The graph below gives \( \Delta t \) jobs lost as a function of time. Sketch the graph of the derivative \( f'(t) \): rate of change of job loss. What are the units of \( f'(t) \)?

"... can easily generate over $31,000 per year in profits."

Before announcing his proposal Tuesday, Rendell asked the state Revenue Department to come up with its own estimate of how much gambling would take place in bars and clubs.

The department projected that about 35,000 machines eventually might be set up in 8,500 licensed liquor establishments, according to a spokeswoman, Stephanie Weyant.

If that proved true, it could mean the doubling of an activity that the state now tries to suppress as a nuisance. Just within the last year, the Gaming Control Board has awarded $3.5 million to help local police and county district attorneys do a better job of cracking down.

No bill has reached the legislature, so there's nothing specific on the table. Rendell has said he would allow five machines in each establishment.

The governor said he hoped that video poker would bring in $556 million a year. The money not only with what's going on in our world," volunteer Deborah Jackson-Smith said.

Accelerating Job Losses

The economy has shed almost 3.6 million jobs since the start of the recession. About half of the losses have come in the last three months.

The worsening economic toll on workers in January's payrolls shed the Labor Department yesterday.

The storm of layoffs is torrential. About half a million job losses since started in December during the last three months. Caught in the flood: Hobbs, 57, who lost his month at Philadelphia Tackle Manufac
