New fish...why?

Bluefish  Tilapia  Salmon
Monkfish  SWAI
Atlantic Croaker
Spiny Dogfish  Atlantic Flounder

Our seafood recipes employ the use of domestically caught species that are typically not eaten in the US and often subsequently exported. Most popular fish species that are eaten in the US are imported and at high risk due to overfishing.

We partner with “local” fish distributors to buy delicious fish that are fresh caught, classified as sustainable down to the vessel, landing point & date caught.
