Welcome to Math 104!
Course: Basic Probability and Statistics

Professor: Amy N. Myers

Call Me: Amy, Professor, Professor Myers, Professor Amy
What is this course about?

Is it the right one for you?

What can you expect this semester?
Introductions

name

college (Bryn Mawr, Haverford)

class year (first-year, sophomore, junior, senior)

major (or majors you are considering)

an interest outside academics
Introductory Math Courses

Basic Probability and Statistics
recommended students who do not intend to pursue majors in quantitatively demanding disciplines

Calculus
recommended for students interested in fields that emphasize quantitative skills

Modeling Change with Functions (spring semester only)
recommended for students who would like to take calculus, but have test scores below those recommended for placement into calculus
Students wishing to study statistics in preparation for research, graduate school, or future careers should take the appropriate courses at Haverford or Swarthmore, or in other departments at Bryn Mawr.

See “Placement for Mathematics and Quantitative Readiness Courses" on Moodle for details.

What does it take to succeed in this course?
Advice

Prepare study questions thoughtfully.

Do homework exercises as soon after class as possible.

Meet with other students to check answers and work on hard exercises together.
Do practice problems similar to those you find difficult.

Ask questions.

Budget enough study time.
Class Survey

Begin with the body measurements. Work with a partner for this part.
