Putting a Value on Impact Investing

Zainab Saeed ’19

Impact investing aims to direct capital to ventures expected to yield social or environmental benefits as well as profits. However, there is a problem. Measuring the actual benefits of this form of investing remains largely a matter of educated guesswork. Companies have spent a lot of time and money developing a methodology to use financial performance measurement to assess the social and environmental impact. A metric was recently created to measure this impact, called the impact multiple of money (IMM). In this talk, we will walk through the six steps used to calculate an IMM.
