The Anita D. Lichtenstein Memorial Lecture

Attachment and Biobehavioral Catch-up:

*An Intervention for Infants and Toddlers Who Have
Experienced Early Adversity*

by

Mary Dozier, PhD

Professor of Psychology, and Amy E. DuPont Chair of Child Development, University of Delaware

at

Bryn Mawr College

Dalton 300

Bryn Mawr, Pennsylvania

Thursday, April 16th, 2009

7:00 p.m. – 9:00 p.m.

Two
CEu Credits
Available

Children who have experienced early adversity especially need nurturing care but often behave in ways that push caregivers away. Caregivers' own attachment experiences often make it difficult for them to provide sensitive care. Mary Dozier and colleagues have developed an intervention that targets these issues. The development of the intervention and data regarding the effectiveness of the intervention will be presented in this lecture.

Lecture: Free and Open to the Public

Funded by
The Anita D. Lichtenstein Memorial Fund and
The G. Mildred and A. Foster Scott Charitable Foundation
