Bryn Mawr prepares students for one path, but many. Our innovative curriculum integrates rigorous coursework with on-campus problem solving in the classroom and the community. Bryn Mawr values critical, creative, and independent habits of thought and expression. Through conversation, collaboration, primary reading, original research, and experiential education, students gain the skills they need to be successful in all their life pursuits.

Bryn Mawr is a place where women put ideas into action. With opportunities for research, service, and experiential learning, Bryn Mawr students discover and strengthen individual leadership skills. Learning beyond the classroom helps students develop strategies for teamwork and big picture thinking.

Pathways to Purpose
Internships and other professional opportunities help students gain the experience and skills necessary to make intentional decisions about their futures. The opportunities our graduates enter are in business, education, non-profit, health, medicine, and the arts.

Joy Rukanzakanza
Class of 2019 Zimbabwe
Started and continues work on Project Qeques after winning a Davis Projects for Peace Award in 2016.

Phoebe Cribb
Class of 2020 Great Britain
Summer internship in D.C. inspired passion for education policy.

Linh Nguyen
Class of 2018 Vietnam
A summer internship in Wall Street expands knowledge of global finance.

Support with Haverford College, Swarthmore College, and the University of Pennsylvania expands academic and social opportunities for students. Our graduates are well prepared for the unique challenges of a global and ever-changing modern world.

MAJORS, MINORS, AND CONCENTRATIONS

MAJORS
