authority, modernization, deviance, bureaucracy, social stratification, social class, status groups, social conflict, and social conceptions of the self.

Prerequisite: BM undergraduate Sociology major or minor.
Units: 1.0
Instructor(s): Sledge,P., Washington,R.
(Fall 2017, Spring 2018)

SOCL B303 Junior Conference: Discipline-Based Intensive Writing

This course will introduce students to a range of qualitative methods in the discipline and will require students to engage, through reading and writing, a wide range of sociological issues. The emphasis of the course will be to develop a clear, concise writing style, while maintaining a sociological focus. Substantive areas of the course will vary depending on the instructor.

Prerequisite: Required of and limited to Bryn Mawr Sociology Major, Junior Standing
SOCL B309 Sociology of Religion
This course will investigate what sociology offers to an historical and contemporary understanding of religion. Most broadly, the course explores how religion has fared under the conditions of modernity given widespread predictions of secularization yet remarkably resilient and resurgent religious movements the world over. The course is structured to alternate theoretical approaches to religion with specific empirical cases that illustrate, test, or contradict the particular theories at hand. It focuses primarily on the West, but situated within a global context.
Units: 1.0
(Not Offered 2017-2018)

SOCL B313 Sociology of Terrorism and Counterterrorism
Terrorism -- the use or threat of violence to achieve political, religious, or social goals -- is a centuries-old phenomenon, but terrorism has become a distressing feature of social life during the last three decades in particular. Since the early 1980s, the world has seen over 10,000 separate acts of terror that have caused thousands of deaths and billions of dollars in damage. This seminar, taught by a former CIA counterterrorism officer, will give students a sociological perspective on terrorism, including the ways in which the threat of terrorism has changed over time, the motivations of different terrorist groups, and the circumstances under which terrorism succeeds and fails. We will also explore America's counterterrorism efforts and grapple with some of the most challenging questions facing the U.S. intelligence community today: what are the best ways to combat terrorism? How do we define and recognize success and failure in the War on Terror? Prerequisite: One Social Science course: Sociology, psychology, political science, and anthropology (students should assume a lot of sociology knowledge)
Units: 1.0
(Not Offered 2017-2018)

SOCL B317 Comparative Social Policy: Cuba, China, US, Scandinavia
This course will examine different countries' policy choices to address different societal challenges. Four societal types - socialist (Cuba), post-socialist (China), capitalist (US), and social-democratic (Scandinavia) - will be studied to help us understand how these different kinds of societies conceive of social problems and propose and implement attempted solutions. We will examine particular problems/solutions in four domains: health/ sports; education; environment; technological development. As we explore these domains, we will attend to methodological issues involved in making historical and institutional comparisons
Counts towards: Education; Health Studies
Units: 1.0
(Not Offered 2017-2018)

SOCL B321 The Black American Intellectual Community
Viewing black American intellectuals from the perspective of the sociology of knowledge, this course examines the patterns of development and conflict in the black American intellectual community, from early 20th century to the 21st century. It highlights the social and historical influences that shaped black intellectuals' world views on racism, black social problems, racial integration, black culture and black identity. Prerequisites: At least one previous sociology course or a course focused on black Americans or race relations. Open only to sophomores, juniors, or seniors.
Counts towards: Africana Studies
Units: 1.0
Instructor(s): Washington, R.
(Fall 2017)

SOCL B326 Feminist Perspectives on Hlth
Increasingly, an individual's sense of self and worth as a citizen turn on their health identity. In this course we will draw on theories of gender, sexuality, medicalization, and biocitizenship to unravel the ways in which gender structures and medical institutions are mutually constitutive and to explore how this relationship, in turn, impacts individual identity. The course will take a global approach to feminist engagement with health issues with an emphasis on human rights and bodily autonomy.
Counts towards: Gender and Sexuality Studies; Health Studies
Units: 1.0
Instructor(s): Sledge, P.
(Spring 2018)

SOCL B331 Global Sociology: Capital, Power, and Protest in World-Historical Perspective
This course examines the social, economic and political dynamics underlying globalization. Through an analysis of global capitalism, the inter-state system, and transnational social movements, we will trace the local-global connections at the basis of contemporary issues like natural resource extraction, human rights violations, and labor insecurity. Prerequisite: Previous course in social science; permission of instructor.
Units: 1.0
Instructor(s): Montes, V.
(Spring 2018)

SOCL B342 Bodies in Social Life
Can social life exist without bodies? How can attention to the body influence our understanding of social processes of subjectivity, interaction, and practice? While the body has long been an "absent presence" in sociology, multiple approaches to theorizing and researching the body have emerged in recent decades. A sociological approach to the body and embodiment provides an opportunity to bridge the gap between everyday experience and analyses of broad social structures which can seem disconnected from daily life. In this course, we will examine the processes by which individual bodies are shaped by and, in turn, shape social life. Key questions to be explored include: how are bodies regulated by social forces; how do individuals
perform the body and how does interactional context influence this performance; what is the meaning of the body in social life; and is there a “right” body? Suggested preparation: At least one course in the social sciences.

Counts towards: Gender and Sexuality Studies; Health Studies
Units: 1.0
Instructor(s): Sledge,P.
(Fall 2017)

**SOCL B350 Movements for Social Justice in the US**

Throughout human history, powerless groups of people have organized social movements to improve their lives and their societies. Powerful groups and institutions have resisted these efforts in order to maintain their own privilege. Some periods of history have been more likely than others to spawn protest movements. What factors seem most likely to lead to social movements? What determines their success/failure? We will examine 20th-century social movements in the United States to answer these questions. Includes a film series. Prerequisite: At least one prior social science course or permission of the instructor.

Counts towards: Gender and Sexuality Studies; Peace, Justice and Human Rights
Units: 1.0
Instructor(s): Karen,D.
(Fall 2017)

**SOCL B358 Higher Education: Structure, Dynamics, Policy**

This course examines the structure and dynamics of the “non-system” of higher education in the US in historical and comparative perspective. Focusing on patterns of access, graduation, and allocation into the labor market, the course examines changes over time and how these vary at different types of institutions and cross-nationally. Issues of culture, diversity (especially with respect to class, race/ethnic, and gender), and programming will be examined. The main theoretical debates revolve around the relationship between higher education and the society (does it reproduce or transform social structure) in which it is embedded. Prerequisites: at least one social science course or permission of instructor.

Units: 1.0
Instructor(s): Karen,D.
(Spring 2018)

**SOCL B398 Senior Conference**

This capstone course for the sociology major focuses on major concepts or areas in sociology and requires students to develop their analytical and synthetic skills as they confront both theoretical and empirical materials. The Key emphasis in the course will be on students' writing. Through a variety of assignments (of different lengths and purposes), students will practice the process (drafts) and elements (clarity and concision) of good writing. Specific topical content will vary by semester according to the expertise of the instructor and the interests of students. Writing Attentive.

Prerequisite: BM undergraduate Sociology major.
Major Writing Requirement: Writing Intensive
Units: 1.0
Instructor(s): Karen,D., Washington,R.
(Fall 2017, Spring 2018)

**SOCL B403 Supervised Work**

Students have the opportunity to do individual research projects under the supervision of a faculty member.
Units: 1.0
(Fall 2017)

**SOCL B425 Praxis III: Independent Study**

Praxis III courses are Independent Study courses and are developed by individual students, in collaboration with faculty and field supervisors. A Praxis course is distinguished by genuine collaboration with fieldsite organizations and by a dynamic process of reflection that incorporates lessons learned in the field into the classroom setting and applies theoretical understanding gained through classroom study to work done in the broader community.

Counts towards: Praxis Program
Units: 1.0
(Not Offered 2017-2018)

**EDUC B266 Schools in American Cities**

This course examines issues, challenges, and possibilities of urban education in contemporary America. We use critical lenses issues of race, class, and culture; urban learners, teachers, and school systems; and restructuring and reform. While we look at urban education nationally over several decades, we use Philadelphia as a focal “case” that students investigate through documents and school placements. This is a Praxis II course (weekly fieldwork in a school required)
Approach: Cross-Cultural Analysis (CC)
Counts towards: Africana Studies; Child and Family Studies; Praxis Program
Units: 1.0
(Spring 2018)

**POLS B273 Race and the Law in the American Context**

An examination of the intersection of race and law, evaluating the legal regulations of race, the history and meanings of race, and how law, history and the Supreme Court helped shape and produce those meanings. It will draw on materials from law, history, public policy, and critical race theory.
Units: 1.0
(Not Offered 2017-2018)

**POLS B354 Comparative Social Movements: Power and Mobilization**

A consideration of the conceptualizations of power and “legitimate” and “illegitimate” participation, the political opportunity structure facing potential activists, the mobilizing resources available to them, and the cultural framing within which these processes occur. Specific attention is paid to recent movements within and across countries, such as feminist, environmental, and anti-globalization movements, and to emerging forms of citizen mobilization, including transnational and global networks, electronic mobilization, and collaborative policymaking institutions. Prerequisite: one course in POLS or SOCL or permission of instructor.
Counts towards: Environmental Studies
Units: 1.0
(Not Offered 2017-2018)
POLS B374 Education Politics & Policy
This course will examine education policy through the lens of federalism and federalism through a case study of education policy. The dual aims are to enhance our understanding of this specific policy area and our understanding of the impact that our federal system of government has on policy effectiveness.

Units: 1.0
(Not Offered 2017-2018)

POLS B375 Gender, Work and Family
As the number of women participating in the paid workforce who are also mothers exceeds 50 percent, it becomes increasingly important to study the issues raised by these dual roles. This seminar will examine the experiences of working and nonworking mothers in the United States, the roles of fathers, the impact of working mothers on children, and the policy implications of women, work, and family.

Counts towards: Child and Family Studies; Gender and Sexuality Studies
Units: 1.0
(Not Offered 2017-2018)

SOWK B554 Social Determinants of Health and Health Equity
The purpose of this course is to provide students with knowledge and an understanding of how structural factors (racism, sexism, homophobia, classism, discrimination, the built environment, poverty, working conditions, and the unequal distribution of power, income, goods, and services) contribute to racial/ethnic and gender disparities in health and well-being.

Counts towards: Praxis Program
Units: 1.0
(Not Offered 2017-2018)

SPANISH

Students may complete a major or minor in Spanish. Majors may pursue state certification to teach at the secondary level.

Faculty
Inés Arribas, Senior Lecturer in Spanish
Kaylea Berard, Senior Lecturer in Spanish
Stephen L. Bishop, Instructor
Martín Gaspar, Assistant Professor of Spanish and Acting Co-Director of the Latin American, Latina/o and Iberian Studies Program
María Cristina Quintero, Chair and Professor of Spanish
Enrique Sacerio-Gari, Dorothy Nepper Marshall Professor of Hispanic and Hispanic-American Studies (on leave semester II)
Rosi Song, Professor of Spanish and Director of Gender and Sexuality Studies

The major in Spanish offers a program of study in the language, literature, and culture of Spain, Latin America, and U.S. Latino communities. The program is designed to develop linguistic competence and critical skills, as well as a profound appreciation of the culture and civilization of the Hispanic world.

Our graduates have gone on to pursue successful careers in law, business, medicine, and translation, among others. This major program prepares students appropriately for graduate study in Spanish.

The language courses provide solid preparation and practice in spoken and written Spanish, including a thorough review of grammar and vocabulary contextualized by cultural readings and activities. SPAN 110 and SPAN 120 prepare students for advanced work in literature and cultural studies while improving competence in the language. The introductory literature courses treat a selection of the outstanding works of Spanish and Spanish-American, and U.S. Latino literature in various periods and genres. Three hundred-level courses deal intensively with individual authors, topics, or periods of special significance.

Students in all courses are encouraged to supplement their coursework with study in Spain or Spanish America either in the summer or during their junior year. All students who have taken Spanish at other institutions and plan to enroll in Spanish courses at Bryn Mawr must take a placement examination. The exam is offered online by the department and is available on our website.

The Department of Spanish works in cooperation with the Departments of French and Italian in the Romance Languages major. It also collaborates with the Latin American, Iberian, and Latina/o Studies (LAILS).

College Foreign Language Requirement
Before the start of the senior year, each student must complete, with a grade of 2.0 or higher, two units of foreign language. Students may fulfill the requirement by completing two sequential semester-long courses in one language, beginning at the level determined by their language placement. A student who is prepared for advanced work may complete the requirement instead with two advanced free-standing semester-long courses in the foreign language(s) in which she is proficient.

Major Requirements
Requirements for the Spanish major are:

- SPAN 110 (formerly 200, Introducción al análisis cultural),
- SPAN 120 (formerly 202, Introducción al análisis literario),
- four 200-level courses,
- three 300-level courses,
- and SPAN 398 (Senior Seminar).

The prerequisite for 200-level Spanish courses is the completion of SPAN 110 and/or SPAN 120. The prerequisite for 300-level courses is the completion of a 200-level course in Spanish. At least two courses for the major must be in Peninsular literature (Spain) and at least two in Latin American literature; one of the major courses should focus on pre-1700 literature. Two courses must be writing intensive (WI). Students can satisfy the writing requirement by taking SPAN 120, SPAN 243, and other 200-level courses designated as WI in any given semester. Students whose training includes advanced work may, with the permission of the department, be exempted from taking SPAN 110 and/or SPAN 120. SPAN 399 (Senior Essay) is optional for majors with a grade point average of 3.7 who seek to graduate with honors. It may not be counted as one of the 300-level requirements.

Please note: the department offers some courses taught in English. In order to receive major and minor credit, students must do substantial reading and written work in Spanish. No more than
two courses taught in English may be applied toward a major, and only one toward a minor.

Independent research (SPAN 403) is offered to students recommended by the department. The work consists of independent reading, conferences, and a long paper.

**Honors**

Departmental honors are awarded on the basis of a minimum grade point average of 3.7 in the major, the senior essay (SPAN 399), and the recommendation of the department.

**Minor Requirements**

Requirements for a minor in Spanish are six courses in Spanish beyond Intermediate Spanish, at least one of which must be at the 300 level. At least one course should be in Peninsular literature (Spain).

**Minor in Latin American, Iberian, and Latina/o Studies (LAILS)**

The Department of Spanish participates with other departments in offering a minor in Latin American, Iberian, and Latina/o Studies (LAILS).

**Teacher Certification**

The department also participates in a teacher-certification program. For more information see the description of the Education Program.

**COURSES**

**SPAN B101 Intermediate Spanish I**

A thorough review of grammar with special emphasis on speaking, listening, reading, and writing (group activities and individual presentations). Readings from the Hispanic world. There is a required additional hour conducted by a TA on Monday evenings from 5:10-6:00, 6:10-7:00 or 7:10-8:00. Prerequisite: SPAN 002 or placement.

Approach: Course does not meet an Approach

Units: 1.0

Instructor(s): Berard,K., Arribas,I.

(Fall 2017, Spring 2018)

**SPAN B102 Intermediate Spanish II**

Continuation of a thorough review of grammar with special emphasis on reading and writing. Selected readings from the Hispanic world. The class meets three days a week with the instructor. Continuation of a thorough review of grammar with special emphasis on reading and writing. Selected readings from the Hispanic world. The class meets three days a week with the instructor. Additional hour of practice and conversation with a language assistant on Monday evenings 5:10 pm-6:00 pm, 6:10pm-7:00 pm or 7:10 pm-8:00 pm for the first three weeks, which is replaced by conversations with a student partner from Barcelona, Spain, via Skype. Prerequisite: SPAN 101 or placement.

Approach: Course does not meet an Approach

Units: 1.0

Instructor(s): Arribas,I., Berard,K., Quintero,M.

(Fall 2017, Spring 2018)

**SPAN B110 Análisis cultural y grámatica en contexto**

An introduction to the history and cultures of the Spanish-speaking world in a global context: art, folklore, geography, literature, sociopolitical issues, and multicultural perspectives. Written and oral proficiency is emphasized. This course is a requisite for the Spanish major. Prerequisite: SPAN 102 or placement.

Approach: Cross-Cultural Analysis (CC)

Counts towards: Latin American, Iberian and Latina/o Studies

Units: 1.0

Instructor(s): Gaspar,M., Song,R.

(Fall 2017, Spring 2018)

**SPAN B119 Advanced Spanish Composition and Conversation**

This is an advanced course designed for students who want to improve their written and oral communicative abilities in Spanish. This course provides a comprehensive review of Spanish grammar with attention given to advanced concepts and structures. Writing skills are developed through the application of grammar concepts in composition. Students increase their aural/oral fluency through their participation in a variety of communicative activities such as performance of a one-act play, spoken word, debates, academic presentations, and interviews to the community. A wide range of questions will be discussed: current affairs, identity issues, literary and cultural topics from Spain and Latin America

Approach: Course does not meet an Approach

Units: 1.0

(Not Offered 2017-2018)

**SPAN B120 Introducción al análisis literario**

Readings from Spanish and Spanish-American works of various periods and genres (drama, poetry, short stories). Main focus on developing analytical skills with attention to improvement of grammar. This course is a requisite for the Spanish major. Prerequisite: SPAN 102, or placement.

Approach: Critical Interpretation (CI)

Major Writing Requirement: Writing Intensive

Counts towards: Latin American, Iberian and Latina/o Studies

Units: 1.0

Instructor(s): Quintero,M., Sacerio-Gari,E.

(Fall 2017, Spring 2018)

**SPAN B208 Drama y sociedad en España**

A study of the rich dramatic tradition of Spain from the Golden Age (16th and 17th centuries) to the 20th century within specific cultural and social contexts. The course considers a variety of plays as manifestations of specific sociopolitical issues and problems. Topics include theater as a site for fashioning a national identity; the dramatization of gender conflicts; and plays as vehicles of protest in repressive circumstances. Counts toward the Latin American, Latino and Iberian Peoples and Cultures Concentration. Prerequisite: SPAN B110 and/or B120 (previously SPAN B200/B202); or another SPAN 200-level course.

Approach: Critical Interpretation (CI); Inquiry into the Past (IP)

Counts towards: Latin American, Iberian and Latina/o Studies

Units: 1.0

(Not Offered 2017-2018)
SPAN B209 Lo que hemos comido: Identidades en España
This course considers the relationship between the food we eat and our sense of identity in the context of regional identity politics in Spain. We will review the historical tension as they surface in diverse linguistic and cultural communities and currently challenged by the new wave of immigration to the peninsula. Amid this intersection of different cultures and practices, we will study how each region as turned to its traditional cuisine and local culinary products to strengthen their sense of regional identity while strategizing to communicate this uniqueness beyond the brand of “Spain” to the world. We will examine, for instance, how this new trend compares to the tourism industry endorsed by the dictatorship in the 1960s. This discussion will serve as a case study to explore how communities remember and narrate their own histories to themselves and to others, using concepts such as taste, terroir, memory, and identity. Students in the course will view films and read fiction, essays, and culinary essays from around Spain. Prerequisite: SPAN 120 or SPAN 110.
Approach: Critical Interpretation (CI)
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

SPAN B211 Borges y sus lectores
Primary emphasis on Borges and his poetics of reading; other writers are considered to illustrate the semiotics of texts, society, and traditions. Prerequisite: SPAN B110 and/or B120 (previously SPAN B200/B202); or another SPAN 200-level course.
Approach: Critical Interpretation (CI)
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

SPAN B216 Introducción a la lingüística hispánica
A survey of the field of Hispanic linguistics. We will explore the sounds and sound patterns of Spanish (phonetics and phonology), how words are formed (morphology), the structure and interpretation of sentences (syntax and semantics), language use (pragmatics), the history and dialects of the Spanish language, and second language acquisition. Prerequisite: SPAN B110 or SPAN B120 or permission of the instructor. Critical Interpretation (CI)
Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

SPAN B219 Focus: Imaginando Barcelona
An introduction to the textual and visual representation of the city of Barcelona, a key geographical, historical, political, and cultural referent for Spain and Catalonia. In this course we will read past and present texts that narrate the origins and the symbolic significance of this city and discuss recent films that capture the evolving experience of its residents, as a global destination for many and a city of immigrants. Prerequisite: SPAN B110 or SPAN B120.
Approach: Critical Interpretation (CI)
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 0.5
(Not Offered 2017-2018)

SPAN B223 Género y modernidad en la narrativa del siglo XIX
A reading of 19th-century Spanish narrative by both men and women writers, to assess how they come together in configuring new ideas of female identity and its social domains, as the country is facing new challenges in its quest for modernity. Prerequisites: SPAN B110 and/or B120 (previously SPAN B200/B202); or another SPAN 200-level course.
Approach: Inquiry into the Past (IP)
Major Writing Requirement: Writing Intensive
Counts towards: Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

SPAN B225 La poesía hispanoamericana
Study of poetic language from the Avant-garde movements to the present. Special attention to key figures. Prerequisite: Spanish 120 or another 200-level course.
Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

SPAN B231 El cuento y novela corta en España
A reading of 19th-century Spanish narrative by both men and women writers, to assess how they come together in configuring new ideas of female identity and its social domains, as the country is facing new challenges in its quest for modernity. Prerequisites: SPAN B110 and/or B120; or another SPAN 200-level course.
Approach: Critical Interpretation (CI)
Units: 1.0
(Not Offered 2017-2018)

SPAN B232 Encuentros culturales en América Latina
This course introduces canonical Latin American texts through translation scenes represented in them. Arranged chronologically since the first encounters during the conquest until contemporary times, the readings trace different modulations of a constant linguistic and cultural preoccupation with translation in Latin America. Translation scenes are analyzed through close reading, and then considered as barometers for understanding the broader cultural climate. Special emphasis is placed on key notions for literary analysis and translation studies, as well as for linking the literary text with cultural, social, political, and historical processes. Prerequisite: SPAN B110 and/or B120 (previously SPAN B200/B202); or another SPAN 200-level course.
Approach: Cross-Cultural Analysis (CC); Inquiry into the Past (IP)
Units: 1.0
Instructor(s): Gaspar,M.
(Fall 2017)

SPAN B233 Focus: La Habana y sus textos
La Habana (a historical, artistic and literary crossroad) is studied in its intersemiotic complexity. Readings from the colonial period to the present. Authors included, among others: La Condesa de
SPAN B242 José Martí y el equilibrio mundial
An introductory course on José Martí: the writer, the thinker, the revolutionary. Texts include selections from La Edad de Oro (a magazine for children), essays on the arts, the United States, Nuestra América, political struggle and interdependence (“world equilibrium”), a selection of his poetic works and a novella. Prerequisite: SPAN B110 and/or B120 (previously SPAN B200/B202); or another SPAN 200-level course.
Approach: Critical Interpretation (CI)
Units: 1.0
(Instructor(s): Sacerio-Gari, E.)
(Fall 2017)

SPAN B243 Temas de la literatura hispana
This is a topic course. Topics vary. Prerequisite: SPAN B110 and/or B120 (previously SPAN B200/B202); or another 200-level course.
Approach: Critical Interpretation (CI)
Major Writing Requirement: Writing Intensive
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
(Instructor(s): Sacerio-Gari, E.)
(Not Offered 2017-2018)

SPAN B252 Compassion, Indignation, and Anxiety in Latin American Film
Stereotypically, Latin Americans are viewed as “emotional people”—often a euphemism to mean irrational, impulsive, wildly heroic, fickle. This course takes this expression at face value to ask: Are there particular emotions that identify Latin Americans? And, conversely, do these “people” become such because they share certain emotions? Can we find a correlation between emotions and political trajectories? To answer these questions, we will explore three types of films that seem to have, at different times, taken hold of the Latin American imagination and feelings: melodramas (1950s-1960s), documentaries (1970s-1990s), and “low-key” comedies (since 2000s.)
Approach: Cross-Cultural Analysis (CC)
Counts towards: Film Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

SPAN B260 Ariel/Calibán y el discurso americano
A study of the transformations of Ariel/Calibán as images of Latin American culture. Prerequisite: SPAN B110 and/or B120 (previously SPAN B200/B202); or another SPAN 200-level course.
Approach: Critical Interpretation (CI); Inquiry into the Past (IP)
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 0.5
(Instructor(s): Sacerio-Gari, E.)
(Not Offered 2017-2018)

SPAN B265 Escritoras españolas: entre tradición, renovación y migración
Fiction by women writers from Spain in the 20th and 21st century. Breaking the traditional female stereotypes during and after Franco’s dictatorship, the authors explore through their creative writing changing sociopolitical and cultural issues including regional identities and immigration. Topics of discussion include gender marginality, feminist studies and the portrayal of women in contemporary society. Prerequisite: SPAN B110 and/or B120 (previously SPAN B200/B202); or another SPAN 200-level course.
Approach: Critical Interpretation (CI)
Counts towards: Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
(Instructor(s): Song, R.)
(Spring 2018)

SPAN B307 Cervantes
A study of themes, structure, and style of Cervantes’ masterpiece Don Quijote and its impact on world literature. In addition to a close reading of the text and a consideration of narrative theory, the course examines the impact of Don Quijote on the visual arts, music, film, and popular culture. Counts toward the Latin American, Latino and Iberian Peoples and Cultures Concentration. Prerequisite: at least one SPAN 200-level course.
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

SPAN B309 La mujer en la literatura española del Siglo de Oro
A study of the depiction of women in the fiction, drama, and poetry of 16th- and 17th-century Spain. Topics include the construction of gender; the idealization and codification of women’s bodies; the politics of feminine enclosure (convent, home, brothel, palace); and the performance of honor. The first half of the course will deal with representations of women by male authors (Calderón, Cervantes, Lope, Quevedo) and the second will be dedicated to women writers such as Teresa de Ávila, Ana Caro, Juana Inés de la Cruz, and María de Zayas. Prerequisite: at least one SPAN 200-level course.
Counts towards: Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

SPAN B311 Crimen y detectives en la narrativa hispánica contemporánea
An analysis of the rise of the hard-boiled genre in contemporary Hispanic narrative and its contrast to classic detective fiction, as a context for understanding contemporary Spanish and Latin American culture. Discussion of pertinent theoretical implications and the social and political factors that contributed to the genre’s...
evolution and popularity. Prerequisite: at least one SPAN 200-level course.
Units: 1.0
(Not Offered 2017-2018)

SPAN B315 El futuro ya llegó: relatos del presente en América Latina
Taught in Spanish. In the 21st Century, “Here and now” is not what it used to be. There is no single “here” but instead multiple, coexisting realities (that of the cellphone, the street, the ‘world’). There’s no clear present when the “now” is multiple. In this course we will explore 21st century Latin American short-stories, films, works of art, and novellas that synchronize with our contemporary circumstances—fictions and representations where realities alternate, identities flow, and the world appears oddly out of scale. As contemporaries, you will also be asked to write fictions about life “here and now.” Throughout, we will keep two fundamental questions in mind: What is reality (here)? What is the contemporary (now)? Prerequisite: at least one SPAN 200-level course.
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Gaspar, M.
(Spring 2018)

SPAN B317 Poéticas del deseo y el poder en la lirica del Siglo de Oro
A study of the evolution of the lyric in Spain during the Renaissance and Baroque periods beginning with the oral tradition and the imitation of Petrarch. Topics include: the representation of women as objects of desire and pre-texts for writing, the political and national subtexts for lyric production, the self-fashioning and subjectivity of the lyric voice, theories of parody and imitation, and the feminine appropriation of the Petrarchan tradition. Although concentrating on the poetry of Spain, reading will include texts from Italy, France, England and Mexico. Taught in Spanish. Prerequisites: at least one 200-level course. Counts toward Latin American, Iberian, and Latina/o Studies
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

SPAN B318 Adaptaciones literarias en el cine español
Film adaptations of literary works have been popular since the early years of cinema in Spain. This course examines the relationship between films and literature, focusing on the theory and practice of film adaptation. Attention will be paid to the political and cultural context in which these texts are being published and made into films. Students will be required to attend film screenings or view films on their own devices. Prerequisite: A 200-level course in Spanish.
Counts towards: Gender and Sexuality Studies; Film Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Song, R.
(Fall 2017)

SPAN B321 Surrealismo al afrorrealismo
Examines artistic texts that trace the development and relationships of surrealism, lo real maravilloso americano, realismo mágico and afrorrealismo. Manifestos and literary works by Latin American authors will be emphasized: Miguel Angel Asturias, Alejo Carpentier, Gabriel García Márquez, Isabel Allende, Laura Esquivel, Quince Duncan. Prerequisite: at least one SPAN 200-level course.
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

SPAN B322 Queens, Nuns, and Other Deviants in the Early Modern Iberian World
The course examines literary, historical, and legal texts from the early modern Iberian world (Spain, Mexico, Peru) through the lens of gender studies. The course is divided around three topics: royal bodies (women in power), cloistered bodies (women in the convent), and delinquent bodies (figures who defy legal and gender normativity). Course is taught in English and is open to all juniors or seniors who have taken at least one 200-level course in a literature department. Students seeking Spanish credit must have taken BMC Spanish 110 and/or 120 and at least one other Spanish course at a 200-level, or received permission from instructor.
Counts towards: Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

SPAN B323 Memoria y Guerra Civil
A look into the Spanish Civil War and its wide-ranging international significance as both the military and ideological testing ground for World War II. This course examines the endurance of myths related to this conflict and the cultural memory it has produced along with the current negotiations of the past that is taking place in democratic Spain. Prerequisite: at least one SPAN 200-level course.
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Song, R.
(Spring 2018)

SPAN B326 Voces trasplantadas: teoría y práctica de la traducción
Taught in Spanish. Translation has been argued to be both impossible and inevitable. Theoretically impossible, because no two languages are perfectly equivalent; practically inevitable, because cultures, and human beings, are constantly interpreting one another—and understanding themselves in the process. This course is an introduction to translation as a practice with linguistic, literary, and cultural implications. It is organized in three steps. We will begin by exploring the linguistic aspect of translation: the theories (and myths) about language difference and equivalence, and how they can be put into practice. Then we will focus on translating literary texts of different genres (from canonical epics to film, from poems to short stories and proverbs), and we will simultaneously examine how the various types of texts have spurred very different opinions about what is a good or bad translation, what is desirable, and what is not. Finally, we will trace the role of translation in cultural exchanges, as well as its defining presence in contemporary debates on "world literature.” Prerequisite: At least one 200 level Spanish course.
Units: 1.0
(Not Offered 2017-2018)
SPAN B332 Novelas de las Américas
What do we gain by reading a Latin American or a US novel as “American” in the continental sense? What do we learn by comparing novels from “this” America to classics of the “other” Americas? Can we find through this Panamericanist perspective common aesthetics, interests, conflicts? In this course we will explore these questions by connecting and comparing major US novels with Latin American classics of the 20th and 21st century. We will read these works in clusters to illuminate aesthetic, political and cultural resonances and affinities. This course is taught in Spanish. Prerequisite: at least one SPAN 200-level course.
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

SPAN B350 Lo fantástico y el cuento hispanoamericano
Special attention to the double, the fantastic and the sociopolitical thematics of short fiction in Spanish America. Authors include Quiroga, Borges, Carpenter, Rulfo, Cortázar and Valenzuela. Prerequisite: at least one SPAN 200-level course.
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

SPAN B351 Tradición y revolución: Cuba y su literatura
An examination of Cuba, its history and its literature with emphasis on the analysis of cultural and economic transformations. Major topics include slavery and resistance; Cuba’s struggles for freedom; changing cultural policies and film of the Revolution. Prerequisite: at least one SPAN 200-level course.
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

SPAN B370 Literatura y delincuencia
A study of the origins, development and transformation of the picaresque genre from its origins in 16th- and 17th-century Spain through the 21st century. Using texts, literature, painting, and film from Spain and Latin America, we will explore topics such as the construction of the fictive self, the poetics and politics of criminality, transgression in gender and class. Among the topics to be discussed: criminalization of poverty, prostitution, and the feminine picaresque. Prerequisite: At least one SPAN 200-level course.
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
Instructor(s): Quintero,M.
(Fall 2017)

SPAN B398 Senior Seminar
The study of special topics, critical theory and approaches with primary emphasis on Hispanic literatures. A requirement for all Spanish Majors. Some topics and readings will be prepared in consultation with the students.
Prerequisite: BM undergraduate Spanish major.
Units: 1.0
Instructor(s): Gaspar,M.
(Fall 2017)

SPAN B399 Senior Essay
Available only to Spanish majors whose proposals are approved by the department. Students must identify a faculty member as director of the essay during the Fall semester of the senior year.
Units: 1.0
(Not Offered 2017-2018)

SPAN B403 Supervised Work
Independent reading, conferences, and a long paper; offered to senior students recommended by the department.
Units: 1.0
(Fall 2017)

ENGL B217 Narratives of Latinidad
This course explores how Latin/o writers fashion bicultural and transnational identities and narrate the intertwined histories of the U.S. and Latin America. We will focus on topics of shared concern among Latino groups such as struggles for social justice, the damaging effects of machismo and racial hierarchies, the politics of Spanglish, and the affective experience of migration. By analyzing a range of cultural production, including novels, poetry, testimonial narratives, films, activist art, and essays, we will unpack the complexity of Latinidad in the Americas.
Approach: Critical Interpretation (CI)
Counts towards: Africana Studies; Gender and Sexuality Studies; Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

ENGL B236 Latina/o Culture and the Art of Migration
Gloria Anzaldúa has famously described the U.S.-Mexico border as an open wound and the border culture that arises from this fraught site as a third country. This course will explore how Chicana/os and Latina/os creatively represent different kinds of migrations across geo-political borders and between cultural traditions to forge transnational identities and communities. We will use cultural production as a lens for understanding how citizenship status, class, gender, race, and language shape the experiences of Latin American migrants and their Latina/o children. We will also analyze alternative metaphors and discourses of resistance that challenge anti-immigrant rhetoric and reimagine the place of undocumented migrants and Latina/os in contemporary U.S. society. Over the course of the semester, we will probe the role that literature, art, film, and music can play in the struggle for migrants’ rights and minority civil rights, querying how the imagination and aesthetics can contribute to social justice. We will examine a number of different genres, as well as read and apply key theoretical texts on the borderlands and undocumented migration.
Approach: Cross-Cultural Analysis (CC); Critical Interpretation (CI)
Counts towards: Latin American, Iberian and Latina/o Studies
Units: 1.0
(Not Offered 2017-2018)

GNST B245 Introduction to Latin American, Iberian and Latina/o Studies
A broad, interdisciplinary survey of themes uniting and dividing societies from the Iberian Peninsula to the Americas. The class introduces the methods and interests of all departments in the concentration, posing problems of cultural continuity and
change, globalization and struggles within dynamic histories, political economies, and creative expressions. Course is taught in English.

Approach: Cross-Cultural Analysis (CC)  
Counts towards: Latin American, Iberian and Latina/o Studies; International Studies  
Units: 1.0  
Instructor(s): Gaspar,M.  
(Spring 2018)

SPAN B001 Beginning Spanish I  
Develops basic communicative skills in both oral and written Spanish. Introduces students to different aspects of Hispanic and Latino cultures. Assumes no previous study of Spanish. The Tuesday class is a mandatory practice session with a teaching assistant.

Approach: Course does not meet an Approach  
Units: 1.0  
Instructor(s): Arribas,I., Berard,K., Bishop,S.  
(Fall 2017)

SPAN B002 Beginning Spanish II  
Second course of the First-year Spanish language sequence. Designed to develop basic communicative skills in both oral and written Spanish. Students are exposed to different aspects of Hispanic and Latino cultures. The Tuesday class is a mandatory practice session with a teaching assistant. Prerequisite: SPAN B001 or placement.

Approach: Course does not meet an Approach  
Units: 1.0  
Instructor(s): Arribas,I., Berard,K.  
(Fall 2017, Spring 2018)

VISUAL STUDIES

Students may minor in Visual Studies at Haverford College.

Core Faculty

Imke Brust, Assistant Professor, VCAM Faculty Fellow (2018-2019)
Victoria Funari, Hurford Center for the Arts and Humanities (HCAH) Visual Media Scholar
Christina Knight, Assistant Professor, Director of Visual Studies
John Muse, Hurford Center for the Arts and Humanities (HCAH) Visual Media Scholar
Lindsay Reckson, Assistant Professor, VCAM Faculty Fellow (2017-2019)
Erin Schoneveld, Assistant Professor, VCAM Faculty Fellow (2017-2018)

The Interdisciplinary Visual Studies minor invites students both to investigate their place in a global system of images and make images, objects, and digital artifacts with critical awareness. Additionally, the program trains students in interdisciplinary rigor and encourages them to examine the relationship between the visual and various structures of power.

Located in the new Visual Culture, Arts and Media facility (VCAM), Visual Studies links elements of the curriculum, campus, and broader community, highlighting the intersections between courses, faculty, students, departments, and Centers engaging the visual.

Curriculum

The Visual Studies curriculum is organized to help students develop critical and creative engagement with visual experience across media, time, and cultures.

All students are required to take an introductory gateway course and a senior-level capstone course. The introductory course will cover a variety of disciplinary approaches to the field of Visual Studies, and will include guest lectures, field trips for hands-on learning, and an introduction to some form of making. The capstone course will consolidate a student experience of the interdisciplinary minor that integrates visual scholarship, making, and public engagement. Students will select their four elective courses from three categories: Visual Literacy, Labs/Studio Courses and The Ethics of the Visual.

Students interested in the Interdisciplinary Visual Studies Minor should plan their course schedule in consultation with the Director of Visual Studies and with their major advisor. Please note: currently no more than one of the six minor credits may count towards the student’s major.

Minor Requirements

The minor will include six courses:

- The Introduction to Visual Studies gateway course, offered each fall
- Four elective courses selected from three categories (please find a current list of approved courses on the Visual Studies website):
  - Visual Literacy Courses that encourage students to describe, analyze, and negotiate the visual and the impact of digital and/or material technologies on art, culture, science, commerce, policy, society, and the environment
  - Labs/Studio Courses Courses that create curricular opportunities for students to make images, objects, films and digital artifacts and develop a critical awareness of the relationship between process, product, and reception
  - The Ethics of the Visual Courses that invite students to examine the relationship between the visual and social structures of power, analyzing the role of images in making consumers and attending to the role that images play in constructing “others” through such categories as race, gender, or disability
  - A Capstone Seminar where students will work in small groups to research and propose a project that engages the larger campus community.

COURSES

NB: In addition to the following list, all courses in cognate departments (Fine Arts at Haverford, History of Art, Museum Studies and Film Studies at Bryn Mawr) will count as electives in the Visual Studies Minor.

VIST H142 INTRODUCTION TO VISUAL STUDIES

An introduction to the trans-disciplinary field of Visual Studies, its methods of analysis and topical concerns. Traditional media and artifacts of art history and film theory, and also an examination of the ubiquity of images of all kinds, their systems of transmission,
their points of consumption, and the very limits of visuality itself. Crosslisted: Visual Studies, Fine Arts, Comparative Literature (Offered Fall 2017)

**VIST H203 UKIYO-E: THE ART OF JAPANESE PRINTS**

This course will explore the evolution of Japanese woodblock prints, artists, collectors, and exhibition practices from the 17th century through the present day. Crosslisted: Visual Studies, East Asian Languages & Cultures (Offered Fall 2017)

**VIST H215 REALISM, RACE, AND PHOTOGRAPHY**

This course examines American literary realism and turn-of-the-century photography as complementary and sometimes competing practices, with a focus on their complex role in the imaging and imagining of racial identity. Fulfills ACNC concentration requirement. Crosslisted: English, Visual Studies; Prerequisite(s): First-Year Writing, or instructor consent. (Offered Fall 2017)

**VIST H229 TOPICS IN VISUAL STUDIES: ROLAND BARTHES AND THE IMAGE**

An exploration of the rhetoric of visual culture through an examination of 20th century French critic Roland Barthes’ many writings on photography, film, and what he calls the “civilized code of perfect illusions.” We will spend the semester reading his texts, charting the trajectory of a career that begins with the euphoria of an ever-expanding semiotic and ends with a meditation on the limits of this very project. Crosslisted: Visual Studies, Fine Arts, Comparative Literature (Offered Fall 2017)

**VIST H230 POSTWAR JAPANESE CINEMA**

This course provides an introduction to Japanese cinema from the immediate Postwar period of 1945 to the present day. Focusing on films by influential directors including Ozu Yasujirō, Kurosawa Akira, and Mizoguchi Kenji among others we will consider how Japanese filmmakers use cinema to investigate issues of truth, beauty, identity, and nationhood in an attempt to answer fundamental questions regarding life and death in Japan’s Postwar period. Crosslisted: East Asian Languages & Cultures, Environmental Studies, Visual Studies (Offered Spring 2018)

**VIST H243 INTRODUCTION TO DOCUMENTARY VIDEO PRODUCTION**

The craft and theory of documentary video production. The basics, including use of HD digital cameras, lighting and sound techniques, and nonlinear video editing, culminating in the completion of short documentaries during the semester. Attendance at weekly documentary screenings is required, Thurs 7:00-9:30pm. (Offered Fall 2017)

**VIST H258 AMERICAN QUEEN: DRAG IN CONTEMPORARY ART AND PERFORMANCE**

An interdisciplinary visual studies examination of queer subcultural performance and its influence on contemporary American culture. Readings include live performance, visual art and film as well as historical and theoretical secondary sources. Crosslisted: Visual Studies, Independent College Programs; Prerequisite(s): An intro course in Gen/Sex or instructor consent. (Offered Fall 2017)

**VIST H305 ART AND THE ENVIRONMENT IN EAST ASIA**

This course examines the relationship between environment and the arts in China and Japan. In particular, how artists engage with and respond to nature through varied modes of artisic production and exhibition. Crosslisted: East Asian Languages & Cultures, Environmental Studies, Visual Studies (Offered Fall 2017)

**VIST H346 TOPICS IN 18TH-CENTURY LITERATURE: NEW(S) MEDIA AND PRINT CULTURE**

This course explores a century of polemic and performance in relation to more recent political, formal and legal debates about digital technologies. In particular we will focus on modernity's shifting visual representations of materiality and circulation; ownership, authority and license; citation, plagiarism and piracy. What structures control systems of knowledge production and dissemination in the eighteenth century and today? Our most ambitious text will be Laurence Sterne’s strange novel Tristram Shandy—a brilliant meditation on experimental fiction, mortality, history, and digression for eighteenth-century and contemporary readers. Interdisciplinary students welcome. Crosslisted: English, Visual Studies Prerequisite(s): One 200-level English course or instructor consent. (Offered Fall 2017)

**VIST H353 THE DOCUMENTARY BODY: ADVANCED MEDIA PRODUCTION**

The theory and craft of documentary film through an exploration of representations of the body. Students produce short documentaries, hone camera and editing skills, and learn basic producing skills. Students may also explore new media forms. Required weekly screenings, Thurs 7:00-9:30pm. Prerequisite(s): One introductory video production class or equivalent experience or instructor consent. (Offered Spring 2018)

**ANTH H112 THE ANTHROPOLOGY OF ARCHITECTURE**

A survey of anthropological approaches to architecture, with a particular interest in how architecture expresses senses of place. Readings will cover indigenous and vernacular architecture, the modernist movement, ecological design, and forms of housing. (Offered Fall 2017)

**COML H268 ARTISTS UNDER THE POLICING GAZE OF THE STATE: POLITICS, HISTORY, AND PERFORMANCE**

An investigation of what permanent surveillance meant and means today for society at large and for individual artists living under its pressure, through interdisciplinary texts on the theory and history of surveillance and artworks in multiple genres and media. Crosslisted: Comparative Literature, Independent College Programs, PJHR (Offered Fall 2017)

**EALC H370 ADVANCED TOPICS IN BUDDHIST STUDIES: THE VISUAL CULTURE OF PURE LAND BUDDHISM**

Advanced course on a topic chosen annually by instructor. The purpose of this course is to give students with a basic background in Buddhist Studies deeper conversancy with a particular textual, thematic, or practice tradition in the history of Buddhism. The 2017-2018 iteration will focus on Pure Land Buddhism, and especially on visual culture and iconology. Prerequisite(s): EALC 201 or instructor consent. (Offered Fall 2017)

**FREN H212 GRAMMAIRE AVANCÉE: COMPOSITION ET CONVERSATION**

The principal objective of this course is to allow its participants to master the techniques of composition and to write with a growing ease in order to express themselves with pertinent and original ideas. Students will contribute to the creation of an
views of embodiment, disability, and difference? Open only to first-year students as assigned by the Director of College Writing. (Offered Fall 2017)

HIST H264 MATERIALITY AND SPECTACLE IN NINETEENTH CENTURY UNITED STATES

Spectacles reflect, influence, and change cultural experiences, meaning, and understanding. This course will consider the materiality of spectacular nineteenth century US events through critical examination of historical accounts, primary research, and close readings of objects. Crosslisted: Anthropology, History (Offered Fall 2017)

MUSC H254 TONES, WORDS, AND IMAGES

This course is designed around a core group of works that demonstrate musical interaction with a variety of media such as literary and dramatic text, visual art and architecture, and the physical movement of dance. Drawing from the rich resource of Western tradition, examples for study range from the German Lied of the Classical and Romantic periods to the contemporary collaborations of Philip Glass and filmmaker Godfrey Reggio. Along the way we encounter many of the principal currents in the development of the arts—impressionism, symbolism, expressionism, pointillism, verismo, abstraction—and the genres of song cycle, opera, melodrama, tone poem, ballet, theater and film. (Offered Fall 2017)

RELG H303 RELIGION, LITERATURE AND REPRESENTATION: IMAGES OF KRISHNA

This course approaches the Hindu god Krishna through varied expressions in architecture, sculpture, paintings, textiles, landscape design, poetry, music, dance, and drama. We will ask how these practices were employed to visualize the divine, to nurture faith and passion, and to gain proximity to the transcendent deity. Class work will include field trips to local temples and museums. (Offered Fall 2017)

SPAN H210 SPANISH AND SPANISH AMERICAN FILM STUDIES

Exploration of films in Spanish from both sides of the Atlantic. The course will discuss approximately one movie per class, from a variety of classic and more recent directors such as Luis Buñuel, Carlos Saura, Pedro Almodóvar, Lucrecia Martel among others. The class will focus on the analysis of cinematic discourses as well as the films' cultural and historic background. The course will also provide advanced language training with particular emphasis in refining oral and writing skills. This course is conducted in Spanish. Crosslisted: Spanish, Comparative Literature; Prerequisite(s): SPAN 102, or placement, or instructor consent. (Offered Fall 2017)

WRPR H118 PORTRAITS OF DISABILITY AND DIFFERENCE

In this seminar we will explore visual and literary portraits and self-portraits of bodies marked by difference, bodies that often elicit stares. We will ask: What kinds of stories are told about these bodies? How do memoirs and self-portraits by people with disabilities draw on and challenge traditions of life writing and portraiture? How does this work enlarge cultural and aesthetic

Peter A. Beckman, Ph.D. (University of British Columbia, Vancouver), Marion Reilly Professor of Physics
Carol L. Bernstein, Ph.D. (Yale University), Mary E. Garrett Alumnae Professor Emeritus of English and Professor Emeritus of Comparative Literature
Sandra Berwind, Ph.D. (Bryn Mawr College), Professor Emeritus of English
Cynthia Bisman, Ph.D. (University of Kansas), Professor Emeritus of Social Work and Social Research
Charles Brand, Ph.D. (Harvard University), Professor Emeritus of History
Peter M. Briggs, Ph.D. (Yale University), Professor of English
Jane Caplan, DPHIL (University of Oxford), Majorie Walter Goodhart Professor Emeritus of European History
Isabelle Cazeaux, Ph.D. (Columbia University), Alice Carter Dickerman Professor Emeritus of Music
Maria DeOca Corwin, Ph.D. (Smith College), Associate Professor Emeritus of Social Work and Social Research
Maria Luisa Crawford, Ph.D. (University of California, Berkeley), Professor Emeritus of Geology and Curator of the Geology Mineral Collection
William A. Crawford, Ph.D. (University of California, Berkeley), Professor Emeritus of Geology
Dan E. Davidson, Ph.D. (Harvard University), Professor of Russian on the Myra T. Cooley Lectureship in Russian and Director of the Russian Language Institute
Christopher Davis, B.A. (University of Pennsylvania), Senior Lecturer Emeritus in the Arts

Richard Davis, Ph.D. (Columbia University), Professor Emeritus of Anthropology
Susan Dean, Ph.D. (Bryn Mawr College), Professor Emeritus of English
Gregory W. Dickerson, Ph.D. (Princeton University), Professor Emeritus of Greek
Nancy C. Dorian, Ph.D. (University of Michigan Ann Arbor), Professor Emeritus of Linguistics in German and Anthropology
Richard B. Du Boff, Ph.D. (University of Pennsylvania), Samuel and Etta Wexler Professor Emeritus of Economic History
Richard S. Ellis, Ph.D. (The University of Chicago), Professor Emeritus of Classical and Near Eastern Archaeology
Noel J.J. Farley, Ph.D. (Yale University), Professor Emeritus and Harvey Wexler Professor Emeritus of Economics
Julia H. Gaisser, Ph.D. (The University of Edinburgh), Eugenia Chase Guild Professor Emeritus of the Humanities and Professor of Latin
Stephen Gardiner, Ph.D. (University of North Carolina, Chapel Hill), Senior Lecturer Emeritus of Biology
Helen Grundman, Ph.D. (University of California, Berkeley), Professor Emeritus of Mathematics
Michel Guggenheim, Ph.D. (Yale University), Professor Emeritus of French
Richard Hamilton, Ph.D. (University of Michigan Ann Arbor), Paul Shorey Professor Emeritus of Greek
Margaret M. Healy, L.H.D. (Villanova University), Treasurer Emeritus of the College
Jane Hedley, Ph.D. (Bryn Mawr College), K. Laurence Stapleton Professor Emeritus of English
Christiane Hertel, Ph.D. (Eberhard Karls-Universität Tübingen), Professor Emeritus of History of Art
Rhonda J. Hughes, Ph.D. (University of Illinois), Helen Hermann Professor Emeritus of Mathematics
Thomas H. Jackson, Ph.D. (Yale University), Professor Emeritus of English
Anthony R. Kaney, Ph.D. (University of Illinois at Chicago), Professor Emeritus of Biology
Toba Kerson, Ph.D. (University of Pennsylvania), Mary Hale Chase Professor Emeritus of Social Sciences
Dale Kinney, Ph.D. (New York University), Eugenia Chase Guild Professor Emeritus of the Humanities and Professor Emeritus of History of Art
Christine Koggel, Ph.D. (Queens College), The City University of New York, Harvey Wexler Professor Emeritus of Philosophy
Joseph E. Kramer, Ph.D. (Princeton University), Professor Emeritus of English
Michael Krausz, Ph.D. (University of Toronto), Milton C. Nahm Professor Emeritus of Philosophy
Catherine Lafarge, Ph.D. (Yale University), Professor Emeritus of French

Barbara Miller Lane, Ph.D. (Harvard University), Andrew W. Mellon Professor Emeritus of the Humanities and Professor Emeritus of History

Philip Lichtenberg, Ph.D. (Case Western Reserve University), Mary Hale Chase Professor Emeritus of Social Science, Social Work and Social Research and Professor Emeritus of Social Work and Social Research

Frank B. Mallory, Ph.D. (California Institute of Technology), W. Alton Jones Emeritus Professor of Chemistry

Clark McCauley, Ph.D. (University of Pennsylvania), Professor Emeritus of Psychology

Stella Miller-Collett, Ph.D. (Bryn Mawr College), Rhys Carpenter Professor Emerita of Classical and Near Eastern Archaeology

Carolyn E. Needleman, Ph.D. (Washington University), Professor Emeritus of Social Work and Social Research

Harriet B. Newburger, Ph.D. (University of Wisconsin-Milwaukee), Associate Professor Emeritus of Economics

George S. Pahomov, Ph.D. (New York University), Professor Emeritus of Russian

Nicholas Patruno, Ph.D. (Rutgers, The State University of New Jersey), Professor Emeritus of Italian

Lucian B. Platt, Ph.D. (Yale University), Professor Emeritus of Geology

Judith D.R. Porter, Ph.D. (Harvard University), Professor Emeritus of Sociology

David J. Prescott, Ph.D. (University of Pennsylvania), Professor Emeritus of Biology

Marc Howard Ross, Ph.D. (Northwestern University), William Rand Kenan, Jr. Professor Emeritus of Political Science

Stephen Saltkever, Ph.D. (University of Chicago), Mary Katharine Woodworth Professor Emeritus in Political Science

W. Bruce Saunders, Ph.D. (The University of Iowa), Class of 1897 Professor Emeritus of Science and Professor Emeritus of Geology

Judith Shapiro, Ph.D. (Columbia University), Professor Emeritus of Anthropology

Jenipher Price Shillingford, MSED (Temple University), Director Emeritus of Physical Education

Elliot Shore, Ph.D. (Bryn Mawr College), Professor Emeritus of History

Brunilde Sismondo Ridgway, Ph.D. (Bryn Mawr College), Rhys Carpenter Professor Emeritus of Classical and Near Eastern Archaeology

Elizabeth G. Verney, M.A. (Wesleyan University), Director Emeritus of Admissions

James C. Wright, Ph.D. (Bryn Mawr College), William R. Kenan, Jr. Chair and Professor of Classical and Near Eastern Archaeology Emeritus

Matthew Yarczower, Ph.D. (University of Maryland), Professor Emeritus of Psychology

Greta Zybon, D.S.W. (Case Western Reserve University), Associate Professor Emeritus of Social Work and Social Research

PROFESSORS

Raymond Albert, Ph.D. (University of Pennsylvania), Professor of Social Work, Faculty Diversity Liaison, Staff Issues Liaison and Equal Opportunity Officer

Leslie Alexander, Ph.D. (Bryn Mawr College), Professor of Social Work and on the Mary Hale Chase Chair in the Social Sciences, Social Work and Social Research

Michael Allen, Ph.D. (University of London), Chair and Professor of Political Science on the Harvey Wexler Chair in Political Science

Grace Armstrong, Ph.D. (Princeton University), Eunice M. Schenck 1907 Professor of French and Director of Middle Eastern Languages

Darlyne Bailey, Ph.D. (Case Western Reserve University), Professor, Dean Emeritus of the Graduate School of Social Work and Social Research and Special Assistant to the President for Community Partnerships

Jim Bauch, D.S.W. (University of California, Berkeley), Professor of Social Work

Peter Brodfuehrer, Ph.D. (University of Virginia), Eleanor A. Bliss Professor of Biology

Sharon Burgmayer, Ph.D. (The University of North Carolina at Chapel Hill), Dean of Graduate Studies and the W. Alton Jones Professor of Chemistry

Kimberly Wright Cassidy, Ph.D. (University of Pennsylvania), President of the College and Professor of Psychology

David Cast, Ph.D. (Columbia University), Professor of History of Art

Janet Cegielski, Ph.D. (University of California, Berkeley), Professor of Economics on the Harvey Wexler Chair of Economics

Leslie Cheng, Ph.D. (University of Pittsburgh), Professor of Mathematics

Catherine Conybeare, Ph.D. (University of Toronto), Chair and Professor of Greek, Latin and Classical Studies

Alison Cast-Sather, Ph.D. (University of Pennsylvania), Mary Katherine Woodworth Chair and Professor in the Bryn Mawr/Haverford Education Program and Director of Peace, Conflict and Social Justice Program

Tamara Davis, Ph.D. (University of California, Berkeley), Professor of Biology
Victor Donnay, Ph.D. (New York University), Professor of Mathematics on the William R. Kenan, Jr. Chair and Director of Environmental Studies

Alice Donohue, Ph.D. (New York University Institute of Fine Arts), Rhys Carpenter Professor of Classical and Near Eastern Archaeology

Robert Dostal, Ph.D. (Pennsylvania State University), Rufus M. Jones Professor and Chair of Philosophy

Radcliffe Edmonds, Ph.D. (The University of Chicago), Paul Shorey Professor of Greek and Professor of Greek, Latin, and Classical Studies

Michelle Francl, Ph.D. (University of California, Irvine), Professor of Chemistry

Karen Greif, Ph.D. (California Institute of Technology), Professor of Biology

Carol Hager, Ph.D. (University of California, San Diego), Professor of Political Science on the Clowes Professorship in Science and Public Policy

Madhavi Kale, Ph.D. (University of Pennsylvania), Chair and Professor of History

David Karen, Ph.D. (Harvard University), Professor of Sociology

Homay King, Ph.D. (University of California, Berkeley), Professor of History of Art and the Eugenia Chase Guild Chair in the Humanities

Deepak Kumar, Ph.D. (University at Buffalo, State University of New York), Professor of Computer Science

Steven Levine, Ph.D. (Harvard University), Professor of History of Art and the Leslie Clark Professor in the Humanities

Julia Littell, Ph.D. (The University of Chicago), Professor of Social Work

Mark Lord, M.F.A. (Yale University), Alice Carter Dickerman Director of the Arts Program and Professor of the Arts on the Theresa Helburn Chair of Drama and Director of the Theater Program

Peter Magee, Ph.D. (The University of Sydney), Chair and Professor of Classical and Near Eastern Archaeology

Brigette Mahuzier, Ph.D. (Cornell University), Chair and Professor of French

Bill Malachowski, Ph.D. (University of Michigan Ann Arbor), Associate Provost and Professor of Chemistry

James Martin, Ph.D. (University of Pittsburgh), Professor of Social Work

Gary McDonogh, Ph.D. (Johns Hopkins University), Chair and Professor of Growth and Structure of Cities and on the Helen Herrmann Chair

Paul Melvin, Ph.D. (University of California, Berkeley), Professor of Mathematics

Michael Noel, Ph.D. (University of Rochester), Marion Reilly Professor of Physics

Mary Osirim, Ph.D. (Harvard University), Provost and Professor of Sociology

Maria Cristina Quintero, Ph.D. (Stanford University), Chair and Professor of Spanish

Leslie Rescorla, Ph.D. (Yale University), Professor of Psychology on the Class of 1897 Professorship of Science and Director of Child and Family Studies and the Director of the Child Study Institute

Michael Rock, Ph.D. (University of Pittsburgh), Samuel and Etta Wexler Professor of Economic History

Enrique Sacerio-Gari, Ph.D. (Yale University), Dorothy Nepper Marshall Professor of Hispanic and Hispanic-American Studies

Lisa Saltzman, Ph.D. (Harvard University), Chair and Professor of History of Art and the Andrew W. Mellon Foundation Chair in the Humanities

Marc Schulz, Ph.D. (University of California, Berkeley), Chair and Professor of Psychology and Rachel C. Hale Professor in the Sciences and Mathematics

Russell Scott, Ph.D. (Yale University), Doreen C. Spitzer Professor of Latin and Classical Studies

Azade Seyhan, Ph.D. (University of Washington), Fairbank Professor in the Humanities and Chair and Professor of German and Comparative Literature

Janet Shapiro, Ph.D. (University of Michigan Ann Arbor), Dean and Professor of Social Work and Director of the Center for Child and Family Wellbeing

Rosi Song, Ph.D. (Brown University), Professor of Spanish and Director of Gender and Sexuality Studies

Anjali Thapar, Ph.D. (Case Western Reserve University), Professor of Psychology

Earl Thomas, Ph.D. (Yale University), Professor of Psychology

Michael Tratner, Ph.D. (University of California, Berkeley), Mary E. Garrett Alumnae Professor of English

Lisa Traynor, Ph.D. (Stony Brook University, State University of New York), Chair and Professor of Mathematics

Sharon Ullman, Ph.D. (University of California, Berkeley), Professor of History

Thomas Vartanian, Ph.D. (University of Notre Dame), Professor of Social Work and Chair of Economics

Robert Washington, Ph.D. (The University of Chicago), Professor of Sociology

Arlo Weil, Ph.D. (University of Michigan Ann Arbor), Chair and Professor of Geology

Susan A. White, Ph.D. (Johns Hopkins University), Professor of Chemistry and Co-Director of Health Studies

Robert Wozniak, Ph.D. (University of Michigan Ann Arbor), Professor of Psychology
Dianna Xu, Ph.D. (University of Pennsylvania), Chair and Professor of Computer Science

ASSOCIATE PROFESSORS
Annette Baertschi, Ph.D. (Humboldt-University of Berlin), Associate Professor of Greek, Latin, and Classical Studies and Director of the Graduate Group
Don Barber, Ph.D. (University of Colorado Boulder), Associate Professor of Geology on the Harold Alderfer Chair in Environmental Studies
Linda-Susan Beard, Ph.D. (Cornell University), Associate Professor of English and Director of Africana Studies
Macalester Bell, Ph.D. (The University of North Carolina at Chapel Hill), Associate Professor of Philosophy
Douglas Blank, Ph.D. (Indiana University Bloomington), Associate Professor of Computer Science
Sara Bressi, Ph.D. (University of Pennsylvania), Associate Professor of Social Work
Linda Caruso Haviland, Ed.D. (Temple University), Director and Associate Professor of Dance
Monica Chander, Ph.D. (University of Connecticut), Chair and Associate Professor of Biology
Xuemei Cheng, Ph.D. (Johns Hopkins University), Chair and Associate Professor of Physics
Selby Cull-Hearth, Ph.D. (Washington University), Associate Professor of Geology
Gregory Davis, Ph.D. (The University of Chicago), Associate Professor of Biology
Jeremy Elkins, Ph.D. (University of California, Berkeley), Associate Professor of Political Science
Ignacio Gallup-Díaz, Ph.D. (Princeton University), Associate Professor of History
Marissa Golden, Ph.D. (University of California, Berkeley), Interim Chair (fall) and Associate Professor of Political Science on the Joan Coward Chair in Political Economics
Jonas Goldsmith, Ph.D. (Cornell University), Associate Professor of Chemistry
Timothy Harte, Ph.D. (Harvard University), Chair and Associate Professor of Russian on the Myra T. Cooley Lectureship in Russian
Yonglin Jiang, Ph.D. (University of Minnesota), Co-Chair and Associate Professor of East Asian Studies
Rudy Le Menthéour, Ph.D. (Université de Grenoble), Associate Professor of French and Director of the Institut d’Etudes Francaises d’Avignon
Astrid Lindenlauf, Ph.D. (University College London), Associate Professor of Classical and Near Eastern Archaeology
Pedro Marenco, Ph.D. (University of Southern California), Associate Professor of Geology
Kalala Ngalamulume, Ph.D. (Michigan State University), Associate Professor of Africana Studies and History, Co-Director of International Studies, and Co-Director of Health Studies
Andrew Nutting, Ph.D. (Cornell University), Associate Professor of Economics
Melissa Pashigian, Ph.D. (University of California, Los Angeles), Associate Professor and Acting Chair of Anthropology
Roberta Ricci, Ph.D. (Johns Hopkins University), Chair Associate Professor of Italian
David Ross, Ph.D. (Northwestern University), Associate Professor of Economics
Bethany Schneider, Ph.D. (Cornell University), Associate Professor of English
Michael Schulz, Ph.D. (Stanford University), Associate Professor of Physics
Asya Sigelman, Ph.D. (Brown University), Associate Professor of Greek, Latin and Classical Studies
Jamie Taylor, Ph.D. (University of Pennsylvania), Associate Professor of English
Kate Thomas, Ph.D. (University of Oxford), Chair and Associate Professor of English
Daniel Torday, M.F.A (Syracuse University), Associate Professor of Creative Writing
Elly Truitt, Ph.D. (Harvard University), Associate Professor of History
Jennifer Harford Vargas, Ph.D. (Stanford University), Associate Professor of English on the Rosabeth Moss Kanter Change Master Fund and Co-Director of the Latin American, Latina/o and Iberian Studies Program
Alicia Walker, Ph.D. (Harvard University), Associate Professor of History of Art on the Marie Neuberger Fund for the Study of Arts and Director of the Middle Eastern Studies Program
Amanda Weidman, Ph.D. (Columbia University), Associate Professor of Anthropology
Nathan Wright, Ph.D. (Northwestern University), Chair and Associate Professor of Sociology

ASSISTANT PROFESSORS
William (Dustin) Albert, Ph.D. (Temple University), Assistant Professor of Psychology
Casey Barrier, Ph.D. (University of Michigan Ann Arbor), Assistant Professor of Anthropology
David S. Byers, Ph.D. (Smith College), Assistant Professor of Social Work
Piper Coutinho-Sledge, Ph.D. (The University of Chicago), Assistant Professor of Sociology
Kathryne J. Daniel, Ph.D. (Johns Hopkins University), Assistant Professor of Physics
Richard Eisenberg, M.S. (Harvard University), Assistant Professor of Computer Science
Sofia Fenner, M.A. (The University of Chicago), Assistant Professor of Political Science
Susanna Fioratta, Ph.D. (Yale University), Assistant Professor of Anthropology
Martín Gaspar, Ph.D. (Harvard University), Assistant Professor of Spanish and Acting Co-Director of the Latin American, Latina/o and Iberian Studies Program
Colby Gordon, Ph.D. (University of California, Irvine), Assistant Professor of English
Erica Graham, Ph.D. (University of Utah), Assistant Professor of Mathematics
Bella Grigoryan, Ph.D. (Columbia University), Assistant Professor of Russian
Carolina Hausmann-Stabile, Ph.D. (Washington University), Assistant Professor of Social Work on the Alexandra Grange Hawkins Lectureship in Social Work
Sylvia W. Houghteling, Ph.D. (Yale University), Assistant Professor of History of Art
Yan Kung, Ph.D. (Massachusetts Institute of Technology), Assistant Professor of Chemistry
Anita Kurimay, Ph.D. (Rutgers, The State University of New Jersey), Assistant Professor of History
Shiamin Kwa, Ph.D. (Harvard University), Assistant Professor of East Asian Studies
Min-Kyung Lee, Ph.D. (Northwestern University), Assistant Professor of Growth and Structure of Cities
Airea D. Matthews, M.F.A (University of Michigan Ann Arbor), Assistant Professor of Creative Writing
Djordje Milicević, Ph.D. (Princeton University), Assistant Professor of Mathematics
Veronica Montes, Ph.D. (University of California, Santa Barbara), Assistant Professor of Sociology and Co-Director of the Latin American, Latina/o and Iberian Studies Program
Thomas Mozdzber, Ph.D. (University of Virginia), Assistant Professor of Biology
Seung-Youn Oh, Ph.D. (University of California, Berkeley), Assistant Professor of Philosophy
Heejeung Park, Ph.D. (University of California, Los Angeles), Assistant Professor of Psychology
Laurel Peterson, Psy.D. (George Washington University), Assistant Professor of Psychology
Adrienne Prettyman, Ph.D. (University of Toronto), Assistant Professor of Philosophy
Sydne Record, Ph.D. (University of Massachusetts), Assistant Professor of Biology
Collin Rice, Ph.D. (University of Missouri, Columbia), Assistant Professor of Philosophy

David, Schaffner, Ph.D. (California State University), Assistant Professor of Physics
Joel Schlosser, Ph.D. (Duke University), Assistant Professor of Political Science
Maja Seselj, Ph.D. (New York University), Assistant Professor of Anthropology
Joshua Shapiro, Ph.D. (Williams College), Assistant Professor of Biology
Qinna Shen, Ph.D. (Yale University), Assistant Professor of German
Jie Shi, Ph.D. (The University of Chicago), Assistant Professor of History of Art
Catharine Siusar, M.F.A. (Goddard College), Assistant Professor of Theater
Cindy Sousa, Ph.D. (University of Washington), Assistant Professor of Social Work
Mecca Jamilah Sullivan, Ph.D. (University of Pennsylvania), Assistant Professor of English

**OTHER FACULTY ON CONTINUING APPOINTMENT**
Inés Arribas, Ph.D. (University of Wisconsin-Madison), Senior Lecturer in Spanish
Kaylea Berard, Ph.D. (Georgetown University), Senior Lecturer in Spanish
Carol Bower, M.S. (University of Pennsylvania), Senior Lecturer and Head Rowing Coach
Victor Brady, M.S. (Smith College), Lecturer and Head Field Hockey Coach
Madeline Cantor, M.F.A. (University of Michigan Ann Arbor), Associate Director and Term Professor of Dance
Jeffrey Cohen, Ph.D. (University of Pennsylvania), Term Professor in Growth and Structure of Cities
Jody Cohen, Ph.D. (University of Pennsylvania), Term Professor in the Bryn Mawr/Haverford Education Program
Manar Darwish, M.A. (University of Washington), Instructor and Coordinator of Bi-Co Arabic Program
Gail Hemmeter, Ph.D. (Case Western Reserve University), Senior Lecturer in English and Director of Writing
Jason Hewitt, M.S. (Springfield College), Senior Lecturer and Head Coach of Cross Country and Indoor and Outdoor Track and Field, Athletics and Physical Education
Olga Karagiardis, Ph.D. (Northwestern University), Lecturer in Chemistry
Peter Kasius, M.A. (Princeton University), Instructor in Mathematics
Laura Marzano Kemper, M.S. (University of Delaware), Senior Lecturer and Assistant Athletic Trainer, Athletics and Physical Education
ADMINISTRATION

Kimberly Wright Cassidy, Ph.D. (University of Pennsylvania), President of the College and Professor of Psychology
Raymond L. Albert, J.D. (University of Connecticut), Ph.D. (University of Pennsylvania), Faculty Diversity Liaison, Staff Issues Liaison, Equal Opportunity Officer and Professor of Social Work
Richard Barry, Ph.D. (The Graduate Center of the City University of New York), Director of Institutional Research
Nina N. Bisbee, M.U.P. (University of Michigan), Director of Facilities Services
Sharon Burgmayer, Ph.D. (University of North Carolina), Dean of Graduate Studies and W. Alton Jones Professor of Chemistry
Vanessa Christman, M.F.A. (Brooklyn College, City University of New York), Assistant Dean and Director of Leadership and Community Development
Emily C. Espenshade, Ed.M. (Harvard University), Chief of Staff, Office of the President
Kari A. Fazio, M.P.A. (Columbia University), Treasurer and Chief Financial Officer
Jesse Gale, Ph.D. (Yale University), Chief Communications Officer
Cheryl Lynn Horsey, Ph.D. (Bryn Mawr College Graduate School of Social Work and Social Research), Chief Enrollment Officer
Martin A. Mastascusa, M.B.A. (Temple University), Director of Human Resources
Robert A. Miller, B.A. (Elizabethtown College), Chief Development Officer
Stephanie Nixon, M.Ed. (University of Virginia), Assistant Dean, Title IX Coordinator, and Director of Diversity, Social Justice and Inclusion
Mary J. Osirim, Ph.D. (Harvard University), Provost and Professor of Sociology
Janet R. Shapiro, Ph.D. (University of Michigan), Dean and Professor of Social Work and Director of the Center for Child and Family Wellbeing
Gina M. Siesing, Ph.D. (University of Texas at Austin), Chief Information Officer
Kathleen Tierney, B.S. (State University of New York at Brockport), Director of Athletics and Physical Education
Jennifer L. Walters, D. Min. (Episcopal Divinity School), Dean of the Undergraduate College
UNDERGRADUATE DEAN’S OFFICE

Deborah Alder, M.A. (West Chester University), Access Services Coordinator
Judith Weinstein Balthazar, Ph.D. (University of Pennsylvania), Dean of Studies
Theresa Cann, M.Ed. (Widener University), Assistant Dean and Director of International Education
Vanessa Christman, M.F.A. (Brooklyn College of the City University of New York), Assistant Dean and Director of Leadership and Community.
Raima Evan, Ph.D. (University of Pennsylvania), Assistant Dean
Rachel Heiser, M.Ed. (Temple University), Academic Support and Learning Resources Specialist
Charles Heyduk, Ph.D. (Bryn Mawr College), Associate Dean
Michelle Mancini, Ph.D. (University of California, Berkeley), Associate Dean
Stephanie Nixon, M.Ed. (University of Virginia), Assistant Dean
Christina Rose, Ed.D. (University of Pennsylvania), Assistant Dean
Jennifer L. Walters, D.Min. (Episcopal Divinity School), Dean of the Undergraduate College

OFFICERS OF THE ALUMNAE ASSOCIATION

Saskia Subramanian ’88, M.A. ’89, President
Penny Pollister Price ’90, Vice President
Sarah Herlihy ’94, Secretary
Linda Bush ’85, Representative, At Large
Jennifer Campbell, Ph.D. ’05, Representative, Graduate School of Social Work and Social Research
Linda D. Friedrich ’89, Chair, The Bryn Mawr Fund
Sharon Harshbarger-Kucera ’90, Representative, Career Network
Alison Kosakowski ’01, Representative, Alumnae Communications
Bonnie Osler ’79, Representative, At Large
Mia Parker ’87, Representative, At Large
Joanna Pinto-Coelho ’09, Representative, At Large
Kate Salley ’00, Chair, Committee on Leadership Development
Sarah Sarnelli ’94, Representative, Clubs & Affinity Groups
Celia Schultz, M.A. ’94, Ph.D. ’99, Representative, Graduate School of Arts and Sciences
