

It is very simple to add the Data Analysis toolkit to Microsoft Excel 2007. If you have a different version of Excel, you can try these steps, or go to the Help menu and search for Data Analysis Toolpak.

When in Excel, click on the upper left hand corner of the screen, then click on Excel Options on the bottom right. This will take you to the following screen.

Next, click on Add-ins on the left (a few lines down on the left side of this screen). This will take you to the add ins. Click on Analysis Toolpak, as shown below.

Click on GO. You will then be taken to the following screen. Click on the Analysis toolpak and Analysis Toolpak – VBA. Click on OK.

You now have data analysis tools in Excel.
