

Intersecting Communities: Colleges and Communities Partnering to Address Health Disparities

The conference is dedicated to the life and work of Kevin J. Robinson, Associate Professor at the Bryn Mawr College Graduate School of Social Work and Social Research

This conference brings together members of the Bryn Mawr, Haverford, and Swarthmore College communities with representatives of community-based health organizations in the greater Philadelphia area to discuss collaborations targeted at reducing health disparities in our community. The goals are; a) to analyze the dimensions of health disparities in our nation and community, b) to present innovative local programs addressing health care needs of low income people, c) to discuss the experiences of tri-co students and graduates engaged in local community-based health care organizations and programs, and d) to discuss how the college community and community-based health care organizations can collaborate to advance equity and justice in health care delivery
