ABOUT THE FRANKLIN INSTITUTE:
As the most visited museum in the Commonwealth of Pennsylvania and a top-five tourist destination in the City of Philadelphia, The Franklin Institute is one of the leading science centers in the country, and serves as both a prominent educational and cultural resource, and as an anchor of the local economy. Science and technology have the potential to solve some of the most critical issues of our time, to improve our lives, and to inspire our curiosity about the world around us. Every day The Franklin Institute provides resources that help people to connect with science and technology in creative ways that resonate with learners of all ages and backgrounds.

The Institute directly reaches more than 1 million people each year with informal learning experiences that engage students, adults, and families. Though its historic museum is a central learning space, the Institute has evolved to provide people with educational resources in their own neighborhoods through hands-on activities in classrooms, workshops in libraries, community centers, and other settings, and through ways to interact online. Since 1824, The Franklin Institute has pursued its commitment to making these resources available to as many people as possible throughout the mid-Atlantic region.
